## NON-TECHNICAL SUMMARY

### Introduction

- 0.1 This is the Non-Technical Summary (NTS) of the Sustainability Appraisal (SA) and Strategic Environmental Assessment (SEA) for the Vale of Glamorgan Deposit Local Development Plan, as required under the Environmental Assessment of Plans and Programmes (Wales) Regulations 2004. On Monday 14 August 2006, the Vale of Glamorgan Council, as the responsible authority, determined that the Vale of Glamorgan Local Development Plan (LDP) was likely to have significant environmental effects and accordingly a Strategic Environmental Assessment would be carried out during the preparation of the Plan and any subsequent reviews of the Plan.
- 0.2 Part 6 of the Planning and Compulsory Purchase Act 2004 (The Act) requires that each local authority in Wales prepares a Local Development Plan (LDP). Work formally began on the Vale of Glamorgan LDP in January 2007, which plan seeks to set out the Council's land use strategy and policy framework for the period 2011-2026. The Deposit LDP published for consultation in 2012 identifies the anticipated levels of future development during the plan period and sets out a framework for the management of development and growth.

### This Sustainability Appraisal Report

- 0.3 As part of the LDP process, the Council is required<sup>1</sup> to undertake a Sustainability Appraisal of the Plan, which incorporates the requirements of the Strategic Environmental Assessment Directive<sup>2,3</sup>. The reason for undertaking an SA during the preparation of the LDP is to assist the Council in identifying any likely significant economic, environmental and social effects of the LDP. In doing so, this allows the Council to ensure that the LDP includes suitable mitigation measures to minimise any negative effects and also to maximise positive effects.
- 0.4 Each stage of the preparation of the LDP has been subject to an assessment against the SA objectives and methodology. This began with the appraisal of the Preferred Strategy, which included the Vision, Strategic Objectives, Strategy Options and Strategic Policies which have subsequently been carried forward, and in certain cases have evolved to form part of the Deposit LDP. This initial appraisal was detailed and published within the Council's LDP Initial Sustainability Appraisal (ISA) Report (December 2007) which is included within Appendix 7.
- 0.5 The SA of the Deposit LDP builds upon the ISA and as such it is not the intention for this report to revisit work that has already been undertaken as this would result in unnecessary repetition. The starting point is therefore an assessment of any changes and amendments that have been made to the policies and objectives previously set out

<sup>1</sup> Planning and Compulsory Purchase Act, 2004

<sup>2</sup> Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment, June 2001

<sup>3</sup> Environmental Assessment of Plans and Programmes (Wales) Regulations 2004

in the Council's Draft Preferred Strategy, such changes having been as a result of further work undertaken by the Council during the production of the Deposit Plan.

- 0.6 Section 4 of the assessment then considers the Policies and site allocations which form the remainder of the Deposit LDP with detailed assessment tables included at Appendices 10-13

### Stages of the SA to date

- 0.7 The SA of the emerging LDP is intended to be an iterative process, with feedback between successive stages of appraisal and the production of the LDP. This approach is to allow the potential sustainability implications of all options considered in preparing the strategy to be made explicit. This therefore allows these implications to be taken into account by the Council when progressing work on the LDP. Likewise the process also assists consultees when formulating responses to the LDP.
- 0.8 **Scoping** – The first stage of the SA was a scoping exercise to identify the main sustainability issues in the Vale of Glamorgan, to set out the approach to SA and the sustainability framework.
- 0.9 During 2006, the Council began work on its LDP SA Scoping Report to assist the identification of the key environmental, social and economic issues that required consideration during the preparation of the LDP. This Scoping Report involved a review of relevant in international, national, regional and local plans, policies and programmes (PPP's) and relevant local information. This allowed the Council to develop a thorough appreciation of the sustainability issues affecting the Vale of Glamorgan as well as key sustainability objectives contained within other documents that would also need to be considered within the SA framework.
- 0.10 Prior to drafting the Scoping Report, the Council held an external stakeholder workshop with the environmental consultation bodies and relevant stakeholders on 11 October 2006. In addition, an internal officer workshop was held on 19 October 2006 to further discuss the findings of and feedback from the external stakeholder workshop. . The information detailing the feedback from these workshops is contained within the Sustainability Appraisal Stakeholder Workshop – Report of Consultation October 2006 (Appendix 1) and the Sustainability Appraisal Officer Workshop – Report of Consultation October 2006 (Appendix 2).
- 0.11 Consultation on the Council's Sustainability Appraisal Draft Scoping report was undertaken between the 12 February and the 19 March 2007. Responses to the consultation exercise and proposed amendments to the scoping report were reported to the Council's Cabinet on the 6 June 2007.
- 0.12 A fuller account of the sustainability issues, baseline information and key sustainability objectives that have informed the SA framework is contained within the Vale of Glamorgan Local Development Plan Sustainability Appraisal - Approved Scoping Report (July 2007), attached at Appendix 3.

