The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5726/1/1 Mr & Mrs GL & CL Roberts

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5726/2/1      Mr & Mrs GL & CL Roberts

Alternative Site    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5730/2/1 Mr & Mrs R Thomas

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5736/3/1      Thelma Bartlett

**Alternative Site**    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the deletion of site MG 2 (46) - Land west of Swanbridge Road, Sully and associated references to it in the LDP.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5736/3/2      Thelma Bartlett

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks the removal of Sully as a primary settlement within the LDP settlement hierarchy policy MD5 refers to primary settlements.

#### Council's Response(s):

Sully is identified within the LDP as a Primary Settlement on the basis of the LDP Sustainable Settlement Appraisal, the findings of which suggest that Sully is afforded with a suitable range of services and facilities, including transport links to enable the settlement to accommodate future housing growth.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5737/1/1 Colin Bramhall

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

Representation seeks the deletion of site MG2 (46) - Land West of Swanbridge Road, Sully.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5737/2/1 Colin Bramhall

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

Representor ID and details: ID-5741/1/2      Mr David Kears

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5748/1/1 Philip Thiele

**Alternative Site** ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5748/2/1 Philip Thiele

Alternative Site N/A

Representation Type Support

#### Summary of Representation:

Representation supports the park and ride facility as it has the potential to deliver journey time savings and alleviate traffic congestion. Suggestion for bus service to be extended from Barry/ Dinas Powys to Cardiff Bay and asks the question whether a bus-rail interchange has been considered at Cogan or Eastbrook.

#### Council's Response(s):

Comments noted.

Support is Welcomed.

With regard to the alternative proposals suggested at Cogan or Eastbrook stations, the Council would suggest that the current station car parks are well utilised already by those choosing to use rail transport and that encouraging additional car parking at these sites to utilise a bus service would be to the detriment of the existing rail users. In addition, the constrained urban nature of these sites would make the accommodations of such a facility difficult.

With regards bus services, the Council would advise that an existing bus service has been extended with effect from April 2015 that provides links between Dinas Powys, Llandough Hospital, Cardiff Bay and Cardiff centre. While this is an initial extension to an existing service, it is the Council's aspiration that subject to operational requirements, further services both commercial and subsidised, may be provided along the Dinas Powys to Cardiff corridor (including the Cardiff Bay Barrage), to cater for growing demand along this important route.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5748/3/1 Philip Thiele

Alternative Site ASN019 - Dinas Powys - Dinas Powys Bypass Road

Representation Type Object

#### Summary of Representation:

SP 7 should include the Dinas Powys by-pass or safeguard the corridor for the scheme for its future development as a bypass. The A4055 has significant issues with traffic and congestion and the most adequate and effective solution is the provision of a bypass around Dinas Powys.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary. It is noted that the St Cyres development site impinges on the previously safeguarded bypass route. However the previous route identified was only indicative and only detailed design will advise the exact land required. It is considered therefore that land options for a future by-pass still remain if this is ever needed.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5748/4/1 Philip Thiele

Alternative Site ASN019 - Dinas Powys - Dinas Powys Bypass Road

Representation Type Object

#### Summary of Representation:

SP 7 should include the Dinas Powys by-pass or safeguard the corridor for the scheme for its future development as a bypass. The A4055 has significant issues with traffic and congestion and the most adequate and effective solution is the provision of a bypass around Dinas Powys. If this is not achievable then upgrades to the Merrie Harrier junction and Barons Court junction should be included in policy to reduce queuing at peak commute times.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

The Council has recently undertaken junction improvement works at the Merrie Harrier junction. These works were funded by the Welsh Government and supported by the Sewta and included the updating of the traffic control mechanisms and junction realignment within the confines of the existing adopted highway. Further works are currently being investigated as a part of the bus corridor investment package funded by the Cardiff Metro proposals. Additional improvements as promoted by the representor would require the compulsory purchase of adjoining land and/or residential properties adjacent to the junction and it is the Council's view that such measures cannot be justified at this time.

Representor ID and details: ID-5749/1/1      Mr JD Webb

Alternative Site    ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Representor ID and details: ID-5751/1/2      Hannah Fuller

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. **Alternative Site**    ASN007 - Land at Llandow - New Settlement

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN007 - Land at Llandow for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

**Alternative Site**    ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the deletion of site MG 2 (19) - Land adjoining St. Athan Road, Cowbridge

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-5759/1/1 Sally Fowler

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 due to housing supply being too high. MG 2 should allocate more housing on brownfield sites as there is an overuse of greenfield sites and contradicts MD 1.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

#### Officer Recommendation:

**Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan****Represor ID and details:** ID-5759/1/3      **Sally Fowler****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed Welsh Government Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and has again been identified as an integral part of the proposals for the Welsh Government Enterprise Zone and ABP. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport. This has been further supported by work undertaken on the St Athan and Cardiff Airport Strategic Development Framework document which also identifies the NAR.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the necessary highway improvements required to facilitate the delivery of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone.

Furthermore, alternative highway improvement schemes have previously considered and discounted by the Welsh Government and Ministry of Defence and it was concluded the alternative access schemes would not provide the necessary highway improvements to facilitate the delivery of the Aerospace Business Park. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT). In addition to enabling employment proposals at the ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment allocations and as part of the St Athan Strategic Opportunity Area (SOA). The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore no change is considered to be required.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-5760/1/1 Jackie Simpson

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 as population and housing figures based on invalid data. Population figures have been overestimated and consequently so having housing figures. Base new estimates on 2011 census projections on population and household population issued by Welsh government.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-5760/1/2 Jackie Simpson

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Comments on the format of the LDP and questions the credibility of the plan citing the absence of population data in the plan.

#### Council's Response(s):

The process and methodology of producing an LDP is set out in the LDP Manual (June 2006) produced by the Welsh Government and which the council has adhered to. The evidence base has informed the LDP and the needs identified in the supporting documents are reflected in the policies and allocations of the Deposit Plan. It is therefore considered that the evidence base has been utilised to inform the structure and content of the LDP, and where appropriate the LDP has made reference to the supporting evidence and associated background documents produced by the Council.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - N/A

Represor ID and details: ID-5761/1/1 Mr Graham Jones

Alternative Site N/A

Representation Type Object

### Summary of Representation:

The representation objects to the assessment of settlements (listed in Appendix 11) and seeks to amend the sustainable settlements appraisal to rank Cowbridge from 4th to 8th seeking a reclassification of Cowbridge to a Primary Settlement within the LDP.

### Council's Response(s):

The LDP Settlement Hierarchy ranks the towns and villages within the Vale of Glamorgan in a manner which reflects the level of services and facilities each settlement offers, and the categories of settlements within the hierarchy generally reflect their individual role based on the geographical areas they serve. The aim of establishing a settlement hierarchy is to promote sustainable communities where new development is located close to services and facilities with good public transport links. By locating housing, jobs and services close together, the need for travel will be reduced and the ongoing prosperity of existing settlements will be supported.

In establishing the LDP settlement hierarchy, the Council undertook a Sustainable Settlements Appraisal (SSA) of all settlements within the Vale of Glamorgan using a range of key sustainability measures developed by the Council, and reflected the general principles set out in national planning policy. Using these measures, the review involved an audit of the services and facilities within each settlement, and a system of scoring that ranked each settlement according to the level of services available within each against the key sustainability measures. Further details on the methodology and findings are set out in the Council's Sustainable Settlements Appraisal Background Paper.

Within the hierarchy, the market town of Cowbridge ranked Cowbridge 4th overall amongst the settlements, and is categorised within the hierarchy as being a Service Centre Settlement, reflecting the level of services and facilities within the town. Accordingly, the Council is of the view that the identification of Cowbridge as a Service Centre Settlement is appropriate and reinforces its established role as an important rural centre, and is based on a sound assessment of the level of services available alongside its functional relationship with other settlements identified within the hierarchy.

Furthermore, it is considered that site MG2 (20) is reasonably located to the centre of Cowbridge to enable future residents the opportunity to walk and cycle into the centre. Additionally, the current parking issues within Cowbridge could be addressed through appropriate parking management measures.

**Representation Type**    Object

### Summary of Representation:

Representation seeks the deletion of deletion of site MG 2 (19) - Land adjoining St. Athan Road, Cowbridge

### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Summary of Representation:

Promotes alternative housing allocation ASN002 - The Limes, Cowbridge for inclusion in the Deposit LDP

### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

### Deposit Plan Policy - N/A

Representor ID and details: ID-5761/1/4      Mr Graham Jones

Alternative Site    ASD7,9 - Darren Farm and Link Road

Representation Type    Object

### Summary of Representation:

Representation seeks the deletion of deletion of site MG 16 (19) Darre Farm Link Road

### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Representor ID and details: ID-5762/1/1      Colin Ryland

Alternative Site    ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-5763/1/1 Elen Lowri Jones

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

SP 7 should recognise the need for improvements to roads at St Augustine's before any proposed developments are developed. Development in the area will increase traffic on roads already near capacity therefore SP 7 should outline improvements to mitigate the foreseen implications on transport infrastructure developments will have. The creation of a crossing at the junction of Plassey Road and Glebe Road should also be considered.

#### Council's Response(s):

In support of the Deposit LDP the Council has assessed the strategic highway network to identify which junctions and/or links are under pressure from excessive vehicular movements. The Highway Impact Assessment assesses the impact of the proposed future development sites on the strategic highway network within the Vale of Glamorgan which will enable the targeting of resources to those areas where pressure has been identified. Details of highway improvements are contained within the Council's Draft Infrastructure Plan September 2103. While the provision of pedestrian crossings is a highways management/maintenance issue rather than a concern of the LDP, it is noted that the Council has installed a pedestrian crossing in the location identified by the representor during 2015.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5764/1/1 Bryon Davies

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5766/1/1      David Bennett

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5766/2/1      David Bennett

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5769/1/1 Luke Bellamy

**Alternative Site** ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (2) - Land at Higher End, St Athan

Represor ID and details: ID-5777/1/1 Mrs D.Matthews

Alternative Site ASD19 - MG 2 (2) - Land at Higher End, St Athan - Delete Site

Representation Type Object

#### Summary of Representation:

Representation objects to MG 2 (2) - Land at Higher End, St Athan, raising concerns regarding the impact that the proposed development would have.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. #### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5778/1/2      Mr Glyn Hoskins

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representer ID and details: ID-5779/1/1 Mrs D.Rawlings

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5792/1/1 Mrs Lynda Morris

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5793/1/1 Mr M.Roberts

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Represor ID and details: ID-5793/2/1 Mr M.Roberts

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5794/1/3 Mrs A.Jones

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN007 - Land at Llandow within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5794/2/1 Mrs A.Jones

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5805/1/1 Mrs A Marcola

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5805/2/1 Mrs A Marcola

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

**Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge****Represor ID and details:** ID-5815/1/2      S.Vaughan**Alternative Site**      N/A**Representation Type**      Object**Summary of Representation:**

Update Community Facilities and Burial Land background papers due to factual mistakes or outdated information

**Council's Response(s):**

Page 37 of the Community Facilities Background Paper lists the community buildings included in the assessment. Those with an asterisk (\*) are VoG owned. As correctly highlighted in the representation, the St Nicholas, Barry Island and St Francis Millennium Community Centres are owned by the Vale of Glamorgan Council and would therefore require an asterisk next to the name. Additionally, Colwinston Community Centre is also owned by The Vale of Glamorgan Council and requires an asterisk.

Regarding the Burial Land Study, this was a technical study undertaken in 2008 by planning and landscape consultants TACP and provides a strategic overview of burial land and facilities in the Vale of Glamorgan. The 2013 review provides the following position update:

'The study was originally finalised in November 2008 and since this time a number of material changes have taken place which, in part, address the local provision issues identified. This principally relates to the development of the Cardiff and Glamorgan Memorial Park and Crematorium which was granted planning permission in April 2010 (reference 2010/00058/FUL) and opened in 2011.

Whilst it is considered that the issues identified in the study remain valid and relevant for the LDP, the Town and Community Councils have been contacted to provide a factual update regarding burial land space. This includes an update on:

Approximate number of burials per year (e.g. over the last 5 years)

Approximate number of cremations (where applicable) per year

Current capacity (number of remaining plots)

Possible area for additional burial land (for potential extension)

In terms of the study's overall conclusions that additional burial land capacity is likely to be required by the end of the plan period it is considered that the development of the crematorium in Barry, together with the expansion of existing capacity where possible, is sufficient to meet the identified need over the LDP period. As a result, no specific burial land allocation policy has been recommended for inclusion within the LDP. Future proposals for extensions to existing cemeteries or for new facilities can be assessed against the Plan's suite of policies covering design and environmental issues. Furthermore, it is considered that the four-yearly major Plan reviews will enable the burial land position to be reviewed allowing for any potential significant shortfalls towards the end of the Plan period to be addressed where required. Notwithstanding the above factual updates which are attached to this update, it is considered that the report's content and findings remain relevant and valid for the LDP. Therefore, no further changes have been undertaken to the detailed assessment work undertaken by consultants TACP.'

Therefore it is considered this matter has already been addressed and no further action is required.

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

**Represantor ID and details:** ID-5815/1/2      S.Vaughan

The omissions of Council owned facilities within Community Facilities background paper on p.37 and p.38 are noted (relating to Council owned St Nicholas, Barry Island, St Francis Millennium and Colwinston Community Centres). However, no changes are considered to be required to the Plan as a result. In addition, no change necessary for Burial Land Study background paper as the issue of the omission of the Cardiff and Glamorgan Memorial Park and Crematorium from the 2008 study has been considered.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Represor ID and details: ID-5815/2/1 S.Vaughan

Alternative Site ASN006 - Llysworney - Llysworney Bypass

Representation Type Object

#### Summary of Representation:

SP 7 should include the Llysworney By-pass under strategic transportation infrastructure as there is an identified need for the bypass scheme. Traffic movement through the top part of the village is fast (above the 30mph limit). The narrowness of the road only allows for a single vehicle to pass. Heavy goods vehicles are detrimental to the structural integrity of the roads within the village. The bypass scheme will contribute to the Vales economy creating easier and efficient access for businesses and commuters.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent specialist consultants to prepare a Transport Assessment (September 2013) to consider the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study seeks to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesor are noted, the Council considers that the study and LDP appropriately identifies future highway infrastructure requirements as a result of the proposed site allocations. Notwithstanding the above, policy MG2 includes a housing allocation at Darren Farm which will provide for houses on the western edge of Cowbridge. The development of the site will be informed by a master plan/development brief and will deliver key local infrastructure including a new medium primary school and a new road on the western edge of the site running between the A48 and Llantwit Major Road which will alleviate pressure both in Cowbridge and at Llysworney. The suggested Llysworney highway scheme is therefore not considered to be required.

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Objection to MG2 Minor Rural Settlement housing allocations and propose a new settlement at Llandow.

#### Council's Response(s):

In preparing its LDP, the Council is required to follow the legislative process for LDPs set out in Part 6 of the Planning and Compulsory Purchase Act 2004. A key stage in this process is the Pre Deposit Participation and Public Consultation on Strategic Options Stage (Regulation 14 &15), and places a requirement on the Council to prepare in partnership with key stakeholders a pre deposit document setting out the Council's vision, strategic options, preferred strategy and key policies that will provide the overall policy framework for the Deposit LDP.

In accordance with this requirement in May and July 2007, the Council held workshops with stakeholders on the potential strategy options for the Vale of Glamorgan. In total 9 strategic options were identified, including the development of a new settlement within the Vale of Glamorgan. These nine options were also the subject of a Sustainability Appraisal which concluded that of the 9 options identified, Option 5 (the current Deposit LDP Strategy) would provide the widest sustainability benefits.

On the basis of the findings of the Sustainability Appraisal, between January and February 2008 the Council publicly consulted on the LDP Draft Strategy document, which set out the Council's proposed vision, objectives and preferred growth strategy for the Vale of Glamorgan.

During this consultation, the Council received 210 representations to the Draft Preferred Strategy, and included the proposal of a further spatial option (8a), namely the addition of Llandow Newydd as the location of a new settlement alongside the preferred LDP strategy. In response to this proposal the Council undertook a further appraisal of the options, which concluded that the current LDP strategy provided the most sustainable option for the Vale of Glamorgan.

In addition to the above, in preparing the LDP, the Council is also guided by the policy requirements prescribed nationally, and primarily contained within Planning Policy Wales (PPW). This advises that local planning authorities should direct development to the sustainable locations with the overall aim of reducing the need to travel by locating development within existing urban areas or other locations which are or can be served by public transport. Furthermore in identifying land for future development PPW advises that local planning authorities firstly consider re-use of previous developed land and buildings within settlements, then settlement extensions and finally new development around settlements with good public transport links (Paragraph 9.28 refers).

Finally, in respect of new settlements, PPW indicates that "any proposals for new settlements should be promoted through, and fully justified in, the development plan. Plans should state clearly the contribution which developers will be expected to make towards the provision of infrastructure, community facilities and affordable housing. New settlements on greenfield sites are unlikely to be appropriate in Wales, and should only be proposed where such development would offer significant environmental, social and economic advantages over the further expansion or regeneration of existing settlements. (Paragraph 9.27)"

In this respect, in considering the proposed development of land at Llandow Airfield, the Council commissioned a review of the agricultural land quality of the undeveloped areas of which the proposed new settlement would occupy. This revealed that a significant area of the land 51ha falls within grade 3a agricultural land classification (best and most versatile classification), and a further 36 ha of 3b agricultural land.

**Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge****Represantor ID and details:** ID-5815/3/1      S.Vaughan

In this regard PPW states that:

“In the case of agricultural land, land of grades 1, 2 and 3a of the Department for Environment, Food and Rural Affairs (DEFRA) Agricultural Land Classification system (ALC) is the best and most versatile, and should be conserved as a finite resource for the future. In development plan policies and development management decisions considerable weight should be given to protecting such land from development, because of its special importance. Land in grades 1, 2 and 3a should only be developed if there is an overriding need for the development, and either previously developed land or land in lower agricultural grades is unavailable, or available lower grade land has an environmental value recognised by a landscape, wildlife, historic or archaeological designation which outweighs the agricultural considerations. If land in grades 1, 2 or 3a does need to be developed, and there is a choice between sites of different grades, development should be directed to land of the lowest grade.”

In selecting sites for development, the Council has sought to clarify the agricultural quality of the sites allocated within the LDP, and has worked closely with the Welsh Governments Natural Environment and Agriculture Department to ascertain the quality of land for allocated sites. From this work the Council has minimised the loss of BMVA land. Additionally, Appendix 5 of the LDP identifies those sites where agricultural land has been verified by the Welsh Government, but where a further detailed agricultural land assessment is required to verify the grading of the land. The Council is therefore of the opinion that in identifying the housing allocations, it has sought to ensure that priority is given to brownfield developments, and where greenfield sites have been required these have been limited to those of lower quality, that is grade 3b and below consistent with the National Planning Policy Wales. Accordingly the Council are of the view that it is unnecessary to include a policy within the LDP for the protection of BMVA, as this would reiterate national planning policy.

On the basis of the above, the Council consider that it has fully considered all policy options when preparing the Deposit LDP, including satisfying the requirement of national policy when considering the suitability of a new settlement at Llandow Airfield, alongside other existing established settlements.

**Officer Recommendation:**

No Change Required

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Summary of Representation:

Delete MG 2 (44) - Land adjacent to St Brides Road, Wick.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5820/1/1 Rhian Thomas

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5820/2/1 Rhian Thomas

Alternative Site ASN059 - Land South West of Weycock Cross - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes alternative site ASN071 - Land north east of Weycock Cross, Barry , for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5820/3/1 Rhian Thomas

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

#### Officer Recommendation:

**Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)****Representor ID and details:** ID-5827/2/1      Ms Heddwyn James**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site**Representation Type**    Object**Summary of Representation:**

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

**Council's Response(s):**

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

**Officer Recommendation:**

Proposed Amendment

#### Summary of Representation:

Representation objects to MG 2 (2) - Land at Higher End, St Athan, raising concerns regarding the impact that the proposed development would have.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representor ID and details: ID-5831/1/1      Mr D.I.Jones

Alternative Site    ASD20 - MG 2 (45) - Land off Sandy Lane, Ystradowen - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. #### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5835/2/1 Mr Frank Jones

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5843/1/1 M.C.Francis

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5843/2/1 M.C.Francis

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5844/1/1      Mr Neil Gaskell

**Alternative Site**    ASN018 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Community Use

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the inclusion of allotments as part of the redevelopment of MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys (alternative site ASN018).

