The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-4720/1/1 Wynford Bellin

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

**Deposit Plan Policy - SP7 - Transportation****Represor ID and details:** ID-4740/1/1      **Peter Randall & Cllr Margaret Randall****Alternative Site**    ASN019 - Dinas Powys - Dinas Powys Bypass Road**Representation Type**    Object**Summary of Representation:**

SP 7 needs to demonstrate how transport can mitigate the effect developments will have on highway infrastructure due to increased traffic. Provision of a Dinas Powys By-pass and major junction improvements at Merrie Harrier and Barons Court need to be reflected in policy. The A4055 running through Dinas Powys has been identified as a key problem area due to the scale of current traffic and congestion; investment in alternative modes of transport will not effectively lessen car use on the road but major infrastructure change will distribute traffic appropriately.

**Council's Response(s):**

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme.

Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

While Planning Policy Wales includes the provision for local authorities to safeguard land for transport infrastructure (PPW paragraph 8.5.2), including schemes identified within the RTP, it also states that blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period.

PPW 8.5.2 Development plans should also include policies and proposals relating to the development of other transport infrastructure and related services (such as public transport interchange facilities, rail facilities, harbours and airports) including safeguarding zones. Where local planning authorities wish to safeguard land for transport infrastructure, including schemes identified in the RTP, they should do so through a proposal in the development plan, where possible showing the precise route of the proposed new or improved infrastructure. When the precise route is not known, a safeguarding policy may be applied to the area of land necessary for the scheme. Blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period. When development plans are prepared or amended, existing transport proposals should be reviewed, so as to remove any proposals that have previously been safeguarded but are now abandoned or any that are unlikely to commence during the plan period.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

**Officer Recommendation:**

---

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-4752/1/1      Chris Franks

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the housing requirement is based on out of date projections. Amend by reassessing housing requirement based on the WAG 2011 housing projections.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-4752/2/1      Chris Franks

**Alternative Site**    ASN018 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Community Use

**Representation Type**    Object

#### Summary of Representation:

Representation wishes to see site MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys redevelopment for community facilities, including allotments and a nature reserve. (alternative site ASN018).

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Represor ID and details: ID-4775/1/3 Peter Sain ley Berry

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site - ASN007 - Land at Llandow - New Settlement.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Representor ID and details: ID-4775/2/1 Peter Sain ley Berry

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to additional housing in and around Cowbridge and the use of outdated population projections.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-4779/1/1 Carolyn Mirza-Davies

Alternative Site ASD41 - MG 2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-4779/1/3 Carolyn Mirza-Davies

Alternative Site ASD39 - MG 2 (28) - Ardwyn, Penyturnpike Road, Dinas Powys - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG18 (4) - South of Bridgend

Representor ID and details: ID-4793/1/1 Ewenny Priory Estate

Alternative Site ASA35 - The Stables, Corntown Road, Corntown - Green Wedge - reduce designation

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to green wedge designation MG14 (4) South of Bridgend to exclude alternative site being promoted for residential development.

#### Council's Response(s):

The green wedge designation MG18 (4) South of Bridgend has been defined in response to the large scale industrial expansion on the southern edges of Bridgend. The designation utilises permanent and robust boundaries and compliments a similar designation made by Bridgend County Borough Council in the Local Development Plan. It is considered that the designation conforms with national policy set out in PPW which states that "In defining green wedges it is important to include only land that is strictly necessary to fulfil the purposes of the policy. Factors such as openness, topography and the nature of urban edges should be taken into account. Clearly identifiable physical features should be used to establish defensible boundaries." (PPW para. 4.8.12 Planning for Sustainability).

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG18 (4) - South of Bridgend

Represor ID and details: ID-4793/2/2 Ewenny Priory Estate

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to SP 3 as overall housing numbers are insufficient also need to provide a contingency for flexibility. MG 1 needs to remove phasing requirement as it's too restrictive to development. Reduce reliance on windfall site to decrease uncertainty of achieving development goals. (MG 2) Allocate proposed alternative site ID: 4793/DP7. Amend by increasing housing supply.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG18 (4) - South of Bridgend

Represor ID and details: ID-4793/6/1      Ewenny Priory Estate

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to SP 3 on the grounds the housing requirement has insufficient housing numbers to supply the authority compared with the predicted population over the plan period. The policy needs to provide a contingency for flexibility throughout the plan period. Amend by increasing the housing requirement to adequately facilitate the increase in population predicted for the Vale.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG18 (4) - South of Bridgend

Represor ID and details: ID-4793/7/1      Ewenny Priory Estate

**Alternative Site**    ASN052 - Land off Ewenny Road, Ewenny - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN052 - Land off Ewenny Road, Ewenny for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

**Deposit Plan Policy - MG18 (4) - South of Bridgend****Represor ID and details:** ID-4793/8/1      Ewenny Priory Estate**Alternative Site**      N/A**Representation Type**      Object**Summary of Representation:**

Objects to SP 3 as overall housing numbers are insufficient also need to provide a contingency for flexibility. MG 1 needs to remove phasing requirement as it's too restrictive to development. Reduce reliance on windfall site to decrease uncertainty of achieving development goals. (MG 2) Allocate proposed alternative site ID: 4793/DP7. Amend by increasing housing supply.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

### Deposit Plan Policy - MG18 (4) - South of Bridgend

Represor ID and details: ID-4793/9/1      Ewenny Priory Estate

**Alternative Site**    ASN052 - Land off Ewenny Road, Ewenny - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN052 - Land off Ewenny Road, Ewenny for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represor ID and details: ID-4798/1/1      Mr Michael Garland

**Alternative Site**    ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the deletion of the proposed park and ride scheme and Cosmeston (MG16 -12)

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme.

Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

While Planning Policy Wales includes the provision for local authorities to safeguard land for transport infrastructure (PPW paragraph 8.5.2), including schemes identified within the RTP, it also states that blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period.

PPW 8.5.2 Development plans should also include policies and proposals relating to the development of other transport infrastructure and related services (such as public transport interchange facilities, rail facilities, harbours and airports) including safeguarding zones. Where local planning authorities wish to safeguard land for transport infrastructure, including schemes identified in the RTP, they should do so through a proposal in the development plan, where possible showing the precise route of the proposed new or improved infrastructure. When the precise route is not known, a safeguarding policy may be applied to the area of land necessary for the scheme. Blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period. When development plans are prepared or amended, existing transport proposals should be reviewed, so as to remove any proposals that have previously been safeguarded but are now abandoned or any that are unlikely to commence during the plan period.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represantor ID and details: ID-4798/1/1      Mr Michael Garland

It is noted that the St Cyres development site impinges on the previously safeguarded bypass route. However the previous route identified was only indicative and only detailed design will advise the exact land required. It is considered therefore that land options for a future by-pass still remain if this is ever needed.

With regard to the park and ride facility at Cosmeston Lakes Country Park, it should be noted that a Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers the country park site is appropriately located to intercept daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal which would help reduce the number of car based daily journeys to/from Cardiff. In addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride site at Cosmeston is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represor ID and details: ID-4798/2/1      Mr Michael Garland

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represor ID and details: ID-4798/2/2      Mr Michael Garland

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Representor ID and details: ID-4798/3/1      Mr Michael Garland

Alternative Site    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-4825/2/1 Mr & Mrs S M Hockley

Alternative Site ASD43 - MG 2 (27) - Land off Caerleon Road, Dinas Powys - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-4840/1/1 Axol Ltd

**Alternative Site** ASN054 - Land to the rear of Heol-y-Felin, Llantwit Major - Residential

**Representation Type** Object

#### Summary of Representation:

Representation promotes a new alternative site ASN054 - Land to the rear of Heol-y-Felin, Llantwit Major for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-4840/2/1 Axol Ltd

**Alternative Site** ASA36 - Land to the rear of Heol-y-Felin, Llantwit Major - Glamorgan Heritage Coast - reduce designation to exclude site

**Representation Type** Object

#### Summary of Representation:

Representation seeks an amendment to Policy MG24 Glamorgan Heritage Coast, to remove part of the designation which relates to an alternative site ASN054 - Land to the rear of Heol-y-Felin, Llantwit Major.

#### Council's Response(s):

The designation of the Glamorgan Heritage Coast recognises its national importance as an area of attractive and unspoilt coastline. The boundaries of the GHC have been defined to accord with robust and defensible boundaries and while minor amendments have been made to the boundary in the LDP these amendments have been made to reconcile minor anomalies which have developed over the years since the original GHC designation boundary was defined. The amendment of the identified boundary to accommodate a new residential site as proposed is therefore unwarranted and would adversely impact upon the character of the GHC.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - MG 2 - Housing Allocations****Represor ID and details:** ID-4840/3/1      Axol Ltd**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Objects to SP 3 as overall housing numbers are too low. Need to increase to ensure needs of the authority are met. MG 1 needs an increase in the contingency provision, the reduction of windfall sites and the removal of the phasing requirement. MG 2 should allocate site ID 4840/DP1 for residential development as previous plan assessed site to be suitable for development. Site ID 4840/DP1 should be removed from the heritage coast designation due to the screening of the site which visually separates it from the heritage coast.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-4840/4/1      Axol Ltd

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the housing requirement has insufficient housing numbers to supply the authority compared with the predicted population over the plan period. The policy needs to provide a contingency for flexibility throughout the plan period. Amend by increasing the housing requirement to adequately facilitate the increase in population predicted for the Vale.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

Alternative Site ASD41 - MG 2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Represor ID and details: ID-4873/1/1 Mrs Sonya Jenkins

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Amend SA scoring for MG2 (45) - Land off Sandy Lane, Ystradowen in relation to Sustainability Objective 5.

#### Council's Response(s):

The Council is of the opinion that the Sustainability Appraisal of the site presents an accurate representation of the site's performance against the Council's adopted sustainability criteria. This has been informed by an assessment of the range of services and facilities available, information provided to the Council in respect of transport, flood risk, ecology and biodiversity, land quality and archaeology as well as site visits undertaken by Council officers. Additionally background information produced has informed the LDP, including Housing Supply Background Paper (2013), Sustainable Transport Assessment (2013), Transport Assessment of LDP Proposals (2013), Community Facilities Assessment (2013), Plan Preparation and Assessment of Flood Risk (2013) and Identification of SINC's (2013).

Additionally the representation seeks the deletion of a site within the Deposit LDP. Since the consultation on the Deposit LDP, a planning application on part of the site has been considered by the Council and permission subsequently granted. As the part of the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representor ID and details: ID-4873/2/1 Mrs Sonya Jenkins

Alternative Site ASA37 - Land off Badger's Brook Rise, Ystradowen - Allocate Residential Site Separately

Representation Type Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

Comments noted. The representation supports the amendment of a site allocation proposed in the Deposit LDP and the Council's composite site response addresses the issues raised to the LDP site allocation. Having considered the site constraints, policy context, the proposed LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated in order to deliver the identified housing needs. The southern part of site MG2 (45) is now subject to full planning permission however, the proposed change is not considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Represor ID and details: ID-4873/2/2 Mrs Sonya Jenkins

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to the proposed site phasing for site MG2 (45) - Land off Sandy Lane, Ystradowen set out in Appendix 4.

#### Council's Response(s):

The matter of open space provision has been considered as part of the approved planning application on the southern part of the site and this will need to be considered as part of development proposals for the remainder of the site. The proposed change is not considered to be required to ensure the soundness of the Plan. The phasing of development shall be monitored through the formal JHLAS process and therefore it is not considered necessary to amend Appendix 4 as suggested.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representor ID and details: ID-4873/2/3 Mrs Sonya Jenkins

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to Appendix 5 in respect of the requirement to upgrade Sandy Lane as part of any future development of allocation MG2 (45) - Land off Sandy Lane, Ystradowen.

#### Council's Response(s):

Comments are noted, whilst part of allocation MG2 (45) is subject to full planning permission, the Council is of the view that further development to the western part of the allocation shall require improvement to the existing Sandy Lane. Therefore whilst factual changes are proposed in relation to Appendix 5 MG2 (45), the suggested change is considered inappropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-4879/1/1 Gareth Johns

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound.

Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-4884/1/1 Mrs Merry Metcalf

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 on the basis of housing figures which are based on out of date population growth data. The allocation of large developments on greenfield sites goes against LDP directives (i.e. MG 18 Green Wedges) and WSP para. 19.15 (Building Sustainable Communities p.101) and para 19.37 (Valuing our Environment p.106).

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-4884/2/1 Mrs Merry Metcalf

**Alternative Site** ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Summary of Representation:

Representation wished to see the inclusion of specific and concrete proposals for providing suitable educational facilities, including how this would be funded.

#### Council's Response(s):

The requirement for additional education provision in relation to strategic housing developments has been undertaken as part of the LDP preparations. The requirement for additional educational facilities identified in Policy MG6 reflect the work undertaken, and further requirements elsewhere are provided within the Educational Facilities Background Paper referenced in the LDP at paragraph 6.46. Further details on infrastructure provision is also summarised in the Council's draft Infrastructure Plan. The Council therefore considers it unnecessary to amend the policy MG6 as suggested by the repesor.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-4884/5/1 Mrs Merry Metcalf

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

MG 7 should be amended to include more substantial proposals for community facilities in more minor and rural settings to better promote the vitality and viability of community life.

#### Council's Response(s):

The council shall seek to secure contributions towards new or enhanced community facilities in association with future development proposals where it is shown that the proposal would place increased demand on community facilities. Policies MD1, MD2, MD5 and MD6 all make the provision for the protection and enhancement of community facilities, and in this regard the Council are of the opinion that the LDP provided adequate protection for improving existing community facilities. Additionally the Council has undertaken an assessment of additional community facilities required as a result of the proposed development within the Vale of Glamorgan and this will form the basis of developer contributions associated with any future development.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-4884/6/1 Mrs Merry Metcalf

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 8 (Provision of Health Facilities) as policy does not provide a plan for suitable infrastructure in advance which is not in alignment with WSP para. 13.2 (Achieving Sustainable Accessibility). Additional medical services should be a prerequisite due to expected population increase. Amend MG 8 to outline suitable infrastructure for proposed development of facilities and add a requirement for an increase in health facilities.

#### Council's Response(s):

Policies MG7 and MG8 provide for new community and health facilities subject to compliance with other policies within the Deposit LDP. The identification of specific sites and types of facilities is not a function of the Council but is a commercial and management assessment and judgement by local health boards and/or service providers. Therefore identification of specific details within the Deposit LDP is not considered to be appropriate or necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-4884/7/1 Mrs Merry Metcalf

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

MG 16 needs to take into accounts the effect the housing allocation in the eastern Vale is going to have on an already overstretched road network. Therefore MG 16 should include concrete and deliverable proposals to alleviate the strained infrastructure such as improvement in public transport in particular Buses need to be increased and routes improved by working with bus companies rather than allocating bus lanes.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to consider the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments. Therefore while the comments of the representor are noted, the Council considers that Deposit LDP contains a range of transport schemes and infrastructure proposals (MG16 refers) and identifies a significant number of locations (paragraph 6.114 refers) where further improvements will be made or are required.

It should be noted that many of the highway issues within the Vale of Glamorgan are historic and result from historic road layouts and/or are a result of the surroundings through which they pass. Such issues can never be fully addressed by new infrastructure and can only be eased by appropriate measures and/or changes in public attitude to travel. In this regard the Council has sought to develop a package of measures ranging from highway improvements to new sustainable transport initiatives which seek to ameliorate adverse impact on existing highways.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Representor ID and details: ID-4884/8/1 Mrs Merry Metcalf

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks an amendment to policy MG18 Green Wedges stating that development will not be allowed under any circumstances on Green Wedge land, and that such land already designated as Green Wedge at the start of the Plan period and for a period of two years before that point shall retain that protection for the duration of the Plan.

#### Council's Response(s):

Policy MG18 Green Wedges is clear in its intention to protect land identified under the policy as green wedge from, unwarranted and inappropriate development. While the policy allows for limited development associated with existing uses, the council considers that this is appropriate and the supporting text clearly states that such development would be limited to minor structures which are strictly ancillary to existing uses. Further reinforcement of the policy as suggested by the representor is therefore considered unwarranted.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-4884/9/1 Mrs Merry Metcalf

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Objection to the insufficient length of the consultation period.

#### Council's Response(s):

Section 16 of the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005, refers to a statutory 6 week period for submission of representations.

The Deposit Plan along with all the background documentation was made available to view on the Council's website from October 3rd 2013 and pre consultation events allowing members of the public to ask questions on the deposit plan and view all the documentation were held between the 7th and the 22nd October 2013. Given that the Deposit LDP consultation commenced on November 8th 2013, this gave people roughly 5 weeks to familiarise themselves with the Deposit LDP documentation and then a further 6 weeks to submit their representations for the Deposit LDP Consultation which finished on the 20th December 2013.

It is therefore considered that the council has complied with the LDP regulations and that 6 weeks along with the additional 5 weeks provided for the 'pre- consultation period' is an adequate period of time to read and understand the Deposit LDP documentation and submit representations. In accordance with Section 17 of the Town and Country Planning (Local Development Plan) (Wales) 2005, the council is required to prepare and publish the 'Consultation Report' before the Deposit LDP is submitted to the Welsh Assembly Government to reflect the bodies engaged or consulted, the main issues raised and the steps taken to publicise the plan preparation for the Deposit LDP consultation (November 8th – December 20th 2013) and the Alternative Sites consultation (March 20th – May 1st 2014)

#### Officer Recommendation:

Representor ID and details: ID-4891/1/1 C J Sollars

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-4899/1/1      Mr and Mrs Sater

**Alternative Site**      ASN056 - Land to the north of Lettons Way, Dinas Powys - Residential

**Representation Type**      Object

#### Summary of Representation:

Representation seeks the inclusion of ASN056 - Land to the north of Lettons Way, Dinas Powy alternative sitewithin the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

**Deposit Plan Policy - MG 2 - Housing Allocations****Represor ID and details:** ID-4899/2/1      Mr and Mrs Sater**Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Objects to MG 1 due to overall housing numbers being too low. Amend by increasing overall housing numbers including, an increase in the contingency provision. The phasing requirement should also be removed due to its restrictive nature on achieving realistic housing supply. MG 2 should allocate site ID: 4899/DP1 for development.

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-4899/3/1      Mr and Mrs Sater

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the overall housing numbers within the plan are too low which is inconsistent with the drive to re-stimulate the housing market. There should also be a larger contingency allowance to allow for more flexibility in the plan to achieve a 5 year land supply. Amend by increasing overall housing numbers and allowing for a larger contingency allowance.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

Representor ID and details: ID-4903/1/1      Debbie Williams

Alternative Site    ASD20 - MG 2 (45) - Land off Sandy Lane, Ystradowen - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - Managing Development

Represor ID and details: ID-4908/1/1      Darren John Bellamy

**Alternative Site**    ASN055 - Land between Five Mile Lane / M4 Junction 34 east to Cardiff Boundary - Green Belt

**Representation Type**    Object

#### Summary of Representation:

Objects due to no policy concerning Green Belts within the LDP. Align policy with PPW 4.8 (Planning for Sustainability). Add new policy concerning Green Belts with mention of green belt separating Barry and Wenvoe.

#### Council's Response(s):

The designation of a Green Belt within the eastern Vale of Glamorgan has been considered in the Council's Green Wedges Background Paper (September 2013) and discounted on the basis that such a designation would be premature in the absence of and until a sub-regional study into the implications of a Green Belt had been undertaken in the region given the implications that it could have upon both the growth dynamics of the region and regional sustainability. In the absence of a Green Belt designation, the Council is confident that the suite of policies contained within the LDP and supported by national planning guidance are adequate to manage the threat of unwarranted urban expansion and protect the countryside of the Vale of Glamorgan. In this respect, the Council considers that the use of green wedges is sufficient enough to protect from the coalescence of settlements while still meeting the development needs set out in the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Managing Development

Representor ID and details: ID-4908/2/1      Darren John Bellamy

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objection to the LDP in that it does not give priority to protect the Best and Viable Agricultural Land.

#### Council's Response(s):

In selecting sites for development, the Council has sought to clarify the agricultural quality of the sites allocated within the LDP, and has worked closely with the Welsh Governments Natural Environment and Agriculture Department to ascertain the quality of land for allocated sites. From this work the Council has minimised the loss of BMVA land. Additionally, Appendix 5 of the LDP identifies those sites where agricultural land has been verified by the Welsh Government, but where a further detailed agricultural land assessment is required to verify the grading of the land. The Council is therefore of the opinion that in identifying the housing allocations, it has sought to ensure that priority is given to brownfield developments, and where greenfield sites have been required these have been limited to those of lower quality, that is grade 3b and below consistent with the National Planning Policy Wales. Accordingly the Council are of the view that it is unnecessary to include a policy within the LDP for the protection of BMVA, as this would reiterate national planning policy.

#### Officer Recommendation:

No Change Required

Represor ID and details: ID-4908/4/1      Darren John Bellamy

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objection to the LDP Settlement Hierarchy.

#### Council's Response(s):

Section 3 of the LDP Sustainable Settlement Appraisal Background Paper sets out the Council's rationale for the categorisation of settlements and assessment methodology. This states that -

"A total of 87 individual settlements were identified within the Vale of Glamorgan. In order to undertake an objective assessment of rural settlements loosely drawn boundaries within reasonable walking distances were used for surveying settlements. Appendix 2 shows a location and boundaries map of each settlement examined in this study. In some cases distinct urban districts were identified for surveying purposes. In considering individual settlements these distinct areas, often known locally under other names, were considered to form a wider functional part of the settlement. This is because many of these areas share the same services and facilities making them closely related in terms of function as well as their location. As a result, these areas were rationalised and assessed as part of the wider settlement.