- 0.13 **SA of the Strategy Options Report.** On May 24<sup>th</sup> 2007, the Council held a workshop with relevant stakeholders to discuss the suitability of six Strategy options developed by the Council that could, in land use terms provide a framework for guiding future development within the Vale of Glamorgan. As a result of this workshop a further three hybrid options were suggested by stakeholders and as such nine strategic options were assessed against the SA methodology.
- 0.14 The Council produced a supplementary SA report of these 9 options to show the relative sustainability impacts of implementing the alternative approaches to growth in the Vale of Glamorgan. The appraisal of the options is included within the LDP Sustainability Appraisal – Options Appraisal Report (November 2007) as Appendix 6 to this report.
- 0.15 **Pre-Deposit Proposals Consultation Stage.** The purpose of this stage is to provide an indication of the relative sustainability implications of implementing the alternative spatial strategy and growth options, as well as the sustainability implications of the preferred strategy. At this stage, the LDP contained policies for implementing the preferred strategy. Each of the policies was appraised against the sustainability objectives and using a standardised matrix to ensure a systematic appraisal.
- 0.16 As a result of the public consultation on the ISA report, a further spatial strategy option (option 8a) was presented as an alternative to the Council's preferred option (option 5). The Council in response to the consultation undertook a further assessment of the options including option 8a and is provided at Appendix 9.
- 0.17 **Current Stage: SA of the Deposit Local Development Plan** – this stage of the SA is the appraisal of the Deposit LDP. This results in the Deposit Plan (including all policies and allocations) being subjected to a sustainability appraisal. It should be noted that the Strategic Policies as presented in the Draft Preferred Strategy were subjected to the appropriate SA at that time. However there have been amendments to the strategic policies, including changes in the wording of some policies. Accordingly, the Strategic Policies as presented in the Deposit LDP have been subject to a further Sustainability Appraisal, which appraisal has further informed their wording.
- 0.18 This SA report considers each section of the LDP in turn aiming to identify what may be the likely effects of implementing the strategy and the individual policies. This is supplemented by the SA matrices in Appendices 10-13. These matrices are an essential component of the appraisal, and should be read in conjunction with the relevant text.
- 0.20 A set of sustainability objectives have been developed for the SA and were identified by the Council at the Scoping stage of the LDP and form the basis of the SA appraisal. The purpose of the objectives is to provide a consistent definition of sustainable development for the SA process. The Vision, objectives, strategy, policies and allocations contained within the LDP, are as a consequence tested against the objectives as part of a process of systematic appraisal:

- To provide the opportunity for people to meet their housing needs.
- To maintain, promote and enhance the range of local facilities.
- To maintain and improve access for all.
- Reduce the causes of deprivation.
- To maintain, protect and enhance community spirit.
- To minimise the causes and manage the effects of climate change.
- To minimise waste.
- To use land effectively and efficiently.
- To protect and enhance the built and natural environment.
- To provide a high quality environment within all new developments.
- To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.
- To reduce the need to travel and enable the use of more sustainable modes of transport.
- To provide for a diverse range of local job opportunities.
- To maintain and enhance the vitality and viability of the Vale's town, district and local centres.

**Likely significant effects of the Vale of Glamorgan LDP and how the SA has influenced the Deposit Vale of Glamorgan LDP**

- 0.21 The SA has found that the Deposit LDP will make a significant contribution to the progression of sustainable development objectives for the Vale of Glamorgan, within the context of the future planned housing and employment growth set out in the plan. Conversely and as a direct result of new development the SA has identified that the potential cumulative effects arising will be those associated with increase in the use of energy through development and transport, and increased waste generation.
- 0.22 The SA also noted that these issues are also key objectives contained in national planning policy and as such the LDP and contribute towards addressing these issues through specific land use policies that have been developed as a consequence of the SA of the emerging plan, but cannot directly influence the occurrence of such issues.
- 0.23 The systematic appraisal of the various components that make up the Deposit LDP has assisted in the development of a series of strategic objectives consistent with the sustainability framework set out in the SA Scoping Report. This included the appraisal of strategic options that informed the Council in the identification of a Draft Preferred Strategy for the LDP that is best placed to address the key economic, social and environmental issues affecting the Vale of Glamorgan. The SA has assisted in the development of a suite of LDP policies that seek to mitigate any potential adverse affects identified during the production of the Deposit Plan.