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

Representor ID and details: ID-5845/1/2 Mrs J.Usher

Alternative Site ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representer ID and details: ID-5849/2/2 Cllr R.A.Penrose

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5849/3/1 Cllr R.A.Penrose

Alternative Site ASN071 - Land north east of Weycock Cross, Barry - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes alternative site ASN071 - Land north east of Weycock Cross, Barry , for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5849/3/2 Cllr R.A.Penrose

Alternative Site ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5860/1/2      Mr Terry Clarke

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP2 (iii) - Employment uses at Land Adjacent to the Airport and Port Road, Rhoose, as part of the St Athan – Cardiff Airport Enterprise Zone

Representor ID and details: ID-5871/1/1 Mrs Sharron Hopkins

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Concerned about the loss of green wedge agricultural land and recommends that SP2 be amended so only the airport to remain in the business zone.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

In terms of Agricultural Land quality, an Agricultural Land Classification (ALC) Study Report for the Land at Model Farm, Barry was prepared in November 2011. The study investigated the Agricultural Land Classification (ALC) and soil resources of the area, by means of a detailed survey of soil and site characteristics. The land consists of higher relatively flat land, and steeply sloping incised valleys. Existing use of the agricultural land is a mixture of arable cultivation, improved pasture, and permanent pasture. The report concluded that the land of best and most versatile quality (Grades 1, 2, and 3a) is only found over 1.7% of the agricultural land in the study area. The remainder of the agricultural land was of poorer quality either Grade 3b, 4 or 5.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5872/1/1 Cllr Kevin Mahoney

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5872/1/2 Cllr Kevin Mahoney

**Alternative Site** ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5872/3/2 Cllr Kevin Mahoney

Alternative Site ASN071 - Land north east of Weycock Cross, Barry - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN071 - Land north east of Weycock Cross, Barry for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5872/4/1 Cllr Kevin Mahoney

Alternative Site ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

Representation Type Object

#### Summary of Representation:

Issues with congestion, car park for Cosmeston Park already being fully utilised and cars parking in Lavernock Housing Estate.

#### Council's Response(s):

A Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers the country park is appropriately located to attract daily commuters who utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. It should be noted that the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride facility at Cosmeston Lakes country park is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan.

Further any substantial new development would require the submission of a robust Transport Assessment (TA). The TA would evaluate and determine any mitigation measures which would be required to alleviate any adverse impacts upon the local highway network that had been identified as a result of the development. The council considers therefore that the concerns expressed by the representor in relation to the local highway are unfounded and would not justify the deletion of the site from the Deposit LDP as requested.

It should be noted that no consideration has yet been given to the operation and management of any future park and ride facility that may ultimately be developed at Cosmeston Lakes Country Park. However, should charging be implemented and on street parking in surrounding residential areas occur as a consequence, this would then become a highways management and enforcement and/or police matter and is not an issue for consideration within the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG19 - Sites of Importance for Nature Conservation

Representor ID and details: ID-5878/1/1 Mr R.Anderton

Alternative Site ASD36 - Land adjoining Cardiff Road, Barry - SINC 339 - Delete Sites of Importance for Nature Conservation 339

Representation Type Object

#### Summary of Representation:

Representation objects due to the proposed SINC designation (SINC 339) on land owned by representor. Representor may need to expand development in the future, finds MG 19 (Sites of Importance for Nature conservation) too restrictive. Amend SINC designation to exclude representation's site.

#### Council's Response(s):

The Sites of Importance for Nature Conservation (SINC) designations contained within the Deposit LDP have been identified according to guidance published by the Wales Biodiversity Partnership ('Wildlife Sites Guidance Wales: A Guide to Develop Local Wildlife Sites Systems in Wales') which was adopted by the Vale of Glamorgan Council in 2009 and which provides a robust set of criteria against which all potential SINC's could be assessed. The 2013 SINC review survey builds on previous SINC identification works which commenced in 1999 and the Council therefore considers that the SINC designations identified on the LDP Proposals Map are based on a robust evidence base which accurately reflects locally important nature conservation sites within the Vale of Glamorgan.

The Council considers that while the intention of Policy MG19 is clear, the supporting text of paragraph 6.126 allows for flexibility in its application in instances where the benefits of a development outweigh the importance of the SINC. In such instances mitigation will be required to compensate for the adverse impact of the development on the SINC. Issues relating to compensatory measures and habitat loss are covered in detail in the councils Supplementary Planning Guidance on Biodiversity and Development which would be a material consideration in the assessment of any future development proposals. Therefore, no changes are considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

SP 7 should include the provision of the Dinas Powys Bypass to alleviate traffic and congestion from the A4055 running through Dinas Powys. Therefore allowing viable development proposals for housing to be permitted.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme. Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5884/1/2      Andrew Robertson

Alternative Site    ASD41 - MG 2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5884/1/3      Andrew Robertson

Alternative Site    ASN019 - Dinas Powys - Dinas Powys Bypass Road

Representation Type    Object

#### Summary of Representation:

MG 16 should include a proposal for a Dinas Powys By-pass to alleviate congestion through the settlement. The capacity assessment of highways network junction carried out by Capita Symonds highlights the Cardiff Road running through Dinas Powys is over capacity therefore it is apparent there is a need for the By-pass provision.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

Notwithstanding the above, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

Represor ID and details: ID-5885/1/1 Steve Thomas

**Alternative Site** ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5887/3/1      Mr Michael Shepperdson

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP2 (iii) - Employment uses at Land Adjacent to the Airport and Port Road, Rhoose, as part of the St Athan – Cardiff Airport Enterprise Zone

Representor ID and details: ID-5888/1/1      Claire Croft

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation seeks an amendment to policy SP2 (iii)- reducing the proposed area.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

In terms of Agricultural Land quality, an Agricultural Land Classification (ALC) Study Report for the Land at Model Farm, Barry was prepared in November 2011. The study investigated the Agricultural Land Classification (ALC) and soil resources of the area, by means of a detailed survey of soil and site characteristics. The land consists of higher relatively flat land, and steeply sloping incised valleys. Existing use of the agricultural land is a mixture of arable cultivation, improved pasture, and permanent pasture. The report concluded that the land of best and most versatile quality (Grades 1, 2, and 3a) is only found over 1.7% of the agricultural land in the study area. The remainder of the agricultural land was of poorer quality either Grade 3b, 4 or 5.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-5889/3/1 Mrs H.L.Clarke

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5890/1/1      Mr Barrie Matthews

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5890/2/1      Mr Barrie Matthews

Alternative Site    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5891/3/2      Mr J.K.Jones

**Alternative Site**    ASN059 - Land South West of Weycock Cross - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN059 - Land South West of Weycock Cross, for inclusion in the Depsoit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5892/1/1 Mrs Mary Matthews

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represantor ID and details: ID-5892/2/1 Mrs Mary Matthews

Alternative Site ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

Representation Type Object

#### Summary of Representation:

The represantor objects to the park and ride facility at Cosmeston because of the loss of biodiversity and ecology and the fact the site is a SSSI at Cosmeston Lakes Country Park. Represantor has suggested a proposal for a park and ride at the Chemical Complex in Barry as an alternative as they believe it would be more feasible.

#### Council's Response(s):

A Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers that the site at Cosmeston Lakes Country Park is appropriately located to intercept daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal that would help reduce the number of car based daily journeys to/from Cardiff. It should be noted that in addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride site at Cosmeston is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan. With regard to any impact on the Site of Special Scientific Interest, this has been primarily designated for the existence of the Starry stonewort is present within the deep waters of the lakes at Cosmeston and while the starry stonewort is susceptible adverse pollution within the lakes it is unlikely that the development of a park and ride facility near the entrance to the country park would impact upon the species population.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-5893/1/1      DPFRAPE

**Alternative Site**    ASD41 - MG 2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5894/2/2 Mr & Mrs Owen

**Alternative Site** ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5895/1/1 Jon Rees

Alternative Site ASD30 - MG 2 (43) - Land to the East of St. Nicholas - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5895/1/2 Jon Rees

Alternative Site ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

Representation Type Object

#### Summary of Representation:

Representation questions the need for the Airport Enterprise Zone.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

In terms of Agricultural Land quality, an Agricultural Land Classification (ALC) Study Report for the Land at Model Farm, Barry was prepared in November 2011. The study investigated the Agricultural Land Classification (ALC) and soil resources of the area, by means of a detailed survey of soil and site characteristics. The land consists of higher relatively flat land, and steeply sloping incised valleys. Existing use of the agricultural land is a mixture of arable cultivation, improved pasture, and permanent pasture. The report concluded that the land of best and most versatile quality (Grades 1, 2, and 3a) is only found over 1.7% of the agricultural land in the study area. The remainder of the agricultural land was of poorer quality either Grade 3b, 4 or 5.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Represor ID and details: ID-5904/1/3 Mr & Mrs Holland

Alternative Site ASD28 - MG 25 (2), MG 9 (2) - Country Park Extension - Porthkerry, Barry - Delete Site

Representation Type Object

#### Summary of Representation:

Concerns with Policy MG 25 (2) the allocation of land would come at the expense to the taxpayer, ruin the community and privacy of Porthkerry for many residents.

#### Council's Response(s):

The proposed extension to the country park forms a part of the larger Cardiff Airport and St Athan Enterprise Zone allocation which has been designated by the Welsh Government. As a part of this initiative, the land will be conveyed to the council and incorporated into the country park and managed as a part of that enterprise. If appropriate a management plan will be prepared to ensure that the land is suitably managed and maintained and this may include a continuation of the existing agricultural use. In accepting the land as an extension to the country park the council would not anticipate any adverse impacts upon existing residents and any such impacts that may ultimately occur would be managed appropriately and in partnership with any relevant agencies and the appropriate local law enforcement community. The inclusion of the land as an extension to the country park would not have an impact on the lands designation as a green wedge as this designation in this area is maintained within the Deposit LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (2) - Land at Higher End, St Athan

### Deposit Plan Policy - MD5 - Residential Development in Key, Service Centre and Primary Settlements

Represor ID and details: ID-5908/1/2 Charles Church East Wales

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 on the grounds that the flexibility allowance should be increased to 10% from 5%. This will allow for sites that may not come forward and for sites being developed at lower densities. There is an over reliance on windfall sites more focus on development identified sites.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MD5 - Residential Development in Key, Service Centre and Primary Settlements

Represor ID and details: ID-5908/1/3 Charles Church East Wales

Alternative Site ASN069 - Land at Penlan Road, Llandough - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes alteranative site ASN069 - Land at Penlan Road, Llandough for inclusion in the Depsoit LDP for residential development.

#### Council's Response(s):

The representation relates to a proposed new residential allocation to reflect potential development proposals for the Former Quarry site at Leckwith Road, Llandough. A planning application (2013/00632/FUL) has since been considered for the site which has been granted approval and is currently under construction. Having considered all representations and evidence, the allocation of the site is not considered to be required to ensure the soundness of the Plan. However, a Focused Change to the Residential Settlement Boundary and Special Landscape Area boundary under policy MG17 (6) has been proposed as a factual update resulting from the planning consent and to ensure the consistency and soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD5 - Residential Development in Key, Service Centre and Primary Settlements

Represor ID and details: ID-5908/1/4 Charles Church East Wales

Alternative Site N/A

Representation Type Support

#### Summary of Representation:

Apply a higher flexibility allowance in the Plan and allocate the land at Leckwith Road, Llandough for residential development in future Focused Changes to the Plan.

#### Council's Response(s):

Comments noted- Since the representation was submitted, the site referred to in the representation is now subject of a planning permission for 25 dwellings (2013/00632/FUL). Notwithstanding this the Council is of the view that the flexibility allowed with the LDP is appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD5 - Residential Development in Key, Service Centre and Primary Settlements

Represor ID and details: ID-5908/1/5 Charles Church East Wales

**Alternative Site** ASA49 - Land at Penlan Road, Llandough - Special Landscape Area - reduce designation

**Representation Type** Object

#### Summary of Representation:

Representation promotes alteranative site ASN069 - Land at Penlan Road, Llandough for inclusion in the Depsoit LDP for residential development.

#### Council's Response(s):

The representation relates to an amended Special Landscape Area boundary to reflect potential development proposals for the Former Quarry site at Leckwith Road, Llandough. A planning application (2013/00632/FUL) has since been considered for the site which has been granted approval and is currently under construction. Therefore, having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Special Landscape Area boundary under policy MG17 (6) is proposed. A consequential amendment to the Residential Settlement Boundary is also considered to be necessary as a result of the planning consent and Focused Change.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5909/1/1      Mr David Chandler

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5909/1/2      Mr David Chandler

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5910/1/1 Mrs J.R.Griffiths

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5914/1/2 Catherine Pearce

Alternative Site ASN059 - Land South West of Weycock Cross - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN059 - Land South West of Weycock Cross, for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5914/2/1 Catherine Pearce

Alternative Site ASN092 - Land East of Llangan - Gypsy and Traveller site

Representation Type Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5914/2/2 Catherine Pearce

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

**Deposit Plan Policy - MG18 (5) - Between Barry & Rhoose****Represor ID and details:** ID-5915/1/1      **Protect the Vale Line / Stop the Spur Campaign****Alternative Site**    ASA08 - Land to the south east of Cardiff Airport and south of Port Road, Rhoose - Green Wedge - increase designation**Representation Type**    Object**Summary of Representation:**

Objects to MG 10 on the grounds the land added to the MG 10 allocation south of Port road should be reduced and reinstated as a green wedge and making Port Road the boundary which is a more logical boundary for the allocation. The new allocation is unrealistic and will result in an unacceptable loss of green space remove allocation from south east of Port Road.

**Council's Response(s):**

The LDP identifies the land at MOD St Athan – Cardiff Airport as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The Welsh Government is in the process of preparing a development framework for the future development of the Enterprise Zone which will provide further details of the proposals set out in the LDP.

The Employment Land and Premises Study background paper (2013) sets out the evidence for the employment land allocations. The approach to identify strategic employment sites and local employment sites is set out under Section 10 (Recommendation 1) of that report. There is considered to be clear rationale for the inclusion of these sites within the LDP employment land supply and given the Plan's Strategy, Objectives and evidence base set out in the Employment Land and Premises Study, no changes are considered to be required to ensure the soundness of the Plan. Further supporting evidence in relation to the employment policies of the Plan and the strategic employment sites is provided in the Further Advice on the Employment Land and Premises Study document (2015).

Given its regional importance, the wider economic benefits of the site and the development framework which provides further details of the proposed land use, the Council consider that the Cardiff Airport – St Athan Enterprise Zone should not be amended.

Policy MG18 Green Wedges is clear in its intention to protect land identified under the policy as green wedge from, unwarranted and inappropriate development. The Council has undertaken a review of the green wedge designations previously included with the Adopted Vale of Glamorgan Unitary Development Plan 2011 – 2026 and has sought to refine the designations in areas where development pressure exists or have been removed. The amendments of the green wedge boundaries to enable further residential development or to further restrict development is not considered to be based on any significant evidence and are therefore considered unwarranted.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

**Officer Recommendation:**

No Change Required

**Deposit Plan Policy - MG18 (5) - Between Barry & Rhoose****Represor ID and details:** ID-5915/1/2      **Protect the Vale Line / Stop the Spur Campaign****Alternative Site**    ASA07 - Land to the south east of Cardiff Airport and south of Port Road, Rhoose - Strategic Site - reduce Employment allocation**Representation Type**    Object**Summary of Representation:**

Representation objects to policy MG 10 on the grounds the land added to the MG 10 allocation south of Port road should be reduced and reinstated as a green wedge and making Port Road the boundary which is a more logical boundary for the allocation. The new allocation is unrealistic and will result in an unacceptable loss of green space remove allocation from south east of Port Road.

**Council's Response(s):**

The representation seeks an amendment to a site allocation within the Deposit LDP for residential development.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated within the LDP are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG18 (5) - Between Barry & Rhoose

Represor ID and details: ID-5915/2/1      Protect the Vale Line / Stop the Spur Campaign

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to MG 10 on the grounds the proposed safeguarding of a route for a potential rail link to Cardiff Airport would go against the LDP's objectives to sustain and develop communities in the Vale, to ensure development makes a positive contribution to mitigating climate change effects and to provide greater access to sustainable forms of transport. Due to the lack of a Master plan for Cardiff Airport it is impossible to assess the inclusion of the employment land in the LDP. Delete reference to safeguarding a route for a potential rail link to Cardiff Airport.

#### Council's Response(s):

The LDP strategy recognises the importance of Cardiff Airport and the surrounding Enterprise Zone to the future prosperity of the Vale of Glamorgan and the wider South Wales region. Policies SP2 and MG10 allocates land for strategic employment sites at St Athan and Cardiff Airport.

The line of the rail spur has not been illustrated on the Proposals Map or included within the transport policies of the Plan and the scheme has therefore not been proposed as part of the Deposit LDP. The supporting text of the Plan does however include details at paragraph 6.63 of the requirements for the future master planning of the site. While the comments of the repesor are noted, the Council considers that the potential route for a rail spur should be considered rather than safeguarded as part of the master planning exercise for the site given the Cardiff City Region Metro proposals for south east Wales. Therefore, the removal of paragraph 6.63 (d) is not considered to be required however, it is proposed to amend the supporting text to clarify the requirements for the master planning stage.

Further, while the line of the rail spur has not been illustrated on the Proposals Map, land potentially required for the route is largely protected by its inclusion within the green wedge designation. The employment site has been identified as a part of the St Athan - Cardiff Airport Enterprise Zone and connectivity of the strategic site with the wider region will be a key consideration of any future master plan for the Enterprise Zone.

Proposed change:

Amend paragraph 6.63 (d) to read: "Consideration of a route for a potential rail link to Cardiff Airport across the site so that development proposals do not compromise future proposals to enhance sustainable access to the airport".

#### Officer Recommendation:

Proposed Amendment

**Deposit Plan Policy - MG18 (5) - Between Barry & Rhoose****Represor ID and details:** ID-5915/3/1      **Protect the Vale Line / Stop the Spur Campaign****Alternative Site**    ASA08 - Land to the south east of Cardiff Airport and south of Port Road, Rhoose - Green Wedge - increase designation**Representation Type**    Object**Summary of Representation:**

Objects to MG 9 (2) as the extent of the employment allocation is too large. Amend by deleting the allocation situated to the south and east of Port road and return the land to green wedge. If deletion is not viable the southern boundary should be amended (see plan 2 of representation). Include a phasing provision of development starting in the north and west of the site. Amendments should take place due to the oversupply of employment allocation, part of the land allocated is grade 3a agricultural land and should be preserved and there will be an unacceptable impact on nature conservation interests.

**Council's Response(s):**

The LDP identifies the land at Cardiff Airport and Port Road Rhoose as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. A Strategic Development Framework is in the process of being prepared for the Enterprise Zone which will inform future detailed proposals for the sites. In allocating these sites the LDP ensures that it is consistent with the economic development strategies of the Welsh Government.

Land allocated identified in the LDP for employment purposes is comprised of Strategic employment sites providing 444 hectares (314 net developable) and local employment sites providing 52.84 hectares to reflect the different employment needs they serve. The 3 Strategic sites within the LDP consist of 2 which fall within the regional St Athan and Cardiff Airport Enterprise Zone and a third site at Land South of Junction 34, M4 at Hensol.

The Employment Land and Premises Study background paper (2013) sets out the evidence for the employment land allocations. The approach to identify strategic employment sites and local employment sites is set out under Section 10 (Recommendation 1) of that report. There is considered to be clear rationale for the inclusion of these sites within the LDP employment land supply and given the Plan's Strategy, Objectives and evidence base set out in the Employment Land and Premises Study, no changes are considered to be required to ensure the soundness of the Plan.

In terms of Agricultural Land quality, an Agricultural Land Classification (ALC) Study Report for the Land at Model Farm, Barry was prepared in November 2011. The study investigated the Agricultural Land Classification (ALC) and soil resources of an area to the east of Cardiff Airport at Barry in south Wales, by means of a detailed survey of soil and site characteristics. The land consists of higher relatively flat land, and steeply sloping incised valleys. Existing use of the agricultural land is a mixture of arable cultivation, improved pasture, and permanent pasture. The report concluded that the land of best and most versatile quality (Grades 1, 2, and 3a) is only found on 1.7% of the agricultural land in the study area. The remainder of the agricultural land was of poorer quality either Grade 3b, 4 or 5.

In terms of the impact on the rural area, this has been considered together with the need for the strategic employment allocation. The design and remaining development policies of the LDP will seek to ensure that development is managed to minimise or mitigate detrimental impacts. In addition, the sustainability appraisal of Model Farm, Port Road, Rhoose as part of the site assessment process concluded that the proposal will have a neutral or positive effect on biodiversity, landscape or nature conservation designation. PPW (2014) states that 'phasing may be justified by considerations relating to physical or social infrastructure, or to the adequacy of other services, which may indicate that a particular site cannot be released for development until a particular stage in the plan period.' In this respect, the Strategic Development Framework for the Enterprise Zone will inform detailed proposals for the strategic sites. This will include details on industrial or offices uses focusing on aerospace and high-tech manufacturing on the site, together with the planned 42ha

**Deposit Plan Policy - MG18 (5) - Between Barry & Rhoose****Represantor ID and details: ID-5915/3/1      Protect the Vale Line / Stop the Spur Campaign**

extension to Porthkerry Country Park as well as considering proposals for an energy centre and route for a rail spur. The framework will provide further details on phasing of the development however it is considered inappropriate for the LDP to constrain the development of specific land at the Cardiff Airport strategic employment site.

Notwithstanding this, monitoring targets relating to the strategic employment allocations have been included within the Measuring Success section of the Deposit LDP to monitor the delivery of the Plan and to indicate potential areas for Plan review. Monitoring targets for the Cardiff Airport Enterprise Zone are shown under Policy Target number PT35 which requires the adoption of master plans or the granting of planning permissions for the Cardiff Airport Enterprise Zone by 2016 and provision of an extension to Porthkerry Country Park as part of the Cardiff Airport Enterprise Zone proposals by 2018.