With regard to the identification of Culverhouse Cross as rural minor settlement, paragraph 6.8 states that

"Culverhouse Cross is the highest scoring settlement within this category and has a high population, estimated at 281. Although not rural in nature it scores similarly to other settlements within this category due to the range of services and facilities which can be accessed locally including retail, leisure and employment uses. The settlement also benefits from frequent bus services and strategic road links to Barry and Cardiff. The assessed area does not have a historic village core but is comprised of a significant amount of suburban residential development along Brooklands Terrace."

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Managing Development

Represor ID and details: ID-4908/5/1      Darren John Bellamy

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects as no policy prioritising agricultural land. Add new Policy prioritising best and most valuable agricultural land according to PPW 4.10.1 (Planning for Sustainability). The draft LDP does not recognise the need for development being proposed on lowest grade land before using greenfield sites of a higher grade concerning agricultural use.

#### Council's Response(s):

Through the candidate sites submissions stage, the Council received some 420 sites for consideration, the majority of which were located in rural locations and on Greenfield land, which is to be expected given the rural character of much of the Vale of Glamorgan, and also adjoining the existing larger urban settlements. In this regard, the Council discounted a new settlement at Llandow on the grounds that it would be contrary to the overarching LDP strategy. Further details on this are set out in the Council's Revised Options Appraisal Background Paper.

Furthermore, in considering the proposed development of land at Llandow Airfield, the Council commissioned a review of the agricultural land quality of the undeveloped areas of which the proposed new settlement would occupy this revealed that a significant area of the land 51ha falls within grade 3a agricultural land classification (best and most versatile classification), and a further 36 ha of 3b agricultural land. In this regard PPW states that:

"In the case of agricultural land, land of grades 1, 2 and 3a of the Department for Environment, Food and Rural Affairs (DEFRA) Agricultural Land Classification system (ALC) is the best and most versatile, and should be conserved as a finite resource for the future. In development plan policies and development management decisions considerable weight should be given to protecting such land from development, because of its special importance. Land in grades 1, 2 and 3a should only be developed if there is an overriding need for the development, and either previously developed land or land in lower agricultural grades is unavailable, or available lower grade land has an environmental value recognised by a landscape, wildlife, historic or archaeological designation which outweighs the agricultural considerations. If land in grades 1, 2 or 3a does need to be developed, and there is a choice between sites of different grades, development should be directed to land of the lowest grade."

Consequently, identifying land to meet the identified housing requirement, priority has been given to the development of suitable and developable sites within existing settlements, with priority being given to developable brownfield sites. In this regard the policy MG2 – Housing Allocations, allocates 18 brownfield sites for housing capable of accommodating 3,030 dwellings, 39% of the total housing allocations. However, as the availability of brownfield sites is insufficient to meet the assessed housing requirement for the Vale of Glamorgan, it has therefore has been necessary to accommodate housing growth through the expansion of existing settlements on to Greenfield land.

Notwithstanding this, when selecting suitable sites for development, the Council has sought to clarify the agricultural quality of the allocated sites, and has worked closely with the Welsh Governments Natural Environment and Agriculture Department to ascertain the quality of land for allocated sites. From this work the Council has been able to determine that the majority of land allocated within the LDP is classified as being of grade 3b or lower and has also sought to exclude areas of 3a grade land (Best and Most Versatile (BMV)), from development such as that site associated with site MG2 46, reducing the area of the candidate site submission. Additionally, in limiting the loss of BMV land, Appendix 5 of the LDP identifies those sites where agricultural land has been verified by the Welsh Government, but where a further detailed agricultural land assessment is required to verify the grading of the land.

Consequently, the Council is of the opinion that in identifying the housing allocations listed in LDP Policy MG2, it has sought to ensure that priority is given to brownfield developments, and where greenfield sites have been required these have been limited to those of lower quality, that is grade 3b and below consistent with the National Planning Policy Wales.

#### Officer Recommendation:

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-4913/1/1      Persimmon and Barratt Homes

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 1 on the grounds 5% flexibility is too low. Flexibility should be increased to 10% and the reserve site requirement removed. Over reliance of windfall sites should be reduced to 10% or less. MG 1 should focus more on identified sites to effectively achieve housing supply figures

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Represor ID and details: ID-4925/2/1 Mrs Wendy Hopkins

**Alternative Site** ASN057 - Land at Dyffryn Lane, St. Nicholas - Residential

**Representation Type** Object

#### Summary of Representation:

Representation promotes alternative site ASN057 - Land at Dyffryn Lane, St. Nicholas, for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Representor ID and details: ID-4929/1/1      Mr & Mrs Duance

Alternative Site    ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-4933/1/1      Andrew & Jonathan Raymond

**Alternative Site**    ASN058 - Land at and adjoining Waterton Lodge, Colwinston - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN058 - Land at and adjoining Waterton Lodge, Colwinston for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-4933/1/2      Andrew & Jonathan Raymond

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-4943/1/1      Taylor Wimpey Strategic Land

Alternative Site    ASN059 - Land South West of Weycock Cross - Residential

Representation Type    Object

#### Summary of Representation:

Objections raised to the distribution of housing, and that there is a deficiency in the level of housing identified with the LDP, arguing for the inclusion of land south of Weycock Cross to address these objections.

#### Council's Response(s):

The Populations and Housing Projections background paper has been updated in light of the publication of the 2011-based Population and Household projections and in response to issues raised in representations on the Deposit LDP. Updated analysis and the Council's consideration of the population projections are provided in the background paper which sets out comparisons with previous official projections, the limitations and other issues that need to be considered in using trend based forecasting. Further detail on this matter is set out in the Council's Housing Provision Background Paper (2015).

The Council's Settlement Hierarchy has been refined from that defined within the Council's previous development plans, and it seeks to direct development to those settlements that offer a range of services and facilities relative to their position within the hierarchy, alongside the future growth aspirations of the LDP Strategy. In this regard the Council considers that the distribution of housing across the Vale accords with the hierarchy. This can be seen through the majority of development (91%) located within the top three settlement tiers (Key Settlement, Service Centre and Primary Settlement).

Within the Minor Rural Settlement category there is a broad spectrum of settlements, in terms of spatial size and resident population. Consequently, the Council is of the view that representations which object to the disproportionate level of housing within a specific settlement, and those which compare the number of houses proposed within one settlement to that in another have not taken into consideration the physical capacity of each village within the hierarchy to accommodate additional housing or their physical, environmental and infrastructure characteristics.

The distribution of housing growth apportioned to each settlement category in the hierarchy, is detailed within the Housing Land Supply background paper (2013). This indicates that Barry accommodates 30% of housing provision; the Service Centre Settlements 21%, Primary Settlements 37% and Minor Rural Settlements 12% (or 9% excluding the brownfield redevelopment allocation at Culverhouse Cross).

The location of development and growth areas identified within the LDP has also been informed by and assists in delivering the overall LDP Strategy and Objectives. The Strategy forms an important part of the Plan and consideration must be had to this in the location of future development to ensure delivery of the Strategy through policies and allocations of the Plan. In this respect, the LDP Strategy is comprised of four key elements; "To promote development opportunities in Barry and the South East Zone, the St Athan area to be a key development opportunity and Cardiff Airport a focus for transport and employment investment. Other sustainable settlements to accommodate further housing and associated development". The settlements identified within the Settlement Hierarchy and site allocations therefore have regard to and assist in delivering the overall Strategy of the Plan.

Accordingly, the Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. Therefore, no change is considered to be required.

**Deposit Plan Policy - LDP Strategy****Represor ID and details:** ID-4943/1/2      **Taylor Wimpey Strategic Land****Alternative Site**    ASN059 - Land South West of Weycock Cross - Residential**Representation Type**    Object**Summary of Representation:**

Objects to MG 1 as the flexibility allowance should be increased to 10% to make provision for 10950 dwellings. Remove phasing from SP 3 and subsequent policies due to the lack of flexibility it should offer as outlined in PPW para. 2.5.2 (Development Plans). MG 2 should allocate site 4943/DP 1 for development (Alternative Site ASN059 - Land South West of Weycock Cross).

**Council's Response(s):**

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

**Officer Recommendation:**

Proposed Change

### Deposit Plan Policy - LDP Strategy

Represor ID and details: ID-4943/1/3      Taylor Wimpey Strategic Land

Alternative Site    ASN059 - Land South West of Weycock Cross - Residential

Representation Type    Object

### Summary of Representation:

Representation promotes a new alternative site ASN059 - Land South West of Weycock Cross for inclusion in the Deposit LDP for residential development.

### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-4945/1/2 Bethan Wilcox

Alternative Site ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP3 - Residential Requirement

Represor ID and details: ID-4946/1/1      Sean Good

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation objects to SP 3 on the grounds the residential requirement number were based on the WAG 2008 housing projections. Amend residential requirement numbers to reflect the new data released by WAG on household projections 2011.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-4946/1/2      Sean Good

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation objects to the level of housing proposed in the VoG without adequate additional infrastructure and raises particular concerns in respect of Dinas Powys.

#### Council's Response(s):

In identifying suitable sites for development, the Council engaged with key infrastructure providers to ensure that adequate and appropriate infrastructure is put in place to support additional development. Additionally, the Council has undertaken a preliminary infrastructure assessment that identifies the likely infrastructure required as a result of the developments proposed. Appendix 5 of the LDP sets out the infrastructure requirements for each development proposal in the LDP. Through this engagement the Council are satisfied that all sites identified within the LDP are capable of delivering the necessary infrastructure required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MD5 - Residential Development in Key, Service Centre and Primary Settlements

Representor ID and details: ID-4949/1/1 Dr E.W.Cloutman

**Alternative Site** ASA14 - Land at Rose Cottage, Higher End, St Athan - Residential Settlement Boundary - extend designation

**Representation Type** Object

#### Summary of Representation:

Representation seeks and amendment to the residential settlement boundary for St Athan to include alternative site Land at Rose Cottage, Higher End.

#### Council's Response(s):

The representation has been made in relation to the inclusion of land at Rose Cottage within the residential settlement boundary and for its allocation within the LDP. The Council are of the view that the LDP identifies sufficient and appropriate housing land and there is no requirement to include land at Rose Cottage as a housing allocation within the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/1/1 Renishaw PLC

**Alternative Site** ASA39 - Land South of Junction 34 M4 Hensol - Strategic Employment Site - Extend Allocation

**Representation Type** Object

#### Summary of Representation:

Amend the employment allocation MG 9 (1) site boundary to the size outlined in the map provided (ID 4955/DP1 Site Boundary Plan) as the appraisal of the site supports the change in the site boundary in accordance with VOG council's candidate site assessment methodology.

#### Council's Response(s):

Comments are noted. The site boundary used is based upon the overall site area previously identified for employment uses. The suggested boundary includes land surrounding the existing buildings and land to the north west of the site which includes land for a proposed hotel / residential training centre, highway access and areas containing Tree Preservation Orders. This is consistent with the boundaries submitted under a planning application currently under consideration for the site which includes the ancillary uses referred to. It is considered that the proposed change would more accurately reflect the likely employment proposals for the strategic site and that this would enable future development to be managed more appropriately. This is considered in line with the net developable areas identified in the Employment Land and Premises Study (2013). Therefore, the suggested boundary change would ensure the soundness of the Plan.

Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG9 (1) has been proposed which accepts the need for the proposed boundary change. The proposed Focused Change amends western site boundary for the strategic employment site in order to reflect the development proposals for the site and to ensure sufficient flexibility. The proposed change amends the overall gross site boundary from 51.1 hectares to 61.8 hectares to allow for 29.59 hectares (net) strategic employment land. The local employment land element allocated as part of the strategic site remains unchanged.

#### Officer Recommendation:

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/12/1 Renishaw PLC

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 9 (1) due to the scale of the development, which should be amended from 34.9ha for development to 36.28ha which would include a site for a hotel/residential training centre. Amend supporting text to include reference to ancillary uses commensurate with employment related land uses. Supporting text should also clarify whilst the site meets local and regional employment need, these needs may not be split into two geographical parts of the site.

#### Council's Response(s):

Policy MD17 makes provision for ancillary developments outside of B class uses; further clarification on this is also provided at paragraph 7.77 which make reference to cafes, crèches and training facilities. It is recognised that additional ancillary uses may be acceptable but it would be inappropriate to list all uses. On this basis it is considered that the LDP makes sufficient provision for ancillary uses on employment sites and these would be assessed on individual merit and assessed against the criteria within policy MD16 and supporting justification.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/13/1 Renishaw PLC

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to policy 6.72 relating to sand and gravel safeguarding shown within the boundary of site MG11 Land to the South of Junction 34, M4, and Hensol and suggests this is replaced by additional supporting text relating to the nature of ancillary uses.

#### Council's Response(s):

Comments noted. The minerals safeguarding shown on the proposals map has been designated in accordance with the BGS Minerals Safeguarding Map of Wales. Safeguarding does not prevent development where the criteria contained in policy MG 20 can be met. The previously submitted evidence relates to minerals safeguarding under the Adopted Unitary Development Plan and to a smaller area than that identified under the latest minerals safeguarding maps. Updated evidence may therefore be required to fully consider potential sand and gravel reserves as part of future development proposals, which could be considered under LDP policy MG 20. Notwithstanding this, a planning application has been submitted for employment proposals on the site and it is understood this matter will be considered as part of these detailed proposals. The proposed change is therefore considered contrary to national policy and would not ensure the LDP is sound.

Policy MD16 (Protection of Employment Land and Premises) makes provision for ancillary developments outside of B class uses; further clarification on this is also provided at paragraph 7.77 which make reference to cafes, crèches and training facilities as examples. It is recognised that additional ancillary uses may be acceptable but it would be inappropriate to list all uses. It is considered that the LDP makes sufficient provision for ancillary uses on employment sites whilst ensuring the protection of employment land. Proposals for ancillary uses could be assessed on individual merit as part of future planning applications under Policy MD16. Therefore, the proposed change is not considered necessary to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol****Representor ID and details:** ID-4955/13/2      Renishaw PLC**Alternative Site**    ASA39 - Land South of Junction 34 M4 Hensol - Strategic Employment Site - Extend Allocation**Representation Type**    Object**Summary of Representation:**

Representation objects to the proposed employment site boundary and requests that it is extended in order to more accurately reflect future development proposals for the site. The representation requests clarification on the restrictions and location for local and regional employment land proposed as part of the allocation. The representation also requests the removal of the reference to 'significant constraints' and the SSSI at paragraph 6.70.

**Council's Response(s):**

Comments are noted. The site boundary used is based upon the overall site area previously identified for employment uses. The suggested boundary includes land surrounding the existing buildings and land to the north west of the site which includes land for a proposed hotel / residential training centre, highway access and areas containing Tree Preservation Orders. This is consistent with the boundaries submitted under a planning application currently under consideration for the site which includes the ancillary uses referred to. It is considered that the proposed change would more accurately reflect the likely employment proposals for the strategic site and that this would enable future development to be managed more appropriately. This is considered in line with the net developable areas identified in the Employment Land and Premises Study (2013). Therefore, the suggested boundary change would ensure the soundness of the Plan.

Reference to 6.64ha of land for local needs and 28.26ha for strategic employment land relates to the proportion of net developable land anticipated to contribute towards local and regional employment need within the wider gross allocation of 51.1ha identified in the Employment Land and Premises Study (2013). To clarify, no specific areas within the allocation have been designated as it is considered this approach could unduly restrict future development proposals for the site.

With regards to comments on paragraph 6.70, the biodiversity constraints identified in relation to Land south of Junction 34, M4, Hensol reflect those identified on the LDP Constraints Map. The Deposit LDP employment site boundary includes the River Ely SSSI to the south of the site. The site also includes pasture and grassland which are locally identified Sites of Importance for Nature Conservation (SINCs) as well as areas of known flooding constraints (for which a FCA has been provided for). Therefore, it is considered this proposed change would not ensure the Plan is sound and that it would be inappropriate to remove this reference from the site description under paragraph 6.70.

Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG9 (1) has been proposed which accepts the need for the proposed boundary change. The proposed Focused Change amends western site boundary for the strategic employment site in order to reflect the development proposals for the site and to ensure sufficient flexibility. The proposed change amends the overall gross site boundary from 51.1 hectares to 61.8 hectares to allow for 29.59 hectares (net) strategic employment land. The local employment land element allocated as part of the strategic site remains unchanged.

**Officer Recommendation:**

Proposed Amendment

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Representor ID and details: ID-4955/13/3 Renishaw PLC

Alternative Site ASA39 - Land South of Junction 34 M4 Hensol - Strategic Employment Site - Extend Allocation

Representation Type Object

#### Summary of Representation:

Objects to MG 9 (1) due to the scale of the development, which should be amended from 34.9ha for development to 36.28ha which would include a site for a hotel/residential training centre. Should also clarify whilst the site meets local and regional employment need, these needs may not be split into two geographical parts of the site as the land needs to be brought forward in a flexible manner.

#### Council's Response(s):

Comments are noted. The site boundary used is based upon the overall site area previously identified for employment uses. The suggested boundary includes land surrounding the existing buildings and land to the north west of the site which includes land for a proposed hotel / residential training centre, highway access and areas containing Tree Preservation Orders. This is consistent with the boundaries submitted under a planning application currently under consideration for the site which includes the ancillary uses referred to. It is considered that the proposed change would more accurately reflect the likely employment proposals for the strategic site and that this would enable future development to be managed more appropriately. This is considered in line with the net developable areas identified in the Employment Land and Premises Study (2013). Therefore, the suggested boundary change would ensure the soundness of the Plan.

Reference to 6.64ha of land for local needs and 28.26ha for strategic employment land relates to the proportion of net developable land anticipated to contribute towards local and regional employment need within the wider gross allocation of 51.1ha identified in the Employment Land and Premises Study (2013). To clarify, no specific areas within the allocation have been designated as it is considered this approach could unduly restrict future development proposals for the site.

With regards to comments on paragraph 6.70, the biodiversity constraints identified in relation to Land south of Junction 34, M4, Hensol reflect those identified on the LDP Constraints Map. The Deposit LDP employment site boundary includes the River Ely SSSI to the south of the site. The site also includes pasture and grassland which are locally identified Sites of Importance for Nature Conservation (SINCs) as well as areas of known flooding constraints (for which a FCA as been provided for). Therefore, it is considered that the proposed change to the supporting text would not ensure the Plan is sound and that it would be inappropriate to remove this reference from the site description under paragraph 6.70.

Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG9 (1) has been proposed which accepts the need for the proposed boundary change. The proposed Focused Change amends western site boundary for the strategic employment site in order to reflect the development proposals for the site and to ensure sufficient flexibility. The proposed change amends the overall gross site boundary from 51.1 hectares to 61.8 hectares to allow for 29.59 hectares (net) strategic employment land. The local employment land element allocated as part of the strategic site remains unchanged.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/13/4 Renishaw PLC

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to the wording of paragraph 6.71 and the use of “high quality B1, B2 and B8 uses” as it could be interpreted differently. Requests that this is removed from paragraph 6.71.

#### Council's Response(s):

As a strategic employment allocation within the Plan it is the Council's view that the LDP should seek to ensure that development proposals are of a “high quality” to reflect the aspirations for developing the regionally important site which is strategically located on the M4 corridor. Indeed the Council's Employment Land and Premises Study (2013) had categorised Land South of Junction 34, Miskin as a ‘Flagship’ site, which the study defines as being:

“Sites of scale, location and setting capable of being broad business park developments competing for investment in the regional/sub regional marketplace. These are prime sites for marketing to a cross-section of users – including new inward investments into the Vale. They can also meet the needs of image-conscious, aspirational companies already located in the area” (Table 34, page 96 refers).

It is the Council's view that the LDP should be aspirational in the future development of the site in line with the Flagship status identified in the Employment Land and Premises Study. The use of the description in the supporting text of policy MG 11 and the need for “high quality” B1, B2 and B8 development is therefore considered to be justified and the proposed change considered unnecessary to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/14/1      Renishaw PLC

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to policy MG 17 (Special Landscape Areas) as it should make reference to the positive role that consideration of siting, orientation, layout and landscaping in development can protect the special features of an SLA. Seeks an amendment to MG 17 to mention positive role a development can have to SLA.

#### Council's Response(s):

While the comments made by Renishaw PLC are noted, the Council would respond that paragraph 6.121 of the LDP clearly states that 'The designation of Special Landscape Areas is not intended to prevent development but to ensure that where development is acceptable careful consideration is given to the design elements of the proposal such as the siting, orientation, layout and landscaping, to ensure that the special qualities and characteristics for which the SLAs have been designated are protected.' Issues of design, siting, landscaping etc. are also covered by the Council's Supplementary Planning Guidance 'Design in the Landscape' which will support the adopted LDP. The issues raised in the representation are therefore considered by the council to be appropriately addressed within the Deposit LDP and any future development proposals at the Renishaw site (subject to compliance with other policies within the plan) will be considered against these policies/criteria.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/15/1 Renishaw PLC

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objection over four SINC designations on land owned by Renishaw. Renishaw has proposals for a development which are likely to impinge on the following sites ID: 23, 22, 26 and 25. Important that restrictive MG 19 policy is not used to frustrate the development of strategic employment sites given the amount of time already invested in the development. (See paragraph 6.126 MG 19 Sites of Importance for Nature Conservation). Seeks to amend MG 19 to be more lenient towards development within SINC.

#### Council's Response(s):

The Sites of Importance for Nature Conservation (SINC) designations contained within the Deposit LDP have been identified according to guidance published by the Wales Biodiversity Partnership ('Wildlife Sites Guidance Wales: A Guide to Develop Local Wildlife Sites Systems in Wales') which was adopted by the Vale of Glamorgan Council in 2009 and which provides a robust set of criteria against which all potential SINC could be assessed. The 2013 SINC review survey builds on previous SINC identification works which commenced in 1999 and the Council therefore considers that the SINC designations identified on the LDP Proposals Map are based on a robust evidence base which accurately reflects locally important nature conservation sites within the Vale of Glamorgan.