**Compliance with the SEA Directive and Regulations**

0.24 The SEA Regulations set out certain requirements for reporting the SEA process, and specify that if an integrated appraisal is undertaken, the sections of the SA Report that meet the requirements set out for reporting the SEA process must be clearly signposted. The requirements for reporting the SEA process are identified in the first column of the Table 0 below, whereby the second column identifies the section of this report or the SA Scoping Report that addresses these requirements.

| <b>Table 0: Environmental Report Requirements</b>  |   |
|--|---|
| <b>Contents of the SEA report as required by the SEA regulations.</b>  | <b>Where covered</b>  |
| An outline of the contents, main objectives of the plan and relationship with other relevant plans.  | Section 2 of this Document sets out the key aspects and main SA objectives and their relationship with other relevant plans.  |
| The relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan.  | Baseline conditions for sustainability (including the state of relevant environmental aspects). More detailed baseline information is provided at Appendices 6 (Vale of Glamorgan SA Scoping Report)  |
| The environmental characteristics of areas likely to be significantly affected   | Section 2 of this Document summarises the relevant environmental characteristics likely to be significantly affected.   |
| Any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance   | Section 2 Table 2 of this Report.<br>More detailed baseline information is provided at Appendices 6 (Vale of Glamorgan SA Scoping Report)   |
| The environmental protection objectives, established at international, Community or Member State level, which are relevant to the plan or programme and the way those objectives and any environmental considerations have been taken into account during its preparation.   | Section 2 Table 1 of this Report.<br>More detailed baseline information is provided at Appendices 6 (Vale of Glamorgan SA Scoping Report)   |
| The likely significant effects on the environment, including short, medium and long-term effects, permanent and temporary effects, positive and negative effects, and secondary, cumulative and synergistic effects, on issues including (a) biodiversity; (b) population; (c) human health; (d) fauna; (e) flora; (f) soil; (g) water; (h) air; (i) climatic factors; (j) material assets; (k) cultural heritage, including architectural and archaeological heritage; (l) landscape; and (m) the inter-relationship between the issues referred to in sub-paragraphs (a) to (l). | The likely sustainability effects of implementing the Deposit Plan (including environmental effects) is summarised in Section 5 of this SA Report. These area supported by more detailed appraisal tables at Appendices 10-13, with consideration given to short, medium and long-term effects. |

| Contents of the SEA report as required by the SEA regulations.  | Where covered   |
|---|---|
| The measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme.                                       | Where significant adverse effects, including environmental effects, have been predicted, the SA has sought where possible to identify means of offsetting these effects. These are provided in the form of recommendations in the appraisal matrices (Appendix 10-13) and summarised in Sections 4 of this SA Report. |
| An outline of the reasons for selecting the alternatives dealt with, and a description of how the assessment was undertaken including any difficulties encountered in compiling the required information. | Justification for the different options considered for the Deposit Plan is provided in the matrix based assessment of options and summarised in Section 3 of this Report. Appendices 3-6 and 9 provide further detailed information on the Options considered.  |
| A description of the measures envisaged concerning monitoring in accordance with regulation 17  | Section 6 of this Report sets out the monitoring framework of the plan.   |
| A non-technical summary of the information provided under paragraphs 1 to 9.  | The Non-Technical Summary is set out at the beginning of this report  |

### Habitats Regulations Assessment (HRA)

- 0.25 The European Directive (92/43/EEC) on the Conservation of Natural Habitats and Wild Flora and Fauna (the Habitats Directive) protects habitats and species of European nature conservation importance. The Habitats Directive establishes a network of internationally important sites designated for their ecological status. These are referred to as Natura 2000 (N2K) sites or European Sites, and comprise Special Areas of Conservation (SACs) and Special Protection Areas (SPAs) [which are classified under the Council Directive 79/409/EEC on the conservation of wild birds, the 'Birds Directive'].
- 0.26 The purpose of HRA/AA is to assess the impacts of a land-use plan, in combination with the effects of other plans and projects, against the conservation objectives of a European Site and to ascertain whether it would adversely affect the integrity of that site. Where significant negative effects are identified, alternative options should be examined to avoid any potential damaging effects. The scope of the HRA/AA is dependent on the location, size and significance of the proposed plan or project and the sensitivities and nature of the interest features of the European sites under consideration.
- 02.7 Habitats Regulations Assessment Screening of the Deposit Plan was undertaken by Enfusion. The HRA Screening Report is being published alongside this SA Report and the Deposit Plan for consultation.