It is considered that the LDP contains sufficient phasing and monitoring criteria to allow deliverability issues to be considered and reviewed as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance. Furthermore, it is considered that placing restrictions on strategic employment sites or the delivery of allocations in support of the Strategic Opportunity Area would provide an inflexible approach which would negatively impact on the delivery of the wider site and the soundness of the Plan.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

**Officer Recommendation:**

No Change Required

**Deposit Plan Policy - MG18 (5) - Between Barry & Rhoose****Represor ID and details:** ID-5915/3/2      **Protect the Vale Line / Stop the Spur Campaign****Alternative Site**    ASA09 - Land to the south east of Cardiff Airport and south of Port Road, Rhoose - Strategic Site - reduce Employment allocation**Representation Type**    Object**Summary of Representation:**

**Council's Response(s):**

The LDP identifies the land at Cardiff Airport and Port Road Rhoose as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. A Strategic Development Framework is in the process of being prepared for the Enterprise Zone which will inform future detailed proposals for the sites. In allocating these sites the LDP ensures that it is consistent with the economic development strategies of the Welsh Government.

Land allocated identified in the LDP for employment purposes is comprised of Strategic employment sites providing 444 hectares (314 net developable) and local employment sites providing 52.84 hectares to reflect the different employment needs they serve. The 3 Strategic sites within the LDP consist of 2 which fall within the regional St Athan and Cardiff Airport Enterprise Zone and a third site at Land South of Junction 34, M4 at Hensol.

The Employment Land and Premises Study background paper (2013) sets out the evidence for the employment land allocations. The approach to identify strategic employment sites and local employment sites is set out under Section 10 (Recommendation 1) of that report. There is considered to be clear rationale for the inclusion of these sites within the LDP employment land supply and given the Plan's Strategy, Objectives and evidence base set out in the Employment Land and Premises Study, no changes are considered to be required to ensure the soundness of the Plan.

In terms of Agricultural Land quality, an Agricultural Land Classification (ALC) Study Report for the Land at Model Farm, Barry was prepared in November 2011. The study investigated the Agricultural Land Classification (ALC) and soil resources of an area to the east of Cardiff Airport at Barry in south Wales, by means of a detailed survey of soil and site characteristics. The land consists of higher relatively flat land, and steeply sloping incised valleys. Existing use of the agricultural land is a mixture of arable cultivation, improved pasture, and permanent pasture. The report concluded that the land of best and most versatile quality (Grades 1, 2, and 3a) is only found on 1.7% of the agricultural land in the study area. The remainder of the agricultural land was of poorer quality either Grade 3b, 4 or 5.

In terms of the impact on the rural area, this has been considered together with the need for the strategic employment allocation. The design and remaining development policies of the LDP will seek to ensure that development is managed to minimise or mitigate detrimental impacts. In addition, the sustainability appraisal of Model Farm, Port Road, Rhoose as part of the site assessment process concluded that the proposal will have a neutral or positive effect on biodiversity, landscape or nature conservation designation.

PPW (2014) states that 'phasing may be justified by considerations relating to physical or social infrastructure, or to the adequacy of other services, which may indicate that a particular site cannot be released for development until a particular stage in the plan period.' In this respect, the Strategic Development Framework for the Enterprise Zone will inform detailed

**Deposit Plan Policy - MG18 (5) - Between Barry & Rhosse****Representor ID and details: ID-5915/3/3      Protect the Vale Line / Stop the Spur Campaign**

proposals for the strategic sites. This will include details on industrial or offices uses focusing on aerospace and high-tech manufacturing on the site, together with the planned 42ha extension to Porthkerry Country Park as well as considering proposals for an energy centre and route for a rail spur. The framework will provide further details on phasing of the development however it is considered inappropriate for the LDP to constrain the development of specific land at the Cardiff Airport strategic employment site.

Notwithstanding this, monitoring targets relating to the strategic employment allocations have been included within the Measuring Success section of the Deposit LDP to monitor the delivery of the Plan and to indicate potential areas for Plan review. Monitoring targets for the Cardiff Airport Enterprise Zone are shown under Policy Target number PT35 which requires the adoption of master plans or the granting of planning permissions for the Cardiff Airport Enterprise Zone by 2016 and provision of an extension to Porthkerry Country Park as part of the Cardiff Airport Enterprise Zone proposals by 2018.

It is considered that the LDP contains sufficient phasing and monitoring criteria to allow deliverability issues to be considered and reviewed as part of LDP Annual Monitoring Reports and the Plan review processes provided under national planning guidance. Furthermore, it is considered that placing restrictions on strategic employment sites or the delivery of allocations in support of the Strategic Opportunity Area would provide an inflexible approach which would negatively impact on the delivery of the wider site and the soundness of the Plan.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Representor ID and details: ID-5916/1/1 Mrs Sue Dentten

Alternative Site ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Representer ID and details: ID-5916/2/1 Mrs Sue Dentten

Alternative Site ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

Representation Type Object

#### Summary of Representation:

Issues with congestion, car park for Cosmeston Park already being fully utilised and cars parking on residential roads nearby.

#### Council's Response(s):

As with the residential allocation contained within the deposit LDP any substantial new development would require the submission of a robust Transport Assessment (TA). The TA would evaluate and determine any mitigation measures which would be required to alleviate any adverse impacts that may occur to the local highway network that had been identified as a result of the development. The council considers therefore that the concerns expressed by the representer in relation to the local highway are unfounded and would not justify the deletion of the site from the Deposit LDP as requested.

It should be noted that no consideration has yet been given to the operation and management of any future park and ride facility that may be developed at Cosmeston Lakes Country Park. Any new facility would be separate to the country park and would be operated under its own management regime and structure. It is also not the intention that a park and ride facility would become a part of the country park; moreover, it would be a separate entity with its own management regime and operational structure. Should charging be implemented and on street parking in surrounding residential areas occur as a consequence, this would then become a highways management and enforcement and/or police matter and is not an issue for the LDP.

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5918/3/1 Mr I.Barlow

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5918/3/2      Mr I.Barlow

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Representor ID and details: ID-5919/1/1 Margaret Hughes

Alternative Site ASD7,9 - Darren Farm and Link Road

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5930/1/2 G.W.Dunn

Alternative Site ASN070 - Hayes Road, Sully - Community Use

Representation Type Object

#### Summary of Representation:

Objects to MG 5 on the grounds the site should be allocated as allotments to meet community need. Site should be returned to public open space. The types of dwellings proposed on site are inadequate in protecting against any chemical incidents from Dow Chemicals site. Detrimental effect on tourism. Allocation will have a negative effect on strategic employment developments in the area. Site is not large enough to adequately provide for the gypsy and traveller community. Remove gypsy and traveller allocation from Hayes road site and return to public open space and allotments.

#### Council's Response(s):

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5930/2/1      G.W.Dunn

**Alternative Site**    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5931/1/1 W.E.Dunn

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major

Represor ID and details: ID-5932/1/3 N Kerry Veale

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major

**Representor ID and details:** ID-5932/1/3      N Kerry Veale

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### **Officer Recommendation:**

No Change Required

Represor ID and details: ID-5932/1/4      N Kerry Veale

**Alternative Site**    ASN007 - Land at Llandow - New Settlement

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN007 - Land at Llandow within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

Representor ID and details: ID-5933/1/1      Mr Kelvin Price

Alternative Site    ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5934/1/1 Mr & Mrs Levick-Jones & Thelma Bartlett

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5934/1/2      Mr & Mrs Levick-Jones & Thelma Bartlett

Alternative Site      ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type      Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

**Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major****Represor ID and details:** ID-5935/1/3      **Mr and Mrs P G Taylor****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major

**Representor ID and details:** ID-5935/1/3      **Mr and Mrs P G Taylor**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5944/2/1 Mr and Mrs A Margetts

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

Represor ID and details: ID-5946/1/1 Mrs Elizabeth Stone

Alternative Site ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

### Deposit Plan Policy - MG2 (37) - Land to the east of Bonvilston

Represor ID and details: ID-5949/1/3 J A Haynes

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Policy SP 5 should acknowledge the need for employment allocation to be located on more brownfield sites and questions the allocation of greenfield employment land, in particular at the former Bosch site at land south of Junction 34 of the M4.

#### Council's Response(s):

The former Bosch site at Junction 34 was acquired by Renishaw PLC in 2011 and they have occupied the site since 2012. The area of land allocated within the LDP under policy MG9 (1) Land to the South of Junction 34 M4 Hensol reflects the area currently occupied by the former Bosch development, alongside the area which Renishaw are seeking to develop to facilitate the expansion of their operations as part of a strategic employment site. This is an existing serviced employment site, with strategic highway links which the LDP considers to be of regional importance. Development of the site would provide employment opportunities within the wider South Wales area and its allocation as a strategic employment site is supported by the Employment Land and Premises Study (2013). A planning application for development of the site is current under consideration.

#### Officer Recommendation:

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5959/1/1      Pauline Godfrey

**Alternative Site**    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Representation Type**    Object

#### Summary of Representation:

representation seeks the deletion of site MG 2 (46) - Land west of Swanbridge Road, Sully.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5959/1/2      Pauline Godfrey

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks the removal of Sully as a primary settlement within the LDP settlement hierarchy policy MD5 refers to primary settlements.

#### Council's Response(s):

Sully is identified within the LDP as a Primary Settlement on the basis of the LDP Sustainable Settlement Appraisal, the findings of which suggest that Sully is afforded with a suitable range of services and facilities, including transport links to enable the settlement to accommodate future housing growth

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5959/2/1      Pauline Godfrey

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

**Deposit Plan Policy - MG5 - Gypsy and Traveller Site****Represor ID and details:** ID-5965/1/1      Arthur Coxon**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site**Representation Type**    Object**Summary of Representation:**

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

**Council's Response(s):**

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5967/2/1 Judith P Lynn

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (2) - Land at Higher End, St Athan

Represor ID and details: ID-5968/1/1      Mr & Mrs Cummings-Jones

**Alternative Site**    ASD19 - MG 2 (2) - Land at Higher End, St Athan - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Representation objects to MG 2 (2) - Land at Higher End, St Athan, raising concerns regarding the impact that the proposed development would have.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-5975/1/1 Mr & Mrs Griffiths

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation questions the accuracy of the population projections and seeks a reduction on the housing requirement.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-5975/1/2      Mr & Mrs Griffiths

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to SP 3 on the grounds the proposed housing requirement is too high for the current infrastructure to handle. Amend by reducing housing requirement and any additional infrastructure required by housing must be in place before development begins.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representor ID and details: ID-5982/1/1 Louise Maher

Alternative Site ASD20 - MG 2 (45) - Land off Sandy Lane, Ystradowen - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

**Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)****Represor ID and details:** ID-5987/2/1      Mrs H.N.Tasker**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site**Representation Type** Object**Summary of Representation:**

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

**Council's Response(s):**

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Representor ID and details: ID-5994/1/1 Julie Robinson

Alternative Site ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-6006/1/1      Phillipa Cole

Alternative Site    ASN071 - Land north east of Weycock Cross, Barry - Residential

Representation Type    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN071 - Land north east of Weycock Cross, Barry for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-6006/1/2      Phillipa Cole

Alternative Site    ASD32 - MG 2 (39), MG 25 (9) - Mixed - ITV Wales, Culverhouse Cross - Delete Site

Representation Type    Object

#### Summary of Representation:

Representation objects to the seeks the MG2 (39) - ITV Wales Culverhouse Cross and proposes its deletion from the housing allocations. Concerns raised relate to the potential impacts of the proposed development.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6006/1/3      Phillipa Cole

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

The representation states that the Plan fails to provide an adequate range and choice of residential accommodation in Barry. It considers that additional residential development would be more appropriately located in the key settlement of Barry where there is a high demand for affordable housing. Representation objects to the level of housing proposed for St Athan and seeks a reduction. It also considers that the number of residential units proposed in the Minor Rural settlements, particularly Bonvilston, St Nicholas and Wick should be reduced as the number of units proposed are disproportionate to the scale of the existing settlement.

Representation objects to the distribution of housing under MG2 particularly for:

- Minor Rural Settlements at Bonvilston, St Nicholas and Wick where the number of units proposed are disproportionate to the scale of the existing settlement and there is limited community infrastructure
- The level of the housing proposed in St Athan.

#### Council's Response(s):

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Further details relating to the residential requirement and housing supply of the Plan are provided in the Housing Provision background paper (2015).

□

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

Within the Minor Rural Settlement category there is a broad spectrum of settlements, in terms of spatial size and resident population. Consequently, the Council is of the view that representations which object to the disproportionate level of housing within a specific settlement, and those which compare the number of houses proposed within one settlement to that in another have not taken into consideration the physical capacity of each village within the hierarchy to accommodate additional housing or their physical, environmental and infrastructure characteristics.

The distribution of housing growth apportioned to each settlement category in the hierarchy, is detailed within the Housing Land Supply background paper (2013). This indicates that Barry accommodates 30% of housing provision; the Service Centre Settlements 21%, Primary Settlements 37% and Minor Rural Settlements 12% (or 9% excluding the brownfield redevelopment allocation at Culverhouse Cross).

The location of development and growth areas identified within the LDP has also been informed by and assists in delivering the overall LDP Strategy and Objectives. The Strategy forms an important part of the Plan and consideration must be had to this in the location of future development to ensure delivery of the Strategy through policies and allocations of the Plan. In

### Deposit Plan Policy - MG 2 - Housing Allocations

**Represor ID and details:** ID-6006/1/3      **Phillipa Cole**

this respect, the LDP Strategy is comprised of four key elements; “To promote development opportunities in Barry and the South East Zone, the St Athan area to be a key development opportunity and Cardiff Airport a focus for transport and employment investment. Other sustainable settlements to accommodate further housing and associated development”. The settlements identified within the Settlement Hierarchy and site allocations therefore have regard to and assist in delivering the overall Strategy of the Plan.

Accordingly, the Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. Therefore, no change is considered to be required.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council’s requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

#### **Officer Recommendation:**

No Change Required

---

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6006/2/1      Phillipa Cole

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to Policy MG 20 due to insufficient flexibility for development on safeguarded sites. Amend by adding additional criteria to make development for alternative use easier to permit.

#### Council's Response(s):

Safeguarding is not only for the short term, it relates to the ability of future generations to meet their own needs. Mineral resources should not be unnecessarily sterilised for that reason. Therefore, no change is considered necessary to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Representor ID and details: ID-6007/1/1      Mr & Mrs Pepper

Alternative Site    ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-6009/2/1 Jonathan & Florence Smith

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6018/1/1 Ken Horsman

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6019/1/1 Christopher Jeans

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

#### Officer Recommendation:

### Deposit Plan Policy - MG12 - Retail Hierarchy

Represantor ID and details: ID-6025/1/1      G Powys Jones

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Policy MG 12 should remove the Font-y-Gary neighbourhood retail centre from as it does not constitute as a neighbourhood centre as referenced in the background paper. Amend by removing Font-y-Gary from the neighbourhood centre classification and re-evaluate the area on up to date information.

#### Council's Response(s):

The represantor has previously sought planning permission to enable the neighbourhood retail centre to be developed for residential purposes which have been subject to a planning application (2013/0009/OUT) that was subsequently refused by the Council and the decision upheld at Appeal (APP/Z6950/A/13/2204394).

The represantor considers that the neighbourhood retail centre consists of 2 and not the 3 units identified in the Local and Neighbourhood retail centre review background paper as two of the units have since been converted into one following its original designation. It is considered that the centre could easily be converted back 3 units in the future and that this would meet the threshold set out in the background paper. Notwithstanding this, it is considered the loss of the centre would have a harmful effect on retail provision in the area and the important local role the neighbourhood retail centre plays has been correctly identified in the background paper. Its potential loss would therefore result in the loss of a valued local facility, a reduction of choice and competition, and an increase in the need for local residents to travel to other local centres.

It is considered that the proposed removal of the Fontygary neighbourhood centre from the retail hierarchy is unjustified and the removal of its protection afforded by Policy MG12 would be contrary to the Plan objectives (in particular LDP Objectives 1, 3, 5, 6 and 8). Therefore, the proposed change would not ensure the soundness of the Plan and no change is proposed.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG12 - Retail Hierarchy

Represor ID and details: ID-6025/2/1      G Powys Jones

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

**Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan****Represor ID and details:** ID-6027/1/1      Pete Sulley**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Objects to MG 1 due to 5% flexibility being too low. Flexibility needs to be higher to allow for the non-delivery of allocated sites. There is an over reliance on windfall sites which will cause future problems in achieving the housing supply. Concerns over the flexibility allowance site already being decided goes against objectives outlined in PPW (2.5 Development Plans).

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6027/2/1      Pete Sulley

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the phasing requirement is unfounded as PPW requires LDPs to provide a continual range and choice of sites over the plan period (para. 9.2.2 and 9.3.3 PPW). Phasing is too restrictive towards housing development and would be detrimental in achieving a 5 year supply of housing land. Delete phasing requirement to ensure the soundness of SP 3.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6027/3/1      Pete Sulley

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation objects to Policy MG2 as it appears the proposed allocations have not been robustly considered and demonstrated to be genuinely available, suitable and deliverable for development within the Plan period.

#### Council's Response(s):

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Further details relating to the residential requirement and housing supply of the Plan are provided in the Housing Provision background paper (2015).

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and the proposed changes are not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6027/3/2      Pete Sulley

Alternative Site    ASN072 - Land east of Harding Close, Boverton - Residential

Representation Type    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN072 - Land north of Orchard Lodge, Boverton for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6027/3/3      Pete Sulley

**Alternative Site**    ASN073 - Land north of Orchard Lodge, Boverton - Residential

Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan****Represor ID and details:** ID-6027/4/1      Pete Sulley**Alternative Site**      N/A**Representation Type**      Object**Summary of Representation:**

Objects to MG 1 due to 5% flexibility being too low. Flexibility needs to be higher to allow for the non-delivery of allocated sites. There is an over reliance on windfall sites which will cause future problems in achieving the housing supply. Concerns over the flexibility allowance site already being decided goes against objectives outlined in PPW (2.5 Development Plans).

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6027/5/1      Pete Sulley

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the phasing requirement is unfounded as PPW requires LDPs to provide a continual range and choice of sites over the plan period (para. 9.2.2 and 9.3.3 PPW). Phasing is too restrictive towards housing development and would be detrimental in achieving a 5 year supply of housing land. Delete phasing requirement to ensure the soundness of SP 3.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6027/6/1      Pete Sulley

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation objects to Policy MG2 as it appears the proposed allocations have not been robustly considered and demonstrated to be genuinely available, suitable and deliverable for development within the Plan period.

#### Council's Response(s):

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Further details relating to the residential requirement and housing supply of the Plan are provided in the Housing Provision background paper (2015).

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and the proposed changes are not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6027/6/2      Pete Sulley

Alternative Site    ASN072 - Land east of Harding Close, Boverton - Residential

Representation Type    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN072 - Land north of Orchard Lodge, Boverton for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6027/6/3      Pete Sulley

**Alternative Site**    ASN073 - Land north of Orchard Lodge, Boverton - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN073 - Land north of Orchard Lodge, Boverton for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/1/1      Osian Roberts

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/1/2      Osian Roberts

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-6028/2/1 Osian Roberts

**Alternative Site** ASA64 - Land east of St Nicholas - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/2/2      Osian Roberts

**Alternative Site**    ASN074 - Land off Dyffryn Lane, St. Nicholas - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN074 - Land off Dyffryn Lane, St. Nicholas for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/2/3      Osian Roberts

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation objects to the identified housing requirement on the grounds that it is flexibility should be increased and additional housing allocations identified.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/2/4 Osian Roberts

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to site MG2(43) St Nicholas and proposes alternative site.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

**Deposit Plan Policy - MG5 - Gypsy and Traveller Site**

Represor ID and details: ID-6028/4/1 Osian Roberts

Alternative Site N/A

Representation Type Object

**Summary of Representation:**

Objects to policy MG 1 as the overall housing numbers are too low. There needs to be an increase in overall housing numbers and in the contingency provision. A reduction in the provision for windfall sites is needed to ensure deliverability with more focus on identified housing allocations. Removal of phasing as too restrictive towards development, detrimental to housing provision.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/5/1 Osian Roberts

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 due to the requirement for phasing housing sites. The phasing causes housing land supply to be split up and will cause uncertainty for developers as to when they are permitted to progress with an allocated site. Reduces the ability to be flexible. Remove phasing requirement and increase housing supply.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-6028/6/1 Osian Roberts

**Alternative Site** ASA64 - Land east of St Nicholas - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6028/6/2      Osian Roberts

**Alternative Site**    ASN074 - Land off Dyffryn Lane, St. Nicholas - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN074 - Land off Dyffryn Lane, St. Nicholas for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-6028/6/3      Osian Roberts

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the overall housing numbers are too low to achieve an adequate amount of housing for the Authority's need. The flexibility (5%) for housing is also too low and needs to be increased. Amend by increasing overall housing numbers to keep up with demand and increase the flexibility allowance to provide a contingency for the plan period.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

**Deposit Plan Policy - MG5 - Gypsy and Traveller Site****Represor ID and details:** ID-6028/6/4      **Osian Roberts****Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Objects to policy MG 1 as the overall housing numbers are too low. There needs to be an increase in overall housing numbers and in the contingency provision. A reduction in the provision for windfall sites is needed to ensure deliverability with more focus on identified housing allocations. Removal of phasing as too restrictive towards development, detrimental to housing provision.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6029/1/1 Ieuan Williams

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6030/1/1 Nicola Stingl

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-6030/2/1 Nicola Stingl

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

Represor ID and details: ID-6033/1/2      Chris Dance

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Represor ID and details: ID-6035/3/1      Ian & Sharon Bullock

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-6040/1/1 Mr S W Jones

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6041/1/1 David W Owens

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

#### Officer Recommendation:

### Deposit Plan Policy - MG25 (2) - Porthkerry Country Park

Representer ID and details: ID-6049/1/1      Johnathan Stott

**Alternative Site**    ASD28 - MG 25 (2), MG 9 (2) - Country Park Extension - Porthkerry, Barry - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Concerns with the allocation of 42ha for Porthkerry Park within policy MG 25 (Public Open Allocations). The added allocation and lack of management of parks causing anti-social behaviour e.g. drug dealing. Concerns policy does not take into account the effect of the allocation on nearby residents, specifically the designation of homes within open space.

