

## Product Recalls Week 17

### Wk 17 15 0488/08 Convector heaters

Brand: IGENIX

Type/number of model:

- Igenix IG5100 / 5016368010655
- Igenix IG5500 / 5016368010662
- Igenix IG5550 / 5016368012697.

Affected products do not have a batch code. If the product displays the batch code 500907, they are unaffected by this voluntary recall.

Description: Metal-cased electric convector heaters, three separate models.

#### Fire

The product poses a risk of fire.  
Twelve incidents have been reported.

Country of origin: China

### Wk 17 9 0482/08 Motor vehicles ATV Quad bike

Brand: HUMMER

Type/number of model: XTQSI- D250

**No picture available**

Description: The ATV is a four-wheeled, motorised quad bike. The ATV requires some self-assembly, for example attaching the wheels and battery. The quad is available in yellow, blue and red.

It is packaged in a plain cardboard box. There is a steel frame around the ATV which is attached with wires.

#### Injuries and burns

The product poses a risk of injuries because:

- the plastic containers of battery acid can leak, which would cause a hazard to the skin and eyes
- the nut and bolt provided to hold the shock absorber in place do not fit together. If the bolt is unfastened and becomes loose, an accident could occur
- the material of the saddle is stapled along the underside and many of these staples are loose and sharp
- the chain drive near the operator's left foot is only partially guarded, this may lead to a hazard due to catching of boot/shoelaces

The product poses a risk of fire and burns because:

- there are two identical pipes in close proximity, either of which can be attached to the fuel valve
- the fuel pipes are fastened by means of small metal clips. These are supplied loosely on the pipe, meaning they can easily be lost. This would lead to the fuel line being insecure
- the driver's legs are close to the engine and exhaust system, which may lead to burns

Country of origin: China
