Introduction

The Vale of Glamorgan Local Service Board (LSB) comprises of senior representatives from the organisations listed on the inside cover of this document. The Vale LSB is responsible for the delivery of our Single Integrated Plan, the Community Strategy 2011-21, which was informed by a Unified Needs Assessment (UNA), and outlines ten priority outcomes for the Vale of Glamorgan (Appendix A). The Community Strategy represents a coordinated approach to improving the quality of life in the Vale and was initially supported by a three year delivery plan for 2011-14. The implementation of the delivery plan through the key partnerships was closely monitored by the LSB and progress has been reported in annual reports which are available at:

http://www.valeofglamorgan.gov.uk/en/our_council/local_service_board/latest_news.aspx

In 2014, the LSB published a revised UNA which was an extensive exercise involving a wide range of partners and supported by the Local Government Data Unit. This needs assessment has informed the development of a new plan to support the next phase in delivering the ten year community strategy. The needs assessment and supporting information is available at:

http://www.valeofglamorgan.gov.uk/en/our_council/local_service_board/unified_needs_assessment.aspx

Drafting the Delivery Plan

The key themes emerging from the UNA were the importance of early intervention, the ageing population and disadvantaged communities and inequalities. An exercise was undertaken to review the key findings of the UNA, as well as future legislation and policy direction, and it was agreed that the focus for the LSB in delivering the next stage of the Community Strategy should be on tackling poverty. Existing work being undertaken through the LSB partnerships to deliver the Community Strategy priority outcomes will continue to take place and will continue to be monitored through the relevant groups using existing sets of partnership measures. The purpose of this plan is to provide a focus to LSB activities, allowing the board to monitor progress to tackle poverty in a more detailed manner, with assurances that partnership activities continue to be monitored through the appropriate channels.

The LSB has considered the Welsh Government Tackling Poverty Action Plan 'Building Resilient Communities' and has structured activities around the three themes of

- Preventing poverty
- Helping people into Work
- Mitigating poverty

Pages 9-15 set out the main areas of work that will be undertaken against these three themes. However, it should be recognised that partners are already undertaking a great deal of work to address poverty and this work will continue. The purpose of this plan is not to duplicate existing plans for specific projects which

include detailed actions and measures and are monitored through a range of mechanisms. In developing this plan, the LSB agreed a number of workstreams where they could add value in terms of raising profile, coordinating activity and committing their organisations to delivering the objectives.

Partnership Working in the Vale

As stated, in addition to this plan, work is continuing to deliver the ten priority outcomes within the Community Strategy and much of this work is now embedded through agreed plans such as the Substance Misuse Action Plan and through the mature working relationships which have been established e.g. through the Integrated Health and Social Care Programme. Increasingly work is taking place not just within the Vale but on a regional basis and in June 2014, a Cardiff and Vale joint LSB was established. The joint board will complement local partnership arrangements, providing a strategic overview regarding joint working across the Vale of Glamorgan and Cardiff and a focus for exploring new opportunities.

As of July 2014, partnership structures in the Vale have also been revised in light of the establishment of the joint LSB and the new focus of the Delivery Plan for 2014-18. Appendix B shows the new partnership structures for the Vale.

Monitoring Progress

Although the focus of this plan is on tackling poverty we will still be monitoring progress across all ten of our Community Strategy priority outcomes.

To assist with this, the LSB has agreed a set of core indicators detailed on pages 6-7 and these will enable us to identify areas of concern as well as areas where significant progress is being made to deliver the Community Strategy as a whole. The Annual Report will provide an overview of the work undertaken through the partnerships to deliver each of the priority outcomes, ensuring the LSB still maintains an overview of partnership working taking place in the Vale.

In addition to the annual report, a specific report detailing the progress within the poverty workstreams will be reported to the LSB twice a year, this will include the poverty measures detailed on pages 15-16 alongside the evidence gathered through the meetings of the groups. The updates from this process will be fed back to the LSB regularly and information will form the core of our Annual Report.