**Next Steps and How to Comment On This SA Report**

- 0.28 This SA report accompanies the Deposit Plan at independent examination and forms part of the evidence base. If recommendations or changes are suggested as a result of the examination then it may be necessary to amend the SA report prior to adoption.
- 0.29 Consultation is an important part of developing the LDP and carrying out the assessment. Following this, all responses received will be collated and incorporated as appropriate into the Council's decision-making process for finalising the LDP. The consultation on the LDP is being undertaken in parallel to the consultation on the SA report, and feedback can be provided on the LDP as well as the SA Report.
- 0.30 Any comments on the SA/SEA of the Deposit Plan should be submitted on the standard Response Form for the Deposit Plan consultation.
- 0.31 After adoption of the LDP, an SEA Statement must be produced in order to document how the SA / SEA and consultation on the SA has influenced the development of the LDP. It will also set out the final SEA monitoring commitments. This will be done at the earliest practicable opportunity upon adoption of the LDP.

## 1. Background

### Purpose of the Sustainability Appraisal and the SA Report

- 1.1 The purpose of Sustainability Appraisal (SA) is to promote sustainable development through the integration of environmental, social and economic considerations in the preparation of a Local Development Plan (LDP). This requirement is set out in Section 39 (2) of the Planning and Compulsory Purchase Act, 2004. Local Development Plans must also be subject to Strategic Environmental Assessment (SEA) and Government advises that an integrated approach is adopted so that the SA process incorporates the SEA requirements.
- 1.2 This report documents the Sustainability Appraisal/ Strategic Environmental Assessment of the Vale of Glamorgan Deposit Local Development Plan. This SA Report is being published for consultation with the Deposit Plan in accordance with SEA Regulations and SA Guidance.
- 1.3 A fuller account of the sustainability issues, baseline information and key sustainability objectives that have informed the SA framework is contained within the Vale of Glamorgan Local Development Plan Approved Sustainability Scoping Report (July 2007) which forms Appendix 3 of this report.

### LDP Preparation and the SA Process

- 1.4 The SA process seeks to improve the sustainability performance of the Plan by testing its various components against sustainability objectives. The appraisal identifies areas where improvements can be made to its contribution to achieving sustainable development. It is considered to be an integral part of the LDP process and as such the Council, prior to progressing work on the LDP, developed a SA framework consisting of a series of objectives covering a range of social, economic and environmental topics, against which the sustainability of the emerging plan has been tested during its preparation.
- 1.5 The Welsh Government's LDP Manual defines the five main stages in conducting a SA as:
- **STAGE A:** Setting the context and objectives, establishing the baseline and deciding on the scope;
  - **STAGE B:** Developing and refining options and assessing effects;
  - **STAGE C:** Preparing the SA Report;
  - **STAGE D:** Consulting on the preferred option of the development plan and SA report; and
  - **STAGE E:** Monitoring significant effects of implementing the development plan.

### Compliance with the SEA Directive and Regulations

- 1.6 The SEA Regulations set out certain requirements for reporting the SEA process, and specify that if an integrated appraisal is undertaken, the sections of the SA Report that meet the requirements set out for reporting the SEA process must be clearly

signposted. The requirements for reporting the SEA process are identified in the first column of the Table 1 below, the second column identifies the section of this report or the and or relevant appendices that address these requirements.