The Council considers that while the intention of Policy MG19 is clear, the supporting text of paragraph 6.126 allows for flexibility in its application in instances where the benefits of a development outweigh the importance of the SINC. In such instances mitigation will be required to compensate for the adverse impact of the development on the SINC. Therefore, no changes are considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Representor ID and details: ID-4955/16/1 Renishaw PLC

Alternative Site ASA40 - Land South of Junction 34 M4 Hensol - Minerals - remove minerals safeguarding designation

Representation Type Object

#### Summary of Representation:

Representation proposed an amended site allocation under policy MG 9 (Employment Allocations). The representation also considers policy MG 20 should not apply to the proposed employment allocation MG 9 (1) for Land south of Junction 34, M4, Hensol as evidence has been submitted which identifies there is insufficient amounts of minerals for extraction.

#### Council's Response(s):

Safeguarding has been carried out in accordance with the Minerals Safeguarding Map of Wales as required by national planning policy. Safeguarding does not prevent development where the criteria contained in policy MG20 can be met. The evidence submitted refers to safeguarded areas identified under the Adopted Unitary Development Plan and this evidence could be considered as part of any future planning application through the application of LDP policies.

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/6/1 Renishaw PLC

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to SP 2 on the basis another strategic site should be added to policy South of Junction 34 M4. Amend by adding land South of Junction 34 M4 to SP 2 as a strategic site.

#### Council's Response(s):

The strategic employment allocation Land to the South of Junction 34 M4 Hensol is an existing well established employment site which was originally developed by Bosch with financial assistance from the former Welsh Development Agency as part of a major regional inward investment programme that recognised the strategic importance of development along the M4 corridor.

The site therefore has a longstanding history of employment use and its classification as a "strategic employment site" within the LDP has been made on the basis of the Council's Employment Land and Premises Study 2013. Such sites are defined within the study as those which are "of scale, location and setting capable of being broad business park developments competing for investment in the regional/sub regional market place. These are prime sites for marketing to a cross-section of users- including new inward investment into the Vale. They can also meet the needs of image conscious, aspirational companies already located in the area"

The site is not however within the 'South East Zone', the area which the LDP strategy seems to promote new development opportunities. The Council considers that the site is not key to the delivery of the LDP. Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/7/1      Renishaw PLC

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Concerns over a lack of reference to the positive role a development can have in ensuring the qualities of a landscape are protected when it has been carefully considered in terms of siting, orientation, layout and landscaping. Specifically with regard to their client's site at land South of Junction 34, M4, Hensol that lies within the Ely River Valley SLA (MG 9 Employment allocation site 1).

#### Council's Response(s):

While the comments of the repesor are noted, the Council considers that the supporting text at paragraph 5.93 adequately emphasises that sensitive design and location can make a positive contribution to protecting the natural and built environment of the Vale of Glamorgan. While the supporting text does not describe such elements as siting, orientation, layout and landscaping, the Council is of the view that such elements are implied in the existing text as well as in other policies of the plan e.g. MD2 Place Making and further elaboration is therefore not required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG9 (1) - Land to the South of Junction 34 M4 Hensol

Represor ID and details: ID-4955/8/1      Renishaw PLC

Alternative Site    N/A

Representation Type    Comment

#### Summary of Representation:

The LDP is silent on the Strategic Infrastructure that would inform a Charging Schedule, in respect of our client's land. Concerns raised about ongoing planning obligation negotiations on a current planning application.

#### Council's Response(s):

The CIL charging schedule will be set, in accordance with the Regulations and Guidance, on the basis of viability and infrastructure needs across the whole of the Plan area, and would be charged accordingly. There is no requirement for CIL to be site specific, unlike planning obligations.

The site specific infrastructure requirements for individual development sites will need to be considered at planning application stage and Policy MD4 provides the framework for doing so. The matters raised in respect of the ongoing negotiations on a current planning application are not relevant to the consideration of the LDP which sets the strategic basis for seeking planning obligations and is not considered to be too prescriptive. Further detail on how this policy will be implemented will be provided in Supplementary Planning Guidance.

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-4957/1/1      Janie Jones

**Alternative Site**    ASD41 - MG 2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-4957/1/3 Janie Jones

Alternative Site ASA41 - Land between Dinas Powys and Penarth - Green Wedge - increase designation

Representation Type Object

#### Summary of Representation:

Representation seeks the reinstatement of the green wedge designation MG18 (1) - Between Dinas Powys, Penarth & Llandough to that of the Adopted Vale of Glamorgan UDP.

#### Council's Response(s):

Green wedges have been identified under policy MG18 of the Deposit LDP to prevent development which prejudices the open nature of land and the coalescence of settlements. Their designation, although non-statutory, adds an additional layer of protection to those areas where it is considered that development pressure exists or will exist during the lifetime of a development plan and they should only include land that is strictly necessary to fulfil the objective of the policy (PPW 4.8.12).

The green wedges are intended to be temporary designations identified to achieve the objectives of the policy and as such, their existence and extent may vary between one adopted plan and another under preparation. In this regard they will reflect the changing objectives and circumstances at that time e.g. population growth versus environmental protection. In preparing a LDP, the council seeks to balance competing objectives and to provide housing and employment whilst protecting the environment and local amenity. In this regard the allocations and designations contained within the deposit LDP are considered to be based on a robust evidence base and the reinstatement of the green wedge around Dinas Powys as suggested by the representor is not considered to be necessary or appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP9 - Minerals

Represor ID and details: ID-4963/1/1 Malcom Ratcliff

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to the provision of minerals reserves and seeks further clarification as to how the land bank requirement identified in the draft RTS First Review will be met throughout the plan period. Representation also seeks policy wording amendments to SP9 to safeguard sand and gravel across its entire outcrop including within existing settlements.

#### Council's Response(s):

The Minerals Background Paper has been revised in the light of the RTS 2014. Clarity regarding future requirements is provided in the background paper. Safeguarding has been carried out in accordance with the BGS Minerals Safeguarding Map of Wales. Sand and gravel resources have been shown on the LDP proposals map in accordance with the Minerals Safeguarding Map of Wales. No change is therefore required to ensure the soundness of the Plan.

Represor ID and details: ID-4969/1/2      Joseph Kuck

**Alternative Site**    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

**Representation Type**    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Alternative Site ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Summary of Representation:

Representation seeks an amendment to the special landscape associated with the objection raised to site MG2 (19) - Land adjoining St Athan Road, Cowbridge.

#### Council's Response(s):

The representation has been made in relation to the proposed housing allocation MG2 (19) Land adjoining St Athan and the subsequent amendment (extension of) of the Special Landscape Area as a consequence of the proposed deletion of the housing allocation. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. #### Summary of Representation:

Representation seek the amendment to Special Landscape Area MG17 (2) - Upper & Lower Thaw Valley.

#### Council's Response(s):

The representation has been made in relation to the allocation of land to the south west of Cowbridge for housing within the Deposit LDP and a separate objection seeking the deletion of the housing allocation (MG2 (19) Land adjoining St Athan Road, Cowbridge refers).

The Deposit LDP identifies sufficient and appropriate housing land to meet the need identified over the plan period while seeking to ensure an appropriate balance between development and the protection of the environmental qualities of the Vale of Glamorgan. As such the sites included within the LDP have been assessed and identified taking into account the relevant constraints and merits related to each site and the contributions that they can make to deliver the aims and objectives of the Deposit Plan and that further changes as proposed are not required.

Alternative Site    ASN019 - Dinas Powys - Dinas Powys Bypass Road

Representation Type    Object

#### Summary of Representation:

MG 16 should identify the need for better transport provision within Dinas Powys including the inclusion within policy of a by-pass to alleviate congestion within the village. Mentions housing refer to MG 2 and green wedges refer to MG 18.

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the representor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

Notwithstanding the above, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

#### Summary of Representation:

Concerns over the number of houses identified at St Cyres without the delivery of Dinas Powys by pass.

#### Council's Response(s):

As part of the evidence base for the Vale of Glamorgan LDP, the Council has undertaken an audit of services and facilities within the Vale of Glamorgan's settlements (Sustainable Settlements Review (September 2013)) in order to identify those which are potentially suitable to accommodate additional development in terms of their location, role and function. Within the determined settlement hierarchy, Dinas Powys was identified as a Primary Settlement i.e. settlements which play an important role in meeting housing need and providing key local services which complement the role of service centre settlements such as Cowbridge and Llantwit Major. Similarly, information on the housing numbers required over the plan period is set out in the Population and Household Projections Update (2014) Background Paper which utilises the latest population and household projections to determine the appropriate level of housing required across the Vale of Glamorgan. With regard to site densities, the Council has utilised a standard site density to determine the size of anticipated development on allocated sites and where necessary, site specific allowances have been made for known site constraints following consultation advice received from relevant agencies. The Council therefore considers that the dwelling numbers at the St Cyres site are appropriate to the site scale and constraints.

In support of the Deposit LDP the Council has assessed the strategic highway network to identify which junctions and/or links are under pressure from excessive vehicular movements. The Highway Impact Assessment assesses the impact of the proposed future development sites on the strategic highway network within the Vale of Glamorgan which will enable the targeting of resources to those areas where pressure has been identified. Details of highway improvements are contained within the Council's Draft Infrastructure Plan September 2103.

#### Officer Recommendation:

### Deposit Plan Policy - MG4 - Affordable Housing

Represor ID and details: ID-5020/1/1 Redrow Homes South Wales & Brynhill Golf Club

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to the uses of minimum affordable housing percentages and this should be amended to a target affordable housing requirement.

#### Council's Response(s):

The Council has reviewed its Affordable Housing Viability Assessment (2014) in response to a number of representations received on the Deposit LDP. The updated evidence confirms that residential development viability remains strong within the Vale of Glamorgan and indicates that higher affordable housing targets than those identified in the Deposit LDP are justified in higher value areas. In light of the updated evidence it is proposed to amend the percentage requirements identified in Policy MG 4 to better reflect development viability across the Vale of Glamorgan. This change reflects the study's recommendations that affordable housing targets for 35% in Llantwit Major, Rhoose and St Athan, and 40% in the remainder of the Vale of Glamorgan (with the exception of Barry), would be appropriate.

These percentage requirements take account of up-to-date development costs and market values and are therefore considered to be robust and justifiable. However, in response to representations from the development industry and Welsh Government it is recognised that the policy could make reference to individual site viability to enable schemes to be considered where the target level sought cannot be achieved due to genuine development viability issues. In this respect, the updated report recommends that the Council should amend policy MG4 so that the affordable housing requirement is set as a targeted requirement, rather than a minimum, to enable land value to be considered against local market circumstances. This approach is considered to be in accordance with TAN2 (Section 10) and recognises that higher affordable housing provisions are achievable in those areas identified within the policy but allows for viability evidence to be considered, where there are development viability issues, without inhibiting development from coming forward.

Amend Policy MG 4 to read as follows:

#### POLICY MG 4 - AFFORDABLE HOUSING

RESIDENTIAL DEVELOPMENTS (INCLUDING MIXED USE SCHEMES) WILL BE REQUIRED TO CONTRIBUTE TO MEETING AFFORDABLE HOUSING NEED AND SHOULD MEET THE LEVELS OF AFFORDABLE HOUSING SET OUT BELOW:

30% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 5 OR MORE UNITS IN:

- BARRY;

35% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN A NET GAIN OF 5 OR MORE UNITS IN:

- LLANTWIT MAJOR ;
- RHOOSE; AND
- ST ATHAN.

### Deposit Plan Policy - MG4 - Affordable Housing

**Representer ID and details:** ID-5020/1/1      Redrow Homes South Wales & Brynhill Golf Club

40% AFFORDABLE HOUSING ON RESIDENTIAL DEVELOPMENTS RESULTING IN

A NET GAIN OF 1 DWELLING OR MORE; OR THE CONVERSION OF EXISTING BUILDINGS RESULTING IN A NET GAIN OF 2 OR MORE DWELLINGS IN:

- BOWBRIDGE;
- DINAS POWYS;
- ELANDOUGH;
- ENARTH;
- SULLY;
- VENVOE;
- THE MINOR RURAL SETTLEMENTS; AND
- THE RURAL VALE OF GLAMORGAN.

THE PROVISION OF AFFORDABLE HOUSING WILL BE NEGOTIATED ON A SITE-BY-SITE BASIS TAKING INTO ACCOUNT THE EVIDENCED VIABILITY OF THE DEVELOPMENT. CONTRIBUTIONS WILL BE MADE IN ACCORDANCE WITH THE REQUIREMENTS SET OUT IN THE COUNCIL'S AFFORDABLE HOUSING SPG, WHICH PROVIDES GUIDANCE ON VIABILITY AND THE CIRCUMSTANCES UNDER WHICH CONTRIBUTIONS MAY BE VARIED OR REVIEWED.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG4 - Affordable Housing

Representor ID and details: ID-5020/2/1 Redrow Homes South Wales & Brynhill Golf Club

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to SP 3 on the grounds the housing requirement has insufficient housing numbers to supply the authority compared with the predicted population over the plan period. The policy needs to provide a contingency for flexibility throughout the plan period. Amend by increasing the housing requirement to adequately facilitate the increase in population predicted for the Vale.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

Represor ID and details: ID-5020/2/2      Redrow Homes South Wales & Brynhill Golf Club

**Alternative Site**      ASA13 - Land to the rear of St David's C/W Primary School, Colwinston - Residential - extend allocation boundary

**Representation Type**      Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG4 - Affordable Housing

Represor ID and details: ID-5020/3/1 Redrow Homes South Wales & Brynhill Golf Club

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to phasing requirement outlined in SP 3 and MG 1 as it restricts development in areas needing to meet housing supply. Remove phasing requirement or include site 5020/DP1 in delivery phase 2011 – 2016.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5026/1/1 Heather Maclehose

Alternative Site ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Representor ID and details: ID-5028/1/1      Mr Graham Ager

Alternative Site    ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-5029/1/1      Mr Phillip Rawsthorne

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation objects to the level of housing proposed for Dinas Powys, raising concerns regarding the impact that the proposed developments would have locally.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-5092/3/1      Cottrell Park Limited

Alternative Site    ASA44 - Land at Cottrell Park - Tourism - extend allocation

Representation Type    Object

#### Summary of Representation:

Representation seeks an amendment to the boundary of site MG26 (3) - Land at Cottrell Park Golf Club.

#### Council's Response(s):

The representation proposes the amendment of a site allocation proposed in the Deposit LDP and the Council's composite site response addresses the issues raised to the LDP site allocation. Having considered the site constraints, policy context, the proposed LDP provision, and other relevant material factors, it is considered there is no demonstrable need to amend the site within the Plan. Furthermore, policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated in order to deliver the identified housing and employment needs. The inclusion of the alternative site proposal is therefore not considered necessary to ensure that the LDP is sound.

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Comments on SP 1 criterion 6 which meets with NRW observations. However it is speculative on how the Water Framework Directive (WFD) is addressed within the plan and its subsequent strategy.

#### Council's Response(s):

It is the Council opinion that policy MD8 Environmental Protection provides sufficient scope to enable the Council to ensure that future development proposals accord with the requirements of the Water Framework Directive. Policy MD8 places a requirement on all development proposals to demonstrate that they would not result in an unacceptable impact on water resources including surface and groundwater. Similarly, LDP policy MD10 requires development to positively contribute to biodiversity interests including wetlands, watercourses and ponds.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks amendments to Appendix 5 and 6 to include a reference to protected species.

#### Council's Response(s):

Appendices 5 and 6 make reference to the need for additional ecological assessments will be required for all sites. Additionally the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to promoting biodiversity (Policy MD10). Paragraph 7.46 states that 'all proposals will be required to ensure that biodiversity interest is maintained and enhanced to achieve overall net gain.' Consequently, it is considered that the LDP meets the tests of soundness without the need to amend appendix 5 and 6.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/12    Planning Consultations    Natural Resources Wales

Alternative Site    N/A

Representation Type    Comment

#### Summary of Representation:

Comments on the annual average completion rate of 663 units which is higher than the historic average annual completion rates for the previous 15 years. Concerns over the realistic delivery of housing provision.

#### Council's Response(s):

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Responses to the residential requirement and housing supply are provided in responses to Policies SP3 and MG1. Further details relating to the residential requirement and housing supply of the Plan are also provided in the Housing Provision background paper (2015).

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and the proposed changes are not considered necessary.

The Council is not aware of any significant issues that would affect the delivery of the LDP housing allocations and level of growth identified and further details are provided in the Housing Provision background paper (2015). In this respect, several residential sites have been granted permission and the Council are aware that many of the sites have been either acquired by developers or are under negotiation.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/13      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation raises concerns over the level of employment land identified to meet regional demand (433.5ha) and believes that there is gap in the evidence base which should be amended to prevent large areas of land from being unnecessarily sterilised.

#### Council's Response(s):

The strategic employment allocation Land to the South of Junction 34 M4 Hensol is an existing established employment site which originally was developed by Bosch with financial assistance from the former Welsh Development Agency as part of a major regional inward investment programme that recognised the strategic importance of development along the M4 corridor.

The site therefore has a longstanding history of employment use and its classification as a "strategic employment site" within the LDP has been made on the basis of the review and recommendations contained within Council's Employment Land and Premises Study (2013). Such sites are defined within the study as 'flagship sites' which are "of scale, location and setting capable of being broad business park developments competing for investment in the regional/sub regional market place. These are prime sites for marketing to a cross-section of users- including new inward investment into the Vale. They can also meet the needs of image conscious, aspirational companies already located in the area". This study is supplemented by further economic advice on the Employment Land and Premises Study (2015) prepared by BE Group.

In 2011, the site and adjacent land was acquired by Renishaw Ltd with the intentions to expand their operations on the site and also further develop the land for employment uses, which include a potential regional distribution hub. The allocation of site under policy MG9 (10) is in recognition of the long term development proposals of the existing owner, and will ensure that future planning proposals for the site will be undertaken in accordance with the policy requirements of the LDP.

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks clarification as to how the provision of waste management facilities on B2 employment sites shall effect the employment land supply.

#### Council's Response(s):

Since the publication of the RWP 1st review, a number of permissions for waste facilities have been granted by the Council and these have been concentrated on the existing employment sites at Llandow Trading and Industrial Estates, and around the Operational Port at Barry Dock these have primarily utilised existing buildings on existing employment sites. This highlights their compatibility with other existing employment sites and it is also unlikely that any additional facilities would undermine the Council's employment needs and requirements identified under policy SP5 of the Deposit LDP. Additionally, policy MD16 Protection of Employment Land and Premises would preclude the development of waste management facilities where this would undermine the identified employment requirements of the LDP.

#### Summary of Representation:

Representation supports clarification in Appendix 5 that ecological studies will be required for certain sites to support planning applications, and seeks additional similar requirements on a number of allocations suggested within the representation.

#### Council's Response(s):

Comments noted. In Appendix 5, under each site named at St Athan except for site MG2 (4), there is reference to the need for an ecological study in consultation with NRW. The potential presence of European Protected on this site is noted. For consistency it is agreed to amend Appendix 5 site MG2 (4) to include reference to the potential presence of European Protected Species and to clarify on all the above sites that consultation with NRW and an ecological study will be required.

**Alternative Site**      ASD18 - MG 2 (5) - Land to the east of Eglwys Brewis - Delete Site

**Representation Type**      Object

#### Summary of Representation:

Representation seeks the deletion of site MG2(5) Land to the east of Eglwys Brewis.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Summary of Representation:

Representation seeks the deletion of site MG 2 (7) - Land between new Northern Access Road and Eglwys Brewis Road.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Amend vision to include reference to the protection and enhancement of the environment.

#### Council's Response(s):

The Council are of the view that the LDP vision is a well-rounded vision that reflects the Council's priorities for social environmental and economic matters in the Vale of Glamorgan. It is also considered that the LDP contains a robust policy framework for the protection and enhancement of the environment, and simply amending the vision would not strengthen the effectiveness of the LDP to protect these areas. Indeed the Council notes that your representation supports those elements of the LDP "which manages the natural and built resources of the Vale of Glamorgan, makes a positive contribution towards reducing the impacts of climate change by promoting sustainable development, transport energy conservation and renewable energy conservation"

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Representor ID and details: ID-5096/1/31      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation suggests that a Broad Level Assessment should be undertaken to inform the LDP and any subsequent site specific flood FCA required by a planning application on site MG2(32).

#### Council's Response(s):

The site is located within a C1 Flood Zone, and therefore is permissible in accordance with TAN 15 Development and Flood Risk, where it is justifiable. In this respect the site is a long standing UDP allocation, which has been affected by land ownership issues which have caused delay in the delivery of the site. The Council has been advised that these by the promoter of the site that these matters have been resolved. With regard to flooding issues, it is the Council's opinion that the site specific matters relating to flood risk assessment of the site would be carefully considered during the planning application stage to ensure any potential impacts are identified and appropriate mitigation and management measures included. National policy guidance provides a sufficient context in terms of details in Technical Advice Notes to provide a sound basis for such detailed work. Notwithstanding this, an initial flood assessment has been undertaken by the promoters of the site which identifies outline mitigation proposals, and further detail of the measure proposed would be provided once an application is formally submitted to the Council and available for scrutiny by NRW.

#### Officer Recommendation:

No Change Required

#### Summary of Representation:

Representation advises of a protected species at site MG2(33) and seeks additional text in site description at Appendix 5.

#### Council's Response(s):

The site is the subject of an extant planning consent; the matter of raised has been considered by the Council in its decision to grant permission for the development, and therefore the Council is of the opinion that no change to the LDP is required.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/34      Planning Consultations      Natural Resources Wales

Alternative Site      ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type      Object

#### Summary of Representation:

Representation seeks a reduction in the size of sites MG2 (37) & (43) to reduce their landscape impact.

