**Alternative Site Details**      **ASN059 - Land South West of Weycock Cross - Residential**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7074**    Miss S Harding

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

---

**Alternative Site Details**      **ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7075**    Jane Norton

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

**Alternative Site Details**      **ASA45 - Land at Upper Cosmeston Farm, Lavernock - Green Wedge - increase designation**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7075**    Jane Norton

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 7077 Mrs Jean Stevens

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 7079 Mrs T L Moon

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN071 - Land north east of Weycock Cross, Barry - Residential**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7081**    Mr George Rowley

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 7081 Mr George Rowley

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASN059 - Land South West of Weycock Cross - Residential

**Summary of Representation:** Support

**Representor ID and details:** 7083 Caron Mace

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7087**    D.Williams

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. **Alternative Site Details**      **ASN070 - Hayes Road, Sully - Community Use**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7090**    Mr Adrian Bousie

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN092 - Land East of Llangan - Gypsy and Traveller site**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7091**    Mrs Caroline Bousie

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD49 - MG 2 (23) - Land at Upper Cosmeston Farm, Lavernock - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 7094 Mr John Coward

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN059 - Land South West of Weycock Cross - Residential**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7096**    Mr Frank Stockham

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details**      **ASN005 - Land at Upper Cosmeston Farm, Lavernock - Retail**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7097**    M.Stockham

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASA45 - Land at Upper Cosmeston Farm, Lavernock - Green Wedge - increase designation**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7097**    M.Stockham

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASD37 - MG 5 - Hayes Road, Sully Gypsy and Traveller Site - Delete Site

**Summary of Representation:** Support

**Representor ID and details:** 7099 Mr David Curtis

**Council's Response(s):**

The representation supports the deletion of a development site or part of a development site included in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness and that the proposed change is not considered necessary to ensure that the LDP is sound.

**Alternative Site Details** ASA46 - Land at Beach Road, Sully - Green Wedge - reduce designation

**Summary of Representation:** Object

**Representor ID and details:** 7101 Mrs Maureen Bridge

**Council's Response(s):**

The representation objects to the inclusion of an alternative site proposal not included in the Deposit LDP. This representation therefore is considered to be consistent with and in support of the Deposit LDP Strategy and Policies. No change is therefore considered necessary to ensure that the Plan is sound.

---

**Alternative Site Details**      **ASN071 - Land north east of Weycock Cross, Barry - Residential**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7101**    Mrs Maureen Bridge

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7105** Sharon Robinson

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Summary of Representation:** Support

**Representor ID and details:** 7105 Sharon Robinson

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7113**   Mrs Ann Alford

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Summary of Representation:** Support

**Representor ID and details:** 7113 Mrs Ann Alford

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7122**    H.Chilcott

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7127**    Mrs Debra Boyland

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Summary of Representation:** Support

**Representor ID and details:** 7128 Mr David Webber

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Summary of Representation:** Support

**Representor ID and details:** 7134 Mr Graham Price

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7135**    K.F.Wilkins

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7142**    Mr Gareth Williams

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7149**    Mr Jonathan Williams

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7149**    Mr Jonathan Williams

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Summary of Representation:** Support

**Representor ID and details:** 7157 Dilys Robertson

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASN006 - Llysworney - Llysworney Bypass

**Summary of Representation:** Support

**Representor ID and details:** 7166 Mr Tom Jackson

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7167**    Mr Chris Booth

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation

**Summary of Representation:** Object

**Representor ID and details:** 7173 K.Morgan

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7180** Anne Lewis

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7187**    Mr Mark Townend

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7194**    Kelly Morgan

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN006 - Llysworney - Llysworney Bypass**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7195**    Mrs G Sanders

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7202**    Dominique Fuller

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7208**    Faith Penhale

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

---

**Alternative Site Details**      **ASN006 - Llysworney - Llysworney Bypass**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7216**    Mr Delme Bennett

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details**      **ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**

**Summary of Representation:**    **Object**

**Representor ID and details:**    **7223**    A.R.Hunt

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation

**Summary of Representation:** Object

**Representor ID and details:** 7230 Mr Alex Drew

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN007 - Land at Llandow - New Settlement**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7245**    Lara Bennett

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**Summary of Representation:** Object**Representor ID and details:** 7277 Mr Michael Day-Thompson**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details**      **ASN088 - Land West of Llanmaes Road, Llantwit Major - Retail**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7296**    Euros Navidi

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

**Alternative Site Details** ASA11 - Land to the west of Darren Farm, Cowbridge - Extend Housing Allocation**Summary of Representation:** Object**Representor ID and details:** 7299 Mr Gerwyn Watkins**Council's Response(s):**

The representation objects to the inclusion of an alternative site not included within the Deposit LDP. Having considered all representations, evidence and the suggested amended site boundary a Focused Change to the Deposit LDP site allocation MG2 (20) has been proposed which accepts the need for the proposed change in part. The proposed Focused Change amends location of the proposed link road and the western site boundary for the residential allocation as it is considered necessary to facilitate the provision of the required highway infrastructure. Consequential changes to the Special Landscape Area and Residential Settlement Boundary are also required as part of the Focused Change. The proposed number of dwellings remains unchanged.

**Alternative Site Details** ASA05 - Land to the west of Darren Farm, Cowbridge - Residential Settlement Boundary - extend designation**Summary of Representation:** Object**Representor ID and details:** 7299 Mr Gerwyn Watkins**Council's Response(s):**

**Alternative Site Details**      **ASN029 - Hayes Road Sully Employment Land - Mixed Use - Including Residential and Employment**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7303**    Mrs Linda Evans

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.

---

**Alternative Site Details**      **ASN070 - Hayes Road, Sully - Community Use**

**Summary of Representation:**    **Support**

**Representor ID and details:**    **7305**    Mrs Brown

**Council's Response(s):**

The representation supports the inclusion of a development site or part of a development site not identified in the Deposit LDP. In preparing the Deposit LDP, the Council has collated an extensive range of supporting evidence that demonstrates the employment and housing requirement over the LDP period, and has also identified the necessary infrastructure required to support this development. Additionally, the Council has consulted with relevant statutory organisations and infrastructure providers to identify any site specific issues and infrastructure needs. It is the Council's view that the sites allocated within the Deposit LDP are consistent with the overall Plan Strategy, are free from constraints and are deliverable within the plan period to enable the LDP to meet the identified housing and employment needs of the Vale of Glamorgan up to 2026. Furthermore, the LDP contains a suite of policies and supporting text that explains how development will be managed within areas of change, and the mechanisms by which the necessary infrastructure, services and facilities will be secured. This policy framework also includes the Council's requirements mitigating potential impacts of development in relation to enhancing and protecting the natural and built environment, provision of sustainable transport, community facilities, environmental assets and the careful management of development in rural locations. Consequently, it is considered that the LDP meets the tests of soundness without the need for a different approach (such as a new settlement) or the suggested alternative site to meet the evidenced need and ensure that the LDP is sound. Therefore, the proposed change is not considered necessary.
