Wk 13 12 0386/08 Childcare articles and children's equipment Wooden playpen

Brand: CALYPSO

Type/number of model: #132211

Description: A rectangular wooden playpen with plain dowel bars and a PVC-covered, padded MDF base board. The sides can be folded down and it has 2 legs and 2 lockable casters.

Injuries and suffocation

The product poses a risk of injuries and suffocation because:

- the 4 spring clips used to support the base are not protected against corrosion
- the slots in the corner posts are between 5mm & 12mm and more than 10mm deep. A gap between 5mm & 12mm exists between the lower side rails and the base rails on all 4 sides
- a gap between 25mm & 45mm exists between the corner posts and their adjacent dowels
- the folding mechanism requires 2 consecutive actions to release, the first fails to require 50N to release
- the minimum internal height from the top of the corner post (highest point on which a child can stand) to the top rail, is less than 600mm
- when in the elevated position, one of the spring clips deform allowing the base to collapse. With the base in the lowest position, 2 of the support brackets detach allowing the base to collapse when impacted at the centre end location
- it is not marked with the maximum weight of child to use the playpen.

Country of origin: Poland

Wk 13 11 0385/08 Toy car "friction power"

Brand: WIL Type/number of model: TY2409

Description: Model toy car in blue and white box with transparent plastic top and front. Yellow/orange/green toy colours failed testing.

Chemical

The product poses a chemical risk because it contains high levels of lead and chromium on bodywork of cars. The levels of lead vary from 1820ppm to 3647ppm compared with the required limit of 90ppm. The levels of chromium vary from 317ppm to 343ppm compared with the required limit of 60ppm.

The product does not comply with the Toys Directive and the relevant European standard EN 71.

Country of origin: China

Wk 13 9 0383/08 Wind turbine

PROVEN Type/number of model: WT2500, WT6000, WT6000E and WT15000.

Description: Wind turbine

Injuries

The product poses a risk of injuries because of insufficient tightening or movement of the connecting bolts. This results in fatigue leading to overload which causes the heads of the bolts to pop off. One incident reported.

Country of origin: United Kingdom

Packaging warnings are: " ! WARNING: CHOKING HAZARD – Small parts. Not for children under 3 years. Not suitable for children under 3 years". Logo.

Choking and injuries

The product poses a risk of choking and injuries because magnets in the small flexible parts of the animals, vehicles and building sets can be detached. Magnets found by young children can be swallowed or aspirated. If more than one magnet is swallowed, the magnets can attract each other and cause intestinal perforations or blockages, which can be fatal.

Two accidents reported in the United States.