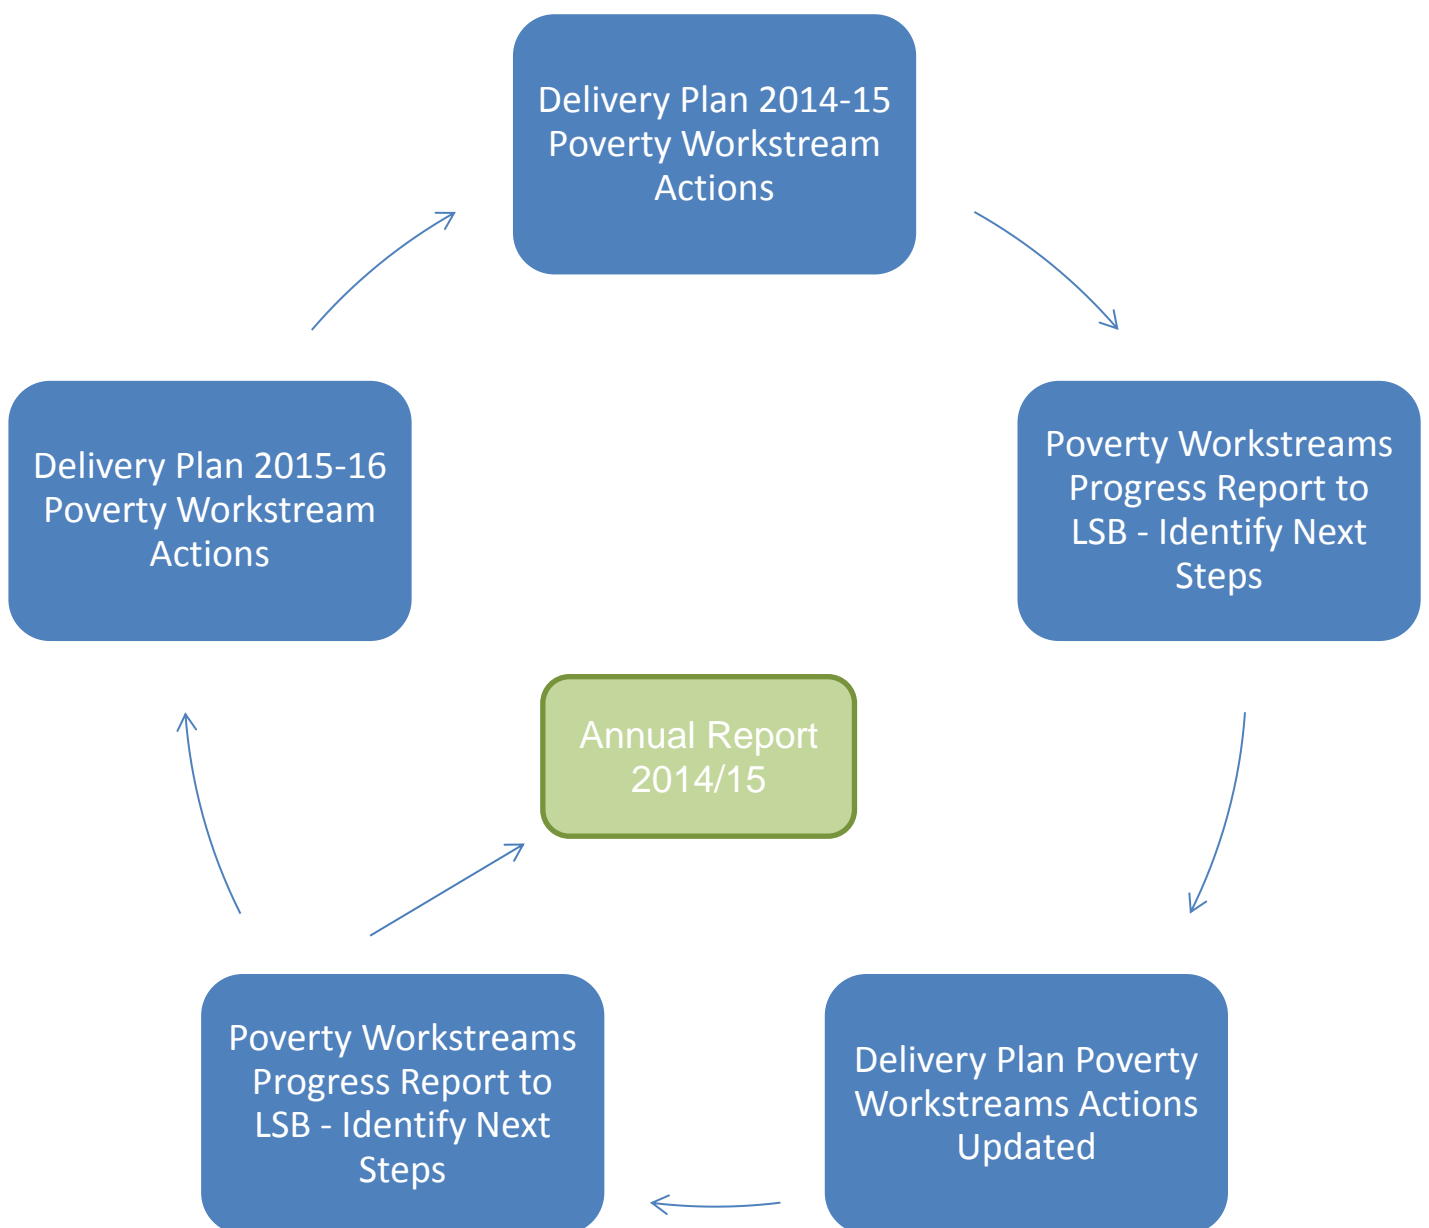

In developing this plan, the LSB has also taken account of the proposals in the Wellbeing of Future Generations (Wales) Bill and the Wellbeing Goals. We are confident that we are already working hard to achieve these goals and reference is made to relevant goals being addressed through activity within this plan. However, as stated earlier, the content of this plan should not be viewed in isolation to the wide range of activities that are undertaken through for example Safer Vale or the Children and Young People's Board and these are all contributing to the achievement of these wellbeing goals.

This plan is to be viewed as a dynamic document and will be regularly reviewed and updated as progress is made and in response to new policy initiatives or evidence

(as shown in the following diagram). The LSB Business Intelligence Group will also play a critical role through ensuring that the needs assessment is kept up to date and any significant changes are reported to the LSB in order to ensure the plan reflects the needs of the community.

A diagram showing the various components which contribute to the monitoring and implementation of the Community Strategy 2011-2021, including this plan, is shown in Appendix C.

Annual Cycle

Community Strategy Core Indicators

The proposed list of 'core indicators' has been developed to provide a core list of measures that will be reported to the LSB.

The list has been developed to provide an overview on progress in delivering the Community Strategy as a whole. The majority of these core indicators are also monitored through mechanisms such as the partnership boards and this is shown in the table, along with which of the Community Strategy priority outcomes the indicator is relevant to.