#### Council's Response(s):

The representation seeks an amendment to a site allocation within the Deposit LDP for residential development.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated within the LDP are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/37      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to MG9(1) as justification is required on the need for a site of this size in an area with areas of nature conservation vale. Representation requires justification for the scale of the employment allocation MG9 (1) - Land to the South of Junction 34 M4 Hensol. Concerns over the lack of demand for large scale logistics (outlined in Employment Land and Premises Study). Amend MG 9 to state development proposals need to demonstrate a need for the development. Include the definition for strategic sites within the Plan. Pre-cautionary approach needed towards development due to sites status as 'less vulnerable' to flooding under TAN 15. Policy should provide reasonable justification or site should be deleted.

The relevant references in Appendix 6 should be amended by adding the requirements related to ecological and flood risk management requirements. For example, a specific flood consequence assessment will be required to be submitted with any planning application. Relevant text should also acknowledge that the development will be constrained, which may in turn affect development density and layout on this site. TAN15 advises that an annotation of flooding as a constraint for an individual site should be included on the proposals map and policy requirements specified which pertain to the development of that site.

The SA concludes that the policy is negative and will result in negative effects with no apparent justification for taking this forward to your Deposit Plan.

#### Council's Response(s):

The strategic employment allocation Land to the South of Junction 34 M4 Hensol is an existing established employment site which was originally developed by Bosch with financial assistance from the former Welsh Development Agency as part of a major regional inward investment programme that recognised the strategic importance of development along the M4 corridor.

The site therefore has a longstanding history of employment use and its classification as a "strategic employment site" within the LDP has been made on the basis of the Council's Employment Land and Premises Study 2013. Its allocation within the plan recognises the flagship status identified within the Employment Land and Premises Study (2013), its strategic location and role as a regional employment site. Such sites are defined within the study as those which are "of scale, location and setting capable of being broad business park developments competing for investment in the regional/sub regional market place. These are prime sites for marketing to a cross-section of users- including new inward investment into the Vale. They can also meet the needs of image conscious, aspirational companies already located in the area".

In 2011, the site and adjacent land was acquired by Renishaw Ltd with the intentions to expand their operations on the site and also further develop the land for employment uses, which include a potential regional distribution hub. The allocation of site under policy MG9 (1) is in recognition of the long term development proposals of the existing, and shall ensure that future planning proposals for the site with be undertaken in accordance with the policy requirements of the LDP.

A number of environmental constraints have been identified within the boundary of the proposed strategic employment site. The proposed site boundary will allow the Council to address the concerns of NRW of the need for mitigating the impact of the development on nature conservation and environmental constraints and manage future development proposals in accordance with the policy requirements of the LDP. This includes safeguarding for SSSIs, mineral resources, SINC's and ensuring appropriate flood mitigation measures are provided as part of any future development of the site. Through this process NRW will be able to comment on the application and thereby ensure that all the matters raised above are fully addressed through the planning application process. Therefore, the proposed change is not considered necessary to ensure the soundness of the Plan.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - Introduction

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Comments on MG 9 (4) in regards to the site not being able to adequately manage the risk of flooding.

#### Council's Response(s):

Comments are noted. The site allocation is located within a well-established port and industrial area and forms part of an allocated employment site within the Adopted Vale of Glamorgan UDP. The allocations within the LDP are made up of small pockets of land within and adjoining existing employment uses. The latest TAN 15 DAM Flood Zone Maps (January 2015) have removed large areas of land previously identified as being within areas of flood risk as shown in the updated Plan Preparation and Assessment of Flood Risk background paper (2015). Notwithstanding this the Council considers that given the nature and planning history of the site the potential flood risk arising from additional new employment uses within the area could be adequately assessed through the planning application process and Appendix 6 identified a requirement for a Flood Consequence Assessment

Representation Type      Object

#### Summary of Representation:

Representation welcomes inclusion of policy MG 25 (Public Open Space Allocation) but raises concerns that the environmental benefits of natural green space has not been fully considered. Supporting text should be amended to at paragraph 6.149 to refer to areas identified as having a deficiency of natural green space and the requirement for developments to address this deficiency. Amend para 6.149 (MG 25 Public Open Space Allocations) to make reference to deficiency in open space and requirement for developments to address that deficiency.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Where sites offer no reasonable scope to provide public open space on site, agreements will be made between developers and the Council to allow commuted sums to be paid towards the provision of additional open space or the improvement of existing open space within the local area. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. Paragraph 6.149 refers to open space facilities in general and this is intended to include natural green space and the Open Space Background Paper similarly includes details of all types of open space. The type and nature of the open space that should be provided as a result of development will be determined during the planning application process and agreed with the developer at that time.

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation seeks an amendment to policy MD5 to exclude last statement in the policy.

#### Council's Response(s):

The rationale for Policy MD5 is to allow for the provision of small scale affordable housing developments – it is the Council's view that the impact of such developments will be limited since the supporting justification at 7.24 indicates that small scale “rounding off” will be limited to 5 dwellings and restricted to the provision of affordable housing. Given the level of affordable housing need identified, especially in the areas where settlement boundaries have been identified, this exception is considered to justify the policy position. Notwithstanding this, the Council accept that the policy should be more specific in its intentions and therefore wish to amend the policy to more accurately reflect the written justification and aim of the policy.

In identifying the extent of the LDP settlement boundaries the Council reviewed existing UDP boundaries and amended these to include land considered to have a physical relationship to the settlement (e.g. open space, planning approvals/physical changes since the original UDP boundaries had been drafted) and the identified LDP allocations. This review did not amend boundaries to identify “white land”, i.e. where potential small scale rounding off may be permitted.

Amend last paragraph of Policy MD5 to read:

FAVOURABLE CONSIDERATION WILL BE GIVEN, OTHER THAN WITHIN AREAS IDENTIFIED AS GREEN WEDGES, TO SMALL-SCALE AFFORDABLE HOUSING DEVELOPMENT WHICH CONSTITUTES THE “ROUNDING OFF” OF THE EDGE OF SETTLEMENT BOUNDARIES WHERE IT CAN BE SHOWN TO BE CONSISTENT WITH THE PROVISIONS OF POLICIES MD 2 AND MD 3.

Representation Type      Object

#### Summary of Representation:

Representation comments on a typographical error and suggests 'designed' is replaced with 'designated' in the third criterion of Policy MD 9 (Historic Environment). Representation also suggests that the criterion includes specific reference to landscapes of outstanding historic interest to meet test of soundness CE2.

#### Council's Response(s):

Comment noted, the Council will amend the third criteria of Policy MD9 Historic Environment to clarify criterion 3 and include historic landscapes such as that at Llancarfan which is included in the CADW / ICOMOS Register of Landscapes of Outstanding Historic Interest in Wales.

Amend third criterion of policy MD 9 to read:

3. WITHIN DESIGNATED LANDSCAPES, HISTORIC PARKS AND GARDENS, AND BATTLEFIELDS, DEVELOPMENT PROPOSALS MUST RESPECT THE SPECIAL HISTORIC CHARACTER AND QUALITY OF THESE AREAS, THEIR SETTINGS OR HISTORIC VIEWS AND VISTAS.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/54      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Representation objects to the wording in Policy MD 10 (Promoting Biodiversity) and the wording of supporting paragraph 7.48. Representation suggests the amending the policy wording to clarify that the need for the development will be required to outweigh the biodiversity interests of the site.

#### Council's Response(s):

Agreed. It is considered the proposed changes would assist in ensuring the soundness of the Plan.

Amend final sentence of Policy MD10 (Promoting Biodiversity) to read:

WHERE PROPOSALS HAVE A NEGATIVE IMPACT ON SITES SHOWN TO BE IMPORTANT FOR BIODIVERSITY, DEVELOPERS WILL BE REQUIRED TO DEMONSTRATE THAT THE DEVELOPMENT COULD NOT BE LOCATED ELSEWHERE AND THAT THE NEED FOR THE DEVELOPMENT OUTWEIGHS THE BIODIVERSITY INTERESTS OF THE SITE.

Amend paragraph 7.48 to read:

7.48 Biodiversity interests include sites of European, National, Regional and local importance, such as Special Areas of Conservation (SAC), Special Protection Areas (SPA), Sites of Special Scientific Interest (SSSI), Regionally Important Geological Sites (RIGS) and Sites of Importance for Nature Conservation (SINCs). These sites are identified on the Constraints Map, with the exception of identified SINCs under Policy MG19 which are shown on the Proposals Map and listed at Appendix 9. Priority habitats are those which are identified as in most need of conservation, comprising collectively those as listed in Section 42 of the Natural Environment and Rural Communities Act 2006 and those listed in the Local Biodiversity Action Plan for the Vale of Glamorgan, and those sites which meet the criteria for SINCs.

Amend paragraph 7.49 to read:

7.49 Any development proposals that are likely to affect protected species and/or internationally and nationally designated nature conservation sites will be determined in accordance with national policy set out in Planning Policy Wales and Technical Advice Note 5: Nature Conservation and Planning (2009). In accordance with The Conservation and Habitats and Species Regulations 2010, any development proposal that has the potential for an adverse effect on the integrity of a European site will require a Project Level Assessment to be prepared to the satisfaction of Natural Resources Wales and the local authority.

Amend paragraph 7.50 to read:

7.50 In the case of locally identified sites, e.g. SINCs, where mitigation measures cannot resolve any significant unacceptable effects on habitats and species in an appropriate manner, the use of compensatory measures such as translocation will only be considered if the habitat(s) and/or species in question cannot be maintained in their present location. In determining development proposals that adversely impact on locally identified sites, the same overriding need justification principles will be applied as for European or National sites i.e. the need for the development must outweigh the biodiversity interest of the site and that development could not be located elsewhere and, compensation/mitigation will be required. However, for locally identified sites their emphasis will reflect the scale of the development proposal and the local status of the site.

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/55      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects due to contradictions between paragraphs 7.50 for Policy MD 10 and 6.126 for Policy MG 19 regarding the assessment of development proposals that would adversely affect locally identified Site of Importance for Nature Conservation (SINCs). Representation requests that comments within paragraph 6.126 (Policy MG 19 Sites of Importance for Nature Conservation) should be aligned with comments in 7.50 (Policy MD 8 Promoting Biodiversity).

#### Council's Response(s):

Agreed. To address the inconsistency it is proposed to amend paragraph 7.50 to read:

7.50 In the case of locally identified sites, e.g. SINCs, where mitigation measures cannot resolve any significant unacceptable effects on habitats and species in an appropriate manner, the use of compensatory measures such as translocation, will only be considered if the habitat(s) and/or species in question cannot be maintained in their present location. In determining development proposals that adversely impact on locally identified sites, the same overriding need justification principles will be applied as for European or National sites i.e. the need for the development must outweigh the biodiversity interest of the site and that development could not be located elsewhere and, compensation/mitigation will be required. However, for locally identified sites their emphasis will reflect the scale of the development proposal and the local status of the site.

Representation Type      Object

#### Summary of Representation:

Representation objects to statutory designations being identified on the constraints map rather than the proposal map. The need for statutory designations of various types to be clearly identified on a LDP's Proposals Maps.

#### Council's Response(s):

Paragraph 5.4.6 of Planning Policy Wales (PPW) provides that 'wherever practical' statutory or non-statutory designations and those which are candidates for such designations should be clearly identified on the proposals maps or be capable of being identified from clear criteria in environmental protection policies.' While the comments of the representor are noted, given the requirement to illustrate the many allocations and designations on the proposals map the Council has for clarity included such designations on the LDP Constraints Map and this is considered to be an appropriate and practical approach given the number of policies and designations required to be identified on the LDP Proposals Map.

Notwithstanding the above, the Council has identified that the Severn Estuary Special Protection Area (SPA) has not been identified on the Constraints Map and it is proposed that this be added for consistency and to ensure the soundness of the Plan.

Proposed change recommended: Add Severn Estuary SPA to the LDP Constraints Map for consistency.

#### Summary of Representation:

Representation objects to Policy MD10 due to concerns that the authority has identified all locations of priority habitat and species across the authority area outside of designated sites. Specifically within para. 7.48 (MD 10 Promoting Biodiversity). Removal of para. 7.48.

#### Council's Response(s):

Agree, the wording of paragraph 7.48 implies that the locations of all European, National and local priority habitats and species in the Vale of Glamorgan are shown on the proposals and constraints maps, which is not the case. For clarity it is proposed that paragraph 7.48 is amended to read: "These designated sites are identified on the Constraints Maps". Amend paragraph 7.48 to read:

7.48 Biodiversity interests include sites of European, National, Regional and local importance, such as Special Areas of Conservation (SAC), Special Protection Areas (SPA), Sites of Special Scientific Interest (SSSI), Regionally Important Geological Sites (RIGS) and Sites of Importance for Nature Conservation (SINCs). These sites are identified on the Constraints Map, with the exception of identified SINCs under Policy MG19 which are shown on the Proposals Map and listed at Appendix 9. Priority habitats are those which are identified as in most need of conservation, comprising collectively those as listed in section 42 of the Natural Environment and Rural Communities Act 2006 and those listed in the Local Biodiversity Action Plan for the Vale of Glamorgan, and those sites which meet the criteria for SINCs.

#### Summary of Representation:

Representation objects to MD10 due to the lack of inclusion of green infrastructure within policy MD 10 and seeks an amendment to include reference to green infrastructure.

#### Council's Response(s):

Agree. It is considered that the inclusion of 'green infrastructure' in policy MD 10 (Promoting Biodiversity) would clarify and assist with the implementation of the policy. In addition the Council proposes that the words 'AND ENHANCE' are added to criterion 3 of the policy and that 'EXCHANGE' is replaced with 'INTERCHANGE' in order to clarify the policy and to comply with the Natural Environment and Rural Communities (NERC) Act 2006.

Amend criterion 3 of Policy MD 10 Promoting Biodiversity to read:

3. DEMONSTRATING HOW THEY MAINTAIN AND ENHANCE FEATURES OF IMPORTANCE FOR ECOLOGICAL CONNECTIVITY, INCLUDING WILDLIFE CORRIDORS AND 'STEPPING STONES' AND OTHER GREEN INFRASTRUCTURE THAT ENABLES MIGRATION, DISPERSAL AND/OR GENETIC INTERCHANGE.

In addition, it is considered appropriate to amend criterion 2 of Policy MD 10 to clarify the implementation of the Policy. Amend Policy criterion 2 of MD10 to read:

2. INCORPORATING NEW BIODIVERSITY FEATURES EITHER ON OR OFF SITE TO ENABLE A NET GAIN IN BIODIVERSITY INTEREST. WHERE IT IS DEMONSTRATED THAT THE IMPACT OF DEVELOPMENT ON BIODIVERSITY CANNOT BE ADDRESSED ON SITE, DEVELOPERS WILL BE REQUIRED TO PROVIDE ALTERNATIVE OFF-SITE COMPENSATION TO MAINTAIN NET BIODIVERSITY INTEREST; AND BY"

Representation Type      Object

#### Summary of Representation:

Objects on the grounds that some terms used within MD 19 (Low Carbon and Renewable Energy Generation) require more clarification. Representation requests definitions of what is covered by the use of terms; natural heritage, nature conservation, wildlife and landscape importance.

#### Council's Response(s):

The policy requires that there is no unacceptable impact on the interests of a number of key considerations and, in this respect, it is considered appropriate to identify those constraints that are likely to be practically relevant in assessing renewable energy development proposals.

In assessing future development proposals the LDP will be read as a whole and all other relevant policies will apply. Therefore, the constraints listed Policy MD 19 will be read together with the Plan's relevant design, nature conservation and environmental health policies such as Policy SP 10 (Built and Natural Environment), MD 10 (Promoting Biodiversity) and MG 17 (Special Landscape Areas). Whilst not a comprehensive list, other relevant policies are referenced in the supporting text such as policies MD 8 (Environmental Protection), MD 2 (Place Making) and MD 3 (Design of New Development).

It is considered that the support text to policy MD 19 at paragraph 7.88 could be amended to clarify other relevant LDP policies when considering renewable energy development proposals.

It is proposed to amend the final sentence of paragraph 7.88 to read:

"In this respect, in considering the impact on the interests of those features and constraints listed in policy MD 19, renewable energy proposals will also need to have due regard to the requirements of policies MD 8 (Environmental Protection), MD 10 (Promoting Biodiversity) and MG 17 (Special Landscape Areas) where relevant".

In addition, is it considered that including these constraints in the Plan's Glossary of Terms would assist in providing clarification.

It is proposed that the following definitions be added to the Glossary of Terms Appendix 1 of the LDP:

Natural Heritage: refers to natural sites with cultural aspects such as cultural landscapes, physical, biological or geological formations.

Cultural Heritage: refers to a monument, group of buildings or site of historical, aesthetic, archaeological, scientific, ethnological or anthropological value.

Wildlife and nature conservation: the practice of protecting and enhancing biodiversity including important plant and wild animal species and their habitats.

Landscape Importance: includes areas identified for their landscape importance such as Special Landscape Areas (SLAs), landscapes, parks and gardens of special historic interest, landscapes of outstanding historic interest and the Glamorgan Heritage Coast. Features of landscape importance can include natural or manmade features important to the character of the landscape, such as, trees, woodland, hedgerows, river corridors, ponds, stone walls, and species rich grasslands.

Represor ID and details: ID-5096/1/63      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

General support for the inclusion of indicators and targets but stresses that there are concerns regarding objectives to reduce the impact of and to mitigating the adverse effects of climate change will not simply be achieved by monitoring one element e.g. developments on flood plains.

#### Council's Response(s):

Comments noted. It is considered the proposed change would assist in the effective monitoring of Objective 2 and the soundness of the Plan. It is proposed that the monitoring for Objective 2 be amended to acknowledge that other Policy Targets identified in the monitoring framework, such as PT11, which will also be relevant in monitoring the outcomes in relation to climate change.

Amended Objective 2 monitoring section (page 128) to read:

Strategic Policies: SP1, SP7 and SP10

Other Relevant Policies MD1, MD2, MD8 and MD19.

Reducing the impact of and mitigating the adverse effects of climate change will not be achieved through the achievement of one objective. Monitoring of the effects of climate change will therefore also need to reflect a wide range of objective, indicators and targets.

Add new paragraph at 9.15 (page 126) to read:

"The Policy Targets contained in the following sections are not considered to be mutually exclusive and in seeking to achieve the objectives multiple Policy Target indicators may be relevant. This will be made clear within AMRs where this is considered to be the case".

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/64    Planning Consultations    Natural Resources Wales

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

General support for inclusion of monitoring indicators and targets but seeks amendment of assessment triggers under Objective 4 for effective monitoring. Representation suggest including reference to Cadw and the Council's conservation officer (in PT7 and PT8) and the Council's ecologist in PT10. It is also suggested that PT9 is amended to read "local and national nature conservation designation". It is considered that the assessment trigger for PT11 should be set sooner than 2021 and should refer to the biodiversity quality of sites.

#### Council's Response(s):

Comments are noted and proposed amendments to PT7, PT8, PT9, and PT10 the monitoring framework.

In respect of the comments for PT11, the Council consider that the 2021 timescale is appropriate given that the LDP is not scheduled to be formally adopted until 2016 and the 4 year period indicated is consistent with the monitoring and review framework set out in the LDP manual. However, the comment in respect of the monitoring target is accepted. Therefore, to assist with effectiveness of the monitoring targets and the soundness of the Plan it is proposed to amend assessment triggers as proposed by NRW as follows:

Amend PT7 and PT8 – to 1 planning consent issued where there is an outstanding objection from Cadw, NRW or the Council's Conservation officer.

Amend PT9 – replace "protected site local and national for nature conservation" with: "local or national nature conservation designation".

Amend PT10 – insert "or the Council's ecologist" at the end.

Amend PT11 – monitoring target to read "Net increase in good quality habitat from major developments".

#### Officer Recommendation:

Proposed Amendment

Representation Type      Object

#### Summary of Representation:

Representation seeks an amendment to the LDP monitoring framework, suggesting the inclusion of additional indicators/targets.

#### Council's Response(s):

Comments are welcomed and proposed amendments to the monitoring indicators and triggers as proposed by NRW:

##### Sustainable Drainage

Policy Target : The sustainable use and management of natural resources.

Monitoring Targets: The use of sustainable drainage systems (SUDs) are considered in all new development (with the exception of conversions and extensions to existing properties and premises).

Indicators: Amount of development providing SUDs.

Assessment Trigger: One or more planning application approved in any given year including SUDs where appropriate in their design.

##### Water Quality and Quantity

We suggest that objectives and indicators are developed in relation to water resources (quality and quantity) and to reflect the requirements of the Water Framework Directive.

Policy Target: The sustainable use and management of natural resources.

Monitoring Targets: No development will adversely impact on water quality and water quantity. Conserve water resources and increase water efficiency in new developments.

Indicators: Percentage of water bodies of good status.

Number of permissions granted where there is a known risk of deterioration in status.

Number of permissions which incorporate measures designed to improve water quality.

Assessment Targets:

One or more planning application approved in any given year and contrary to the advice of Natural Resources Wales and/or Dwr Cymru/Welsh Water.

### Deposit Plan Policy - Introduction

Representor ID and details: ID-5096/1/7      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

MD 6 should include settlement boundaries for minor rural settlements which would provide certainty as to where future development could be located. Due to the size and nature of service within certain settlements (e.g. Culverhouse Cross) boundaries need to be identified to better locate development.

#### Council's Response(s):

Whilst settlement boundaries are a widely accepted planning policy tool for managing development and enabling local authorities to distinguish between existing built up areas and countryside, there is no specific requirement within national planning policy for Local Planning Authorities to identify settlement boundaries when preparing development plans. Where references are made to settlement boundaries within Planning Policy Wales these are within the context of safeguarding the countryside and encouraging sustainable development by directing new development either within or in close proximity to exiting sustainable settlements.