#### Council's Response(s):

The proposed extension to the country park forms a part of the larger Cardiff Airport and St Athan Enterprise Zone allocation which has been designated by the Welsh Government. As a part of this initiative, the land will be conveyed to the council and incorporated into the country park and managed as a part of that enterprise. If appropriate a management plan will be prepared to ensure that the land is suitably managed and maintained and this could include issues relating to access if required. In accepting the land as an extension to the country park the council would not anticipate any adverse impacts upon existing residents and any such impacts that may ultimately occur would be managed appropriately and in partnership with any relevant agencies and the appropriate local law enforcement community. The inclusion of the land as an extension to the country park would not have an impact on the lands designation as a green wedge as this designation in this area is maintained within the Deposit LDP. With regard to the inclusion of Glebe Farm within the designation, the Council has illustrated on the Proposals Map the information and site boundaries with which it has been presented. If this information is incorrect appropriate amendments could be made to reflect the private ownership of the properties in question.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - SP2 (ii) - Mixed uses at St Athan

Representor ID and details: ID-6053/1/1      Mr Graeme Smith

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation seeks a reduction in the scale of the St Athan Enterprise Zone and an upgrading of the existing Eglwys Brewis Road as an alternative to the proposed Northern Access Road.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

The housing allocations proposed in the St Athan area have been made to reflect the strategic importance of the St Athan Aerospace Business Park and to provide the opportunity for local residents to access employment opportunities generated by the Enterprise Zone. In this respect, the residential allocations have been made to locate residential development close to future job creation. Whilst it is acknowledged there is no certainty that local residents will be employed at the St Athan Enterprise Zone it is considered appropriate and prudent to provide the opportunity for future employees to live in the local area. Therefore, the scale of the proposed development is considered to be appropriate given the significance of the Strategic Site and employment proposals.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - SP2 (ii) - Mixed uses at St Athan****Represor ID and details:** ID-6053/2/1      **Mr Graeme Smith****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP2 (ii) - Mixed uses at St Athan

**Representor ID and details:** ID-6053/2/1      **Mr Graeme Smith**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Officer Recommendation:

No Change Required

**Deposit Plan Policy - SP2 (ii) - Mixed uses at St Athan****Represor ID and details:** ID-6053/3/1      Mr Graeme Smith**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Representation seeks a reduction in the scale of the St Athan Enterprise Zone and an upgrading of the existing Eglwys Brewis Road as an alternative to the proposed Northern Access Road.

**Council's Response(s):**

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic site. In allocating these sites the LDP ensures that it is consistent with the economic development strategies of the Welsh Government.

Land allocated identified in the LDP for employment purposes is comprised of Strategic employment sites providing 444 hectares (314 net developable) and local employment sites providing 52.84 hectares to reflect the different employment needs they serve. The 3 Strategic sites within the LDP consist of 2 which fall within the regional St Athan and Cardiff Airport Enterprise Zone and a third site at Land South of Junction 34, M4 at Hensol.

The Employment Land and Premises Study background paper (2013) sets out the evidence for the employment land allocations. The approach to identify strategic employment sites and local employment sites is set out under Section 10 (Recommendation 1) of that report. There is considered to be clear rationale for the inclusion of these sites within the LDP employment land supply and given the Plan's Strategy, Objectives and evidence base set out in the Employment Land and Premises Study. Further supporting evidence in relation to the employment policies of the Plan and the strategic employment sites is provided in the Further Advice on the Employment Land and Premises Study document (2015).

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development or other alternative uses within the Enterprise Zone due to its regional importance and wider economic benefits. Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

The housing allocations proposed in the St Athan area have been made to reflect the strategic importance of the St Athan Aerospace Business Park and to provide the opportunity for local residents to access employment opportunities generated by the Enterprise Zone. In this respect, the residential allocations have been made to locate residential development close to future job creation. Whilst it is acknowledged there is no certainty that local residents will be employed at the St Athan Enterprise Zone it is considered appropriate and prudent to provide the opportunity for future employees to live in the local area. Therefore, the scale of the proposed development is considered to be appropriate given the significance of the Strategic Site and employment proposals.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - SP2 (ii) - Mixed uses at St Athan

Representor ID and details: ID-6053/4/1      Mr Graeme Smith

Alternative Site    ASD13 - MG 2 (6) - Land adjacent to Froglands Farm, Llantwit Major - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6056/1/1 Michael Grimes

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-6057/1/1 Mrs E A Jackson

**Alternative Site** ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

### Deposit Plan Policy - Managing Development

Representor ID and details: ID-6067/1/1      Nigel Baker

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects due to lack of policy referring to fracking, and suggests wording for a new Policy on Fracking to be included in the Deposit LDP.

#### Council's Response(s):

It is the Council's opinion that in the absence of a national policy for shale gas, the LDP has addressed this matter through policy MD 8 (Environmental Protection), MG 23 (Mineral Working) and SP 10 (Built and Natural Environment). This suite of policies offers sufficient breadth to protect against the negative impacts that might result from the industrialisation of green spaces.

In regard to shale extraction and the extraction of other minerals the sub text in MG 23 paragraph 6.140 states:

"The extraction of minerals in the Vale is mainly for construction purposes providing aggregate and cement products. Surveys for hydrocarbon resources were carried out over much of the western Vale in the 1990s however there are currently no known mineral energy sources (oil, gas or coal) within the Vale. Future applications for the exploration of shale gas will also be considered against the plans relevant design and environmental protection policies including SP 10 (Built and Natural Environment) and MD 8 (Environmental Protection). New proposals for mineral extraction will need to be considered against policy MG 23, however, if future exploration were to lead to the discovery of different minerals, such as hydrocarbons, the acceptability of working them may well depend on other issues associated with the development."

#### Officer Recommendation:

No Change Required

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP2 (iii) - Employment uses at Land Adjacent to the Airport and Port Road, Rhoose, as part of the St Athan – Cardiff Airport Enterprise Zone

Represor ID and details: ID-6073/1/1      David Worthington

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation objects to the Airport Enterprise zone and states that the LDP should promote the upgrading of facilities on the Airport itself for Aircraft Maintenance.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP2 (i) - Mixed uses at Barry Waterfront

Representor ID and details: ID-6076/1/1 Marina John

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Amend supporting text for SP2 (i) - Mixed uses at Barry Waterfront to include provision for boats and associated marine facilities.

#### Council's Response(s):

The proposed development at Barry Waterfront was originally identified in the Vale of Glamorgan Unitary Development Plan and the current LDP allocation relates to the second phase on regeneration of this important brownfield site. The approved Masterplan for Barry Waterfront sets out the Council's aspiration to develop the Waterfront into a vibrant mixed use development- including the provision of water based leisure and recreation activities. Whilst the waterside is under the control of Associated British Ports, the Council will continue to support development of the waterside at Barry Waterfront whilst safeguarding the operational requirements of the port.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - SP6 - Retail

Representor ID and details: ID-6079/1/1 Cllr Jeffrey James

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

The LDP should allocate a retail site adjacent to the Rhoose railway station for retail use in order to provide community benefit.

#### Council's Response(s):

The LDP is supported by an extensive and detailed evidence base which includes a retail planning study prepared by independent consultants CACI. The study provided a quantitative and qualitative assessment of the provision of convenience and comparison goods provision in the Vale of Glamorgan and identified a need for an additional 7,874 square metres (net) of convenience floor space and 5,562 square metres (net) of comparison floor space over the plan period. Since the study was completed a significant amount of new convenience floor space has been provided across the Vale of Glamorgan including at Rhoose. The remaining convenience floor space deficit will be met by new retail development at Barry Waterfront (identified under Policies SP 6 and MG 3). Additional retail allocations as suggested are therefore not considered to be required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP6 - Retail

Representor ID and details: ID-6079/2/1 Cllr Jeffrey James

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Representation contends that the proposed educational provision on the site north of the railway line is not required and any educational need would be best accommodated on the existing Rhws primary school site.

#### Council's Response(s):

The site is the subject of an extant planning consent; the matter of educational provision has been considered by the Council in its decision to grant permission for the development, and therefore the Council is of the opinion that no change to the LDP is required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Representor ID and details: ID-6081/1/1 Margaret Fletcher

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6082/1/1      SCN Properties

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6082/1/2      SCN Properties

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Summary of Representation:

Representation objects to the LDP housing requirement and that this should be increased from 10,150 to 13,750 dwellings up to 2026.

#### Council's Response(s):

The Populations and Housing Projections background paper has been updated in light of the publication of the 2011-based Population and Household projections and in response to issues raised in representations on the Deposit LDP. Updated analysis and the Council's consideration of the population projections are provided in the background paper which sets out comparisons with previous official projections, the limitations and other issues that need to be considered in using trend based forecasting.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6083/3/1      Linden Homes Western Ltd

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the residential requirement is purely based on demographic data and is not interlinked with economic and employment growth. Amend by increasing housing requirement to between 10150 and 13750 with a 10% flexibility allowance.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6083/4/1      Linden Homes Western Ltd

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation seeks an amendment to policy MG4 to include a reference to development viability.

#### Council's Response(s):

The Council has reviewed its Affordable Housing Viability Assessment (2014) in response to a number of representations received on the Deposit LDP. The updated evidence confirms that residential development viability remains strong within the Vale of Glamorgan and indicates that higher affordable housing targets than those identified in the Deposit LDP are justified in higher value areas. In light of the updated evidence it is proposed to amend the percentage requirements identified in Policy MG 4 to better reflect development viability across the Vale of Glamorgan. This change reflects the study's recommendations that affordable housing targets for 35% in Llantwit Major, Rhoose and St Athan, and 40% in the remainder of the Vale of Glamorgan (with the exception of Barry), would be appropriate.

These percentage requirements take account of up-to-date development costs and market values and are therefore considered to be robust and justifiable. However, in response to representations from the development industry and Welsh Government it is recognised that the policy could make reference to individual site viability to enable schemes to be considered where the target level sought cannot be achieved due to genuine development viability issues. In this respect, the updated report recommends that the Council should amend policy MG4 so that the affordable housing requirement is set as a targeted requirement, rather than a minimum, to enable land value to be considered against local market circumstances. This approach is considered to be in accordance with TAN2 (Section 10) and recognises that higher affordable housing provisions are achievable in those areas identified within the policy but allows for viability evidence to be considered, where there are development viability issues, without inhibiting development from coming forward.

Amend Policy MG 4 to read as follows:

#### POLICY MG 4 - AFFORDABLE HOUSING

RESIDENTIAL DEVELOPMENTS (INCLUDING MIXED USE SCHEMES) WILL BE REQUIRED TO CONTRIBUTE TO MEETING AFFORDABLE HOUSING NEED AND SHOULD MEET THE LEVELS OF AFFORDABLE HOUSING SET OUT BELOW:

30% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 5 OR MORE UNITS IN:

- BARRY;

35% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 5 OR MORE UNITS IN:

- LLANTWIT MAJOR ;
- RHOOSE; AND
- ST ATHAN.

### Deposit Plan Policy - LDP Strategy

Represen ID and details: ID-6083/4/1 Linden Homes Western Ltd

40% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN  
A NET GAIN OF 1 DWELLING OR MORE; OR THE CONVERSION OF EXISTING BUILDINGS RESULTING IN A NET GAIN OF 2 OR MORE DWELLINGS IN:

- BOWBRIDGE;
- DINAS POWYS;
- ELANDOUGH;
- PENARTH;
- SULLY;
- WENVOE;
- THE MINOR RURAL SETTLEMENTS; AND
- THE RURAL VALE OF GLAMORGAN.

THE PROVISION OF AFFORDABLE HOUSING WILL BE NEGOTIATED ON A SITE-BY-SITE BASIS TAKING INTO ACCOUNT THE EVIDENCED VIABILITY OF THE DEVELOPMENT. CONTRIBUTIONS WILL MADE IN ACCORDANCE WITH THE REQUIREMENTS SET OUT IN THE COUNCIL'S AFFORDABLE HOUSING SPG, WHICH PROVIDES GUIDANCE ON VIABILITY AND THE CIRCUMSTANCES UNDER WHICH CONTRIBUTIONS MAY BE VARIED OR REVIEWED.

### Officer Recommendation:

No Change Required

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6083/5/1      Linden Homes Western Ltd

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 1 on the basis the housing requirement is too low. Housing requirement should be increased to between 10150 to 13750 and the flexibility allowance should increase to 10%. MG 1 relies too heavily on windfall sites should rely more on identified allocated sites.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6083/6/1      Linden Homes Western Ltd

**Alternative Site**    ASN076 - Brynhill Golf Club, Barry - Residential

**Representation Type**    Object

### Summary of Representation:

Representation promotes a new alternative site ASN076 - Brynhill Golf Club, Barry for inclusion in the Deposit LDP for residential development.

### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

### Officer Recommendation:

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Represor ID and details: ID-6085/1/4 Cllr Ian Johnson

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Representation raises concern as to the provision of burial space within the Vale of Glamorgan over the plan period.

#### Council's Response(s):

Burial land is listed under the draft Infrastructure Plan as a potential community facility that could be funded through developer contributions. It is considered that burial land and cemeteries can be included within the broad definition of 'community facilities' and that it is an item of community infrastructure where provisions could be sought under the terms of Policy MD 4. No changes to policy MD 4 are therefore considered to be required to ensure the soundness of the Plan. However, for clarity it is considered the definition of 'community facilities' on page 144 should be amended to include reference to 'burial land'.

Proposed change to the definition of 'community facilities' on page 144 to include 'burial land' within the list of facilities in the second sentence.

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6085/1/6 Cllr Ian Johnson

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to the absence of a fracking policy in the Deposit LDP.

#### Council's Response(s):

It is the Council's opinion that in the absence of a national policy for shale gas, the LDP has addressed this matter through policy MD 8 (Environmental Protection), MG 23 (Mineral Working) and SP 10 (Built and Natural Environment). This suite of policies offers sufficient breadth to protect against the negative impacts that might result from the industrialisation of green spaces.

In regard to shale extraction and the extraction of other minerals the sub text in MG 23 paragraph 6.140 states:

“The extraction of minerals in the Vale is mainly for construction purposes providing aggregate and cement products. Surveys for hydrocarbon resources were carried out over much of the western Vale in the 1990s however there are currently no known mineral energy sources (oil, gas or coal) within the Vale. Future applications for the exploration of shale gas will also be considered against the plans relevant design and environmental protection policies including SP 10 (Built and Natural Environment) and MD 8 (Environmental Protection). New proposals for mineral extraction will need to be considered against policy MG 23, however, if future exploration were to lead to the discovery of different minerals, such as hydrocarbons, the acceptability of working them may well depend on other issues associated with the development.”

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - LDP Strategy

Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6088/1/1      Giles Metcalf

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 1 on the basis of housing figures which are based on out of date population growth data. The allocation of large developments on greenfield sites goes against LDP directives (i.e. MG 18 Green Wedges) and WSP para. 19.15 (Building Sustainable Communities p.101) and para 19.37 (Valuing our Environment p.106).

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6088/2/1      Giles Metcalf

**Alternative Site**      ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type**      Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation wishes to see the inclusion of specific and concrete proposals for providing suitable educational facilities, including how this would be funded.

#### Council's Response(s):

The requirement for additional education provision in relation to strategic housing developments has been undertaken as part of the LDP preparations. The requirement for additional educational facilities identified in Policy MG6 reflect the work undertaken, and further requirements elsewhere are provided within the Educational Facilities Background Paper referenced in the LDP at paragraph 6.46. Further details on infrastructure provision is also summarised in the Council's draft Infrastructure Plan. The Council therefore considers it unnecessary to amend the policy MG6 as suggested by the representor.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6088/5/1      Giles Metcalf

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

The Plan should include specific and concrete proposals for providing suitable community facilities in villages and small centres of population. These should include details of exactly what facilities would be provided, where, and who would be funding this.

#### Council's Response(s):

Policies MG7 and MG8 provide for new community and health facilities subject to compliance with other policies within the Deposit LDP. The identification of specific sites and types of facilities is not a function of the Council but is a commercial and management assessment and judgement by local health boards and/or service providers. Therefore identification of specific details within the Deposit LDP is not considered to be appropriate or necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6088/6/1      Giles Metcalf

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 8 (Provision of Health Facilities) as policy does not provide a plan for suitable infrastructure in advance which is not in alignment with WSP para. 13.2 (Achieving Sustainable Accessibility). Additional medical services should be a prerequisite due to expected population increase. Amend MG 8 to outline suitable infrastructure for proposed development of facilities and add a requirement for an increase in health facilities

#### Council's Response(s):

Policies MG7 and MG8 provide for new community and health facilities subject to compliance with other policies within the Deposit LDP. The identification of specific sites and types of facilities is not a function of the Council but is a commercial and management assessment and judgement by local health boards and/or service providers. Therefore identification of specific details within the Deposit LDP is not considered to be appropriate or necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6088/7/1      Giles Metcalf

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

MG 16 needs to include concrete and specific proposals for the alleviation of overburdened roads in the eastern Vale, as well as, addressing the issues within public transport. Public transport in particular buses should be handled through interaction with the bus companies rather than bus lanes. The road network in the Vale is in need of improvement and MG 16 does not directly address this problem.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to consider the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments. Therefore while the comments of the representor are noted, the Council considers that Deposit LDP contains a range of transport schemes and infrastructure proposals (MG16 refers) and identifies a significant number of locations (paragraph 6.114 refers) where further improvements will be made or are required.

It should be noted that many of the highway issues within the Vale of Glamorgan are historic and result from historic road layouts and/or are a result of the surroundings through which they pass. Such issues can never be fully addressed by new infrastructure and can only be eased by appropriate measures and/or changes in public attitude to travel. In this regard the Council has sought to develop a package of measures ranging from highway improvements to new sustainable transport initiatives which seek to ameliorate adverse impact on existing highways.

With regard to the provision of bus lanes, the Council would suggest that bus lanes and similar infrastructure have been proven to facilitate improved services as is evidenced by their extensive use throughout the country. Such infrastructure can speed up transit through constrained junctions and/or areas on conflict and enable faster and more efficient service delivery. In this regard the Council will continue to provide such infrastructure where it can facilitate improved service delivery however such provision will be in line with current guidelines and best practise and in consultation with the relevant service operators.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6088/8/1      Giles Metcalf

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks an amendment to policy MG18 stating that development will not be allowed under any circumstances on Green Wedge land, and that such land already designated as Green Wedge at the start of the Plan period and for a period of two years before that point shall retain that protection for the duration of the Plan.

#### Council's Response(s):

Policy MG18 Green Wedges is clear in its intention to protect land identified under the policy as green wedge from, unwarranted and inappropriate development. While the policy allows for limited development associated with existing uses, the council considers that this is appropriate and the supporting text clearly states that such development would be limited to minor structures which are strictly ancillary to existing uses. Further reinforcement of the policy as suggested by the representor is therefore considered unwarranted.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-6088/9/1 Giles Metcalf

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Objection to the insufficient length of the consultation period.

#### Council's Response(s):

Section 16 of the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005, refers to a statutory 6 week period for submission of representations.

The Deposit Plan along with all the background documentation was made available to view on the Council's website from October 3rd 2013 and pre consultation events allowing members of the public to ask questions on the deposit plan and view all the documentation were held between the 7th and the 22nd October 2013. Given that the Deposit LDP consultation commenced on November 8th 2013, this gave people roughly 5 weeks to familiarise themselves with the Deposit LDP documentation and then a further 6 weeks to submit their representations for the Deposit LDP Consultation which finished on the 20th December 2013.

It is therefore considered that the council has complied with the LDP regulations and that 6 weeks along with the additional 5 weeks provided for the 'pre- consultation period' is an adequate period of time to read and understand the Deposit LDP documentation and submit representations. In accordance with Section 17 of the Town and Country Planning (Local Development Plan) (Wales) 2005, the council is required to prepare and publish the 'Consultation Report' before the Deposit LDP is submitted to the Welsh Assembly Government to reflect the bodies engaged or consulted, the main issues raised and the steps taken to publicise the plan preparation for the Deposit LDP consultation (November 8th – December 20th 2013) and the Alternative Sites consultation (March 20th – May 1st 2014)

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6091/1/1      Mr Paul A James

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representor ID and details: ID-6092/1/1      Jean Down

Alternative Site    ASD20 - MG 2 (45) - Land off Sandy Lane, Ystradowen - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6099/1/1 Kevin & Phyllis Lamb

Alternative Site ASN019 - Dinas Powys - Dinas Powys Bypass Road

Representation Type Object

#### Summary of Representation:

SP 7 should include the provision of a Dinas Powys Bypass to alleviate serious traffic issues along the A4055 Cardiff Road running through Dinas Powys. This will further mitigate added traffic increase from proposed developments for housing which would further impact the quality of the road infrastructure.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MD8 - Environmental Protection

Representor ID and details: ID-6105/1/1      Donal Whelan

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

General comments on the need to ensure that industrial activity measured under strict environmental standards. Seeks more stringent policies on industrial activity e.g fracking and inland oil extraction. Seeks mandatory EIA,

#### Council's Response(s):

Whether an Environmental Impact Assessment (EIA) is required is considered under The Town and Country Planning (Environmental Impact Assessment) (England and Wales) Regulations 1999. This can be determined through the provisions of this legislation and the use of EIA Screening Opinions. It is therefore considered inappropriate to include the proposed change as a policy requirement.

