I would like to object most strongly about the proposed development at Model Farm Rhoose on the following grounds:

The site is currently a haven for ecology and wildlife and the proposed development would destroy this. I feel very very strongly about prime agricultural land being decimated for this development.

The traffic issues between Rhoose and Weycock Cross in Barry are already at breaking point. There have been some roadworks recently which have caused chaos due to the constant very high volume of traffic. Any further development will be disastrous for the people of Rhoose.

Yours sincerely

Julia Lee-Jones
