Our Team Plan 2015/16	f

Team Overview – Waste Management & Cleansing

The Waste Management & Cleansing team undertakes a number of key roles within Visible Services including delivering the Council's statutory functions of Waste Collection, Disposal and Principle Litter Authorities. It is a front line service that interfaces with all the Council's customers whether resident or visitors and its work impacts on the whole of the Vale's population whether it be by cleaning the Vale's streets, collecting their household waste or providing coastal resorts for their leisure and enjoyment.

The Team's broad functions are:

- responsible for arranging for the collection, treatment and disposal of household and commercial waste collected across the Vale.
- responsible for keeping highways and relevant land clear of litter and refuse in accordance with the Welsh Government's Code of Practice on Litter and Refuse and Associated Guidance 2007;
- providing Household Waste Recycling Centres (HWRCS) where householders can deliver waste for recycling or disposal.
- applying the principles of Welsh Government and EU Waste and Environmental legislation and Strategy and the waste hierarchy (reduce, reuse, recycle) by first trying to ensure waste is not produced in the first place and where waste is unavoidable it maximises the waste recycling and composted. From November 2014, the majority of waste that can't be recycled or composted was be sent to Trident Park ERC _which will divert at least 90% of non-recyclable waste from landfill and generate electricity.
- arranging and holding contracts with private waste companies who provide waste treatment services on the Council's behalf including an
 energy from waste facility, In-Vessel composting facility and a dry recycling Facility;
- organising Waste Awareness and Educational initiatives to help schools, educational establishment, households, businesses and communities reduce, reuse and recycle of their wastes as much as possible by raising awareness and environmental stewardship.
- investigation and enforcement of environmental crime and the issue of fixed penalty notices for litter, dog fouling offences.
- management of coastal areas and their assets;
- provision and cleansing of public conveniences.

Our Contribution to Service Plan priorities 2014/15

Our contribution to the Service Plan priorities last year:

- We obtained efficiencies from collabrative working with neighbouring local authorities for service deliveries including partnership appoarch to AD Treatment with Cardiff CC and EFW Treatment via Prosiect Gwyrdd. This delivered better value for money for the tax payer through economies of scale by combining the waste of 5 local authorities and infrastructure. (CP/E1) (OA5) (VS/A058) (VS/A067)
- Arranged for an early pre-Prosiect Gwyrdd contract to use the Viridor ERC at Trident Park in November 2015 made a significant contribution
 to reducing the amount of municipal waste sent to landfill and move the waste treatment of residual waste higher up the waste hierarchy to a
 more sustainable level of performance. The Viridor plant was delivered approximately 18 months ahead of schedule resulting in a predicted
 saving of £1.6 million. (VS/A058)
- Implemented recycling performance related clauses within the contract for the management of the Council Household Waste Recycling
 Centres (HWRCs) to increase recycling capture. Our approach of specifically targeting residual black bags delivered to our HWRCs by
 householders and the secondary sorting of those black bags for recycling has resulted in an increase in recycling capture rates. (VS/A001)
 (VS/A068)
- We have reviewed our waste, recycling, composting and kitchen food waste collection services. This work also involved the development of new policies for missed refuse and recycling collections and new collection arrangements for green waste utilising the existing recycling waste collection vehicle fleet. (Service Objective 1)
- Implement and monitor real time tracking and communication with waste collection fleet to achieve improved working efficiencies and service delivery(VS/A063, VS/A059, VS/A060, VS/A061, VS/A064, VS/A065, VS/A066, VS/A085);
- Developed and implement an investment plan for the refurbishment of public conveniences and improve the standard of cleanliness including
 the Eastern Shelter Barry Island PC development under the Barry Regeneration Programme. Refurbishments have contributed toward
 improved facilities and achieved more accessible and public conveniences for the benefit of residents and visitors. (VS/A025);

- Improved cleanliness standards in the worst performing areas in the Vale as identified in the cleanliness index 2013/14 Keep Wales Tidy
 LEAMS survey. This included densely populated areas of older terrace housing with rear lanes and multiple occupancy areas with communal
 open spaces. Involvement of the respective communities in the work has increase community engagement and support, demonstrating pride
 in their respective local areas. (CP/E2) (VS/A204) (VS/A081) (VS/A082) (VS/A083) (VS/A084).
- Made a major contribution in keeping the Vale is a clean, safe, well maintained and sustainable place to live or visit using its compliance and
 enforcement powers to meet litter laws as set out (principally) in the Environmental Protection Act 1990 and new powers and enforcement
 measures to tackle a range of environmental crimes affecting local environmental quality such as fly-tipping, graffiti and littering, by way of
 amendments to the 1990 Act by the Clean Neighbourhoods and Environment Act 2005 (VS/099 VS/A024, VS/A081, VS/A082, VS/A083,
 VS/A084);
- We ensured that dog owners must remove their pets' waste from public places and dispose of it in a proper manner in the following places: (VSA099 VS/A024, VS/A081, VS/A082, VS/A083, VS/A084)
 - public roads and footpaths
 - o areas around shopping centres
 - o school/sports grounds and beaches
 - o immediate area surrounding another person's house.

Our Team Plan 2015/16

Service Ou	Service Outcome 1: Our customers have access to sustainable waste and recycling services Objective 1: To reduce municipal waste by increasing re-use, recycling, regulation and enforcement.											
Objective '					<u> </u>	<u> </u>						
Ref. Service Objective	During 2015-7 we plan to:	16	Success Criteria/ Outcomes we'll achieve from this action are:	High, Medium or Low priority	Officer responsible for achieving this action	Start date	Finish date	How will the work be resourced?	Progress			
(VS/A086)	Commence a treatment programme for road sweeping separate composing an other elements. Monitoring composting tonnage achie from initiative. Enter all data Waste data flo	gs to d s. ved	Increase in recyclables arising from road sweepings. 3-5% increase in recycling levels realised.	High	John Davies Colin Smith	01/04/2015	31/03/2015	Existing in- house Highways and WM&C staff and external contractors	Extension of Highways Treatment Plant completed Haulage and composting procedures in place with Neil's Soils