With regard to proposals for mineral extraction, including unconventional gas extraction, policy MG 23 (Mineral Working) of the LDP would also be considered. Paragraph 6.140 of the supporting text to that policy sets out how the Council will consider any forthcoming applications for unconventional gas extraction.

#### Officer Recommendation:

No Change Required

Representor ID and details: ID-6105/1/2      Donal Whelan

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

Comments on the right to appeal against the number of houses allocated to be built by central government.

#### Council's Response(s):

Comments are noted. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Responses to the residential requirement and housing supply are provided in responses to Policies SP3 and MG1. Further details relating to the residential requirement and housing supply of the Plan are also provided in the Housing Provision background paper (2015).

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and the proposed changes are not considered necessary. The right of appeal is beyond the scope of the LDP's Policies.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6108/1/1 E.S & K Jones

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

**Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major****Represor ID and details:** ID-6113/1/3      **Mrs Caroline Smith****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major

**Representor ID and details:** ID-6113/1/3      Mrs Caroline Smith

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6114/1/1 Ceri Cummings

**Alternative Site** ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Representor ID and details: ID-6118/1/1      Mr Mike Hopes

Alternative Site    ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6126/1/1      Royal Mail Group

**Alternative Site**    ASN077 - Penarth Delivery Office, Penarth - Residential / Mixed Use

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN077 - Penarth Delivery Office, Penarth for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6129/1/1      Leighton Morgans

Alternative Site      N/A

Representation Type      Support

#### Summary of Representation:

General support for the LDP Area Objective for Dinas Powys and its identification as a primary settlement- concern raised over the distribution on housing outside if the South East Zone.

#### Council's Response(s):

Support is welcomed and comments noted.

With regard to the distribution of housing the Council are of the opinion that the LDP Settlement Hierarchy contains a broad spectrum of settlements, in terms of spatial size and resident population, and this is reflected in the level of growth apportioned to each settlement category in the hierarchy. This is highlighted within the Housing Land Supply Background Paper (2013) which reveals that the LDP proposing 30% of housing within Barry; the Service and Primary Settlements accommodating 61%, and 9% within the minor rural settlements. Consequently, the Council are of the view that the distribution of housing reflects the role and functions of the settlement hierarchy

### Deposit Plan Policy - MG2 (7) - Land between new Northern Access Road and Eglwys Brewis Road

Representor ID and details: ID-6130/1/1      Martin & Sonia Booy

**Alternative Site**    ASD10 - MG 2 (7) - Land between new Northern Access Road and Eglwys Brewis Road - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6131/1/1 Ms. Amanda Morgan

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-6132/1/1 Peter Davies, Roger Thomas & Dunraven Estates

Alternative Site ASN078 - Land to the rear of the Three Golden Cups, Southerndown - Minerals - reduce allocation

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN078 - Land to the rear of the Three Golden Cups, Southerndown for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

**Representor ID and details:** ID-6132/1/4      Peter Davies, Roger Thomas & Dunraven Estates

**Alternative Site**      ASA50 - Land to the rear of the Three Golden Cups, Southerndown - Minerals Safeguarding - reduce designation to remove site

**Representation Type**      Object

#### Summary of Representation:

Representation seeks to remove limestone safeguarding zone from a proposed allocation.

#### Council's Response(s):

Safeguarding has been carried out in accordance with the Minerals Safeguarding Map of Wales. There is no justification for removing the site from the limestone safeguarding area.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6132/2/1 Peter Davies, Roger Thomas & Dunraven Estates

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 as overall housing numbers should be increased to meet the needs of the authority. Should increase in contingency provision and reduce windfall sites. Remove phasing from MG 1 hinders deliverability of plan. Representation also makes reference to policies SP 3, MG 2, SP 9, MG 20.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-6132/5/1 Peter Davies, Roger Thomas & Dunraven Estates

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to SP 3 on the grounds the overall housing numbers are too low to achieve an adequate amount of housing for the Authority's need. The flexibility (5%) allowance for housing is also too low and needs to be increased. Amend by increasing overall housing numbers to keep up with demand and increase the flexibility allowance to provide a contingency for the plan period.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

**Deposit Plan Policy - SP7 - Transportation****Representor ID and details:** ID-6133/1/1      Gareth Clubb**Alternative Site**    ASN079 - Land adjacent to Cardiff Airport and South of Port Road - Transportation - rail link**Representation Type**    Object**Summary of Representation:**

Representation objects to Policy SP7 and considers reference to the new link road at Barry Island should be removed from the policy and LDP. The airport rail corridor should be reinstated into Policy SP 7 and included on the LDP Proposal Map to adequately improve sustainability.

**Council's Response(s):**

The delivery of a new link road to Barry Island is a key element of the Barry Waterfront development proposals and its delivery is integrated within the extant planning consent for Barry Waterfront development, planning application 2009/00846/OUT refers). In this regard the deletion of the scheme as requested by the representor is not appropriate and no change is considered to be required in this respect.

The LDP strategy recognises the importance of Cardiff Airport and the surrounding Enterprise Zone to the future prosperity of the Vale of Glamorgan and the wider South Wales region. Policies SP2 and MG10 allocates land for strategic employment sites at St Athan and Cardiff Airport. While the comments of the representor in respect of the reinstatement of the airport rail spur on the LDP Proposals Map are noted, the Council considers that inclusion of this scheme within the LDP is not warranted at this time and could be considered to be premature given the exploratory works being undertaken into the development of a Cardiff Capital Region Metro system for south east Wales. Further, investment in rail infrastructure is matter for the Government rather than the Council. While the line of the rail spur has not been illustrated on the Proposals Map, the land required for the development of such a route is largely protected by its inclusion within the green wedge designation and through the inclusion of paragraph 6.63 which sets out the requirements for the master planning of the site, which includes consideration of a potential rail spur as part of future proposals for the site.

Whilst no changes to the Proposals Map are considered to be required it is proposed that paragraph 6.63 (d) be amended to clarify the supporting text of the LDP and the considerations for the master planning of the strategic site.

Amend paragraph 6.63 (d) to read:

‘Consideration of a route for a potential rail link to Cardiff Airport across the site to ensure development proposals do not compromise future proposals to enhance sustainable access to the airport.’

**Officer Recommendation:**

Proposed Amendment

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6133/1/10 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to criterion 2 of policy MD 10 (Promoting Biodiversity) as it is considered to be ineffective, inconsistent with the background evidence for biodiversity and PPW. Representation requests that criterion 2 be amended to be more stringent.

#### Council's Response(s):

While the comments in respect of criterion 2 of policy MD10 (Promoting Biodiversity) are noted, the Council would advise that the policy is supported by detailed Supplementary Planning Guidance (SPG) on Biodiversity & Development as stated in paragraph 7.51 of the Deposit LDP. The SPG provides detailed guidance on the issue of compensatory measures, enhancement and mitigation and provides a robust basis for determining appropriate replacement habitat features.

PPW at paragraph 5.2.8 states "The planning system has an important part to play in meeting biodiversity objectives by promoting approaches to development which create new opportunities to enhance biodiversity, prevent biodiversity losses, or compensate for losses where damage is unavoidable" (PPW, Conserving and Improving Natural Heritage and the Coast, para. 5.2.8). The Council therefore considers that the policy is in accordance with PPW as it reflects its aims for biodiversity.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Represor ID and details: ID-6133/1/11 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MD 19 (Low Carbon and Renewable Energy Generation) as the policy is not clear that applications for non-renewable energy will not be supported. Representation also considers there to be no policies within the LDP to assess carbon intensive / non-renewable energy proposals.

#### Council's Response(s):

Policy MD 19 is solely concerned with low carbon and renewable energy generation.

Whilst policy MD 19 permits and favours renewable energy schemes there may be instances where development proposals for non-renewable energy development will be necessary and acceptable in terms of all other planning considerations. In this case, as the LDP should be read as a whole, the Plan's other policies will be used to assess such development proposals. This includes policies MD 8 (Environmental Protection), MD 2 (Place Making), MD 3 (Design of New Development) or policy MG 23 (Mineral Working) for example (see paragraph 6.140 under policy MG 23 which refers to the exploration of hydrocarbons and shale gas). This approach is considered to be in accordance with national planning policy however it should be noted that the specific types and larger scaled energy developments could be assessed under the nationally significant infrastructure projects consenting regime. Therefore, no change is considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Represor ID and details: ID-6133/1/2 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

The policy should give priority support to genuinely sustainable waste management technologies, and restrict energy-from-waste, in order to support a move towards zero waste. The potential environmental effects associated with waste incineration have not been adequately considered in the Sustainability Appraisal.

#### Council's Response(s):

The role of the LDP is to facilitate the provision of waste management facilities, not specify which technologies are the most suitable, and proposals for waste management would need to demonstrate that the facility is required to address the capacity needs of the area in accordance with national planning guidance and the Collections, Infrastructure and Markets Sector Plan (2012)

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6133/1/3 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

The wording of SP11 (Tourism and Leisure) is too generic specifically the first sentence of the policy. First sentence of SP 11 should be deleted.

#### Council's Response(s):

Policy SP11 is a strategic policy which seeks to provide a framework for the delivery of the LDP strategy. As overarching policies, they seek to set the scene for the Council's primary objectives for the LDP and the more detailed policies that follow. In this regard, the first sentence of SP11 demonstrates that subject to conformity with the other policies within the DLDP the council will look favourably on development proposals that enhance the role of the Vale of Glamorgan as a leisure and tourism destination. The Council considers that this is an acceptable objective and does not agree that the first sentence should be deleted.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6133/1/4 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks the replacement of the designated green wedges with a green belt.

#### Council's Response(s):

The designation of a Green Belt within the eastern Vale of Glamorgan has been considered in the Council's Green Wedges Background Paper (September 2013) and discounted on the basis that such a designation would be premature in the absence of and until a sub-regional study into the implications of a Green Belt had been undertaken in the region given the implications that it could have upon both the growth dynamics of the region and regional sustainability. In the absence of a Green Belt designation, the Council is confident that the suite of policies contained within the LDP and supported by national planning guidance are adequate to manage the threat of unwarranted urban expansion and protect the countryside of the Vale of Glamorgan. In this respect, the Council considers that the use of green wedges is sufficient enough to protect from the coalescence of settlements while still meeting the development needs set out in the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Represor ID and details: ID-6133/1/5 Gareth Clubb

Alternative Site ASD24 - MG 11 - Land to the South of Junction 34 M4 Hensol - Delete Site

Representation Type Object

#### Summary of Representation:

Representation objects to the proposed strategic employment site and requests its deletion from the Plan.

#### Council's Response(s):

The strategic employment allocation (Land to the South of Junction 34, M4 Hensol) is an existing employment site with direct access to the M4. Its allocation within the plan recognises the flagship status identified within the Employment Land and Premises Study (2013), its strategic location and role as a regional employment site. The site has previously received investment from the Welsh Development Agency and there are long term development proposals from the existing owner Renishaw Plc. The deletion of the site is therefore considered to be unjustified; contrary to the evidence provided within the Employment Land and Premises Study and would not ensure the soundness of the Plan.

A number of environmental constraints have been identified within the boundary of the proposed strategic employment site. The proposed site boundary will allow the Council manage future development proposals in accordance with the policy requirements of the LDP. This includes safeguarding for SSSIs, mineral resources, SINCs and ensuring appropriate flood mitigation measures are provided as part of any future development of the site.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6133/1/6 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Policy MG 13 should be reworded to clarify that new out of town retail development will not be permitted. Amend policy to refuse out of town retail to make MG 13 consistent with PPW.

#### Council's Response(s):

Policy MG13 refers to proposals for new retail development on new sites or existing retail areas in edge and out of town locations. The policy is considered to be consistent with PPW as it applies the "sequential test" which requires proposals for new retail development to demonstrate that they could not be located within an existing retail centre (i.e. that town centres and other existing retail centre sites are considered in the first instance). The policy also requires that the impact on existing retail centres is considered (through the application of criterion 2) and that the proposal would not have an unacceptable impact on the trade, turnover, vitality and viability of town, district, local or neighbourhood centres. Therefore, it is considered the LDP meets the test of soundness without the need for the proposed change.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6133/1/7 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to wording of MG 17 as it does not sufficiently protect SLAs. Seeks amendment to wording. Areas of coast should be included within the SLAs. (Possibly refer to MG 24 Heritage Coastline).

#### Council's Response(s):

The Special Landscape Areas (SLA) designated in the LDP has been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had been independently collected and quality assured by consultants acting on behalf of the Countryside Council for Wales (now Natural Resources Wales). The Council considers therefore that the coastal environment has been considered within the assessment process and that the SLAs designated are appropriate, relevant and based on robust data. The inclusion of additional areas of SLA such as coastal areas is therefore not considered to be necessary. Notwithstanding the above, large areas of the coastal environment within the Vale of Glamorgan are afforded specific protection against development that would cause adverse impact through policy MG24 (Glamorgan Heritage Coast) and MG 18 (Green Wedges) and other policies within the plan under the Managing Development section e.g. MD1 and MD2, supplement this specific protection with more general safeguards which are applicable across the whole of the Vale of Glamorgan such as the protection of amenity, quality of open space etc.

### Deposit Plan Policy - SP7 - Transportation

Represor ID and details: ID-6133/1/8 Gareth Clubb

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Represor ID and details: ID-6133/1/9 Gareth Clubb

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks additional protection for the areas of undeveloped coast within the vale of Glamorgan and the deletion of point 3 of policy MG24.

#### Council's Response(s):

The designation of the Glamorgan Heritage Coast recognises its national importance as an area of attractive and unspoilt coastline. Given this importance, it is considered appropriate that the LDP contains a specific policy which seeks to ensure that the qualities for which this section of the coastline has been designated are protected and enhanced. The extension of the policy to cover other areas of the coastline as suggested is therefore considered by the Council to dilute the importance of the GHC and undermine its national importance.

Notwithstanding this, the remaining coastline of the Vale of Glamorgan is afforded protection by other policies such as MG18 - Green Wedges, which seek to prevent development that would prejudice the open nature of the land. Where the coastline is not protected by a specific policy, the more general policies of the plan such as MD1 - Location of New Development will be applied to ensure that new development does not have unacceptable impact upon the countryside.

Criteria 3 of policy MG24 does not seek to provide a basis for the assessment of future tourist development, which is covered under criteria 2 along with other relevant policies within the plan and it is considered that any such proposals would be considered against the overriding objective of the policy which is the conservation and enhancement of the special environmental qualities of the Glamorgan heritage Coast. Criterion 3 is intended to cover non-standard development proposals that require a coastal location however the overarching policy objective would remain the predominant consideration.

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

General comments on no reference to encouraging existing companies to reinvest.

#### Council's Response(s):

Policy MD15 provides a framework for the expansion of existing employment sites and also the redevelopment of new sites where this would encourage inward investments, whilst also protecting existing employment sites from inappropriate redevelopment for alternative uses. In assessing applications for developments in close proximity to Dow Corning the impact on existing uses and that proposed would be fully considered.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD15 - New Employment Proposals

Representor ID and details: ID-6137/1/2 Paul Meakin

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Comments on present issue of surface water drainage which would be exaggerated by further development along the eastern part of the Hayes Road.

#### Council's Response(s):

Comments are noted. In preparing the LDP the Council has consulted with NRW and Dwr Cymru Welsh Water and they have not raised any significant concerns over the site in respect of flood risk. However, any future development of the site will be required to address any localised issues of flooding

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Represor ID and details: ID-6138/1/1      Mr Alun Williams

**Alternative Site**    ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6139/1/1      Mr Clinton Harris

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/15 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Representation comments on the identified need for affordable housing being 4575 units over 5 years in the Vale rather than the Deposit LDP's projection of 2694 units under Policies SP4 and MG4 which falls short of meeting the identified need.

#### Council's Response(s):

The Deposit LDP target for affordable housing is set against the level of affordable housing which the plan anticipates it can be secured on allocated and windfall sites based on the targets set in Policy MG 4. These affordable housing targets are set based on an assessment of the viability of sites to cross subsidise affordable housing provision. The overall housing requirement identified within the LDP is derived from the projected housing need arising from changes in the population during the LDP period together with an assessment of all other evidence and policy factors, such as meeting the Plan's other objectives (further information can be found in the Housing Provision background paper 2015). Consequently the affordable housing target identified in Policy SP4 represents the Plan's contribution to meeting the overall need. This represents approximately 63% of the overall affordable housing need identified in the 2010 Local Housing Market Assessment (based on updated update viability evidence and proposed changes to Policy MG4). Additional sources of affordable housing may also be brought forward by RSLs themselves on sites where there is a 100% affordable housing provision or through the beneficial use of empty properties.

Representation Type      Object

#### Summary of Representation:

Representation considers supporting paragraph 5.51 to Policy SP4 should include the reference to Welsh Government's Development Quality Requirement rather than Welsh Quality Housing Standards as affordable housing for rent will be required to meet these higher standards.

#### Council's Response(s):

Comments are noted. To ensure consistency with Welsh Government requirements for affordable housing and for clarity it is considered that paragraph 5.51 should be amended to reference to the Welsh Government's Development Quality Requirements.

Amend fourth sentence of paragraph 5.51 to read:

The Council will expect the provision of new affordable housing to be constructed to the requisite standards such as the Welsh Government's Development Quality Requirements and include measures for managing the reduction of energy use through construction and occupation.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/18 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation considers additional supporting text should be added to Policy SP 4 to link with policy MD 11 (Affordable Housing in Rural Areas) regarding the delivery of affordable homes under the rural exceptions policy. A further paragraph could also be added on the different types and tenures of affordable housing.

#### Council's Response(s):

Amend first sentence of paragraph 5.50 to read:

5.50 As the local planning authority the Council will seek to secure an appropriate level and mix of affordable housing in all proposed residential developments to meet local housing needs. This may include the use of social and intermediate rent, low cost market housing, as well as proposals for co-operative housing and housing for older persons. Further information on this aspect is included under Policy MG 4 and in the Council's Affordable Housing Delivery background paper. The Affordable Housing Viability Study (2013) assesses the ability of new residential developments throughout the authority to provide an element of affordable housing within schemes, concluding that new residential developments in the Vale of Glamorgan can provide between 30 and 40 % affordable housing. These requirements have been taken into account when formulating Policy MG 4.

Amend paragraph 5.52 to read:

5.52 In order to assist in the provision of affordable residential units, Policy MD7 provides Policies MD 5 and MD 11 provide a framework which allows for the development of affordable housing in sustainable locations.

#### Officer Recommendation:

Proposed Amendment

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation considers Policy SP 5 should include a reference to live/work employment and social enterprises related to affordable housing policies.

#### Council's Response(s):

It is not considered appropriate to make reference to the provision of live/work housing within Policy SP5 as the aim of the policy is to identify the level of employment land the LDP should provide. Whilst live work housing can provide employment opportunities, these are by their very nature small in scale, and are primarily housing developments that provide ancillary opportunities for working from home. Live/work proposals would therefore be considered within the context of general housing policies of the LDP. No changes are considered to be required to ensure the soundness of the Plan.

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/20 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to policy MG1 to include reference to providing a mix of housing types within developments

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

Represor ID and details: ID-6144/1/27 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seek an amendment to para. 6.32 by adding to the final sentence; "but the Council reserves the right to revert back to the upper rate depending on market circumstances".

#### Council's Response(s):

Policy MG4 indicates minimum targets for affordable housing provision and allows for the provision of affordable housing above the thresholds set within the policy, whilst also allow a degree of certainty for developers as to what the Council's expectation are for affordable housing provision. In this respect the proposed change to the supporting text would introduce ambiguity as to the Council's application of policy MG4.

The Council has undertaken a review of its initial Affordable Housing Viability Appraisal and on the basis of this review the Council propose to amend policy MG4 to reflect the recommendations of the report. Further information on this is available within the Vale of Glamorgan Viability Update Report (2014).

#### Officer Recommendation:

Representor ID and details: ID-6144/1/29      Vale of Glamorgan Overarching Housing Forum

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

General comment on the Welsh Governments Housing Bill and the requirements placed on the Copuncil to undertake an updated GTAA within 12 months of the Housing Bill being introduced in April 2015.

#### Council's Response(s):

Comments noted. It is understood that an updated Gypsy and Traveller Accommodation Needs Assessment is being considered and is likely to be available by April 2016.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - National, Regional and Local Planning Context

Representor ID and details: ID-6144/1/3      Vale of Glamorgan Overarching Housing Forum

Alternative Site      N/A

**Representation Type**      Comment

#### Summary of Representation:

Representation makes comments on the Community Strategy and the lack of reference to the important role of housing.