Planning Policy Wales, paragraph 4.7.8 states, "development in the countryside should be located within and adjoining those settlements where it can be best accommodated in terms of infrastructure, access and habitat and landscape conservation. Infilling or minor extensions to existing settlements may be acceptable, in particular where it meets a local need for affordable housing, but new building in the open countryside away from existing settlements or areas allocated for development in development plans must continue to be strictly controlled. All new development should respect the character of the surrounding area and should be of appropriate scale and design."

However, TAN 6 Planning for Sustainable Rural Communities (July 2010) recognises that in rural areas settlement boundaries can limit the provision of housing to meet local needs, advising at paragraph 2.26 that "In smaller settlements, planning authorities should consider including criteria based policy against which planning applications can be assessed, rather than identifying settlement boundaries".

Within this policy context the Council has considered the merits and appropriateness of maintaining settlement boundaries for those identified in the LDP Settlement Hierarchy. The Council acknowledge that maintaining settlement boundaries can provide a long standing approach to restricting inappropriate expansion of development into the countryside, and provide certainty to communities, landowners and developers as to where the Council wish to see future development occur. Within the larger settlements, maintaining settlement boundaries would ensure that the priority is given to the delivery of LDP housing allocations which could be undermined by potential future edge of settlement windfall developments. This could include disproportionate or large scale windfall development proposals in areas of high development pressure or in otherwise sensitive locations.

One of the key disadvantages of settlement boundaries is that this creates a general presumption that development within boundaries is acceptable. In rural settlements this is particularly problematic as it places pressure on infill development which can impact on the rural character these settlements, many of which in the Vale of Glamorgan contain rural conservation areas. Additionally, this presumption in favour of development increases land values within boundaries compared to that outside of the settlement boundaries, but also creates "hope values" on land adjoining settlement boundaries (i.e. that the land could be included sometime in the future plan review or as a potential "rounding off" development site). The latter reduces the opportunities for "rural exceptions" affordable housing, and increases the affordability gap in rural settlements as the supply of housing land is restricted. This is considered likely to be a key reason for a limited number of rural exception sites for affordable housing being proposed and delivered over the life of the previous Unitary Development Plan.

Furthermore, whilst providing more certainty on locations likely to be acceptable for most forms of development, especially housing, settlement boundaries should not be considered as a

### Deposit Plan Policy - Introduction

**Represantor ID and details:** ID-5096/1/7      **Planning Consultations**   **Natural Resources Wales**

strait jacket to all forms of development. Policies in Planning Policy Wales and those in the Adopted UDP and Deposit LDP allow in principle, some forms of development on the edge of a minor villages which are outside but adjacent to the residential settlement boundary (such as proposals for affordable housing, community facilities and rural employment). Likewise it is not always the case that sites/proposals on land within a settlement boundary are suitable for development, which highlights the case that proposals for new development are simply not determined on whether a site falls with or outside a boundary line drawn on map. In this respect, such proposals are considered within the wider context of the site itself alongside other factors such as character of the surrounding area, adjoining uses, and the provision of adequate amenity space, and safe and suitable access.

In light of these factors, the LDP has proposed settlement boundaries around the Key, Service Centre and Primary settlements which are the focus of the majority of future development opportunities. For the Minor Rural Settlements, alongside a number of housing allocations, the LDP proposes criteria based approach for the assessment of future development proposals (Policy MD6 – Development within Minor Rural Settlements). The aim being to ease development pressures within Minor Rural Settlements by allowing “windfall” developments to come forward where considered appropriate on a case by case basis, whilst safeguarding the countryside from inappropriate development. This is particularly the case for those settlements within the hierarchy where housing allocations have been identified.

Notwithstanding this, Policy MD 6 maintains the ability for the Council to restrict inappropriate expansion of development in the countryside, proposals which would have a detrimental impact on the existing settlement or on the wider area. This approach is set out within Policy MD 6, Criteria 1 to 5, and is reinforced at paragraph 7.30 which states that:

“New development should therefore demonstrate a distinct physical or visual relationship with the structures that comprise the settlement. For example, new development should share an existing property boundary or be closely related to existing buildings so as to maintain and strengthen the settlement form. A strong visual relationship is also important, and proposals for new buildings that are divorced or unrelated to the existing properties or settlement or which present an incongruous or large scale extension will not be permitted”.

The criteria contained within Policy MD6 has been developed to reflect the material considerations that the Council would need to consider if settlement boundaries were maintained, for example relating to its impact on the countryside and character of the settlement. This enables development proposals within Minor Rural Settlements to be considered on their own merits rather than considering whether a potential development site lies within or outside a settlement boundary. Indeed, it should be noted that UDP Policy HOUS2 and HOUS8 allow for appropriate small scale development adjacent to settlement boundaries when assessed against criteria based policy. It is considered that the criteria proposed within Policy MD6 are sufficiently detailed to manage development proposals within Minor Rural Settlements and have been significantly enhanced from those previously used.

Therefore, it is considered that the criteria based policy under policy MD6 maintains the ability to appropriately manage new development proposals without imposing the restrictive approach of using settlement boundaries to control future development. This allows for appropriate small scale development within Minor Rural Settlements to be considered on individual merit rather than restricting new development opportunities to a limited number of small-infill and rounding-off plots within and adjoining the defined settlement boundary. This will allow the character of existing settlements to be safeguarded and assist in meeting local housing needs in rural villages, thereby supporting their longer term viability. Therefore, the proposed change is not considered to be required to ensure the soundness of the LDP.

It is noted that similar approaches to management of rural settlement developments and the removal of settlement boundaries has been proposed within Local Plans in England, notably the Cornwall Local Plan (2010-2030) and the Wiltshire LDF Core Strategy (2011).

### Deposit Plan Policy - Introduction

Representor ID and details: ID-5096/1/8      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objection raised on the grounds that the LDP should include a specific policy for Culverhouse Cross, rather than being considered under policies MD6 and MD17.

#### Council's Response(s):

Section 3 of the LDP Sustainable Settlement Appraisal Background Paper sets out the Council's rationale for the categorisation of settlements and assessment methodology. This states that -

"A total of 87 individual settlements were identified within the Vale of Glamorgan. In order to undertake an objective assessment of rural settlements loosely drawn boundaries within reasonable walking distances were used for surveying settlements. Appendix 2 shows a location and boundaries map of each settlement examined in this study. In some cases distinct urban districts were identified for surveying purposes. In considering individual settlements these distinct areas, often known locally under other names, were considered to form a wider functional part of the settlement.

With regard to the identification of Culverhouse Cross as rural minor settlement, paragraph 6.8 states that:

"Culverhouse Cross is the highest scoring settlement within this category and has a high population, estimated at 281. Although not rural in nature it scores similarly to other settlements within this category due to the range of services and facilities which can be accessed locally including retail, leisure and employment uses. The settlement also benefits from frequent bus services and strategic road links to Barry and Cardiff. The assessed area does not have a historic village core but is comprised of a significant amount of suburban residential development along Brooklands Terrace."

#### Summary of Representation:

Representation seeks the amendments of clerical errors in regard to policy numbers.

#### Council's Response(s):

The policy names and numbers referred to in Table 11 refer to the policies in the Deposit LDP February 2012 which was later withdrawn. Paragraph 4.267 explains that the initial SA assessment was undertaken in 2011 and Table 11 summarises the key SA recommendations in respect to the Managing Development Policies and where recommended changes have been incorporated into the Deposit LDP November 2013.

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/86    Planning Consultations    Natural Resources Wales

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation seeks an amendment to the Monitoring Indicator for water quality to include green infrastructure.

#### Council's Response(s):

Comments noted. The Sustainability Appraisal Approved Scoping Report establishes the sustainability context and baseline for the Vale of Glamorgan and sets sustainability objectives and indicators against which the LDP will be assessed during its preparation. These were subject to a public consultation exercise and reported to Cabinet on 6th June 2007. The Council cannot therefore amend the indicators at this stage. It should however be noted that the LDP Policy MD10 includes geology as an important feature that requires consideration.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - Introduction

Represor ID and details: ID-5096/1/9      Planning Consultations      Natural Resources Wales

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Amend area Objectives to refer to the need to protect and where appropriate provide access to natural and semi - natural open spaces (To meet Test of Soundness CE1).

#### Council's Response(s):

The LDP contains a range of policies that seek to protect and enhance natural environment, including overarching Objective 4: To protect and enhance the Vale of Glamorgan's historic, built and natural environment as well as other policies which encompass natural and semi natural spaces. Accordingly it is considered that that emending the area objectives as suggested is unnecessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Representor ID and details: ID-5102/1/1      Mr Gareth L Roberts

Alternative Site      N/A

Representation Type      Support

#### Summary of Representation:

Support for policy MG2.

#### Council's Response(s):

Support is welcomed.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP1 - Delivering The Strategy

Representor ID and details: ID-5119/1/1      Mr Simon Tofts

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 1 on the grounds that the policy should make specific reference to housing for the elderly. Amend SP 1 to include specific reference to housing for the elderly.

#### Council's Response(s):

The housing needs of ageing population are provided across all type of tenure i.e. both private and affordable- consequently the Council considers that it is not necessary to specifically identify the elderly population given that their housing requirements/choices are largely influenced by personal circumstances.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP1 - Delivering The Strategy

Represor ID and details: ID-5119/1/2      Mr Simon Tofts

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 1 as more provision for housing for the elderly should be encouraged within the policy to achieve the creation of balance communities. Amend policy to make reference to the provision of housing for the elderly.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - SP1 - Delivering The Strategy

Represor ID and details: ID-5119/1/3      Mr Simon Tofts

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Representation objects to the small site thresholds and suggest that the requirement should be lower or the thresholds increased.

#### Council's Response(s):

The Council has reviewed its Affordable Housing Viability Assessment (2014) in response to a number of representations received on the Deposit LDP. The updated evidence confirms that residential development viability remains strong within the Vale of Glamorgan and indicates that higher affordable housing targets than those identified in the Deposit LDP are justified in higher value areas. In light of the updated evidence it is proposed to amend the percentage requirements identified in Policy MG 4 to better reflect development viability across the Vale of Glamorgan. This change reflects the study's recommendations that affordable housing targets for 35% in Llantwit Major, Rhoose and St Athan, and 40% in the remainder of the Vale of Glamorgan (with the exception of Barry), would be appropriate.

These percentage requirements take account of up-to-date development costs and market values and are therefore considered to be robust and justifiable. Further information on this is available within the Vale of Glamorgan Viability Update Report (2014).

With regard to the use of site thresholds, the updated study highlights that site size does not affect viability and confirms the policy position of the Deposit LDP. Therefore, no change is considered to be required to this element of the policy.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP1 - Delivering The Strategy

Represor ID and details: ID-5119/1/4      Mr Simon Tofts

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

The representation objects to Policy MD7 on the grounds that it is too prescriptive and does not address the need of housing for the elderly which may require lower densities.

#### Council's Response(s):

Policy MD7 sets minimum site densities which reflect that used by the Council to determine the size of development anticipated on allocated sites. It is considered appropriate for the LDP to contain this policy to enable the Council to meet its housing requirement through the sustainable use of land. The policy acknowledges that there may be occasions where the requisite thresholds could be lower, for example, where there would be an unacceptable impact on the character of the area. Notwithstanding this, the densities set relate to net developable densities which exclude land required for other infrastructure not directly associated with the development such as major distributor roads, community facilities, mixed uses and other ancillary infrastructure provisions. It is considered that the policy contains sufficient flexibility and the density standards used are appropriate for new residential developments within the Vale. Therefore, the proposed change is not considered necessary to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG16 - Transport Proposals

Representor ID and details: ID-5123/1/1      Mr John Evans

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

Initial representation suggested that reinstatement of the railway line through centre of Penarth along Railway Walk- this was subsequently retracted by the representor.

#### Council's Response(s):

Email received from Mr Evans which seeks the withdrawal of this suggestion - therefore no need to further consider this element of the representation.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG16 - Transport Proposals

Representor ID and details: ID-5123/2/1      Mr John Evans

Alternative Site    ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG16 - Transport Proposals

Representor ID and details: ID-5123/2/2      Mr John Evans

**Alternative Site**    ASA45 - Land at Upper Cosmeston Farm, Lavernock - Green Wedge - increase designation

**Representation Type**    Object

#### Summary of Representation:

Representation seeks an amendment to green wedge designation MG18 (6) - South Penarth to Sully, to include housing allocation MG2 (23) Land at Upper Cosmeston Farm.

#### Council's Response(s):

In preparing a Local Development Plan, the local authority has a responsibility to ensure that sufficient land is available to provide for the identified housing need over the plan period while seeking to ensure a balance between development and the protection of the environment. In this regard the Council has identified a range and choice of deliverable sites in sustainable locations, including site MG2 (23) Land at Upper Cosmeston Farm, Lavernock taking into account their relevant constraints and merits and the contributions that they can make to deliver the aims and objectives of the Deposit Plan. In defining a new green wedge between the south of Penarth and the eastern edge of Sully the Council has sought to prevent the further expansion of Penarth and Sully over and above the allocated sites which have been identified within the Deposit Plan. Therefore, while the comments of the representor are noted, the Council does not concur with the views of the representor that the allocations are contradictory as the Council is required to balance what can appear to be conflicting objectives.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG16 - Transport Proposals

Represor ID and details: ID-5123/3/1      Mr John Evans

**Alternative Site**    ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Delete MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth.

#### Council's Response(s):

A park and ride facility within the Penarth area has been identified in the South East Wales Transport Alliance (Sewta) Park and Ride study and the Council considers the site at Cosmeston Lakes Country Park is appropriately located to attract daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. In addition it should be noted that the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride facility at Cosmeston Lakes Country Park is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the scheme represents an important and deliverable proposal which will help to encourage the increased use of sustainable transport and reduce the number of car based daily journeys to/from Cardiff. With regard to the environmental and traffic concerns raised, these matters would be addressed through the appropriate detailed design and planning stages. Therefore no change is considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-5134/1/1 Mr T and Mrs D Lock

**Alternative Site** ASN061 - Land adjacent to Old Rectory, Llandough - Residential

**Representation Type** Object

#### Summary of Representation:

Representation promotes a new alternative site ASN061 - Land adjacent to Old Rectory, Llandough for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Representor ID and details: ID-5140/1/1      Mr P & Mrs E Trenchard

Alternative Site    ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

Representation Type    Object

#### Summary of Representation:

Representation seeks the deletion of the proposed Cosmeston Park and Ride (MG 16 (12) ).

#### Council's Response(s):

As with the residential allocations contained within the Deposit LDP any substantial new development would require the submission of a robust Transport Assessment (TA). The TA would evaluate and determine any mitigation measures which would be required to alleviate any adverse impacts upon the local highway network that had been identified as a result of the development. In addition, detailed design for the park and ride site has yet to be undertaken and these issues could be considered at appropriate detailed design and planning stages. Similarly, detailed consideration has yet to be given to the operation and management of any park and ride facility although given the Council's other objectives it would seek to ensure that any facility would not adversely impact on the use and enjoyment of the Country Park, although this is not a matter than can be addressed by the LDP.

The Council considers therefore that the concerns expressed by the representor in relation to the local highway would not justify the deletion of the site from the Deposit LDP and no change is considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represor ID and details: ID-5140/1/2      Mr P & Mrs E Trenchard

**Alternative Site**      ASN028 - Hayes Road Sully Employment Land - Residential

**Representation Type**      Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN028 - Hayes Road Sully Employment Land within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5142/1/1 Mr J & Mrs K Beach

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5145/2/2 Ms. Sue Hobbs

**Alternative Site** ASN071 - Land north east of Weycock Cross, Barry - Residential

**Representation Type** Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN071 - Land north east of Weycock Cross, Barry within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-5147/1/1      Mr Rhodri Stephens

**Alternative Site**    ASN062 - Land off Trepit Road, Wick - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN062 - Land off Trepit Road, Wick - for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5154/1/1 Mr Peter Simmonds

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5154/2/1 Mr Peter Simmonds

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5155/1/1 Mrs Valerie John

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5159/1/10 Mr James Regan

Alternative Site ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

Representation Type Object

#### Summary of Representation:

Objection to the site based on issues with additional traffic, lack of feasibility study and lack of clarity for the route.

#### Council's Response(s):

A park and ride facility within the Penarth area has been identified in the South East Wales Transport Alliance (Sewta) Park and Ride study and the Council considers the site at Cosmeston Lakes Country Park is appropriately located to attract daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. In addition it should be noted that the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride facility at Cosmeston Lakes Country Park is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area. The scheme represents an important and deliverable proposal which will help to encourage the increased use of sustainable transport and reduce the number of car based daily journeys to/from Cardiff. With regard to the environmental and traffic concerns raised, these matters would be addressed through the appropriate detailed design and planning stages. Therefore, no change is considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5159/1/12 Mr James Regan

**Alternative Site** ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail

**Representation Type** Object

#### Summary of Representation:

Representation promotes alternative site ASN005 - Land at Upper Cosmeston Farm, Lavernock - , for inclusion in the Deposit LDP for retail developmennt.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP.

Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5159/1/13 Mr James Regan

**Alternative Site** ASA48 - Land adjoining St Cyres School, Murch Road, Dinas Powys - Residential - reduce allocation boundary

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and seeks an amendment to the proposed site allocation. A comprehensive summary of the issues raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation supports the amendment of a site allocation proposed in the Deposit LDP.

Having considered the site constraints, policy context, the LDP provision, and other relevant material factors, it is considered there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

The inclusion of the alternative site proposal is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5159/1/5 Mr James Regan

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 to overall housing numbers being too high. Need to be lowered to be more realistic. The amount of housing development is too high and would cause traffic issues. Infrastructure in the Vale needs to come first before development. The green wedge around Dinas Powys needs to be reinstated.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Representor ID and details: ID-5159/1/6      Mr James Regan

**Alternative Site**    ASA41 - Land between Dinas Powys and Penarth - Green Wedge - increase designation

**Representation Type**    Object

#### Summary of Representation:

Representation seeks an amendment to the green to facilitate the safeguarding of a route for a Dinas Powys Bypass.

#### Council's Response(s):

Green wedges have been identified under policy MG18 of the Deposit LDP to prevent development which prejudices the open nature of land and the coalescence of settlements. Their designation, although non-statutory, adds an additional layer of protection to those areas where it is considered that development pressure exists or will exist during the lifetime of a development plan and they should only include land that is strictly necessary to fulfil the objective of the policy (PPW 4.8.12). The green wedge designations are intended as a temporary feature in order to achieve the objectives of the policy and as such, their existence and extent may vary between one adopted plan and another under preparation. In preparing a LDP, the council seeks to balance competing objectives and provide housing, employment and new infrastructure whilst protecting the environment and local amenity. In this regard the allocations and designations contained within the deposit LDP are considered to be based on a robust evidence base and the reinstatement of the green wedge around Dinas Powys as suggested by the representor is not considered to be necessary or appropriate. With regard to the Dinas Powys by pass, the Council has no current intention to pursue this proposals and its inclusion within the LDP would not be appropriate as there is no evidence to support its provision or deliverability and it would therefore be contrary to several of the Tests of Soundness against which the LDP is assessed.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys****Represor ID and details:** ID-5159/1/7      **Mr James Regan****Alternative Site**    ASN019 - Dinas Powys - Dinas Powys Bypass Road**Representation Type**    Object**Summary of Representation:**

MG 16 should include the proposal for the Dinas Powys Bypass, with land being safeguarded for its provision and to be built at the earliest opportunity within the LDP strategy. This is due to the increasing traffic problems being caused on the A4055 Cardiff Road at peak commute times. This raises issues for residents of Dinas Powys with congestion and pollution. Also the Merrie Harrier junction needs to be restructured to better control traffic flow. The Cosmeston bus park and ride should be removed as it is too far from the local need.

**Council's Response(s):**

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme.

Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

While Planning Policy Wales includes the provision for local authorities to safeguard land for transport infrastructure (PPW paragraph 8.5.2), including schemes identified within the RTP, it also states that blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period.

PPW 8.5.2 Development plans should also include policies and proposals relating to the development of other transport infrastructure and related services (such as public transport interchange facilities, rail facilities, harbours and airports) including safeguarding zones. Where local planning authorities wish to safeguard land for transport infrastructure, including schemes identified in the RTP, they should do so through a proposal in the development plan, where possible showing the precise route of the proposed new or improved infrastructure. When the precise route is not known, a safeguarding policy may be applied to the area of land necessary for the scheme. Blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period. When development plans are prepared or amended, existing transport proposals should be reviewed, so as to remove any proposals that have previously been safeguarded but are now abandoned or any that are unlikely to commence during the plan period.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

It is noted that the St Cyres development site impinges on the previously safeguarded by-pass route. However the previous route identified was only indicative and only detailed design will advise the exact land required. It is considered therefore that land options for a future by-pass still remain if this is ever needed.

The Council has recently undertaken junction improvement works at the Merrie Harrier junction. These works were funded by the Welsh Government and supported by the Sewta and

**Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys****Representor ID and details:** ID-5159/1/7      **Mr James Regan**

included the updating of the traffic control mechanisms and junction realignment within the confines of the existing adopted highway. Further works are currently being investigated as a part of the bus corridor investment package funded by the Cardiff Metro proposals. Additional improvements as promoted by the representor would require the compulsory purchase of adjoining land and/or residential properties adjacent to the junction and it is the Council's view that such measures cannot be justified at this time.

In respect of the park and ride facility at Cosmeston Lakes Country Park, it should be noted that a Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers the site at Cosmeston is appropriately located to intercept daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal which would help reduce the number of car based daily journeys to/from Cardiff. It should be noted that in addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride site at Cosmeston is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan.

