The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

---

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 5939 John G Davies

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details** ASN007 - Land at Llandow - New Settlement

**Summary of Representation:** Support

**Representor ID and details:** 5939 John G Davies

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**Summary of Representation:** Object**Representor ID and details:** 5939 John G Davies**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASN091 - Land at Beach Road, Sully - Residential**Summary of Representation:** Object**Representor ID and details:** 5941 Mr Alan Phillips**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**Summary of Representation:** Object**Representor ID and details:** 5947 Sarah Walch**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**Summary of Representation:** Object**Representor ID and details:** 5947 Sarah Walch**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASN095 - Land North East of Ystradowen - Residential**Summary of Representation:** Object**Representor ID and details:** 5957 C A Cheeseman**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASN007 - Land at Llandow - New Settlement**Summary of Representation:** Support**Representor ID and details:** 5957 C A Cheeseman**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Summary of Representation:** Object

**Representor ID and details:** 5966 Robin Lynn

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 5966 Robin Lynn

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN070 - Hayes Road, Sully - Community Use**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **5967**    Judith P Lynn

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASN006 - Llysworney - Llysworney Bypass

**Summary of Representation:** Support

**Representor ID and details:** 5973 Mrs Georgina James

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **5981**    Mr & Mrs Allen

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Representor ID and details:** 5991 Mr & Mrs Weeks

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASN070 - Hayes Road, Sully - Community Use

**Summary of Representation:** Support

**Representor ID and details:** 5997 Mr Allen Sadler

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 5997 Mr Allen Sadler

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6019 Christopher Jeans

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. **Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6047 Gaynor Williams

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6056 Michael Grimes

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details** ASN091 - Land at Beach Road, Sully - Residential

**Summary of Representation:** Object

**Representor ID and details:** 6056 Michael Grimes

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASN070 - Hayes Road, Sully - Community Use**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6056**    Michael Grimes

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details**      **ASN029 - Hayes Road Sully Employment Land - Mixed Use - Including Residential and Employment****Summary of Representation:**    **Support****Representor ID and details:**    **6127**    Ben Wright**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6136**    Mr Julian Wynn

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details**      **ASD47 - MG 7 (4), MG 2 - Land at Upper Cosmeston Farm, Lavernock - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6136**    Mr Julian Wynn

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details** ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6167 Hayes Point Residents Group

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 6195 Dave Gray

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details**      **ASN079 - Land adjacent to Cardiff Airport and South of Port Road - Transportation - rail link**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6196**    British Airways

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Representor ID and details:**    **6201**    Steven Kavanagh

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6201**    Steven Kavanagh

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASD47 - MG 7 (4), MG 2 - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6224 Eileen M Younghusband

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN034 - Land at Main Road, Llanmaes - Residential**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6243**    Geoff Jones

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details**      **ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6267**    Mr Malcolm J Reid

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6303** Charles Champion

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6313**    Dave Jackman

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail

**Summary of Representation:** Support

**Representor ID and details:** 6340 Stephen & Lorraine McGranaghan

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation****Summary of Representation:**    **Object****Representor ID and details:**    **6361**    Moreen Whitworth**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6371 Steven Madeley

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6386**    Howard Teague

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASA49 - Land at Penlan Road, Llandough - Special Landscape Area - reduce designation

**Summary of Representation:** Object

**Representor ID and details:** 6399 Mr Peter Williams

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. The change relates to an amended Special Landscape Area boundary to reflect potential development proposals for the Former Quarry site at Leckwith Road, Llandough. A planning application (2013/00632/FUL) has since been considered for the site which has been granted approval and is currently under construction. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Special Landscape Area boundary under policy MG17 (6) is proposed. A consequential amendment to the Residential Settlement Boundary is also considered to be necessary as a result of the planning consent and Focused Change.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN092 - Land East of Llangan - Gypsy and Traveller site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6407**    Clare Doust

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASD47 - MG 7 (4), MG 2 - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6418 Jonathan Bockelmann-Evans

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6420**    E V Phipps

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details**      **ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6420**    E V Phipps

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN029 - Hayes Road Sully Employment Land - Mixed Use - Including Residential and Employment**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6421**    D C Phipps

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA46 - Land at Beach Road, Sully - Green Wedge - reduce designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6421**    D C Phipps

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details** ASD47 - MG 7 (4), MG 2 - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6438 Jeffrey Baker

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN102 - Land west of Picketston, St Athan - Mixed Use - Including Residential / Employment**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6440**    Mr John Jackson & Ms Wendy Hewitt

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6463 Miss Gwennan M Harries

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6472**    Scott Sherwood

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details** ASD48 - MG 6 (5) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6472 Scott Sherwood

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6474**    Jeffrey Stamatakis

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN105 - Land north west of Llangan - Gypsy and Traveller site**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6490**    Mrs L J O'Garro

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Support

**Representor ID and details:** 6513 Matthew Greenow

**Council's Response(s):**

The representation supports the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details**      **ASN092 - Land East of Llangan - Gypsy and Traveller site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6513**    Matthew Greenow

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. **Summary of Representation:** Support

**Representor ID and details:** 6513 Matthew Greenow

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN091 - Land at Beach Road, Sully - Residential**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **6526**    K Russell

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASA45 - Land at Upper Cosmeston Farm, Lavernock - Green Wedge - increase designation**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6531**    Catrin Sullivan

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASD48 - MG 6 (5) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 6539 David Alan Roderick

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Alternative Site Details** ASA45 - Land at Upper Cosmeston Farm, Lavernock - Green Wedge - increase designation

**Summary of Representation:** Support

**Representor ID and details:** 6550 Mr E Bye & Mrs G Grant

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6559**    Carieanne Wheeler

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6579**    Anne Watson

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation

**Summary of Representation:** Object

**Representor ID and details:** 6589 Mrs Susan Norris

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASN103 - Land south of Eglwys Brewis, St Athan - Mixed Use - Including Residential / Employment

**Summary of Representation:** Support

**Representor ID and details:** 6596 David Bryn Morgan

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Summary of Representation:** Support

**Representor ID and details:** 6600 Mike Smith

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASN092 - Land East of Llangan - Gypsy and Traveller site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6619**    Fleur Riggs

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASN006 - Llysworney - Llysworney Bypass

**Summary of Representation:** Support

**Representor ID and details:** 6634 Sir Adrian Webb

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 6643 Mr Rhodri Griffiths & Ms Kim Andrew

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASD40 - MG 2 (46) - Land west of Swanbridge Road, Sully - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6644**    Sarah Ross

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. **Alternative Site Details**      **ASN026 - Land south west of Sigingstone - Residential**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **6654**    Dr M.Udokane

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 6666 David Lindley/Caron Lindley

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.