#### Council's Response(s):

Section 2 of the Plan provides summaries of how the plan takes into account relevant local, regional and national strategies, plans and programmes. It does not set out specific detail as these issues are considered in further detail elsewhere the Plan. Therefore, no change is considered to be required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - National, Regional and Local Planning Context

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/33 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

MG 6 should be amended by the extension of the last sentence of the policy statement to read "Where new strategic developments are planned, new school provision, both primary and secondary, may also have to be considered."

#### Council's Response(s):

The requirement for additional education provision in relation to strategic housing developments has been undertaken as part of the LDP preparations. The requirement for additional educational facilities identified in Policy MG6 reflect the work undertaken, and further requirements elsewhere are provided within the Educational Facilities Background Paper referenced in the LDP at paragraph 6.46. The Council therefore considers it unnecessary to amend the policy MG6 as suggested by the repesor.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-6144/1/34 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Comments on the inclusion of social enterprises within para. 6.48 and the possibility to have a separate paragraph on social enterprises.

#### Council's Response(s):

Social enterprise relates to how a business operates, and generally provide specific either goods or services to assist in addressing certain social and community needs. In this regard social enterprises do not generate specific land use requirements over and above that associated with other business or community uses and as such the Council are of the view that it is unnecessary to include specific references to social enterprises within the plan and that there land use requirement can be facilitated through the policy framework of the LDP.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-6144/1/36 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to Policy MG 14 as it does not make reference to the potential use of upper floors in non-A1 buildings for affordable housing within town and district retail centres.

#### Council's Response(s):

Policy MG 14 ensures the beneficial use or reuse of upper floors in criterion 5. In addition, the supporting justification of policy MG 14 paragraph 6.82 also states that “to ensure that the number of retail units within the town and district retail centres is maintained, proposals for change of use of ground floor commercial premises to residential uses will not be permitted within the identified primary and secondary frontages. Where the upper floor space is vacant conversion to residential, commercial or community uses will be favoured”. Therefore, the proposed change is not considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

Representor ID and details: ID-6144/1/37      Vale of Glamorgan Overarching Housing Forum

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation suggests amendment to the title of policy MD4 and minor policy rewording.

#### Council's Response(s):

The title reflects the content of the policy which covers Community Infrastructure in the widest sense and more specifically the use of Planning Obligations to secure such infrastructure. The suggested additional wording 'may include but not be limited to...' could add uncertainty and imply that any number of other items may be sought from a developer which is not the case. The Council has sought to provide a comprehensive list of community infrastructure items that are usually secured through the planning system in order to be transparent.

#### Officer Recommendation:

No Change Required

Representor ID and details: ID-6144/1/38      Vale of Glamorgan Overarching Housing Forum

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks clarification in the Council's approach to s106 agreements and CIL.

#### Council's Response(s):

Insert the following text to paragraph 7.21 "However, s106 agreements and planning conditions will still be used to secure on-site infrastructure such as open space and affordable housing." To read:

7.21 In February 2011, the Council resolved in principle to commence preparation of a Community Infrastructure Levy (CIL) for the Vale of Glamorgan. Once in place, the CIL will replace Section 106 agreements in many respects. CIL will therefore become the main mechanism for providing infrastructure in connection with new development once it is adopted. However, s106 agreements and planning conditions will still be used to secure on-site infrastructure such as open space and affordable housing. The CIL schedule for the Vale of Glamorgan will be subject to independent examination prior to adoption. Following its adoption, in considering the need for planning obligations, the Council will need to consider the level of CIL liability on the development and to what extent the community infrastructure needs of the development will be met through implementation of CIL.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - National, Regional and Local Planning Context

Representor ID and details: ID-6144/1/39 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

General comment on paragraph 7.25 questioning the level of affordable housing anticipated through windfall development.

#### Council's Response(s):

The projected contribution of affordable housing from windfall development is considered to be a realistic figure based on past trends, taking into account site viability. Further detail on this is set out in the Affordable Housing Delivery Background Paper and Housing Supply Background Paper.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/4      Vale of Glamorgan Overarching Housing Forum

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks an amendment to the second bullet point paragraph 3.22 to read 'locations where there is demonstrable housing need'.

#### Council's Response(s):

It is taken that the provision of affordable housing would be provided in areas of demonstrable need; it is unlikely that affordable housing would be built where there is no demand for such housing.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/40 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Representation provides comment on Policy MD7 and suggests that for urban sites it may prevent certain dwelling types being developed, such as bungalows, to the detriment of older peoples housing needs.

#### Council's Response(s):

Comments are noted. The setting of minimum site densities has been made to encourage the best and most sustainable use of land. As such, it is considered appropriate for the LDP to contain this policy to enable the Council to meet its housing requirement through the sustainable use of land. Where there is a specific requirement for certain house types affecting residential densities it would be a material consideration when assessing the suitability of the development, especially in cases where development proposals cater for a specific local housing need.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - National, Regional and Local Planning Context

Represor ID and details: ID-6144/1/41 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to paragraph 7.36 and seeks additional text to include reference to residential tenure (in addition to house types and sizes) in the final sentence.

#### Council's Response(s):

The Council considers that the proposed amendment would be consistent with the affordable housing policies of the LDP and would aid clarity to the supporting text.

Amend final sentence of Paragraph 7.36 to read:

"All new development should contribute to the creation of balanced communities, providing an appropriate mix of housing types, tenures and sizes, including smaller properties to meet local housing need."

#### Officer Recommendation:

Proposed Amendment

Represor ID and details: ID-6144/1/43 Vale of Glamorgan Overarching Housing Forum

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to the Glossary to include defintions for Community Infrastructure Levy and Rural Exceptions Sites.

#### Council's Response(s):

Agree. The addition of new definition as proposed for Community Infrastructure Levy to provide clarity for users of the LDP. A definition for Rural Exception Site is already included within the Appendix. Insert new definitions within Appendix 1 as follows:

Community Infrastructure Levy: The Community Infrastructure Levy (CIL) Regulations came into force in April 2010, and gave Local Planning Authorities the power to charge a new local levy on most new developments in their area in order to secure funding for the infrastructure required to support the development of their area. The proposed Community Infrastructure Levy offers an alternative approach to developer contributions which, unlike section 106 agreements, will be a fixed standard charge and will therefore not be negotiated on a case by case basis. The CIL will be charged on most forms of development (i.e. a single dwelling) rather than only major developments and therefore has the potential to deliver significantly more developer funding than section 106.

Representor ID and details: ID-6144/1/45      Vale of Glamorgan Overarching Housing Forum

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks the inclusion of the number of affordable houses and tenure required for the site allocations listed in Appendix 5

#### Council's Response(s):

While the comments of the representor are noted, for the majority of site commentaries within Appendix 5 a percentage figure for the level of affordable housing that each site will be expected to deliver is provided. Where a percentage has not been provided affordable housing provision has already been determined through the planning application process or will be provided in accordance with the findings of the Council's Affordable Housing Viability Study (September 2013). Further, the Council's Affordable Housing Background Paper (September 2013) at Appendix 1 includes figures for the level of affordable housing each of the sites identified in Policy MG2 of the Deposit LDP will be required to contribute. The Council is therefore of the view that further information is not required within the Deposit LDP. With regard to the tenure of any affordable housing provided, this is matter that will be determined during the planning application process and is not for inclusion with the LDP.

#### Officer Recommendation:

No Change Required

#### Summary of Representation:

Representation wished to see references to improving the choice and availability of housing in Llantwit Major or Penarth areas under Area Objectives for these settlements.

#### Council's Response(s):

Comments noted. Given that the sections on the other key, service and primary settlements (Cowbridge, St. Athan) have mentioned the bullet point 'Provide for an appropriate level, range and choice of housing, including affordable housing to meet local need' which is an objective that also applies to Penarth and Llantwit Major and the development allocations there, it is considered acceptable to include the same or a similar bullet point for the Penarth and Llantwit Major area objectives.

Include new bullet point under Llantwit Major and Penarth Headings to read:

Provide for an appropriate level, range and choice of housing, including affordable housing to meet local need.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (37) - Land to the east of Bonvilston

Represor ID and details: ID-6145/1/1      John Hopkins

**Alternative Site**    ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Delete MG 2 (37) - Land to the East of Bonvilston.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-6146/1/2      Ceri Staziker

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6147/1/1 Mr G.Stickler & Landowners

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 due to phasing requirement. Phasing requirement should be removed to accord with PPW para. 2.5.1 and 2.5.2 (Development Plans). An increase in overall housing numbers is also needed to meet the need of the authority.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6147/2/1 Mr G.Stickler & Landowners

**Alternative Site** ASN080 - Land between Murch Crescent, Dinas Powys and Sully Road, Penarth (1) - Residential

**Representation Type** Object

#### Summary of Representation:

Representation promotes a new alternative site ASN080 - Land between Murch Crescent, Dinas Powys and Sully Road, Penarth for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6147/5/1 Mr G.Stickler & Landowners

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to SP 3 on the grounds the overall housing numbers are too low to achieve an adequate amount of housing for the Authority's need. The flexibility (5%) allowance for housing is also too low and needs to be increased. Amend by increasing overall housing numbers to keep up with demand and increase the flexibility allowance to provide a contingency for the plan period.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-6148/1/1      Mr David Williams & Mr Anthony Richards

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the overall housing numbers are too low to achieve an adequate amount of housing for the Authority's need. The flexibility (5%) allowance for housing is also too low and needs to be increased. Amend by increasing overall housing numbers to keep up with demand and increase the flexibility allowance to provide a contingency for the plan period.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

### Deposit Plan Policy - SP3 - Residential Requirement

Represor ID and details: ID-6148/2/1      Mr David Williams & Mr Anthony Richards

**Alternative Site**    ASN084 - Land adjacent to Redway Road and A48 Bonvilston - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation objects to the inclusion of site (ID: 6148/DP3) in SLA. Removal of proposed alternative site (ID: 6148/DP3) from designated SLA due to the minimal factors development would have on the surrounding area.

#### Council's Response(s):

The representation has been made in relation to the allocation of land to the west of Bonvilston for housing and the subsequent amendment by way of reduction, of the Special Landscape Area to encompass the additional housing allocation proposed for the LDP. The Council considers that the LDP identifies sufficient and appropriate housing land to meet the need identified over the plan period (Population and Housing Projections Background Paper 2013 refers). As such, there is no requirement to include additional land as identified to the west of Bonvilston as a housing allocation within the LDP and subsequent amendments to the identified SLA are therefore immaterial.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

Proposed Change

**Deposit Plan Policy - SP3 - Residential Requirement****Represor ID and details:** ID-6148/3/2      **Mr David Williams & Mr Anthony Richards****Alternative Site**      N/A**Representation Type**      Object**Summary of Representation:**

Objects to MG 1 as overall housing numbers are too low and need to be increased to meet the need of the Authority. This should include an increase in the contingency provision, to allow for more flexibility. A reduction in windfall sites is needed to ensure deliverability of the plan. Remove phasing requirement as too restrictive to development. Concerns with SP 3, MG 2 and MG 17.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-6148/3/3      Mr David Williams & Mr Anthony Richards

**Alternative Site**    ASN083 - Land between Redway Lane and A48, including Tudor Lodge, Bonvilston - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN083 - Land between Redway Lane and A48, including Tudor Lodge, Bonvilston for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-6148/3/4      Mr David Williams & Mr Anthony Richards

Alternative Site    ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type    Object

#### Summary of Representation:

Representation seeks an amendment to Policy MG2 Housing Allocations in order to allocate the proposed alternative site ASN083 - Land between Redway Lane and A48, including Tudor Lodge, Bonvilston for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-6148/3/5      Mr David Williams & Mr Anthony Richards

**Alternative Site**      ASA51 - Land between Redway Lane and A48, including Tudor Lodge, Bonvilston - Special Landscape Area - reduce designation

**Representation Type**      Object

#### Summary of Representation:

Amendment to SLA boundary to exclude new site being promoted at Redway Road, Bonvilston.

#### Council's Response(s):

The representation has been made in relation to the allocation of land adjacent to the A48/Redway Road for residential development and the subsequent amendment (reduction) of the Special Landscape Area so as to enable the additional housing allocation proposed. The Council considers that the LDP identifies sufficient and appropriate housing land to meet the identified need over the plan period and as such, there is no requirement to include additional sites as proposed. Consequential amendments to SLA as suggested are therefore irrelevant.

#### Officer Recommendation:

No Change Required

Proposed Change

### Deposit Plan Policy - SP3 - Residential Requirement

Represor ID and details: ID-6148/4/2      Mr David Williams & Mr Anthony Richards

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 1 as overall housing numbers are too low and need to be increased to meet the need of the Authority. This should include an increase in the contingency provision, to allow for more flexibility. A reduction in windfall sites is needed to ensure deliverability of the plan. Remove phasing requirement as too restrictive to development. Concerns with SP 3, MG 2 and MG 17.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN086 - Land South of Primrose Hill, Cowbridge for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6149/3/1      Goodbox Ltd.

**Alternative Site**    ASA04 - Land South of Primrose Hill, Cowbridge - Special Landscape Area - reduce designation

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the removal of a site on Primrose Hill, Cowbridge from the Special Landscape Area to enable its development for residential use.

#### Council's Response(s):

The representation has been made in relation to the allocation of land to the east of Cowbridge for housing and the subsequent amendment (reduction) of the Special Landscape Area to encompass the additional housing allocation proposed for the LDP. The Council considers that the LDP identifies sufficient and appropriate housing land to meet the identified need over the plan period and that these allocations are supplemented by other policy designations within the plan which collectively will meet the plans economic, social and environmental objectives. As such, there is no requirement to include the land identified to the east of Cowbridge as an additional housing allocation within the LDP and subsequent amendments to the identified SLA are therefore irrelevant.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-6149/4/1      Goodbox Ltd.

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the overall housing numbers are too low to achieve an adequate amount of housing for the Authority's need. The flexibility (5%) allowance for housing is also too low and needs to be increased. Amend by increasing overall housing numbers to keep up with demand and increase the flexibility allowance to provide a contingency for the plan period.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-6150/1/1      Teresa Norris

**Alternative Site**    ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 - Transportation

Representor ID and details: ID-6151/1/1 Jane Groves

Alternative Site ASN006 - Llysworney - Llysworney Bypass

Representation Type Object

#### Summary of Representation:

Representation proposes that the Llysworney Bypass is allocated within the Deposit LDP.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent specialist consultants to prepare a Transport Assessment (September 2013) to consider the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study seeks to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP appropriately identifies future highway infrastructure requirements as a result of the proposed site allocations. Notwithstanding the above, policy MG2 includes a housing allocation at Darren Farm which will provide for houses on the western edge of Cowbridge. The development of the site will be informed by a master plan/development brief and will deliver key local infrastructure including a new medium primary school and a new road on the western edge of the site running between the A48 and Llantwit Major Road which will alleviate pressure both in Cowbridge and at Llysworney. The suggested Llysworney highway scheme is therefore not considered to be required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Representor ID and details: ID-6152/1/1 Cecilia Hannigan-Davies

Alternative Site ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6154/1/1 Cheryl Way

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6154/1/2 Cheryl Way

**Alternative Site** ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (28) - Ardwyn, Penyturnpike Road, Dinas Powys

Represor ID and details: ID-6155/1/1 Mr A D Mills

**Alternative Site** ASD39 - MG 2 (28) - Ardwyn, Penyturnpike Road, Dinas Powys - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted. As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Represor ID and details: ID-6156/1/1 Mrs Alexandrina Ball

Alternative Site ASD20 - MG 2 (45) - Land off Sandy Lane, Ystradowen - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

**Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies****Represor ID and details:** ID-6157/1/5      **Mr & Mrs C J Wilkins****Alternative Site**    ASN048 - Castle Hill, Llanblethian - Residential**Representation Type**    Object**Summary of Representation:**

Promotes alternative housing allocation ASN048 - Castle Hill, Llanblethian for inclusion in the Deposit LDP

Objects to housing allocation (MG 2) in Cowbridge. Amend by changing to proposed site to the alternative sites suggested, The Limes, Cowbridge UDP Hous 1, River Walk, Cowbridge UDP Hous 1, British Legion Site, Cowbridge, (next to car park), Castle Hill, Llanblethian 0.5 15, North Road, Cowbridge. Actons Homes Site, Livestock Market, Cowbridge. Retirement homes. (Not concerned with MG 1)

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6158/1/1 Dwr Cymru Welsh Water and Mrs Susan Joseph & Mr Paul Roberts

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to MG 1 phasing requirement as it is too rigid and not flexible enough to accord with PPW para. 2.5.1 and 2.5.2 (Development Plans). Remove phasing requirement.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). ### Deposit Plan Policy - MG2 (37) - Land to the east of Bonvilston

Represor ID and details: ID-6159/1/1 Alex Karran

Alternative Site ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-6164/1/1      Andrew Maclehose

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted. As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-6165/1/1 Trevor Saunders

Alternative Site N/A

Representation Type Support

#### Summary of Representation:

Representation comments on the housing supply, the need for affordable housing and raises concerns over local infrastructure provision. Support for MG2.

#### Council's Response(s):

Comments are noted.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP3 - Residential Requirement

Represor ID and details: ID-6166/1/1      Mr Christopher White

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the Residential Requirement puts too much of the housing burden on the SE Vale. The road infrastructure is not capable to take on the influx of new housing development. Amend by moving development away from SE Vale and re-developing road infrastructure.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6168/1/1      Mr. Philip Harris

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-6168/1/2      Mr. Philip Harris

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6172/1/1 H.R.Anstee. P.Anstee, R.Anstee & G.Richards

Alternative Site ASN087 - Land to the South of Wenvoe - Residential

Representation Type Object

#### Summary of Representation:

Representation seeks the allocation of the Wenvoe Garden Centre site for residential use.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6172/2/1 H.R.Anstee. P.Anstee, R.Anstee & G.Richards

**Alternative Site** ASA54 - Land to the South of Wenvoe - Special Landscape Area - reduce designation to exclude site

**Representation Type** Object

#### Summary of Representation:

Representation seeks the removal of the site to the south of Wenvoe from the identified Special Landscape Area.

#### Council's Response(s):

The Special Landscape Areas (SLA) designated in the LDP has been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising the most up to date Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured by assessors acting on behalf of the then Countryside Council for Wales. The SLAs have been drawn to correspond with logical, permanent and robust boundaries and as a result may include areas of low evaluation or exclude areas of high evaluation in order to provide coherence and defensibility. SLA will therefore include a wide variety of land uses ranging from private gardens to business premises. The Council however considers that the SLA boundaries are based on robust and current information and that the deletion of the area identified from the SLA is unwarranted.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6173/2/1 JN & WD Johns Powell

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Amend the proposed phasing with start period 2011-2016 and total number of dwellings increased from 100 to 120.

#### Council's Response(s):

The Council is of the opinion that there is no justification for amending the indicative phasing schedule for site MG2 (37) Land East of Bonvilston as suggested, given that at the time of responding no formal planning application has been submitted in respect of the allocation that would indicate the suggested development completion rates would be achieved within the period 2011-16.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6173/3/1 JN & WD Johns Powell

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to Policy MD7 and proposes that the final sentence of the policy is amended to encourage as well as permit higher density residential development as it is considered that densities higher than 30 dph could also be appropriate for sites in minor rural settlements. Otherwise the representation generally agrees with the minimum standard specified.

#### Council's Response(s):

Policy MD7 sets minimum targets and does not set an upper limit for housing densities. As such it is not considered necessary to amend the policy to specifically encourage higher densities and the proposed change is not considered to be required to ensure the Plan is sound.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6173/4/1 JN & WD Johns Powell

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Concerns with paragraph 6.149 (MG 25 Public Open Space Allocations) and MG 2 (Housing Allocation ID: 37). Policy MG 2(37) seeks provision of open space within the allocated site that would cater to the whole Bonvilston community which has an identified shortfall in the current amount of open space. Within paragraph 6.149 (MG 25) there should be allowance for flexibility concerning developers of allocated sites to overcome shortfalls by creating open space on land already owned by the developer outside of the allocated site but still in the area used by the community.

#### Council's Response(s):

Policy MG25 identifies new open space requirements associated with new development where additional demand cannot be met by existing facilities. The supporting text at paragraph 6.149 is clear in that such new provision will be expected to be met on site wherever feasible but affords some flexibility on smaller sites which may be constrained and where the required provision may not be possible. The additional text as suggested by the repesor would remain specific to small sites and would therefore exclude in the view of the Council the 7.2 hectare site identified at Bonvilston for 120 dwellings. In relation to this specific site and the plans provided by the repesor for alternative open space provision, the Council considers that given the size of the site there should be no barriers to the provision of open space on site. Further the specific sites identified by the repesor are located on the other side of a major road to the majority of the main population and would be considered unsuitable for the provision of open space to facilitate the proposed development.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - LDP Strategy****Represor ID and details:** ID-6174/1/1      Liz Fidler**Alternative Site**    ASN007 - Land at Llandow - New Settlement**Representation Type**    Object**Summary of Representation:**

Representation objects to MG2 Minor Rural Settlement housing allocations and propose a new settlement at Llandow.

**Council's Response(s):**

In preparing its LDP, the Council is required to follow the legislative process for LDPs set out in Part 6 of the Planning and Compulsory Purchase Act 2004. A key stage in this process is the Pre Deposit Participation and Public Consultation on Strategic Options Stage (Regulation 14 &15), and places a requirement on the Council to prepare in partnership with key stakeholders a pre deposit document setting out the Council's vision, strategic options, preferred strategy and key policies that will provide the overall policy framework for the Deposit LDP.