Further while the representor makes various comments in respect of improvements that would benefit the local transport system and/or network, these are either the responsibility of Network Rail and/or the Train Operating Companies, or would encroach upon the commercial operations and involve land in the control of private companies. Notwithstanding this, where such schemes are advanced and supported by the relevant agencies and organisations, the Council would provide support where they can be shown to enhance local transport provision.

Therefore, with regards to the proposed new site allocations, having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated whilst meeting the identified needs. It is considered that the LDP meets the tests of soundness without the need for the suggested alternative site to deliver the identified needs whilst managing the impact of future development. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5159/1/8      Mr James Regan

**Alternative Site**    ASN099 - Land off Caerleon Road, Dinas Powys - Transportation - new station / transport interchange

**Representation Type**    Object

#### Summary of Representation:

Representation promotes MG2 (27) - Land off Caerleon Road, Dinas Powys as an alternative site for park and ride provision.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP.

Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated.

It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represantor ID and details: ID-5159/1/9 Mr James Regan

Alternative Site ASN063 - Tesco Site, Penarth Marina - Transportation - new station / transport interchange

Representation Type Object

#### Summary of Representation:

Representation promotes alternative site ASN063 - Tesco Site, Penarth Marina, for inclusion in the Deposit LDP for transport uses (bus park and ride)

#### Council's Response(s):

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesantor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme.

Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

While Planning Policy Wales includes the provision for local authorities to safeguard land for transport infrastructure (PPW paragraph 8.5.2), including schemes identified within the RTP, it also states that blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period.

PPW 8.5.2 Development plans should also include policies and proposals relating to the development of other transport infrastructure and related services (such as public transport interchange facilities, rail facilities, harbours and airports) including safeguarding zones. Where local planning authorities wish to safeguard land for transport infrastructure, including schemes identified in the RTP, they should do so through a proposal in the development plan, where possible showing the precise route of the proposed new or improved infrastructure.

When the precise route is not known, a safeguarding policy may be applied to the area of land necessary for the scheme. Blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period. When development plans are prepared or amended, existing transport proposals should be reviewed, so as to remove any proposals that have previously been safeguarded but are now abandoned or any that are unlikely to commence during the plan period.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

It is noted that the St Cyres development site impinges on the previously safeguarded by-pass route. However the previous route identified was only indicative and only detailed design will advise the exact land required. It is considered therefore that land options for a future by-pass still remain if this is ever needed.

The Council has recently undertaken junction improvement works at the Merrie Harrier junction. These works were funded by the Welsh Government and supported by the Sewta and included the updating of the traffic control mechanisms and junction realignment within the confines of the existing adopted highway. Further works are currently being investigated as a part of the bus corridor investment package funded by the Cardiff Metro proposals. Additional improvements as promoted by the repesantor would require the compulsory purchase of

**Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys****Representor ID and details:** ID-5159/1/9      **Mr James Regan**

adjoining land and/or residential properties adjacent to the junction and it is the Council's view that such measures cannot be justified at this time.

In respect of the park and ride facility at Cosmeston Lakes Country Park, it should be noted that a Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers the site at Cosmeston is appropriately located to intercept daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal which would help reduce the number of car based daily journeys to/from Cardiff. It should be noted that in addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride site at Cosmeston is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan.

Further while the representor makes various comments in respect of improvements that would benefit the local transport system and/or network, these are either the responsibility of Network Rail and/or the Train Operating Companies, or would encroach upon the commercial operations and involve land in the control of private companies. Notwithstanding this, where such schemes are advanced and supported by the relevant agencies and organisations, the Council would provide support where they can be shown to enhance local transport provision.

Therefore, with regards to the proposed new site allocations, having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated whilst meeting the identified needs. It is considered that the LDP meets the tests of soundness without the need for the suggested alternative site to deliver the identified needs whilst managing the impact of future development. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Representor ID and details: ID-5160/1/1      Ms. Wendy Youde

Alternative Site    ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-5161/1/1 Mr Tim Bird

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objection to distribution of housing under Policy MG 2. Representation considers there are too many proposed allocations in the Cowbridge, Ystradowen, Bonvilston, St Nicholas area and recommends a new settlement at Llandow or Miskin.

#### Council's Response(s):

The Council's Settlement Hierarchy has been refined from that defined within the Council's previous development plans, and it seeks to direct development to those settlements that offer a range of services and facilities relative to their position within the hierarchy, alongside the future growth aspirations of the LDP Strategy. In this regard the Council considers that the distribution of housing across the Vale accords with the hierarchy. This can be seen through the majority of development (91%) located within the top three settlement tiers (Key Settlement, Service Centre and Primary Settlement).

Within the Minor Rural Settlement category there is a broad spectrum of settlements, in terms of spatial size and resident population. Consequently, the Council is of the view that representations which object to the disproportionate level of housing within a specific settlement, and those which compare the number of houses proposed within one settlement to that in another have not taken into consideration the physical capacity of each village within the hierarchy to accommodate additional housing or their physical, environmental and infrastructure characteristics.

The distribution of housing growth apportioned to each settlement category in the hierarchy, is detailed within the Housing Land Supply background paper (2013). This indicates that Barry accommodates 30% of housing provision; the Service Centre Settlements 21%, Primary Settlements 37% and Minor Rural Settlements 12% (or 9% excluding the brownfield redevelopment allocation at Culverhouse Cross).

The location of development and growth areas identified within the LDP has also been informed by and assists in delivering the overall LDP Strategy and Objectives. The Strategy forms an important part of the Plan and consideration must be had to this in the location of future development to ensure delivery of the Strategy through policies and allocations of the Plan. In this respect, the LDP Strategy is comprised of four key elements; "To promote development opportunities in Barry and the South East Zone, the St Athan area to be a key development opportunity and Cardiff Airport a focus for transport and employment investment. Other sustainable settlements to accommodate further housing and associated development". The settlements identified within the Settlement Hierarchy and site allocations therefore have regard to and assist in delivering the overall Strategy of the Plan.

Accordingly, the Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. Therefore, no change is considered to be required.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5178/1/1 Mr M and Mrs C Hobrough

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

No Change Required

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Represor ID and details: ID-5186/1/5      Mr Colin L Jones

**Alternative Site**    ASN002 - The Limes, Cowbridge - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN002 - The Limes, Cowbridge for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

Represor ID and details: ID-5186/1/8 Mr Colin L Jones

Alternative Site ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

Representation Type Object

#### Summary of Representation:

Delete housing allocation policies MG2(19).

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (17) - Cowbridge Comprehensive Lower School

Represor ID and details: ID-5239/1/1      D W Gerrard

**Alternative Site**    ASD14 - MG 2 (17) - Cowbridge Comprehensive Lower School - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Representor ID and details: ID-5252/1/1      A J Rawson

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. #### Officer Recommendation:

**Deposit Plan Policy - MG 2 - Housing Allocations****Represor ID and details:** ID-5259/1/1      **Mr and Mrs S Barrett****Alternative Site**    N/A**Representation Type**    Object**Summary of Representation:**

Representation objects to the scale of development proposed in St Nicholas, Bonvilston and Cowbridge and wishes to see this reduced.

**Council's Response(s):**

The Council's Settlement Hierarchy has been refined from that defined within the Council's previous development plans, and it seeks to direct development to those settlements that offer a range of services and facilities relative to their position within the hierarchy, alongside the future growth aspirations of the LDP Strategy. In this regard the Council considers that the distribution of housing across the Vale accords with the hierarchy. This can be seen through the majority of development (91%) located within the top three settlement tiers (Key Settlement, Service Centre and Primary Settlement).

Within the Minor Rural Settlement category there is a broad spectrum of settlements, in terms of spatial size and resident population. Consequently, the Council is of the view that representations which object to the disproportionate level of housing within a specific settlement, and those which compare the number of houses proposed within one settlement to that in another have not taken into consideration the physical capacity of each village within the hierarchy to accommodate additional housing or their physical, environmental and infrastructure characteristics.

The distribution of housing growth apportioned to each settlement category in the hierarchy, is detailed within the Housing Land Supply background paper (2013). This indicates that Barry accommodates 30% of housing provision; the Service Centre Settlements 21%, Primary Settlements 37% and Minor Rural Settlements 12% (or 9% excluding the brownfield redevelopment allocation at Culverhouse Cross).

The location of development and growth areas identified within the LDP has also been informed by and assists in delivering the overall LDP Strategy and Objectives. The Strategy forms an important part of the Plan and consideration must be had to this in the location of future development to ensure delivery of the Strategy through policies and allocations of the Plan. In this respect, the LDP Strategy is comprised of four key elements; "To promote development opportunities in Barry and the South East Zone, the St Athan area to be a key development opportunity and Cardiff Airport a focus for transport and employment investment. Other sustainable settlements to accommodate further housing and associated development". The settlements identified within the Settlement Hierarchy and site allocations therefore have regard to and assist in delivering the overall Strategy of the Plan.

Accordingly, the Council considers that the distribution of housing across the Settlement Hierarchy is based on a sound rationale which supports the delivery of the LDP strategy and the longer term viability of settlements considered capable of supporting sustainable growth. Therefore, no change is considered to be required.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

### Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major

Represor ID and details: ID-5272/1/3 Mr John Durrant

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major

**Representor ID and details:** ID-5272/1/3      Mr John Durrant

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### **Officer Recommendation:**

No Change Required

**Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major****Represor ID and details:** ID-5272/1/4      Mr John Durrant**Alternative Site**    N/A**Representation Type**    Support**Summary of Representation:**

Supports SP 2 but comments on aerospace business park should be developed prior to the development of any speculative housing development.

**Council's Response(s):**

Support is welcomed.

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the necessary highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support of the strategic employment site and as part of the St Athan SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

**Officer Recommendation:**

No Change Required

**Deposit Plan Policy - MG2 (6) - Land adjacent to Froglands Farm, Llantwit Major****Representor ID and details:** ID-5272/1/5      **Mr John Durrant****Alternative Site**    ASN098 - Eglwys Brewis Road - Transportation - highways improvements**Representation Type**    Object**Summary of Representation:**

MG 16 should include a proposal to improve the road infrastructure along the Eglwys Brewis Road. This is due to the road being able to serve the Enterprise Zone; this will also be more cost effective, less disruptive and would not isolate residents from the surrounding area. Alternatively the inclusion of a new joining road between B4265 east of the proposed Northern Access Road into the Enterprise Zone would also be appropriate.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the necessary highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### Summary of Representation:

Representation objects to MG 2 (2) - Land at Higher End, St Athan, raising concerns regarding the impact that the proposed development would have.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (37) - Land to the east of Bonvilston

Representor ID and details: ID-5286/3/1 Neil and Sue ..

Alternative Site ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5295/1/1      Ian & Sharon Paterson

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5296/1/1      Mr Paul Baker

#### Officer Recommendation:

### Deposit Plan Policy - MD4 - Community Infrastructure and Planning Obligations

Represor ID and details: ID-5300/1/1 Mr & Mrs D Westlake

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Concern about existing sewerage system in Cowbridge and proposed new developments making it worse.

#### Council's Response(s):

Policy MD4 provides that the Council will seek to secure new and improved community infrastructure, including service and utilities infrastructure, through planning obligations and/or the Community Infrastructure Levy. These matters have been considered when allocating appropriate sites for development and will be considered further when planning applications are submitted to ensure that appropriate infrastructure is provided and the impacts of new development of utilities are fully mitigated.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (41) - Ogmore Residential Centre

Represor ID and details: ID-5301/1/1      A M Warner

**Alternative Site**    ASD02 - MG 2 (41) - Ogmore Residential Centre - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

Represor ID and details: ID-5303/2/10      Mr Andrew Banks

**Alternative Site**      ASN004 - Livestock Market, Cowbridge - Residential

**Representation Type**      Object

#### Summary of Representation:

Representation promotes a new alternative site ASN004 - Livestock Market, Cowbridge for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN064 - Land at North Road, Cowbridge for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5304/1/1 John & Diana Manning

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5304/2/1 John & Diana Manning

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5306/1/1      Mr Peter Robinson

Alternative Site      ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5307/1/1      Mr & Mrs G Jones

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Representor ID and details: ID-5308/1/1 Rebecca Exley

Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP3 - Residential Requirement

Representor ID and details: ID-5309/1/1      Mike Mallen

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 3 on the grounds the residential requirement is an over estimation. The residential requirement needs to reflect the condition of infrastructure as well as population. Amend by reducing the residential requirement to better reflect the state of infrastructure in the Vale.

#### Council's Response(s):

The representation objects to Policy SP3 and raises a number concerns relating to the identified residential requirement for the LDP. Changes are proposed to Policies SP3 (Residential Requirement) and MG1 (Housing Supply) following the publication of new evidence and in response to representations received. Further details are contained within the Housing Provision background paper (2015).

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5312/1/1 Simon Rowlands

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (26) - Land adjoining St Cyres School, Murch Road, Dinas Powys

Represor ID and details: ID-5313/1/1 N Phillips

**Alternative Site** ASN060 - Bryneithin, St. Andrews Road, Dinas Powys - Community Use

**Representation Type** Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN060 - Bryneithin, St. Andrews Road, Dinas Powys within the Deposit LDP for community uses.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

Represor ID and details: ID-5313/1/2 N Phillips

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects to the proposed LDP housing requirement and seeks a reduction in the number of dwellings proposed.

#### Council's Response(s):

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the sites allocated are consistent with the overall plan strategy, and deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Further details relating to the residential requirement and housing supply of the Plan are provided in the Housing Provision background paper (2015).

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and the proposed changes are not considered necessary.

#### Officer Recommendation:

No Change Required

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5320/1/1 Richard Nowell

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5321/2/1      Mr K and Mrs J Bland

Alternative Site    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Representation Type Object

#### Summary of Representation:

Objection to site based on the assumption that the car park will be charging fares increase of vehicles parking in Lavernock Park.

#### Council's Response(s):

No consideration has yet been given to the operation and management of any future park and ride facility that may ultimately be developed at Cosmeston Lakes Country Park. However, should parking charging be implemented and on street parking in surrounding residential areas occur as a consequence, this would then become a highways management and enforcement and/or police matter and is not an issue for consideration within the LDP. Therefore, no change is considered to be required to ensure the soundness of the Plan.

It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5329/1/1 Dr Rupert Smith & Mrs Juliet Smith

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5332/2/1 Mr John Wood

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG1 - Housing Supply in the Vale of Glamorgan

Represor ID and details: ID-5345/1/1 Colm O'Shea

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Objects to MG 1 due to the increased housing supply and the subsequent allocation of 535 dwellings up stream of Boverton. Development will have an adverse effect on Boverton which already suffers from flooding. Amend by prioritising infrastructure improvements to the Vale especially Boverton.

#### Council's Response(s):

The representation objects to Policy MG1 and raises a number concerns relating to the proposed housing supply.

The Council's evidence for the windfall allowance is based on observed windfall completions over a five year period. Additionally, the Council's approach to the use of settlement boundaries and policies for assessing potential windfall development within the DLDP will assist in meeting local housing needs and may lead to an increased level of windfall development than that experienced under previous development plans. It is considered to be an appropriate and robust allowance figure and no change is considered to be required in this respect.

Comments relating to the proposed use of the reserve site phasing are noted. To ensure flexibility of the Plan and to assist in meeting the Plan's objectives it is recommended to remove the 'reserve site' designation so that the allocation forms part of the housing land supply of the Plan. This is considered to be required to provide certainty of the status of the allocation and to ensure the Plan can sufficiently respond to changes in economic growth and any unforeseen deliverability issues.

However, the phasing of sites within the LDP is recommended to be retained as this provides an indication of housing land supply across the Plan period and assists in the planning for infrastructure and monitoring of the Plan. A number of allocated sites now benefit from extant planning consent and it is considered that the phasing within the LDP provides an indication of the overall levels of anticipated development across the phases of the Plan. In this respect the indicative phasing set out in Appendix 4 of the LDP is considered to be in accordance with national policy and that the Policy would not restrict development sites. Therefore, no changes to the indicative phasing are considered to be required.

The LDP is supported by a substantial evidence base regarding infrastructure and site deliverability. Detailed site assessments have been undertaken on the allocated sites and the Council considers these to provide a range and choice of deliverable sites. Infrastructure is therefore not considered to be a key constraining factor in delivery of growth provided for in the Deposit LDP.

The housing land supply figure under Policy MG1 of the Deposit LDP was 10,450. Having considered the representations received and further supporting evidence that has been prepared it is considered this level of housing provision remains appropriate to ensure the LDP is capable of delivering the Strategy, its key socio-economic objectives and ensures maximum flexibility to respond to future economic growth. Notwithstanding this, and following consideration of new evidence such as the Welsh Government 2011-based population and household projections and a range of other factors, a minor realignment of the residential requirement figure of the Plan has been proposed. This results in a housing provision with 10% flexibility allowance under Policy MG1. Further details can be found in the Housing Provision background paper (2015). Comments in respect of the dwelling requirement are addressed under responses to Policy SP3 and further details on the evidence base and the Council's consideration on this matter are contained within the background paper.

#### Officer Recommendation:

Proposed Change

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5346/1/1      Dr David Stuart Fernie

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Represor ID and details: ID-5347/1/1 Mr & Mrs Maddocks

Alternative Site ASD7,9 - Darren Farm and Link Road

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5348/2/1 Mr Robert Hopkins

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - SP4 - Affordable Housing Provision

Representor ID and details: ID-5354/1/1      Derek Walker

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

Representation comments on the benefits of co-operative housing schemes and considers the LDP should support co-operative housing schemes in meeting Welsh Government targets for the long and short term provision of sustainable housing.

#### Council's Response(s):

Comments noted. The Council considers that it would be beneficial to identify the potential types of affordable housing that may be sought under the policies of the Plan.  
Amend first sentence of paragraph 5.50 to read:

5.50 As the local planning authority the Council will seek to secure an appropriate level and mix of affordable housing in all proposed residential developments to meet local housing needs. This may include the use of social and intermediate rent, low cost market housing, as well as proposals for co-operative housing and housing for older persons. Further information on this aspect is included under Policy MG 4 and in the Council's Affordable Housing Delivery background paper. The Affordable Housing Viability Study (2013) assesses the ability of new residential developments throughout the authority to provide an element of affordable housing within schemes, concluding that new residential developments in the Vale of Glamorgan can provide between 30 and 40 % affordable housing. These requirements have been taken into account when formulating Policy MG 4.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5363/2/1 Mr Gari Evans

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5363/3/1 Mr Gari Evans

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5365/2/1 Mr & Mrs Parselle

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5366/1/1 Mr & Mrs Bates

Alternative Site ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5368/1/1 Mr Peter Murrins

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

Housing requirement (SP3) is derived from inaccurate population projections. The number of dwellings proposed is excessive. Remove Swanbridge Road reserve site (site 46). Both Swanbridge Rd and Cog Rd are unsuitable for the volume of traffic generated by increased development. Development of site 46 is contrary to MD1 as site is considerable distance from public services and facilities.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5380/1/4 Mrs Valerie Baker

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks the deletion of references to site MG2 (46) in Appendix 4.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG17 (6) - Cwrt-Yr-Ala Basin

Representor ID and details: ID-5383/1/1      Nigel Clark

**Alternative Site**    ASA61 - Land south east of Culverhouse Cross - Special Landscape Area - reduce designation

**Representation Type**    Object

#### Summary of Representation:

Representation objects to MG17 (6) - Cwrt-Yr-Ala Basin and seeks an amendment of the boundary to exclude land in the representors ownership (alternative site ASA61).

#### Council's Response(s):

Paragraph 6.121 of the LDP clearly states that 'The designation of Special Landscape Areas is not intended to prevent development but to ensure that where development is acceptable careful consideration is given to the design elements of the proposal such as the siting, orientation, layout and landscaping, to ensure that the special qualities and characteristics for which the SLAs have been designated are protected.' Therefore, while the comments are noted, the designation of the SLA is not considered to present an impediment to permitted business uses within the identified area subject to compliance with other policies within the plan and any relevant supplementary planning guidance. The Special Landscape Areas (SLAs) designated in the LDP have been defined utilising the approved Special Landscape Area designation methodology developed for the South East Wales Local Authority Consortium. The application of the methodology was undertaken by independent consultants acting on behalf of the Vale of Glamorgan Council utilising the most up to date Level 3 LANDMAP data that covered the whole of the Vale of Glamorgan and which had again been independently collected and quality assured by assessors acting on behalf of the then Countryside Council for Wales. The Council therefore considers that the SLA boundaries are based on robust and current information and that the deletion of the area identified from the SLA is irrelevant.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5385/1/1      John Sant

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Representor ID and details: ID-5389/1/1 Mark Essenhigh

Alternative Site ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representer ID and details: ID-5392/1/1 Mr G and Mrs A Richards

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5394/1/2      Adrienne Jones

Alternative Site      ASN071 - Land north east of Weycock Cross, Barry - Residential

Representation Type      Object

#### Summary of Representation:

Representation promotes a new alternative site ASN071 - Land north east of Weycock Cross, Barry for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

**Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)****Represor ID and details:** ID-5394/3/2      Adrienne Jones**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site**Representation Type**    Object**Summary of Representation:**

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

**Council's Response(s):**

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5395/1/1 Pamela Haines

Alternative Site ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-5396/1/1      Gwenda Griffith

**Alternative Site**    ASN007 - Land at Llandow - New Settlement

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN007 - Land at Llandow, for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

**Deposit Plan Policy - SP7 - Transportation****Represor ID and details:** ID-5399/1/1      **Michael Dunn****Alternative Site**    ASN019 - Dinas Powys - Dinas Powys Bypass Road**Representation Type**    Object**Summary of Representation:**

Representation seeks the inclusion of the Dinas Powys Bypass within policy SP7 and for a route the road to be identified and safeguarded, supporting paragraph to be amended to reflect the changes to the policy.