LSBs will be required to report on a set of indicators being developed to support the Well-being of Future Generations (Wales) Bill. It is anticipated that these will be published by Welsh Government in 2016 and the Community Strategy Core Indicators will then be reviewed to ensure the National Indicators are included, along with any of the indicators which are still considered relevant at a local level to monitor the Vale's Community Strategy.

Poverty Workstream Measures

A list of poverty measures is proposed to support the monitoring of the poverty workstreams. These measures offer a more focused tool to support the groups and officers tasked with taking the workstreams forward. Where possible they are directly linked to actions outlined in the workstreams, however, as many measures cut across the streams the full set of measures will be reported back to each group.

The proposed list is designed to be amended and reviewed over time due to changing priorities and the availability of data. The data will form part of the progress reports presented to the LSB twice a year.

Appendix A – Community Strategy 2011-2021 Priority Outcomes

1. People of all ages are actively engaged in life in the Vale and have the capacity and confidence to identify their own needs as individuals and within communities.

2. The diverse needs of local people are met through the provision of customer focused, accessible services and information.

3. Vale residents and organisations respect the local environment and work together to meet the challenge of climate change.

4. Older people are valued and empowered to remain independent, healthy and active. They have equality of opportunity and receive high quality services to meet their diverse needs.

5. Children and young people in the Vale are well informed and supported to access a broad range of quality services that enable them to take full advantage of the life opportunities available in their local communities and beyond.

6. People of all ages are able to access coordinated learning opportunities and have the necessary skills to reach their full potential, helping to remove barriers to employment.