In accordance with this requirement in May and July 2007, the Council held workshops with stakeholders on the potential strategy options for the Vale of Glamorgan. In total 9 strategic options were identified, including the development of a new settlement within the Vale of Glamorgan. These nine options were also the subject of a Sustainability Appraisal which concluded that of the 9 options identified, Option 5 (the current Deposit LDP Strategy) would provide the widest sustainability benefits.

On the basis of the findings of the Sustainability Appraisal, between January and February 2008 the Council publicly consulted on the LDP Draft Strategy document, which set out the Council's proposed vision, objectives and preferred growth strategy for the Vale of Glamorgan.

During this consultation, the Council received 210 representations to the Draft Preferred Strategy, and included the proposal of a further spatial option (8a), namely the addition of Llandow Newydd as the location of a new settlement alongside the preferred LDP strategy. In response to this proposal the Council undertook a further appraisal of the options, which concluded that the current LDP strategy provided the most sustainable option for the Vale of Glamorgan.

In addition to the above, in preparing the LDP, the Council is also guided by the policy requirements prescribed nationally, and primarily contained within Planning Policy Wales (PPW). This advises that local planning authorities should direct development to the sustainable locations with the overall aim of reducing the need to travel by locating development within existing urban areas or other locations which are or can be served by public transport. Furthermore in identifying land for future development PPW advises that local planning authorities firstly consider re-use of previous developed land and buildings within settlements, then settlement extensions and finally new development around settlements with good public transport links (Paragraph 9.28 refers).

Finally, in respect of new settlements, PPW indicates that "any proposals for new settlements should be promoted through, and fully justified in, the development plan. Plans should state clearly the contribution which developers will be expected to make towards the provision of infrastructure, community facilities and affordable housing. New settlements on greenfield sites are unlikely to be appropriate in Wales, and should only be proposed where such development would offer significant environmental, social and economic advantages over the further expansion or regeneration of existing settlements. (Paragraph 9.27)"

In this respect, in considering the proposed development of land at Llandow Airfield, the Council commissioned a review of the agricultural land quality of the undeveloped areas of which the proposed new settlement would occupy. This revealed that a significant area of the land 51ha falls within grade 3a agricultural land classification (best and most versatile classification), and a further 36 ha of 3b agricultural land.

**Deposit Plan Policy - LDP Strategy****Represantor ID and details:** ID-6174/1/1      Liz Fidler

In this regard PPW states that:

“In the case of agricultural land, land of grades 1, 2 and 3a of the Department for Environment, Food and Rural Affairs (DEFRA) Agricultural Land Classification system (ALC) is the best and most versatile, and should be conserved as a finite resource for the future. In development plan policies and development management decisions considerable weight should be given to protecting such land from development, because of its special importance. Land in grades 1, 2 and 3a should only be developed if there is an overriding need for the development, and either previously developed land or land in lower agricultural grades is unavailable, or available lower grade land has an environmental value recognised by a landscape, wildlife, historic or archaeological designation which outweighs the agricultural considerations. If land in grades 1, 2 or 3a does need to be developed, and there is a choice between sites of different grades, development should be directed to land of the lowest grade.”

In selecting sites for development, the Council has sought to clarify the agricultural quality of the sites allocated within the LDP, and has worked closely with the Welsh Governments Natural Environment and Agriculture Department to ascertain the quality of land for allocated sites. From this work the Council has minimised the loss of BMVA land. Additionally, Appendix 5 of the LDP identifies those sites where agricultural land has been verified by the Welsh Government, but where a further detailed agricultural land assessment is required to verify the grading of the land. The Council is therefore of the opinion that in identifying the housing allocations, it has sought to ensure that priority is given to brownfield developments, and where greenfield sites have been required these have been limited to those of lower quality, that is grade 3b and below consistent with the National Planning Policy Wales. Accordingly the Council are of the view that it is unnecessary to include a policy within the LDP for the protection of BMVA, as this would reiterate national planning policy.

On the basis of the above, the Council consider that it has fully considered all policy options when preparing the Deposit LDP, including satisfying the requirement of national policy when consider the suitability of a new settlement at Llandow Airfield, alongside other existing established settlements.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-6174/2/1 Liz Fidler

Alternative Site ASN006 - Llysworney - Llysworney Bypass

Representation Type Object

#### Summary of Representation:

MG 16 should include the proposal for a Llysworney By-pass as the village road network is over strained by use by heavy vehicles such as lorries. The proposals was identified in the previous UDP and it is believed that none of the deciding factors have changed therefore the provision of the By-pass should still be included.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent specialist consultants to prepare a Transport Assessment (September 2013) to consider the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study seeks to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP appropriately identifies future highway infrastructure requirements as a result of the proposed site allocations. Notwithstanding the above, policy MG2 includes a housing allocation at Darren farm which will provide for houses on the western edge of Cowbridge. The development of the site will be informed by a master plan/development brief and will deliver key local infrastructure including a new medium primary school and a new road on the western edge of the site running between the A48 and Llantwit Major Road which will alleviate pressure both in Cowbridge and at Llysworney. The suggested Llysworney highway scheme is therefore not considered to be required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-6174/2/2 Liz Fidler

Representation Type Object

### Summary of Representation:

MG 16 should include the proposal for a Llysworney By-pass as the village road network is over strained by use by heavy vehicles such as lorries. The proposals was identified in the previous UDP and it is believed that none of the deciding factors have changed therefore the provision of the By-pass should still be included.

### Council's Response(s):

In support of the Deposit LDP the Council engaged independent specialist consultants to prepare a Transport Assessment (September 2013) to consider the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study seeks to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP appropriately identifies future highway infrastructure requirements as a result of the proposed site allocations. Notwithstanding the above, policy MG2 includes a housing allocation at Darren farm which will provide for houses on the western edge of Cowbridge. The development of the site will be informed by a master plan/development brief and will deliver key local infrastructure including a new medium primary school and a new road on the western edge of the site running between the A48 and Llantwit Major Road which will alleviate pressure both in Cowbridge and at Llysworney. The suggested Llysworney highway scheme is therefore not considered to be required.

### Officer Recommendation:

No Change Required

**Alternative Site**    ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

**Representation Type**    Object

### Summary of Representation:

Objection to the Sustainability Appraisal of Site MG 2 (19) - Land adjoining St. Athan Road, Cowbridge and proposes its deletion.

### Council's Response(s):

The Council is of the opinion that the Sustainability Appraisal of the site presents an accurate representation of the site's performance against the Council's adopted sustainability criteria. This has been informed by an assessment of the range of services and facilities available, information provided to the Council in respect of transport, flood risk, ecology and biodiversity, land quality and archaeology as well as site visits undertaken by Council officers. Additionally background information produced has informed the LDP, including Housing Supply Background Paper (2013), Sustainable Transport Assessment (2013), Transport Assessment of LDP Proposals (2013), Community Facilities Assessment (2013), Plan Preparation and Assessment of Flood Risk (2013) and Identification of SINC's (2013).

**Representation Type** Object

#### Summary of Representation:

Objection to the Sustainability Appraisal of MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston and proposes its deletion.

#### Council's Response(s):

The Council is of the opinion that the Sustainability Appraisal of the site presents an accurate representation of the site's performance against the Council's adopted sustainability criteria. This has been informed by an assessment of the range of services and facilities available, information provided to the Council in respect of transport, flood risk, ecology and biodiversity, land quality and archaeology as well as site visits undertaken by Council officers. Additionally background information produced has informed the LDP, including Housing Supply Background Paper (2013), Sustainable Transport Assessment (2013), Transport Assessment of LDP Proposals (2013), Community Facilities Assessment (2013), Plan Preparation and Assessment of Flood Risk (2013) and Identification of SINC's (2013).

Additionally the representation seeks the deletion of a site within the Deposit LDP. Since the consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted. As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

### Deposit Plan Policy - SP6 - Retail

Representor ID and details: ID-6175/1/1      Sainsbury's Supermarkets Ltd (SSL)

Alternative Site      ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail

Representation Type      Object

#### Summary of Representation:

Representation promotes a retail allocation for a new convenience supermarket near Llantwit Major and comments on the need for the allocation of a retail development within the settlement boundaries in accordance with planning policy objectives.

#### Council's Response(s):

The Council's retail planning study identifies that while Llantwit Major has a significant resident convenience market there is limited scope for additional headroom and identifies additional provision of 386 m<sup>2</sup> net, rising to 468m<sup>2</sup> by 2026. In respect of comparison goods the study concluded that Llantwit Major acted as a rural centre or local centre which did not contribute significantly to comparison turnover. Therefore the Council considers that the Deposit LDP (policies SP6, MG3) adequately provide for the identified retail need over the Plan period and no further retail development as proposed by the representor are considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG18 (2) - North West of Sully

Represor ID and details: ID-6178/1/1      Mr Gary McDonald

**Alternative Site**    ASA47 - Land between Penarth and Dinas Powys - Green Wedge - reduce designation - remove site from designation

**Representation Type**    Object

#### Summary of Representation:

Representation objects to the green wedge between Dinas Powys and Penarth and suggests that part of the area should be designated as an economic development corridor to include a site being promoted by the repesor.

#### Council's Response(s):

As background evidence to the LDP the council commissioned an employment land study from independent consult BE Group (September 2013). The study recommended that there is no need for the Council to identify further land allocations for B1 (a, b and c uses), B2 and B8 uses (other than those already put forward) in the emerging LDP. Similarly, the Council has assessed the residential requirements of the Vale of Glamorgan over the plan period and has allocated land to meet this need. No additional housing allocations are considered necessary. Therefore, in view of the above and given the sensitive nature of the land in question the retention of the green wedge is considered appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG18 (2) - North West of Sully

Represor ID and details: ID-6178/1/2      Mr Gary McDonald

**Alternative Site**      ASN089 - Land between Penarth and Dinas Powys - Employment

**Representation Type**      Object

#### Summary of Representation:

Representation promotes an alternative employment area- ASN089 - Land between Penarth and Dinas Powys

#### Council's Response(s):

The Council are of the view that there is no requirement for additional employment land above that identified within the Deposit LDP, this is consistent with the findings of the Council's Employment Land and Premises Study (2013) paragraph 10.8 states - It is also recommended that there is no need for the Council to identify further land allocations for B1...B2 and B8 uses (other than those already put forward) in the emerging LDP.

### Deposit Plan Policy - MG2 (5) - Land to the east of Eglwys Brewis

Represor ID and details: ID-6181/1/1      Julian Woodman

**Alternative Site**    ASD18 - MG 2 (5) - Land to the east of Eglwys Brewis - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

**Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan****Represor ID and details:** ID-6184/1/1      Eluned Parrott A.M    National Assembly for Wales**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Comments on concerns over out of date data for population growth forecasts.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

**Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan****Represor ID and details:** ID-6184/1/10 Eluned Parrott A.M National Assembly for Wales**Alternative Site** ASD23 - MG 9 (2), MG 10 - St Athan - Cardiff Airport Enterprise Zone - Delete Site**Representation Type** Object**Summary of Representation:**

Object to MG 10 on the grounds a master plan of the allocation should be released before the allocated land is included in the LDP to allow residence of the area to have an informed decision on the impact of such a development. Without such evidence the MG 10 allocation should be deleted.

**Council's Response(s):**

The LDP identifies the land at MOD St Athan – Cardiff Airport as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. A Strategic Development Framework for the St Athan and Cardiff Airport Enterprise Zone is currently being prepared by the Enterprise Zones board to advise Welsh Government. Further details will be included as part of any future master plan for the Enterprise Zones and strategic sites.

Given its regional importance, the wider economic benefits of the site and the development framework which provides further details of the proposed land use, the Council consider that the Cardiff Airport – St Athan Enterprise Zone should not be amended.

Although the development framework has yet to be published, there have been additional studies undertaken to inform the framework. For example, The Gateway Wales - Cardiff Airport Rail Link Feasibility Study was prepared in November 2011 by Atkins. This is a joint venture comprising Legal & General and Hines UK who are seeking to construct a new station at Cardiff International Airport together with a new rail spur approximately 2.2km in length, which will link the airport directly to Cardiff Central station via the Vale of Glamorgan (VOG) line.

The study concluded that a track alignment can be achieved which is in line with Network Rail standards and can achieve a linespeed of 30mph. It has also shown that there is sufficient capacity in the existing timetable to allow a service frequency of 4 trains per hour from Cardiff Central station to a new Cardiff Airport Station. This new rail link direct to Cardiff Airport would provide a major infrastructure project of national importance. The study recommended further feasibility work be undertaken to consider other railway disciplines, such as signalling, telecomms, civils, geotechnics, environmental/ecology etc. as well as ground investigations, stakeholder engagement and a detailed timetable study.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6184/1/11 Eluned Parrott A.M National Assembly for Wales

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Comments on contradictions between Managing Development policies specifically MD 8 with Managing Growth Policies such as MG 1 (housing supply in The Vale of Glamorgan). Concerns over sites with extant planning permission being on greenfield sites.

#### Council's Response(s):

Comments are noted. Policy MG 1 (Housing Supply in the Vale of Glamorgan) considers the provision that sites with extant planning permission will make during the Plan period (also known as 'committed site'). The policy also sets out other elements that are considered will contribute towards housing land supply.

As these sites have planning permission, all planning and environmental issues have already been formally considered under the existing planning policy framework and the permissions cannot be reconsidered. Once adopted the LDP policies will be applied to any future planning applications on sites without planning permission. Where currently extant planning permissions lapse, any material changes, such as the adoption of updated local polices, will be considered in applications for their renewal.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-6184/1/2 Eluned Parrott A.M National Assembly for Wales

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representation seeks the removal of the site at Leckwith from the SINC and the SLA designation of the LDP.

#### Council's Response(s):

The Special Landscape Areas (SLA) designated in the LDP has been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising the most up to date Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured by assessors acting on behalf of the then Countryside Council for Wales. Similarly, the information utilised to designate the Sites of Importance for Nature conservation designations is current and robust and accurately reflects the situation of important nature conservation sites within the Vale of Glamorgan. Therefore it is considered that the removal of the site designations as suggested is not warranted and would undermine the objectives of the Deposit Plan. In the event of the Council receiving a planning application for the site in the future, the application would be considered against the adopted development plan at that time and all issues relating to the site including its landscape and ecological impacts would be considered.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG17 (2) - Upper & Lower Thaw Valley

Representor ID and details: ID-6186/1/2      Tim Gent

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks an amendment to policy MG 17 encouraging development that would result in the improvement of the appearance of the land. Allowing for exceptions to the designation of SLAs so development can be proposed.

#### Council's Response(s):

The Special Landscape Areas (SLA) designated in the LDP has been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured. Similarly, the information utilised to designate the Sites of Importance for Nature conservation designations is current and robust and accurately reflects the situation of important nature conservation sites within the Vale of Glamorgan. Therefore it is considered that changes as proposed would substantially reduce the effectiveness of the policy and result in the loss of or adverse impacts to such sites and/or designations. In the event of the Council receiving a planning application for the site in the future, the application would be considered against the adopted development plan at that time and all issues relating to the site would be considered.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG17 (2) - Upper & Lower Thaw Valley

Representor ID and details: ID-6186/1/3 Tim Gent

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to policy MD1 to provide flexibility in assessing windfall development.

#### Council's Response(s):

Policy MD1 provides a clear and comprehensive set of criteria against which development proposals will be directed and ensures that future development proposals accord with the overarching LDP strategy. The proposed changes are sought in order to accommodate a site that is being promoted by the representor; the site in question has been considered through the LDP candidate site assessment process and found to not be compatible to the LDP strategy.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG17 (2) - Upper & Lower Thaw Valley

Representor ID and details: ID-6186/1/4 Tim Gent

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to the land at Leckwith Quay being designated as a SINC (MG 19 Sites of Importance for Nature Conservation) in the LDP, and should not restrict positive developments within the Vale. Representation seeks an amendment to the SINC to exclude land at Leckwith Quay.

#### Council's Response(s):

The Sites of Importance for Nature Conservation (SINC) designations contained within the Deposit LDP have been identified according to guidance published by the Wales Biodiversity Partnership ('Wildlife Sites Guidance Wales: A Guide to Develop Local Wildlife Sites Systems in Wales') which was adopted by the Vale of Glamorgan Council in 2009 and which provides a robust set of criteria against which all potential SINC could be assessed. The 2013 SINC review survey builds on previous SINC identification works which commenced in 1999 and the Council therefore considers that the SINC designations identified on the LDP Proposals Map are based on a robust evidence base which accurately reflects locally important nature conservation sites within the Vale of Glamorgan. The Council therefore considers that the deletion of the SINC site is unjustified.

The Council considers that while the intention of Policy MG19 is clear, the supporting text of paragraph 6.126 allows for flexibility in its application in instances where the benefits of a development outweigh the importance of the SINC. In such instances mitigation will be required to compensate for the adverse impact of the development on the SINC. Issues relating to compensatory measures and habitat loss are covered in detail in the councils Supplementary Planning Guidance on Biodiversity and Development which would be a material consideration in the assessment of any future development proposals. Therefore, the proposed changes are not considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG17 (2) - Upper & Lower Thaw Valley

Representor ID and details: ID-6186/1/5 Tim Gent

**Alternative Site** ASA58 - Land at Leckwith Bridge - Sites of Importance for Nature Conservation - reduce designation

**Representation Type** Object

#### Summary of Representation:

Objects over the land at Leckwith Quay site being in an SLA (MG 17 Special Landscape Areas) and SINC (MG 19 Sites of Importance for Nature Conservation) in the LDP. Should not be restrictive to positive developments within the Vale. Amend site designations to exclude land at Leckwith Quay.

#### Council's Response(s):

The Sites of Importance for Nature Conservation (SINC) designations contained within the Deposit LDP have been identified according to guidance published by the Wales Biodiversity Partnership ('Wildlife Sites Guidance Wales: A Guide to Develop Local Wildlife Sites Systems in Wales') which was adopted by the Vale of Glamorgan Council in 2009 and which provides a robust set of criteria against which all potential SINC could be assessed. The 2013 SINC review survey builds on previous SINC identification works which commenced in 1999 and the Council therefore considers that the SINC designations identified on the LDP Proposals Map are based on a robust evidence base which accurately reflects locally important nature conservation sites within the Vale of Glamorgan. The Council therefore considers that the deletion of the SINC site is unjustified.

Similarly, the Special Landscape Areas (SLA) designated in the LDP have been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured. Removal of the site from the SLA is therefore not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Represor ID and details: ID-6187/1/1 Mrs Enid Evans

**Alternative Site** ASA10 - Land at Sycamore Farm, Bonvilston - Residential - extend allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (37) - Land to the east of Bonvilston

Representor ID and details: ID-6188/1/1      Rebecca Watkins

Alternative Site    ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-6189/1/1      Huw Tomlinson

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted. As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (44) - Land adjacent to St Brides Road, Wick

Represor ID and details: ID-6190/1/2 Denise & Tony Cooke

**Alternative Site** ASN090 - Land to the West of Wick - Residential - affordable housing

**Representation Type** Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN090 - Land to the West of Wick within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-6192/1/1 Mr Ayng, Mr O'Leary & Mr Best

Alternative Site ASN091 - Land at Beach Road, Sully - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN091 - Land at Beach Road, Sully for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. Representor ID and details: ID-6192/2/1 Mr Ayng, Mr O'Leary & Mr Best

Alternative Site ASA46 - Land at Beach Road, Sully - Green Wedge - reduce designation

Representation Type Object

#### Summary of Representation:

Representation seeks the amendment of the green wedge designation MG18(6) to exclude a site at Beach Road, Sully.

#### Council's Response(s):

The representation seeks the exclusion of the site at Sully from the green wedge designation in order to enable the designation of the site as a housing allocation. The LDP allocates sufficient and appropriate housing land to meet the need identified over the plan period while seeking to ensure a balance between development and the protection of the environmental qualities of the Vale of Glamorgan. In this regard, the sites identified in the LDP have been assessed taking into account their relevant constraints and merits and the contributions that they can make to deliver the aims and objectives of the Deposit Plan. In view of the above, the Council considers that the site identified at Sully is not required to meet the housing needs of the LDP and that any subsequent amendment to the designated green wedge in this area is unwarranted.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-6199/1/1 Marie Claire Williams

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to policy SP 3 on the grounds the residential requirement is based on out of date WAG projections from 2008. Amend by re-evaluating the residential requirement using the recent WAG 2011 projections.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MD6 - Development within Minor Rural Settlements

Represantor ID and details: ID-6200/1/1      Johnathan Powell

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks the deletion of criteria 3 of policy MD6 referring to "unacceptable impact" on the grounds that this would stifle development within Minor Rural Settlements.

#### Council's Response(s):

Policy MD6 recognises the importance of providing for small scale sensitive development that supports the viability vitality of rural villages, that also respects their individual character. Consequently, the Council is of the view that policy MD6 strikes the correct balance in meeting this objective, and any relaxation in the wording of the policy as suggested would be contrary to the overall aim of the policy and the wider LDP objectives.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD6 - Development within Minor Rural Settlements

Represor ID and details: ID-6200/2/1      Johnathan Powell

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation objects to SP10 (Built and Natural Environment) as it is considered the policy does not follow national policy. It does not draw a distinction between statutory and local designations and should distinguish between different levels of designation. It is considered the policy is superfluous and the representation seeks to delete the Policy.