**Council's Response(s):**

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme. Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

While Planning Policy Wales includes the provision for local authorities to safeguard land for transport infrastructure (PPW paragraph 8.5.2), including schemes identified within the RTP, it also states that blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period.

PPW 8.5.2 Development plans should also include policies and proposals relating to the development of other transport infrastructure and related services (such as public transport interchange facilities, rail facilities, harbours and airports) including safeguarding zones. Where local planning authorities wish to safeguard land for transport infrastructure, including schemes identified in the RTP, they should do so through a proposal in the development plan, where possible showing the precise route of the proposed new or improved infrastructure. When the precise route is not known, a safeguarding policy may be applied to the area of land necessary for the scheme. Blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period. When development plans are prepared or amended, existing transport proposals should be reviewed, so as to remove any proposals that have previously been safeguarded but are now abandoned or any that are unlikely to commence during the plan period.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

**Officer Recommendation:**

No Change Required

**Deposit Plan Policy - SP7 - Transportation****Representor ID and details:** ID-5399/2/1      Michael Dunn**Alternative Site**    ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site**Representation Type**    Object**Summary of Representation:**

Representor objects to the park and ride facility proposal based on it being in an inappropriate location, a lack of necessity for the facility and considers that it would be too close to Penarth Railway Station (which should be its terminus in order to get people to Cardiff city centre by train rather than Cardiff Bay). The representor then goes onto list the points and sentences which should be removed or deleted within policies and paragraphs from the LDP.

**Council's Response(s):**

A Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers that the site at Cosmeston Lakes Country Park is appropriately located to intercept daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal that would help reduce the number of car based daily journeys to/from Cardiff. It should be noted that in addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride site at Cosmeston is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5400/1/1 Mike McCarthy

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5401/2/1      Liane James

**Alternative Site**    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5405/2/1      Mr Nigel Adams

Alternative Site    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5405/2/2      Mr Nigel Adams

Alternative Site      ASN028 - Hayes Road Sully Employment Land - Residential

Representation Type      Object

#### Summary of Representation:

Reallocate employment site MG 9 (7) at Hayes Road, Sully for residential development. Representation objects to site allocation MG2 (46) Land West of Swanbridge Road, Sully and requests the alternative use of brownfield sites such as ITV Wales, Culverhouse Cross MG2 (39) and Hayes Road Sully MG9 (7).

#### Council's Response(s):

It is considered that reallocating the employment allocation MG9 (7) for residential development would be contrary to the findings of the Council's Employment Land and Premises Study (2013). This states that there is currently a shortage of good quality office space within the Barry area, including demand for small units up to 93 sq. m leasehold suites (paragraphs 5.15-16), and demand for small developable plots of 0.4-1.2 ha, (paragraph 5.21). The study also suggests that the availability of land is currently stifled by the current economic conditions; and within this context the study explicitly refers to the land owner intentions in the Hayes Lane/Hayes Road area (paragraph 6.22 and 6.36). Therefore whilst there is demand for local employment premises/land within the Barry area, owner intentions are restricting supply. Furthermore, it is considered that the Deposit LDP adequately provides for the identified housing requirements for the Vale of Glamorgan over the plan period, and there is no requirement for additional housing allocations such as the suggested site. Therefore, no changes are required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5406/1/1      Mr David Lewis

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5406/1/2      Mr David Lewis

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5414/2/1 Mrs Linda Thomas

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

**Alternative Site** ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Represor ID and details: ID-5417/1/1 Mr Russell James

Alternative Site ASD7,9 - Darren Farm and Link Road

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (45) - Land off Sandy Lane, Ystradowen

Representor ID and details: ID-5432/1/1      B Philip & Olive Irish

Alternative Site    ASD20 - MG 2 (45) - Land off Sandy Lane, Ystradowen - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG23 - Mineral Working

Represor ID and details: ID-5444/1/1 Richard Watkins

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Comments on the threat of extracting fossil fuels from shale. LDP should consider this detrimental to the Vale and plan to protect and prevent this type of extraction.

#### Council's Response(s):

A specific policy in relation to shale gas extraction (or fracking) is not appropriate or necessary. Paragraph 6.140 sets out how the council will consider applications for unconventional gas.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Represor ID and details: ID-5445/1/1 DB Worsell

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

**Representor ID and details:** ID-5445/1/1      DB Worsell

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### **Officer Recommendation:**

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5446/1/1 Mrs B F Pidgeon & Miss B T Lee

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5447/2/1 S & J Isaacs

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Representor ID and details: ID-5449/1/1      Anthony Mears

Alternative Site    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG23 - Mineral Working

Represor ID and details: ID-5450/1/1      Sian Elin Jones

Alternative Site      N/A

Representation Type      Comment

#### Summary of Representation:

Comments on fuel extraction through shale and its detrimental effect to the Vale. The LDP should safeguard against this. Investment in renewable energies. The control of new developments to a small scale. Adhere to bilingual policy of the Welsh Government.

#### Council's Response(s):

A specific policy in relation to shale gas extraction (or fracking) is not appropriate or necessary. Paragraph 6.140 sets out how the council will consider applications for unconventional gas. Comments regarding the need to control development are noted. It is considered the Plan contains appropriate policies to manage development. Street naming is beyond the scope of the LDP and is addressed under the Councils other policies and procedures.

#### Officer Recommendation:

No Change Required

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5456/1/1 Gareth and Olga Jones

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5456/2/1 Gareth and Olga Jones

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5470/1/2      Mr Andrew Richards

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. ### Deposit Plan Policy - MG2 (44) - Land adjacent to St Brides Road, Wick

Represor ID and details: ID-5473/1/1 Mrs Olwen Davies

Alternative Site ASD03 - MG 2 (44) - Land adjacent to St Brides Road, Wick - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5474/1/1 J.L.Bywater

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted. As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5475/1/2 Mr J.Moseley

Alternative Site ASN071 - Land north east of Weycock Cross, Barry - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN071 - Land north east of Weycock Cross, Barry for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Represor ID and details: ID-5477/1/1 Mr Roger Drye

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

**Representor ID and details:** ID-5477/1/1      Mr Roger Drye

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### Officer Recommendation:

**Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone****Representor ID and details:** ID-5477/1/4      Mr Roger Drye**Alternative Site** ASD23 - MG 9 (2), MG 10 - St Athan - Cardiff Airport Enterprise Zone - Delete Site**Representation Type** Object**Summary of Representation:**

Objects to SP 2 on the grounds the strategic site is too large and the aerospace business park should be built before any speculative housing is developed. Amend by reducing size of strategic site and focusing development on Aerospace Business Park.

**Council's Response(s):**

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Residential allocations are proposed in the St Athan area in order to reflect the strategic importance of the St Athan Strategic Opportunity Area identified under Policy SP2 (Strategic Sites). This site is considered to form part of those allocations which support the development needs of the Strategic Site at St Athan and provide the opportunity for future employees to live in the area.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

**Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representer ID and details: ID-5478/2/1      Mr Brian Davies

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

**Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone****Represor ID and details:** ID-5479/1/1      **MMr & Mrs Leach****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

**Alternative Site**    ASD13 - MG 2 (6) - Land adjacent to Froglands Farm, Llantwit Major - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Representation object to MG 2 (6) - Land adjacent to Froglands Farm, Llantwit Major ,raising concerns regarding the impact that the proposed development would have locally.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Representor ID and details: ID-5479/1/4      MMr & Mrs Leach

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to MG 9 (3) due to its excessive scale, Land at Llandow should be allocated for appropriate development. Amend by reducing MG 9 (3) allocation.

#### Council's Response(s):

Although supporting the principle of the Aerospace Enterprise Zone, objections were made in terms of its excessive scale. The St. Athan Enterprise Zone identified within the LDP reflects the overall area or gross area of land at MoD St Athan based on the existing boundary rather than the area of land that will be developed for the proposed Aerospace Business Park. Since the operations of the Aerospace Business Park would largely be undertaken "behind the wire", that is within the boundary of the MoD St Athan site, it is considered appropriate to identify this area on the LDP Proposals Map.

Policy MG 9 sets out the gross and net developable site areas and it is anticipated that some 208 hectares of the site would be occupied for Aerospace related uses and excludes the runway, the surrounding sterile area and other known environmental mitigation sites. The net developable area does however include some existing ancillary buildings and other areas which currently occupy the site as these may be reconfigured as part of the Aerospace Business Park. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone****Represor ID and details:** ID-5480/1/1      Mr N.T & Mrs J.Harris**Alternative Site** ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type** Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### **Officer Recommendation:**

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Represor ID and details: ID-5480/1/2      Mr N.T & Mrs J.Harris

**Alternative Site**    ASN007 - Land at Llandow - New Settlement

**Representation Type**    Object

#### Summary of Representation:

Objects to SP 2 on the grounds too much development is on greenfield sites, the Eglwys Brewis Rd needs improvement and the aerospace business park is too large and lacking in housing allocation. Amend by re-allocating development on to brownfield sites, reduce size of strategic site and improve infrastructure along Eglwys Brewis Rd.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Representer ID and details: ID-5480/1/3      Mr N.T & Mrs J.Harris

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

Objects to SP 2 on the grounds too much development is on greenfield sites, the Eglwys Brewis Rd needs improvement and the aerospace business park is too large and lacking in housing allocation. Amend by re-allocating development on to brownfield sites, reduce size of strategic site and improve infrastructure along Eglwys Brewis Rd.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

The housing allocations proposed in the St Athan area have been made to reflect the strategic importance of the St Athan Aerospace Business Park and to provide the opportunity for local residents to access employment opportunities generated by the Enterprise Zone. In this respect, the residential allocations have been made to locate residential development close to future job creation. Whilst it is acknowledged there is no certainty that local residents will be employed at the St Athan Enterprise Zone it is considered appropriate and prudent to provide the opportunity for future employees to live in the local area. Therefore, the scale of the proposed development is considered to be appropriate given the significance of the Strategic Site and employment proposals.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5481/1/1      Andrew Smith

Alternative Site      ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type      Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5481/2/1      Andrew Smith

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5490/1/1 Cary Archard

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5493/1/1 Mrs Hannah Isherwood

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

**Deposit Plan Policy - SP2 - Strategic Sites****Represor ID and details:** ID-5503/1/2      **Mr Keith Lewis****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP2 - Strategic Sites

**Representor ID and details:** ID-5503/1/2      **Mr Keith Lewis**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Officer Recommendation:

**Alternative Site**    ASD13 - MG 2 (6) - Land adjacent to Froglands Farm, Llantwit Major - Delete Site

**Representation Type**    Object

#### Summary of Representation:

Deletion of site MG2(6) Land adjacent to Froglands Farm, Llantwit Major.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Represor ID and details: ID-5504/2/1 Mr & Mrs Brown

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - SP11 - Tourism and Leisure

Representor ID and details: ID-5515/1/1 Ms E Nash

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Equine tourism should be included in SP11 policy. Bridle paths should be identified within the LDP.

#### Council's Response(s):

Policy SP11 is an overarching policy that seeks to promote tourism in general within the Vale of Glamorgan, it is not an “activity based” policy and therefore it would be inappropriate to list specific tourism activities as has been suggested by the representor. Similarly it is considered that the LDP policy framework can adequately address the assessment of equine developments under the range of development management and managing growth policies of the Plan. The use of bridle paths controlled by separate legislation and policy and is a matter that is overseen by the Council in undertaking its statutory functions and responsibilities for the Public Rights of Way network.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP11 - Tourism and Leisure

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Representor ID and details: ID-5517/1/1 Fiona John

Alternative Site ASD7,9 - Darren Farm and Link Road

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Represor ID and details: ID-5523/1/10 Richard and Judy Griffiths

Alternative Site ASN004 - Livestock Market, Cowbridge - Residential

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN004 - Livestock Market, Cowbridge for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5524/1/1 Eleanor Gower

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5524/1/2 Eleanor Gower

**Alternative Site** ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (19) - Land adjoining St Athan Road, Cowbridge

Representor ID and details: ID-5525/1/1 Carol Downs

Alternative Site ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Represor ID and details: ID-5528/1/2 Elizabeth & Peter Ryland

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Representation promotes a new alternative site ASN007 - Land at Llandow for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5529/1/1 Peter Lindsay Gray

Alternative Site ASD30 - MG 2 (43) - Land to the East of St. Nicholas - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. #### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representer ID and details: ID-5530/1/1 Mr S.M.Jones

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-5532/1/2 Cllr John Drysdale

Alternative Site N/A

Representation Type Comment

#### Summary of Representation:

Comments on regional retail footprint which does not take in to account the regional planned provision.

#### Council's Response(s):

The CACI retail planning study concludes that retail expenditure within the Vale of Glamorgan is heavily influenced by the area's geographic proximity to Cardiff and that there is a significant leakage of retail spend to the city. While the study identifies the need for additional convenience and comparison retail floor space it can only consider the need for additional supply in terms of local need as any new provision will be heavily influenced by Cardiff's significant retail presence. In this regard, Policy SP6 identifies additional provision for new comparison and convenience facilities within the Vale of Glamorgan.

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-5532/1/5 Cllr John Drysdale

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

SP 7 should include reference to the type of cycle lanes proposed for cycle ways, in particular separating pedestrians and motorists from cyclists and having cycle ways linking to rail stations.

#### Council's Response(s):

The Deposit LDP identifies walking and cycling proposals across the Vale of Glamorgan which seek to encourage the greater use of sustainable transport and promote walking and cycling. Funding for such infrastructure is primarily available from the Welsh Government through a range of funding streams however as with all finances this is limited and spread across Wales. In the development of cycle infrastructure, the Council is therefore tasked with providing facilities at best possible cost in order to meet the needs identified whilst maintaining best practise in accordance with relevant guidelines and manuals. Therefore, while the comments of the representor are noted, segregated routes as suggested are not always possible and indeed may not always be the best option. The Council will therefore continue to seek appropriate advice and to provide the most suitable scheme at the best possible cost to meet the needs identified by that location.

#### Officer Recommendation:

No Change Required

### Officer Recommendation:

No Change Required

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-5532/1/8 Cllr John Drysdale

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation objects as Policy MD 10 is too focused on specific sites of biodiversity interest, and on the potential impact on biodiversity at individual development sites. Amend to include biodiversity considerations on wider ecology and interconnections. Include new paragraph after 7.46 (MD 10 Promoting Biodiversity) that put biodiversity into wider context.

#### Council's Response(s):

Policy MD10 is clear in its intention to apply to all new development proposals and their impact on biodiversity. However it is accepted that there is some discrepancy between the policy wording and the first sentence of the supporting text at paragraph 7.46 which refers to 'statutory designated area of biodiversity interest'. In this regard it is proposed that an amendment is made to the supporting text in order that it does not conflict with the policy and to ensure consistency with legislation.

Amend paragraph 7.46 to read:

7.46 Development proposals will be required to ensure that areas of biodiversity interest are not unacceptably affected by development. Proposals will be required to ensure that biodiversity interest is maintained and enhanced to achieve overall net gain. Impact on biodiversity at individual sites must be considered in the context of ecological connectivity across the whole Vale safeguarding existing and generating new ecological corridors e.g. retention of tree lines and hedgerows.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - LDP Strategy

Representor ID and details: ID-5532/1/9 Cllr John Drysdale

Alternative Site N/A

Representation Type Object

### Summary of Representation:

Representation seeks an amendment to policy MD removing reference to substantial construction, as this is considered to be too restrictive.

### Council's Response(s):

The purpose of this clause is to restrict the reconstruction of derelict buildings that are in such a poor condition that development would constitute new development in the countryside; such examples include long abandoned structures where little visible evidence of the original building exists.

### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5533/1/1      Sheila Phillips

Alternative Site    ASD30 - MG 2 (43) - Land to the East of St. Nicholas - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

Representor ID and details: ID-5533/1/2      Sheila Phillips

Alternative Site    ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type    Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5534/1/1 Mr & Mrs Thomas

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5535/2/1 Mrs E.J.Williams

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (2) - Land at Higher End, St Athan

Represor ID and details: ID-5536/1/1 Helena & Phillip Cook

Alternative Site ASD19 - MG 2 (2) - Land at Higher End, St Athan - Delete Site

Representation Type Object

#### Summary of Representation:

Representation objects to MG 2 (2) - Land at Higher End, St Athan, raising concerns regarding the impact that the proposed development would have.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5537/2/2      Chris Dixon

**Alternative Site**    ASN028 - Hayes Road Sully Employment Land - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN028 - Hayes Road Sully Employment Land within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (7) - Land between new Northern Access Road and Eglwys Brewis Road

Represor ID and details: ID-5541/1/2 Carol Jones

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - MG2 (7) - Land between new Northern Access Road and Eglwys Brewis Road

**Representor ID and details:** ID-5541/1/2      Carol Jones

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### **Officer Recommendation:**

No Change Required

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5542/1/2 Mrs G.Knowles

Alternative Site ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5548/2/1      Bob Keen

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Represor ID and details: ID-5551/1/1 Robert & Yvonne Turner

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

**Representor ID and details:** ID-5551/1/1      **Robert & Yvonne Turner**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Represor ID and details: ID-5551/1/3 Robert & Yvonne Turner

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN007 - Land at Llandow within the Deposit LDP for residential development

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5552/1/1 Sandra Lewis

Alternative Site ASD30 - MG 2 (43) - Land to the East of St. Nicholas - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5552/1/2 Sandra Lewis

Alternative Site ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5556/1/1 Thomas Allgeier

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - SP2 - Strategic Sites

Represor ID and details: ID-5557/1/1 N. Turner

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation considers that the St Athan aerospace park is not viable or needed and should be utilised for housing.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

Residential allocations are proposed in the St Athan area in order to reflect the strategic importance of the St Athan Strategic Opportunity Area identified under Policy SP2 (Strategic Sites). This site is considered to form part of those allocations which support the development needs of the Strategic Site at St Athan and provide the opportunity for future employees to live in the area.

Comments relating to the use of the brownfield site are noted however, it is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site by locating additional residential development within the Enterprise Zone due to its regional importance and wider economic benefits. Furthermore, there is ongoing work on a Strategic Development Framework for the Enterprise Zone which will provide further details of its future development.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

**Deposit Plan Policy - SP2 - Strategic Sites****Represor ID and details:** ID-5557/1/3      **N. Turner****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP2 - Strategic Sites

**Representor ID and details:** ID-5557/1/3      **N. Turner**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Officer Recommendation:

No Change Required

### Deposit Plan Policy - SP2 - Strategic Sites

Represor ID and details: ID-5557/1/4      N. Turner

**Alternative Site**    ASN007 - Land at Llandow - New Settlement

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN007 - Land at Llandow within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP2 - Strategic Sites

**Representor ID and details:** ID-5560/1/4      **Mr Peter Emery**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (37) - Land to the east of Bonvilston

Represor ID and details: ID-5561/1/1 Mrs Gillian Elizabeth Sillence

Alternative Site ASD27 - MG 2 (37) - Land to the East of Bonvilston - Delete Site

Representation Type Object

#### Summary of Representation:

Representation seeks the deletion of MG 2 (37) - Land to the East of Bonvilston.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5563/1/1      Mr A.J.Scott

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - SP2 - Strategic Sites

Represor ID and details: ID-5566/1/1      Mr Andrew Jack

Alternative Site    N/A

Representation Type    Object

#### Summary of Representation:

Objects to the enterprise zone within the strategic site of St Athan as it is too large. Amend by reducing the enterprise zone to be more proportionate to the area.

#### Council's Response(s):

The LDP identifies the land at MOD St Athan as part of the Strategic Opportunity Area identified in the Wales Spatial Plan. The strategic site identified under Policy SP2 has also been designated as an Enterprise Zone focusing on the aerospace and defence sectors. The St Athan and Cardiff Airport Enterprise Zone board is in the process of preparing a Strategic Development Framework for the Welsh Government which will inform future detailed proposals for the Enterprise Zone. Further detail will also be contained within any future master plans for the strategic sites which will undergo public consultation.

It is considered inappropriate to reduce the developable area or constrain the future use of the Strategic Site due to its regional importance, the wider economic benefits of the site and in light of the St Athan Enterprise Zone development framework which provides further details of the proposed land use.

Therefore the proposed change is not considered to be required to ensure the soundness of the LDP.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - SP2 - Strategic Sites****Represor ID and details:** ID-5566/1/2      **Mr Andrew Jack****Alternative Site**    ASN098 - Eglwys Brewis Road - Transportation - highways improvements**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP2 - Strategic Sites

**Representor ID and details:** ID-5566/1/2      **Mr Andrew Jack**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5567/2/1 Mrs Margaret Davies

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

### Deposit Plan Policy - MG 2 - Housing Allocations

Represor ID and details: ID-5569/1/1      G.T.Aspros & F.D. & S.J.Pearce

**Alternative Site**    ASN065 - The Gilberts, St Andrew's Major - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN065 - The Gilberts, St Andrew's Major for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Represor ID and details: ID-5570/1/1 Mrs Anne Jack

Alternative Site ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site

Representation Type Object

#### Summary of Representation:

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

#### Council's Response(s):

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

**Representor ID and details:** ID-5570/1/1      Mrs Anne Jack

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

#### **Officer Recommendation:**

No Change Required

### Deposit Plan Policy - SP7 (2) - A New Northern Access Road at St Athan Enterprise Zone

Representor ID and details: ID-5570/1/2      Mrs Anne Jack

Alternative Site    ASD13 - MG 2 (6) - Land adjacent to Froglands Farm, Llantwit Major - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (23) - Land at Upper Cosmeston Farm, Lavernock

Represor ID and details: ID-5571/3/1 Mrs DV Murison

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - N/A

Represor ID and details: ID-5573/1/1      Tayyeb Mirza

Alternative Site      N/A

Representation Type      Object

### Summary of Representation:

Concerns raised with regard to the length of the consultation period and whether the consultation is worthwhile.