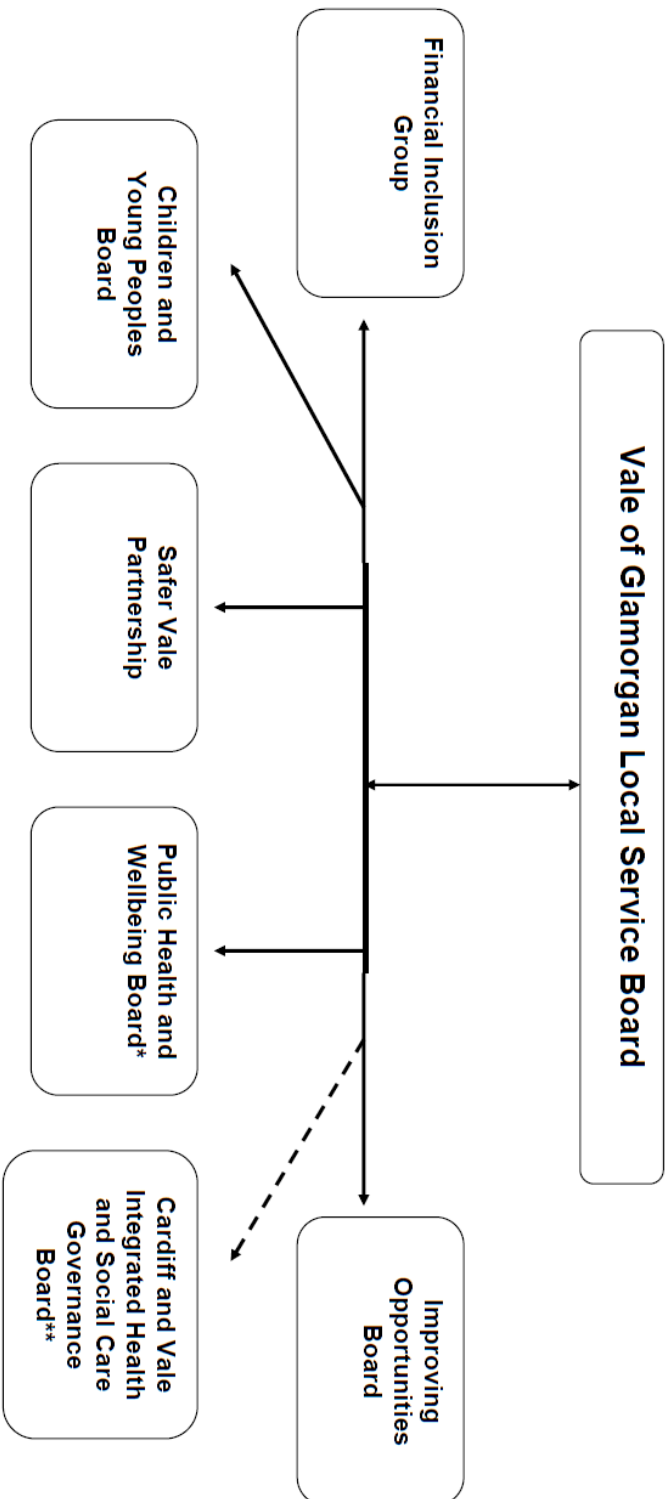

7. The underlying causes of deprivation are tackled and the regeneration of the Vale continues, opportunities for individuals and businesses are developed and the quality of the built and natural environment is protected and enhanced.

8. The Vale maximises the potential of its position within the region working with neighbours for the benefit of local people and businesses, attracting visitors, residents and investment.

9. Residents and visitors are safe and feel safe and the Vale is recognised as a low crime area.

10. Health inequalities are reduced and residents are able to access the necessary services, information and advice to improve their wellbeing and quality of life.

Appendix B – Vale LSB Partnership Structures

* Proposals to merge the Public Health and Wellbeing Board with the equivalent in Cardiff are being implemented. The new group will report to the Cardiff and Vale LSB.

** Cardiff and Vale Integrated Health and Social Care Programme has a clearly defined governance structure involving elected members, board members and officers. The Board will also report to the Cardiff and Vale LSB.
