No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASN011 - Former RAF accomodation, East Camp, St. Athan - Mixed Use - Including Residential and Employment**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **170**    Barry & Vale Friends of The Earth

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASN055 - Land between Five Mile Lane / M4 Junction 34 east to Cardiff Boundary - Green Belt

**Summary of Representation:** Support

**Representor ID and details:** 170 Barry & Vale Friends of The Earth

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN066 - Alps Depot, Wenvoe - Gypsy and Traveller site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **170**    Barry & Vale Friends of The Earth

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN044 - Travellers Rest, Felindre Road, St Mary Hill - Gypsy / Traveller Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **170**    Barry & Vale Friends of The Earth

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. ---

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**Summary of Representation:** Object**Representor ID and details:** 178 Dr C A Pearce Cowbridge & Llanblethian Residents Group**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASN021 - Land to the Rear of Tuar Gaer and White Gables, St Nicholas - Residential**Summary of Representation:** Object**Representor ID and details:** 196 Chris Lambart Land Use Planning Adviser, The National Trust**Council's Response(s):**

**Alternative Site Details** ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail

**Summary of Representation:** Support

**Representor ID and details:** 298 Mrs P Price

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **501**    Mr M Evans

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASD10 - MG 2 (7) - Land between new Northern Access Road and Eglwys Brewis Road - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **519**    Mr G Flye

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details**      **ASN098 - Eglwys Brewis Road - Transportation - highways improvements**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **519**    Mr G Flye

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASD48 - MG 6 (5) - Land at Upper Cosmeston Farm, Lavernock - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **535**    Mr C F Tatt

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 554 Mrs J M Caig

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail

**Summary of Representation:** Object

**Representor ID and details:** 697 Ms S Nash

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Representor ID and details:** 755 Mrs P Lambourn

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN092 - Land East of Llangan - Gypsy and Traveller site**

**Representor ID and details:** 1040 Mr N Phillips

**Council's Response(s):**

The representation objects to the deletion of a site included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP strategy and policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASA55 - ABP Barry Docks - Sand and Gravel Safeguarding - reduce designation to exclude site

**Summary of Representation:** Object

**Representor ID and details:** 1040 Mr N Phillips

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASA33 - ABP Barry Docks - Green Wedge - reduce designation

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASN059 - Land South West of Weycock Cross - Residential

**Summary of Representation:** Support

**Representor ID and details:** 1040 Mr N Phillips

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **1277**    Mr P Donovan

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASN006 - Llysworney - Llysworney Bypass

**Summary of Representation:** Support

**Representor ID and details:** 1438 Ms S Palmer

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA12 - Land to the East of St. Nicholas - Residential - extend allocation boundary**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **1874**    Rhodri Traherne

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASD30 - MG 2 (43) - Land to the East of St. Nicholas - Delete Site**Summary of Representation:** Object**Representor ID and details:** 1874 Rhodri Traherne**Council's Response(s):**

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**Summary of Representation:** Object**Representor ID and details:** 1885 Mrs D E Prosser**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 2041 Dr J Green

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASA55 - ABP Barry Docks - Sand and Gravel Safeguarding - reduce designation to exclude site**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **2096**    Miss A Masters

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 2096 Miss A Masters

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Summary of Representation:**    **Object**

**Representor ID and details:**    **2221**    K G Jones

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASD48 - MG 6 (5) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 2225 Mrs P A Day

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN069 - Land at Penlan Road, Llandough - Residential****Summary of Representation:**    **Object****Representor ID and details:**    **2256**    Mr P R Egan BA, MCIPD, IPSH      Llandough Community Council**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. The change relates to a proposed new residential allocation to reflect potential development proposals for the Former Quarry site at Leckwith Road, Llandough. A planning application (2013/00632/FUL) has since been considered for the site which has been granted approval and is currently under construction. Having considered all representations and evidence, the allocation of the site is not considered to be required to ensure the soundness of the Plan. However, a Focused Change to the Residential Settlement Boundary and Special Landscape Area boundary under policy MG17 (6) has been proposed as a factual update resulting from the planning consent and to ensure the consistency and soundness of the Plan.

**Summary of Representation:** Object

**Representor ID and details:** 2272 Mr David Roberts Sully & Lavernock Community Council

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASN070 - Hayes Road, Sully - Community Use

**Summary of Representation:** Support

**Representor ID and details:** 2272 Mr David Roberts Sully & Lavernock Community Council

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA33 - ABP Barry Docks - Green Wedge - reduce designation

**Summary of Representation:** Object

**Representor ID and details:** 2272 Mr David Roberts Sully & Lavernock Community Council

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 2272 Mr David Roberts Sully & Lavernock Community Council

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Summary of Representation:** Support

**Representor ID and details:** 2344 J R Bird

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 2344 J R Bird

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASN069 - Land at Penlan Road, Llandough - Residential

**Summary of Representation:** Object

**Representor ID and details:** 2389 R E Cullen

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. The change relates to a proposed new residential allocation to reflect potential development proposals for the Former Quarry site at Leckwith Road, Llandough. A planning application (2013/00632/FUL) has since been considered for the site which has been granted approval and is currently under construction. Having considered all representations, evidence and the suggested amended site boundary, the allocation of the site is not considered to be required to ensure the soundness of the Plan. However, a Focused Change to the Residential Settlement Boundary and Special Landscape Area boundary under policy MG17 (6) has been proposed as a factual update resulting from the planning consent and to ensure the consistency and soundness of the Plan.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **2477**    Mr R Norris

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement****Summary of Representation:**    **Support****Representor ID and details:**    **2477**    Mr R Norris**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 2589 Mr J Alan Fairfax

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify the any site specific issues and infrastructure needs.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall plan strategy, are free from constraints and therefore deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities shall be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations.

Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details** ASD38 - MG 2 (29) - Land at Cross Common Road, Dinas Powys - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 2734 E Winn-Jones

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASN043 - Land adjoining Cardiff Road and Corbett Road, Llandough - Transportation - Land for Hospital Access

**Summary of Representation:** Support

**Representor ID and details:** 3395 Jack El-Khatib

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASN015 - Land to the North of Colwinston - Residential

**Summary of Representation:** Support

**Representor ID and details:** 3571 Mr B Kennard

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASN058 - Land at and adjoining Waterton Lodge, Colwinston - Residential

**Summary of Representation:** Object

**Representor ID and details:** 3571 Mr B Kennard

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation****Summary of Representation:**    **Object****Representor ID and details:**    **3742**    Mr I Ross**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation****Summary of Representation:**    **Object****Representor ID and details:**    **3742**    Mr I Ross**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASN011 - Former RAF accomodation, East Camp, St. Athan - Mixed Use - Including Residential and Employment**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **3804**    Mr F Cleland

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Object

**Representor ID and details:** 3837 J De-Courcy-Davies

**Council's Response(s):**

The representation objects to the deletion of a site included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP strategy and policies. No change is therefore considered necessary to ensure that the Plan is sound.

Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD46 - MG 16 (12) – Bus Park and Ride at Cosmeston, Penarth - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 3899 B Millard

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details**      **ASN026 - Land south west of Sigingstone - Residential****Summary of Representation:**    **Support****Representor ID and details:**    **3932**    Mr A W Morgan**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **3933**    R H Bradshaw

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASA55 - ABP Barry Docks - Sand and Gravel Safeguarding - reduce designation to exclude site

**Summary of Representation:** Object

**Representor ID and details:** 4005 A.G.Thomas

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASD36 - Land adjoining Cardiff Road, Barry - SINC 339 - Delete Sites of Importance for Nature Conservation 339

**Summary of Representation:** Object

**Representor ID and details:** 4005 A.G.Thomas

**Council's Response(s):**

The representation objects to the deletion of a site included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP strategy and policies. No change is therefore considered necessary to ensure that the Plan is sound.

No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 4005 A.G.Thomas

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4046**    Dr Luc Vandamme

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Representor ID and details:** 4101 Jan Stephenson

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details** ASD15 - MG 2 (19) - Land adjoining St. Athan Road, Cowbridge - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 4127 Mrs Margaret Hopwood

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **4127**    Mrs Margaret Hopwood

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation

**Summary of Representation:** Object

**Representor ID and details:** 4182 Mr S.A.Thomas

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details** ASN006 - Llysworney - Llysworney Bypass

**Summary of Representation:** Support

**Representor ID and details:** 4182 Mr S.A.Thomas

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4182**    Mr S.A.Thomas

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4330**    Mrs Jean Nugent

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4612**    Mr Robert John Adams

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **4612**    Mr Robert John Adams

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4640** Mrs Suzanne Butcher (On Behalf of R

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA36 - Land to the rear of Heol-y-Felin, Llantwit Major - Glamorgan Heritage Coast - reduce designation to exclude site

**Summary of Representation:** Support

**Representor ID and details:** 4673 Alun Cairns MP

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD04 - MG 2 (38) - Land to rear of St. David's C/W Primary School, Colwinston - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 4673 Alun Cairns MP

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 4673 Alun Cairns MP

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASD09 - MG 2 (20) - Land North and West of Darren Close, Cowbridge - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 4673 Alun Cairns MP

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. **Alternative Site Details**      **ASN019 - Dinas Powys - Dinas Powys Bypass Road**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4743**    Mr and Mrs JC Blackman

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 4798 Mr Michael Garland

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 4800 William Lambert

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details**      **ASN006 - Llysworney - Llysworney Bypass**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4800**    William Lambert

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN006 - Llysworney - Llysworney Bypass**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **4965**    Mr Richard Tonkin

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **4965**    Mr Richard Tonkin

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASN006 - Llysworney - Llysworney Bypass**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **5072**    Mr H.N.W Pickering

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **5072**    Mr H.N.W Pickering

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASA45 - Land at Upper Cosmeston Farm, Lavernock - Green Wedge - increase designation

**Summary of Representation:** Support

**Representor ID and details:** 5106 Mr Paul Hopkins

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASN029 - Hayes Road Sully Employment Land - Mixed Use - Including Residential and Employment

**Summary of Representation:** Support

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details** ASA55 - ABP Barry Docks - Sand and Gravel Safeguarding - reduce designation to exclude site

**Summary of Representation:** Object

**Representor ID and details:** 5142 Mr J & Mrs K Beach

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 5142 Mr J & Mrs K Beach

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details**      **ASA46 - Land at Beach Road, Sully - Green Wedge - reduce designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **5154**    Mr Peter Simmonds

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **5155**    Mrs Valerie John

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN095 - Land North East of Ystradowen - Residential****Summary of Representation:**    **Object****Representor ID and details:**    **5185**    Mrs K O'Carroll**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **5186**    Mr Colin L Jones

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **5203**    Ms. Claire Goulden

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details**      **ASN025 - Land East of Llantwit Major Road surrounding Crosslands, Llandow - Mixed Use Development including Housing**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **5272**    Mr John Durrant

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN011 - Former RAF accomodation, East Camp, St. Athan - Mixed Use - Including Residential and Employment**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **5292**    Mr Stephen Thorne

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA46 - Land at Beach Road, Sully - Green Wedge - reduce designation

**Summary of Representation:** Object

**Representor ID and details:** 5304 John & Diana Manning

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Representor ID and details:**    **5313**    N Phillips

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 5314 Mr A Pass

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.