#### Council's Response(s):

Policy SP10 (Built and Natural Environment) is a strategic policy which emphasises the importance that the Council places on all of the natural and built environmental assets within the Vale of Glamorgan and it is considered appropriate to highlight these assets within a strategic policy.

Policy MD10 Promoting Biodiversity outlines how new development proposals that impact upon biodiversity assets will be assessed and whether mitigation or compensatory measures will be required. In assessing new development proposals appropriate distinctions will be made between European and National designations and locally identified sites. The deletion of Policy SP 10 is therefore not considered to be appropriate as the strategic policy does not seek to embellish or repeat European or national policy but merely to recognise and highlight the importance of such assets that exist in the Vale of Glamorgan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD6 - Development within Minor Rural Settlements

Represor ID and details: ID-6200/3/1      Johnathan Powell

**Alternative Site**    ASA62 - Upper Thaw Valley - Special Landscape Area - reduce designation

**Representation Type**    Object

#### Summary of Representation:

Representation suggests that the designation of SLA within the Vale of Glamorgan is not based on a robust and credible evidence base and that the SLA should be reviewed.

#### Council's Response(s):

The Special Landscape Areas (SLA) designated in the LDP has been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising the most up to date Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured by assessors acting on behalf of the then Countryside Council for Wales. Therefore the Council considers that the SLAs designated within the Deposit LDP are based on robust and current information and that the reconsideration of SLA as suggested either in whole or to exclude the site identified in Graig Penllyn is unwarranted.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD6 - Development within Minor Rural Settlements

Represor ID and details: ID-6200/4/1      Johnathan Powell

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation request that the Council should undertake a review of its affordable housing viability study, and objects to the 1-5 dwelling threshold.

#### Council's Response(s):

The Council has undertaken a review of its initial Affordable Housing Viability Appraisal and on the basis of this review the Council propose to amend Policy MG4 to reflect the recommendations of the report. Further information on this is available within the Vale of Glamorgan Viability Update Report (2014).

The requirement for contributions towards affordable housing provision on sites creating a net increase of 1 or more dwellings prescribed within Policy MG4 is based on robust assessment of development viability across the Vale of Glamorgan. This assessment is set out in the "Provision of Viability and Policy Advice of Affordable Housing, Small Sited and Commuted Sums" background paper (September 2013). Where site viability is disputed the Council will require the developer to undertake a full and robust development viability assessment to support their case that the site cannot support the affordable housing contribution specified within policy MG4. Additionally, the most recent review of the Council's viability evidence also considered small site viability and the findings maintain that affordable housing contributions are achievable on smaller sites. These contributions are therefore considered to be justified for this scale of development and no changes are proposed to the thresholds within the policy.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD6 - Development within Minor Rural Settlements

Represor ID and details: ID-6200/5/1      Johnathan Powell

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation seeks the rewording of policy MG19 to accord with PPW.

#### Council's Response(s):

While the comments of the repesor are noted, the Council considers that the proposed amendments do not enhance the existing wording of Policy MG19 and that the first sentence of paragraph 6.126 accurately reflects the intention of the policy which is to prevent development which would have an adverse impact on SINC sites. It is considered that the supporting text allows sufficient flexibility for development where the benefits of that development are considered to outweigh the importance of the SINC and this could be a material consideration in the determination of any future planning application. Therefore, the proposed changes are not considered to be required to ensure the soundness of the Plan.

Notwithstanding the above, the Council considers that paragraph 6.126 could be amended to clarify the cross reference to Policy MD10 and the consideration of development proposals which adversely affect SINC's under the policy for clarity.

Amend final sentence of paragraph 6.126 to read:

Development proposals which affect SINC's adversely impact on locally identified sites will be assessed in accordance with Policy MD10 and the same overriding need justification principles will be applied as for European or National sites i.e. the need for the development must outweigh the biodiversity interest of the site and that development could not be located elsewhere. In such cases, compensation/mitigation will be required in accordance with Policy MD 10. However, for locally identified sites their emphasis will reflect the scale of the development proposal and the local status of the site.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MD6 - Development within Minor Rural Settlements

Representor ID and details: ID-6200/5/2      Johnathan Powell

**Alternative Site**    ASA34 - Land North of Graig Penllyn - Sites of Importance for Nature Conservation - reduce designation

**Representation Type**    Object

#### Summary of Representation:

Representation objects to the designation of Coed Mansel as a SINC. Not been justified to the criteria of Planning Policy Wales paragraph 5.3.11 (Conserving and improving Natural Heritage and the Coast) as it is not based on a formal scientific assessment of the nature conservation, landscape or geological value of the site. Amend to exclude site from SINC.

#### Council's Response(s):

The Sites of Importance for Nature Conservation (SINC) designations contained within the Deposit LDP have been identified according to guidance published by the Wales Biodiversity Partnership ('Wildlife Sites Guidance Wales: A Guide to Develop Local Wildlife Sites Systems in Wales') which was adopted by the Vale of Glamorgan Council in 2009 and which provides a robust set of criteria against which all potential SINC could be assessed. The 2013 SINC review survey builds on previous SINC identification works which commenced in 1999 and the Council therefore considers that the SINC designations identified on the LDP Proposals Map are based on a robust evidence base which accurately reflects locally important nature conservation sites within the Vale of Glamorgan. The Council therefore considers that the deletion of the SINC site is unjustified and that no changes in this respect are required to ensure the soundness of the Plan.

Similarly, the Special Landscape Areas (SLA) designated in the LDP have been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured. Removal of the site from the SLA is therefore considered to be inappropriate. The Council therefore considers that the designations identified within the Deposit LDP have been defined utilising strong and robust evidence and nationally agreed methodologies and changes as proposed by the representor are therefore unwarranted.

No Change Required

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Represor ID and details: ID-6201/1/1 Steven Kavanagh

Alternative Site ASD7,9 - Darren Farm and Link Road

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-6204/1/1      Dr Sharon Hopkins

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

Support for the LDP Strategy and the Plan's policies. Representation also provides general comment on the provision of primary, community and secondary care services to serve the needs of the Vale of Glamorgan resulting from changes in the population, and the need for future joint work in the planning of future services, particularly in areas where new housing is planned.

#### Council's Response(s):

Comments noted and support welcomed. Policy MD4 includes Healthcare Facilities amongst the list of community infrastructure that will be sought where appropriate from developments and welcomes involvement from the health sector in discussions about planning for infrastructure to meet the needs of the Vale of Glamorgan's population.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - LDP Strategy****Represantor ID and details:** ID-6204/1/2      **Dr Sharon Hopkins****Alternative Site**    ASA03 - Land at Llandough Hospital - Green Wedge - reduce designation to exclude site**Representation Type**    Object**Summary of Representation:**

Representation seeks the removal of the old petrol filling station at Llandough from the green wedge designation MG18(1).

**Council's Response(s):**

The Special Landscape Areas (SLA) designated in the LDP has been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured. In defining boundaries, robust and permanent features have been utilised and it is accepted that in some areas land and landscapes of variable quality may have been included. However, the supporting text to policy MG18 clearly states that the designation of an SLA is not intended to prevent development but to ensure that where development is acceptable under other policies within the plan, careful consideration is given to design, siting and layout etc. to ensure that the impact of any future development on the SLA is minimised. Therefore, the Council considers that the boundary of the Cwrt-yr-Ala Basin SLA (MG 17(6)) is appropriate and does not consider that an amendment to exclude the identified site is warranted.

In respect of excluding the site from the green wedge, green wedges have been identified under policy MG18 of the Deposit LDP to prevent development which prejudices the open nature of land and the coalescence of settlements. Their designation, although non-statutory, adds an additional layer of protection to those areas where it is considered that development pressure exists or will exist during the lifetime of a development plan. The Council considers that the attractiveness of the area to developers and the need for a green wedge is evidenced by the high number of candidate sites that were submitted for consideration by the Council in this location. Further, the openness of the land is also threatened by the progressive expansion of the UHB Llandough Hospital site. Similar to SLA, green wedge boundaries seek to utilise robust and defensible features and there may be instances where parcels of land are included where subject to the other policies within the plan, development which does not prejudice the open nature of the land may be permitted. Therefore, the Council considers that the boundaries of the green wedge are appropriate and do not warrant amendment as suggested by the repesantor.

Settlement boundaries have been defined around the key and service centre settlements in order to encourage the reuse of land and buildings and to prevent the spread of new development into the open countryside (policy MD 5 refers). Policy MD 5 allows for small scale development or affordable housing outside of the identified settlement boundary where it would respond to the local context and accord with policies MD2 and MD3 and a definition of 'rounding off' is provided. It is unreasonable to believe that in defining residential settlement boundaries all development will be included and there will invariably be minor anomalies as boundaries are once again drawn to what are perceived to be robust and permanent boundaries. In this regard, the council considers that the policies of the Deposit LDP offer enough flexibility to future development outside of defined residential settlement boundaries subject to the criteria of other policies of the plan and does not consider that an amendment of the settlement boundary as suggested by the repesantor is warranted.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - LDP Strategy

**Representor ID and details:** ID-6204/1/3      **Dr Sharon Hopkins**

**Alternative Site**    ASA16 - Land at Llandough Hospital - Special Landscape Area - reduce designation to exclude site

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the removal of the old petrol filling station in Llandough from the Special Landscape Area designation.

#### Council's Response(s):

The Special Landscape Areas (SLAs) designated in the LDP have been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising the most up to date Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured by assessors acting on behalf of the then Countryside Council for Wales. The SLAs have been drawn to correspond with logical, permanent and robust boundaries and as a result may include areas of low evaluation or exclude areas of high evaluation in order to provide coherence and defensibility. The Council therefore considers that amendments to the SLA boundaries as suggested are unwarranted. Similarly, the Green Wedge designations have been drawn to correspond with robust and defensible boundaries and may therefore include areas that may be appropriate for future development e.g. small brownfield sites. The amendment to the green wedge designation as proposed is therefore unwarranted.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-6204/1/4      Dr Sharon Hopkins

**Alternative Site**      ASA15 - Land at Llandough Hospital - Residential Settlement Boundary - extend designation to include site

**Representation Type**      Object

### Summary of Representation:

Representation seeks an amendment to the residential settlement boundary to include alternative site ASA15 - Land at Llandough Hospital.

### Council's Response(s):

The representation has been made in relation to the inclusion of land adjoining Llandough Hospital within the residential settlement boundary and for its future consideration for housing within the LDP. In this regard the Council are of the view that the LDP identifies sufficient and appropriate housing land and there is no requirement to include the area of land identified. Additionally, the settlement boundary as drawn follows a logical identified boundary- in this case Penland Road and Llandough Hospital.

### Officer Recommendation:

No Change Required

**Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)****Represor ID and details:** ID-6236/1/1      Taylor Wimpey UK Ltd**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Representation seeks the deletion of the phasing table in Appendix 4.

**Council's Response(s):**

The representation objects to the proposed phasing in Appendix 4 and Policy MG1 and raises a number concerns relating to the proposed housing supply.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6236/10/1 Taylor Wimpey UK Ltd

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to Appendix 5 to clarify the open space requirements for site MG2 (33) - Land north of the Railway Line, Rhoose.

#### Council's Response(s):

The site is the subject of an extant planning consent; the matter of open space provision raised within the representation has been considered by the Council in its decision to grant permission for the development, therefore the Council is of the view that no change to the LDP is required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6236/10/2 Taylor Wimpey UK Ltd

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to policy MD3 - Design of New Development to include consideration of existing open space provision within the vicinity of new development sites.

#### Council's Response(s):

Criterion 10 of policy MD3 - Design of New Development seeks to secure open space in accordance with the Council's approved standards of provision. In referencing the relevant standards, the Council considers that the existing levels of provision in an area will clearly form a consideration of the open space provision required from any new development. Notwithstanding the above, all housing developments will be expected to make provision for children's play facilities on site wherever feasible however on constrained sites financial contributions may be acceptable to enhance or provide open space provision off site.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6236/11/1 Taylor Wimpey UK Ltd

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to policy MD7 to allow flexible approach to housing densities.

#### Council's Response(s):

Policy MD7 sets minimum site densities which reflect that used by the Council to determine the size of development anticipated on allocated sites. It is considered appropriate for the LDP to contain this policy to enable the Council to meet its housing requirement through the sustainable use of land. The policy acknowledges that there may be occasions where the requisite thresholds could be lower, for example, where there would be an unacceptable impact on the character of the area. Notwithstanding this, the densities set relate to net developable densities which exclude land required for other infrastructure not directly associated with the development such as major distributor roads, community facilities, mixed uses and other ancillary infrastructure provisions. It is considered that the policy contains sufficient flexibility and the density standards used are appropriate for new residential developments within the Vale. Therefore, the proposed change is not considered necessary to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-6236/13/1 Taylor Wimpey UK Ltd

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to MG 1 due to phasing as it would be unable to deliver housing to the most appropriate areas of the Vale. Site 46 (MG 2 Housing Allocations) is a more viable site than others and should be allocated for development in the first 2 periods of the plan. Remove appendix 4 and remove reserve site status of site 46 (MG 2).

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

Representation Type Object

#### Summary of Representation:

Representation seeks amendments to the site specific details of site MG2(46) in Appendix 5.

#### Council's Response(s):

The representation objects to the Plan and the proposed use of reserve site phasing. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues. Further details can be found in the Housing Provision background paper (2015).

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. As part of the Focused Changes it is anticipated that site MG2 (46) would come forward for completion between 2016 and 2026.

**Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)****Represor ID and details:** ID-6236/3/1      Taylor Wimpey UK Ltd**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Representation objects to policy MG 1 due to 5% flexibility being too low as Welsh Assembly Government suggest 10%. Phasing within MG 1 not justified in reference to PPW para 2.5.1 and 2.5.2 (Development Plans). Housing Allocation should be increased to 10945 dwellings without reserve sites over the plan period. Remove concept of reserve sites, increase housing allocation and flexibility.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. #### Summary of Representation:

Representation objects to the uses of minimum affordable housing percentages and this should be amended to a target affordable housing requirement. Comments are also made in respect of the 1-5 dwelling threshold indicating that this too low.

#### Council's Response(s):

The Council has reviewed its Affordable Housing Viability Assessment (2014) in response to a number of representations received on the Deposit LDP. The updated evidence confirms that residential development viability remains strong within the Vale of Glamorgan and indicates that higher affordable housing targets than those identified in the Deposit LDP are justified in higher value areas. In light of the updated evidence it is proposed to amend the percentage requirements identified in Policy MG 4 to better reflect development viability across the Vale of Glamorgan. This change reflects the study's recommendations that affordable housing targets for 35% in Llantwit Major, Rhoose and St Athan, and 40% in the remainder of the Vale of Glamorgan (with the exception of Barry), would be appropriate.

These percentage requirements take account of up-to-date development costs and market values and are therefore considered to be robust and justifiable. However, in response to representations from the development industry and Welsh Government it is recognised that the policy could make reference to individual site viability to enable schemes to be considered where the target level sought cannot be achieved due to development viability issues. In this respect, the updated report recommends that the Council should amend policy MG4 so that the affordable housing requirement is set as a targeted requirement, rather than a minimum, to enable land value to be considered against local market circumstances. This approach recognises that higher affordable housing provisions are achievable in the areas identified in the LDP and allows for viability evidence to be considered in instances where there are development viability issues without inhibiting development from coming forward.

Comments regarding alternative forms of intermediate affordable housing provision, which may not fall within the TAN2 definition, are noted. Alternative methods of affordable housing delivery will be considered within an updated Affordable Housing SPG which will undergo public consultation in due course. As such no further changes are considered necessary to ensure the soundness of the Plan.

Amend Policy MG 4 to read as follows:

#### POLICY MG 4 - AFFORDABLE HOUSING

RESIDENTIAL DEVELOPMENTS (INCLUDING MIXED USE SCHEMES) WILL BE REQUIRED TO CONTRIBUTE TO MEETING AFFORDABLE HOUSING NEED AND SHOULD MEET THE LEVELS OF AFFORDABLE HOUSING SET OUT BELOW:

30% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 5 OR MORE UNITS IN:

- BARRY;

35% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 5 OR MORE UNITS IN:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-6236/5/1      Taylor Wimpey UK Ltd

- PLANTWIT MAJOR ;
- HOOSE; AND
- ST ATHAN.

40% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 1 DWELLING OR MORE; OR THE CONVERSION OF EXISTING BUILDINGS RESULTING IN A NET GAIN OF 2 OR MORE DWELLINGS IN:

- ROWBRIDGE;
- DINAS POWYS;
- LANDOUGH;
- ENARTH;
- SULLY;
- VENVOE;
- THE MINOR RURAL SETTLEMENTS; AND
- THE RURAL VALE OF GLAMORGAN.

THE PROVISION OF AFFORDABLE HOUSING WILL BE NEGOTIATED ON A SITE-BY-SITE BASIS TAKING INTO ACCOUNT THE EVIDENCED VIABILITY OF THE DEVELOPMENT. CONTRIBUTIONS WILL BE MADE IN ACCORDANCE WITH THE REQUIREMENTS SET OUT IN THE COUNCIL'S AFFORDABLE HOUSING SPG, WHICH PROVIDES GUIDANCE ON VIABILITY AND THE CIRCUMSTANCES UNDER WHICH CONTRIBUTIONS MAY BE VARIED OR REVIEWED.

#### Summary of Representation:

Representation seeks to amend Policy MD3 to provide flexibility in the provision of open space in order to take account of situations where there may be an over supply.

#### Council's Response(s):

Criterion 10 of policy MD3 - Design of New Development seeks to secure open space in accordance with the Council's approved standards of provision. In referencing the relevant standards, the Council considers that the existing levels of provision in an area will clearly form a consideration of the open space provision required from any new development. Notwithstanding the above, all housing developments will be expected to make provision for children's play facilities on site wherever feasible however on constrained sites financial contributions may be acceptable to enhance or provide open space provision off site.

#### Officer Recommendation:

No Change Required

Representation Type Object

#### Summary of Representation:

Representation objects to Policy MD7 and seeks its deletion on the grounds that it is inappropriate to contain a policy requirement for residential density as, for example, known site constraints may warrant lower residential densities. Alternatively the representation seeks an amendment to remove the requirement that site constraints were previously unknown in order to permit a reduction in densities due to site constraints.

#### Council's Response(s):

Policy MD7 sets minimum site densities which reflect that used by the Council to determine the size of anticipated development on allocated sites. It is considered appropriate for the LDP to contain this policy to enable the Council to meet its housing requirement through the sustainable use of land. The policy acknowledges that there may be occasions where the requisite thresholds may be lower where there would be an unacceptable impact on the character of the area. Furthermore, site specific allowances have been made for known site constraints in the allocation of sites in the LDP (e.g. for undeveloped green buffers following consultation advice from Natural Resources Wales). Notwithstanding this, the densities set relate to net developable densities which exclude land required for other infrastructure not directly associated with the residential development such as major distributor roads, community facilities, mixed uses and other ancillary infrastructure provisions.

It is considered that the policy contains sufficient flexibility and the density standards used are appropriate for new residential developments within the Vale. However, for the assessment of future windfall development proposals the requirement that constraints were previously unknown is considered inappropriate as site surveys are likely to have been undertaken by planning application stage. In this respect, it is considered that it is the nature of constraint that is more relevant as opposed to the knowledge of its existence.

Replace 'previously unknown' with 'significant' in the wording of criterion 2 of policy MD 7 to ensure the soundness of the Plan and consistency with the supporting text at paragraph 7.36 to read:

2. REDUCED DENSITIES ARE REQUIRED AS A RESULT OF SIGNIFICANT SITE CONSTRAINTS OR TO PRESERVE A FEATURE THAT WOULD CONTRIBUTE TO EXISTING OR FUTURE LOCAL AMENITY;  
OR

Representor ID and details: ID-6236/6/1 Taylor Wimpey UK Ltd

**Alternative Site** ASA06 - Land north of the railway line (west) Rhoose - Residential - extend allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Summary of Representation:

Representation seeks and amendment to Policy MG4 Affordable Housing so that the proposed percentage figure is treated as a target figure.

#### Council's Response(s):

The Council has undertaken a review of its initial Affordable Housing Viability Appraisal and on the basis of this review the Council propose to amend policy MG4 to reflect the recommendations of the report. Further information on this is available within the Vale of Glamorgan Viability Update Report (2014). This recommends that the "minimum target" of policy MG4 be changed to a target percentage as suggested by the representor, and as such the Council accept a need to amend the policy.

The requirement for contributions to affordable housing on sites creating a net dwelling increase of 1 or more dwellings is based on a robust assessment of site viability, which has been reconfirmed through a review of the Council's viability assessment undertaken in 2014. Further information on the Council's approach for securing affordable housing contributions on smaller sites shall be set out in future SPG.

Where site viability is disputed the Council shall require the developer to undertake a full and robust site viability assessment to support their case that the site cannot support the affordable housing contribution specified within policy MG4. Where this support the developers he Council shall explore options for the delivery of the required provision of affordable housing- including potential for housing grant subsidy- further detail will be set within Supplementary Planning Guidance to be published in due course. Similarly, the mix and tenure of housing will be determined at the time of the proposed development, and shall be based the identified local need within the relevant housing market area within which the development is located at the time of the proposal.
