CAS-02641-G8G7M5

Dear Sir/Madam

I yet again have to vehemently oppose the above listed planning application. It would be the most dreadful travesty of justice for the inhabitants of the Vale of Glamorgan as well as the proud family that have worked there for so long .The Wellbeing Act of 2015 states that any development should make a positive difference to the lives of the people in Wales ……how can it when part of the beautiful coastal stretch of the Vale is destroyed?It is supposed to have the wellbeing of future generations at its heart and yet if this application was allowed to go ahead it shows that all these acts and promises are simply words……The Environment Act if 2016 maintains that local authorities will maintain and enhance biodiversity and promote the resilience of ecosystems …..how if this development is allowed when precious ecosystems are divided and split ?It's just not possible!There should be no developments where there is the loss of the best and most versatile agricultural land …..surely this is a prime example,biodiverse land farmed in an organic manner with livestock ,as well as wildflowers, and it is thriving .The Vale council also talks about retaining an openess of land between Barry and Rhoose …..a green wedge .

There are plenty of other problems including the vast amount of extra traffic that would inevitably arise , flooding that would cause further problems in Porthkerry,the already overstretched sewage plant in Porthkerry .

I hope and pray that this application will be turned down

Sian Delaney