### Council's Response(s):

Section 16 of the Town and Country Planning (Local Development Plan) (Wales) Regulations 2005, refers to a statutory 6 week period for submission of representations.

The Deposit Plan along with all the background documentation was made available to view on the Council's website from October 3rd 2013 and pre consultation events allowing members of the public to ask questions on the deposit plan and view all the documentation were held between the 7th and the 22nd October 2013. Given that the Deposit LDP consultation commenced on November 8th 2013, this gave people roughly 5 weeks to familiarise themselves with the Deposit LDP documentation and then a further 6 weeks to submit their representations for the Deposit LDP Consultation which finished on the 20th December 2013.

It is therefore considered that the council has complied with the LDP regulations and that 6 weeks along with the additional 5 weeks provided for the 'pre- consultation period' is an adequate period of time to read and understand the Deposit LDP documentation and submit representations. In accordance with Section 17 of the Town and Country Planning (Local Development Plan) (Wales) 2005, the council is required to prepare and publish the 'Consultation Report' before the Deposit LDP is submitted to the Welsh Assembly Government to reflect the bodies engaged or consulted, the main issues raised and the steps taken to publicise the plan preparation for the Deposit LDP consultation (November 8th – December 20th 2013) and the Alternative Sites consultation (March 20th – May 1st 2014)

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Representor ID and details: ID-5579/1/2 Valerie Morris

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Inclusion of alternative site ASN007 - Land at Llandow within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5582/1/1      Mr Neil Sillence

Alternative Site    ASD30 - MG 2 (43) - Land to the East of St. Nicholas - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5583/1/1 Pat Collins

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5592/2/1 Mr Richard Paton

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5592/2/2 Mr Richard Paton

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - SP7 - Transportation

Represor ID and details: ID-5601/1/1      Barrie Avery

Alternative Site      N/A

Representation Type      Object

#### Summary of Representation:

In SP 7 sub text para. 5.65 It should make reference to the travel plan hierarchy which should resemble; walking and cycling, public transport, PTWs and shared cars and finally single use cars and other motor vehicles. This will emphasises the plans commitment to sustainability and the contribution PTWs can make to sustainable transport.

#### Council's Response(s):

While such vehicles may give some advantages over the average family car e.g. they require less road and parking space, lower emissions in some instances, they still utilise public highways as do other forms of motor driven transport. Therefore while PTW can provide some advantages over other forms of vehicular traffic, specific land use designations and/or improvements are not considered to be necessary within the LDP to enable their use. Similarly, the encouragement of car sharing etc. as suggested by the repesor is a 'hearts and minds' matter rather than a policy requirement of the plan.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5602/2/1 Ms Jayne Greatrex

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5604/1/1 Mr & Mrs Holmes

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

Not a matter for the LDP.

#### Council's Response(s):

The use of public footpaths by whatever user is not an issue for the LDP and is more appropriately considered by the Council's Public Rights of Way officer.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5614/1/1 Martin Johns

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5620/3/1 Carole Britton

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5624/1/1      Mr Peter Rawlings

**Alternative Site**    ASN070 - Hayes Road, Sully - Community Use

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5624/1/2      Mr Peter Rawlings

**Alternative Site**    ASN100 - Hayes Road, Sully - Residential

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5625/1/1 N and S Williams

Alternative Site ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5626/1/1 Sarah Linnard

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - SP2 - Strategic Sites****Represor ID and details:** ID-5628/1/2      **Mr & Mrs Flye****Alternative Site**    ASD12 - MG 16 (14) – Northern Access Road (St Athan Enterprise Zone) - Delete Site**Representation Type**    Object**Summary of Representation:**

A number of representations were received objecting to the proposed Northern Access Road (NAR) in representation on the strategic employment site at St Athan or in providing comments specifically on the Plans transportation policies. Representations on the NAR considered that the proposal was not needed or that suitable alternatives could be adopted (which have been identified as Alternative Sites). These representations requested the deletion of the scheme favour of suitable alternative options, including:

1. Highway improvements to the existing Eglwys Brewis Road.
2. Utilise the existing lower MoD entrance, with a new bridge.
3. New link road via an alternative routes proposed by represors.

**Council's Response(s):**

As part of the proposals for the St Athan and Cardiff Airport Enterprise Zone the Deposit LDP recognises that highway access to the proposed strategic site, which includes the Aerospace Business Park (ABP) at St Athan needs to be significantly improved to facilitate its development and deliver the economic benefits of the strategic employment site.

The Northern Access Road (NAR) was previously included in proposals for the Defence Technical College and Aerospace Business Park in 2009 and a new access road along the northern boundary has again been identified as an integral part of the proposals for this strategic site. The strategic site allocations and NAR at St Athan have been supported by Welsh Government through representations made on the Deposit LDP by the Department for the Economy, Science and Transport.

Alternative highway improvement schemes have been suggested in other Deposit Plan representations, for example, by providing highway improvements along Eglwys Brewis Road (see Alternative Site ASN 98). While the alternative highway improvement schemes are noted, it is considered that whilst they may resolve some minor local transport issues, they would not provide the highway improvements and access requirements necessary to facilitate the bringing forward of key residential allocations, development of the Aerospace Business Park and future employment aspirations of the designated Enterprise Zone. This is particularly the case given the need to consider the development and use of these sites together with future military access requirements at St Athan which are under the control of the Ministry of Defence. These access requirements could change from 2018 following the relocation of army regiments and personnel to the St Athan base.

In this respect, there are highway constraints in the level of traffic that would be considered acceptable for Eglwys Brewis road and St Athan Village to accommodate. A height restricted bridge at Eglwys Brews road would further constrain future access options. Alternative highway improvement schemes were also previously considered and discounted by the Welsh Government and Ministry of Defence. Options for improvements along Eglwys Brewis Road were considered unacceptable principally on environmental and construction phasing grounds (see ABP Planning Statement, Chapter 4, application 2009/00501/OUT).

Together the strategic employment site, the Enterprise Zone, residential allocations and Northern Access Road make up a key strategic allocation which should not be considered in isolation given the LDP Strategy and St Athan Strategic Opportunity Area (SOA) identified in the Wales Spatial Plan. Whilst minor alterations to Eglwys Brewis Road may be appropriate in the short term, this would not constitute a long term or permanent solution and would not allow for the comprehensive access requirements necessary for the strategic site in its entirety. In addition to enabling employment proposals at the Enterprise Zone and ABP to be realised, the NAR will facilitate highway access to at least one of the two strategic residential allocations (Site MG2 (7) Land Between the Northern Access Road and Eglwys Brewis Road) that have been identified in support the strategic employment site and as part of the St Athan

### Deposit Plan Policy - SP2 - Strategic Sites

**Representor ID and details:** ID-5628/1/2      **Mr & Mrs Flye**

SOA. The NAR is therefore considered necessary to facilitate the development of the wider St Athan SOA. Consequently, it is considered that the allocation is appropriate and that the proposed change would not be in accordance with the LDP Strategy or ensure the soundness of the Plan. Therefore, no change is considered to be required.

### Deposit Plan Policy - SP2 - Strategic Sites

Represor ID and details: ID-5628/1/6 Mr & Mrs Flye

Alternative Site ASN007 - Land at Llandow - New Settlement

Representation Type Object

#### Summary of Representation:

Representation seeks the inclusion of alternative site ASN007 - Land at Llandow within the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (20) - Land north and west of Darren Close, Cowbridge

Representor ID and details: ID-5638/1/1      Mr David Pugh

Alternative Site    ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. #### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5641/1/2      Mr Julian Matthews

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5642/1/1 Mrs K.Stokes

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

**Alternative Site**    ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

Representor ID and details: ID-5653/1/1      Malcolm and Monica Porter

Representation Type    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (24) - Land adjoining St Joseph's School, Sully Road

Represor ID and details: ID-5659/1/6      Mr & Mrs Huntley

**Alternative Site**    ASA41 - Land between Dinas Powys and Penarth - Green Wedge - increase designation

**Representation Type**    Object

#### Summary of Representation:

Representation seeks the reinstatement of the green wedge designation MG18 (1) - Between Dinas Powys, Penarth & Llandough to that of the Adopted Vale of Glamorgan UDP.

#### Council's Response(s):

Green wedges have been identified under policy MG18 of the Deposit LDP to prevent development which prejudices the open nature of land and the coalescence of settlements. Their designation, although non-statutory, adds an additional layer of protection to those areas where it is considered that development pressure exists or will exist during the lifetime of a development plan and they should only include land that is strictly necessary to fulfil the objective of the policy (PPW 4.8.12). The green wedge designations are intended as a temporary feature in order to achieve the objectives of the policy and as such, their existence and extent may vary between one adopted plan and another under preparation. In preparing a LDP, the council seeks to balance competing objectives and provide housing and employment whilst protecting the environment and local amenity. In this regard the allocations and designations contained within the deposit LDP are considered to be based on a robust evidence base and the reinstatement of the green wedge around Dinas Powys as suggested by the representer is not considered to be necessary or appropriate.

#### Officer Recommendation:

No Change Required

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5663/1/1 L. Tatham

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5663/1/2 L. Tatham

Alternative Site ASN101 - Land at Dow Corning, Barry - Transportation - new station / transport interchange

Representation Type Object

#### Summary of Representation:

Representation promotes the provision of a park and ride site a Dow Corning, Barry, alternative site ASN101

#### Council's Response(s):

The Strategy for the LDP seeks to concentrate new development within the south eastern zone of the Vale of Glamorgan. For the purposes of the LDP the South East zone includes the urban settlements of Barry, Dinas Powys, Llandough (Penarth), Penarth and Sully. This area or zone accommodates the majority of the Vale of Glamorgan's population and benefits from the widest range and choice of services and facilities including a choice of transport links to Cardiff, Bridgend and the wider region. The LDP seeks to maximise these benefits locating new development close to existing infrastructure to facilitate sustainable development and attract new inward investment. Notwithstanding the above the Council has prepared a draft Infrastructure Plan and has undertaken a highway capacity study which identifies how and where new infrastructure may be required to facilitate additional development. The Council therefore considers that the concerns expressed by the representor have been considered and addressed within the LDP.

In respect of the siting of a park and ride facility at Cosmeston Lakes country park, a Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance (Sewta) Park and Ride study and the Council considers the country park is appropriately located to attract daily commuters who utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal which would help reduce the number of car based daily journeys to/from Cardiff. In addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride facility at Cosmeston Lakes country park is appropriate given the existing and ongoing feasibility studies into improved public transport provision within the area and that the development of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan. Therefore, no change is considered to be required to ensure the soundness of the Plan.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5664/1/1 Mr A Hobbs

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5664/1/2      Mr A Hobbs

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

No Change Required

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Representor ID and details: ID-5664/2/1      Mr A Hobbs

**Alternative Site**    ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5664/2/2      Mr A Hobbs

**Alternative Site**    ASN059 - Land South West of Weycock Cross - Residential

**Representation Type**    Object

#### Summary of Representation:

Representation promotes alternative site ASN059 - Land South West of Weycock Cross for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Officer Recommendation:

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (43) - Land to the East of St Nicholas

Representor ID and details: ID-5673/1/2 Mrs L.Arcos

Alternative Site ASD29 - MG 25 (10) - Open Space - Land to the east of St Nicholas - Delete POS

Representation Type Object

#### Summary of Representation:

The representation seeks the deletion of the open space provision MG25 (10) which has been identified in association with housing allocation MG2 (43) Land to the East of St Nicholas.

#### Council's Response(s):

New residential sites will be required to provide additional open space to meet the needs generated by the development. Policy MG25 identifies those sites allocates land for open space which is to be provided as part of housing allocations in these areas where the scale of demand for such facilities from housing growth cannot be met by existing provision. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5676/1/1      Sean Gough

**Alternative Site**    ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5676/1/2      Sean Gough

**Alternative Site**    ASN092 - Land East of Llangan - Gypsy and Traveller site

**Representation Type**    Object

#### Summary of Representation:

The representation objects to the Deposit LDP and promotes the allocation of an alternative site not included within the Plan. A comprehensive summary of the objections and comments received on this issue are provided in the LDP Consultation Report and Council's composite response to site allocation representations.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. ### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Representor ID and details: ID-5685/2/1 Mr & Mrs Prentice

Alternative Site ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (46) - Land West of Swanbridge Road, Sully (Reserve Site)

Represor ID and details: ID-5685/3/1 Mr & Mrs Prentice

Alternative Site ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

Representation Type Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2(20),MG16(19),MG6(4) - MG 2(20) Darren Farm & associated policies

#### Officer Recommendation:

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5687/1/1 Paul Dimblebee

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.

#### Officer Recommendation:

### Deposit Plan Policy - MG16 - Transport Proposals

Representor ID and details: ID-5688/1/1 Marilyn & Michael Kolmar

Alternative Site N/A

Representation Type Object

#### Summary of Representation:

Representation seeks amendments to policy MG 16 to include a proposal for the improvements of Castle drive and Murch Road. These should include traffic calming measure such as sleeping policeman, road narrowing and enforced speed limits. Introduce traffic lights and a pedestrian crossing at the junction between Castle Drive and Murch Rd.

#### Council's Response(s):

The LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments (TA) will be required for most development proposals. These will evaluate any likely highway impacts and propose any mitigation measures that may be required to prevent any adverse impacts upon or indeed improve the local highway network. Until such a time as a TA has been undertaken for the St Cyres site, specific infrastructure requirements as proposed by the representor are a matter of highway management/safety officers however the TA is likely to include such considerations when it is undertaken and such features will be provided as a result of the development if required. Notwithstanding the above, a 20mph scheme has recently been implemented along Murch Road as suggested by the representor.

#### Officer Recommendation:

No Change Required

**Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston****Represor ID and details:** ID-5689/1/1      Lorraine Garland**Alternative Site**    ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site**Representation Type**    Object**Summary of Representation:**

Representation seeks the deletion of the proposed park and ride scheme and Cosmeston (MG16 -12)

**Council's Response(s):**

In support of the Deposit LDP the Council engaged independent consultants to prepare a Transport Assessment (September 2013) to assess the impact of the LDP residential allocations on the strategic highway network within the Vale of Glamorgan. The study sought to identify capacity issues of junctions and roads as a result of the proposed new developments and while the comments of the repesor are noted, the Council considers that the study and LDP addresses the concerns raised and that infrastructure provision within the LDP is appropriate. Notwithstanding the above the LDP is clear in its requirements for future developments and Appendix 5 identifies that comprehensive and robust Transport Assessments will be required for most site allocations which evaluate likely highway impacts and propose any mitigation measures that might be required.

While a reference to the Dinas Powys by-pass is included within the Regional Transport Plan, this is within the projected five year programme to 2014/15 and no funding has been identified as being associated with the scheme.

Further, the RTP at paragraph 5.8.7 is clear in its objectives for new road schemes in that they should 'facilitate more efficient transportation for the benefit of the environment, the economy and for social need and will also be expected to provide benefits for regeneration and facilitate new development'. Therefore, while the Council accepts that a by-pass would bring benefits it is considered unlikely to fulfil the remaining necessary criteria to secure sufficient funding to ensure that it is delivered during the lifetime of the LDP.

While Planning Policy Wales includes the provision for local authorities to safeguard land for transport infrastructure (PPW paragraph 8.5.2), including schemes identified within the RTP, it also states that blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period.

PPW 8.5.2 Development plans should also include policies and proposals relating to the development of other transport infrastructure and related services (such as public transport interchange facilities, rail facilities, harbours and airports) including safeguarding zones. Where local planning authorities wish to safeguard land for transport infrastructure, including schemes identified in the RTP, they should do so through a proposal in the development plan, where possible showing the precise route of the proposed new or improved infrastructure. When the precise route is not known, a safeguarding policy may be applied to the area of land necessary for the scheme. Blight should be kept to a minimum by including in development plans only firm schemes on which work will commence within the plan period. When development plans are prepared or amended, existing transport proposals should be reviewed, so as to remove any proposals that have previously been safeguarded but are now abandoned or any that are unlikely to commence during the plan period.

In respect of the Dinas Powys by-pass the Council is of the view that while the provision of a by-pass would partially address through traffic issues within Dinas Powys, it would not address the primary issues which cause the congestion i.e. the constraints imposed by the Merrie Harrier and Barons Court junctions and would merely transpose the issue to another location. Therefore, the inclusion of the by-pass scheme in the LDP is not considered be required.

With regard to the protection of the previous by-pass route, the Council considers that the route identified in previous development plans is largely protected by the area to the east of Dinas Powys having been designated as a Green Wedge. Further the area lies outside any designated residential settlement boundary in open countryside where development proposals would be resisted. The specific protection of a route for the Dinas Powys by-pass is therefore not considered to be necessary.

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represor ID and details: ID-5689/1/1      Lorraine Garland

It is noted that the St Cyres development site impinges on the previously safeguarded bypass route. However the previous route identified was only indicative and only detailed design will advise the exact land required. It is considered therefore that land options for a future by-pass still remain if this is ever needed.

With regard to the park and ride facility at Cosmeston Lakes Country Park, it should be noted that a Park and Ride facility within the Penarth area has been identified in the South East Wales Transport Alliance Park and Ride study and the Council considers the country park site is appropriately located to intercept daily commuters, large numbers of whom currently utilise Lavernock Road as an alternative to Cardiff Road through Dinas Powys. The Council considers that the scheme represents an important and deliverable proposal which would help reduce the number of car based daily journeys to/from Cardiff. In addition to the above, the Council has secured funding for feasibility investigations into bus priority improvements within Dinas Powys and Penarth and onwards into Cardiff which would complement investigations into bus access across the Cardiff Bay Barrage that have already been undertaken. The Council is therefore of the opinion that the siting of the park and ride site at Cosmeston is appropriate given the existing and ongoing feasibility studies into improved public transport provision and facilities within the area and that the development and use of bus priority measures together with the park and ride scheme will help encourage the increased use of sustainable transport within the Vale of Glamorgan.

### Deposit Plan Policy - MG16 (12) - Bus Park & Ride at Cosmeston

Represor ID and details: ID-5689/4/2      Lorraine Garland

**Alternative Site**    ASN007 - Land at Llandow - New Settlement

**Representation Type**    Object

#### Summary of Representation:

Representation promotes a new alternative site ASN007 - Land at Llandow for inclusion in the Deposit LDP for residential development.

#### Council's Response(s):

The representation seeks the inclusion of a new site not included within the Deposit LDP. Having considered the policy context, Plan strategy, the LDP provision, and other relevant material factors, it is considered that there is no demonstrable need to include the site within the Plan. Furthermore, the Plan's policies, supporting text and documentation have set out how the Council proposes to manage the delivery of new development including details on infrastructure planning. The LDP therefore demonstrates how development can be managed, phased and impacts mitigated. It is considered that the LDP meets the tests of soundness without the need for a different approach such as a new settlement or the suggested alternative site to deliver the identified housing and employment needs. The inclusion of the alternative site is therefore not considered necessary to ensure the soundness of the LDP.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support the development. It is the Council's view that the site allocated is consistent with the overall plan Strategy and is deliverable within the plan period to enable the LDP to meet the identified housing needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in environmentally sensitive or rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as a new settlement or alternative sites to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary. Further consideration of the issues raised within this representation is provided within the Council's LDP Consultation Report and the Summary of Consultation and Key Issues document.

#### Officer Recommendation:

### Deposit Plan Policy - MG5 - Gypsy and Traveller Site

Represor ID and details: ID-5700/1/1 Mr & Mrs M J Fry

**Alternative Site** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to the proposed Gypsy and Traveller site allocation identified in the Deposit LDP. The representation raises a number of issues related to the site allocation and the potential impact of development and management of the site. See Council's composite response to site allocation representations for a summary of the list of issues and objections raised.

#### Council's Response(s):

The allocation of site MG 5 Land at Hayes Road, Sully is based on the identified need evidenced within the Council's Gypsy and Traveller Accommodation Needs Assessment (2013). In allocating the site at Hayes Road, the Council has considered the relevant planning merits of the site (alongside other Council owned sites within the Vale of Glamorgan) and has concluded that the Hayes Road site is the most appropriate to address the identified need.

In allocating the site in the LDP, the Council has considered the potential impacts of the development on adjacent land uses, the sustainability of the site in terms of access to services and facilities, alongside other environmental constraints. It is considered that detailed site specific issues can be addressed through sensitive site design and appropriate site management arrangements. The Hayes Road allocation is therefore considered to be a deliverable site which is capable of meeting the identified need.

Consequently, it is considered that the LDP meets the tests of soundness without the need for the removal of the site or a different approach, such as an alternative site, to meet the evidenced need. However, changes to the supporting text of site allocation and monitoring targets are proposed to provide clarity in relation to the delivery of the site and to ensure the effective monitoring of the Plan. Further details on the issues raised are provided within the LDP Consultation Report and the Council's composite response to site allocation representations.

#### Officer Recommendation:

Proposed Amendment

### Deposit Plan Policy - MG2 (38) - Land to rear of St Davids Church in Wales Primary School, Colwinston

Represor ID and details: ID-5703/1/1 Richard Gibb

**Alternative Site** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Representation Type** Object

#### Summary of Representation:

The representation objects to a Deposit LDP site allocation raising concerns related to the potential impacts of the proposed development. A comprehensive summary of the objections raised to this allocation is provided in the Council's LDP Consultation Report.

#### Council's Response(s):

The representation seeks the deletion of a site within the Deposit LDP.

Since consultation on the Deposit LDP, a planning application has been considered by the Council and permission subsequently granted.

As the site is subject to full planning permission, the Council will monitor delivery of such sites through the LDP Annual Monitoring Report and Joint Housing Land Availability Study process. Therefore, the proposed change to the LDP is not appropriate.