| <b>Table 0: Environmental Report Requirements</b>  |  |
|--|--|
| <b>Contents of the SEA report as required by the SEA regulations.</b>  | <b>Where covered</b>   |
| An outline of the contents, main objectives of the plan and relationship with other relevant plans.  | Section 2 of this Document sets out the key issues and main SA objectives and their relationship with other relevant plans.  |
| The relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan.  | Baseline conditions for sustainability (including the state of relevant environmental aspects). More detailed baseline information is provided at Appendix 6 (Vale of Glamorgan SA Scoping Report)   |
| The environmental characteristics of areas likely to be significantly affected   | Section 2 of this Document summarises the relevant environmental characteristics likely to be significantly affected.  |
| Any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance   | Section 2 Table 2 of this Report. More detailed baseline information is provided at Appendix 6 (Vale of Glamorgan SA Scoping Report)   |
| The environmental protection objectives, established at international, Community or Member State level, which are relevant to the plan or programme and the way those objectives and any environmental considerations have been taken into account during its preparation.   | Section 2 Table 1 of this Report. More detailed baseline information is provided at Appendix 6 (Vale of Glamorgan SA Scoping Report)   |
| The likely significant effects on the environment, including short, medium and long-term effects, permanent and temporary effects, positive and negative effects, and secondary, cumulative and synergistic effects, on issues including (a) biodiversity; (b) population; (c) human health; (d) fauna; (e) flora; (f) soil; (g) water; (h) air; (i) climatic factors; (j) material assets; (k) cultural heritage, including architectural and archaeological heritage; (l) landscape; and (m) the inter-relationship between the issues referred to in sub-paragraphs (a) to (l). | The likely sustainability effects of implementing the Deposit Plan (including environmental effects) is summarised in Section 5 of this SA Report. These area supported by more detailed appraisal tables at Appendices 10-13, with consideration given to short, medium and long-term effects.                      |
| The measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme.  | Where significant adverse effects, including environmental effects, have been predicted, the SA has sought where possible to identify means of offsetting these effects. These are provided in the form of recommendations in the appraisal matrices (Appendix 10-13) and summarised in Section 4 of this SA Report. |

| Contents of the SEA report as required by the SEA regulations.  | Where covered  |
|---|--|
| An outline of the reasons for selecting the alternatives dealt with, and a description of how the assessment was undertaken including any difficulties encountered in compiling the required information. | Justification for the different options considered for the Deposit Plan is provided in the matrix based assessment of options and summarised in Section 3 of this Report. Appendices 3-6 and 9 provide further detailed information on the options considered. |
| A description of the measures envisaged concerning monitoring in accordance with regulation 17  | Section 6 of this Report sets out the monitoring framework of the plan.  |
| A non-technical summary of the information provided under paragraphs 1 to 9.  | The Non-Technical Summary is set out at the beginning of this report   |

### Habitats Regulations Assessment (HRA)

- 1.7 The European Directive (92/43/EEC) on the Conservation of Natural Habitats and Wild Flora and Fauna (the Habitats Directive) protects habitats and species of European nature conservation importance. The Habitats Directive establishes a network of internationally important sites designated for their ecological status. These are referred to as Natura 2000 (N2K) sites or European Sites, and comprise Special Areas of Conservation (SACs) and Special Protection Areas (SPAs) [which are classified under the Council Directive 79/409/EEC on the conservation of wild birds, the 'Birds Directive'].
- 1.8 The purpose of HRA/AA is to assess the impacts of a land-use plan, in combination with the effects of other plans and projects, against the conservation objectives of a European Site and to ascertain whether it would adversely affect the integrity of that site. Where significant negative effects are identified, alternative options should be examined to avoid any potential damaging effects. The scope of the HRA/AA is dependent on the location, size and significance of the proposed plan or project and the sensitivities and nature of the interest features of the European sites under consideration.
- 1.9 Habitats Regulations Assessment Screening of the Preferred Strategy was undertaken by the Council in 2007 and published for consultation alongside the Preferred Strategy. The HRA Screening Report recommended that further 'Appropriate Assessment (AA)' be undertaken. The assessment method and the findings of the further HRA/AA are published in a separate report accompanying the Deposit Draft Plan.

### SA methodology for policy appraisal

- 1.10 The objectives and aims which form the basis of the appraisal methodology were developed as part of the Council's work on its LDP SA Approved Scoping Report (July 2007), which is provided at Appendix 3. These were informed by the appraisal of other relevant plans and programmes that may either influence or be influenced by the Plan. Where possible the Council also gathered baseline information on social, economic and environmental issues relevant to the Vale of Glamorgan.

1.11 Prior to drafting the Scoping Report, the Council held an external stakeholder workshop with the environmental consultation bodies and relevant stakeholders on 11 October 2006. In addition, an internal officer workshop was held on 19 October 2006 to further discuss the findings of the external stakeholder workshop. The reports of these workshops are contained within Appendices 1 and 2.

1.12 Consultation on the Council's Sustainability Appraisal Draft Scoping report was undertaken between the 12 February and the 19 March 2007. Responses to the consultation exercise and proposed amendments to the scoping report were reported to the Council's Cabinet on the 6 June 2007. A copy of that report is attached at Appendix 8.

### Summary of the SA Methodology

1.13 The SA of the LDP has been undertaken against the SA objectives developed at the Scoping Stage of the SA process and has been carried out using a matrix-based approach based on ODPM guidance<sup>4</sup>. The matrix also ensures that the spatial nature of effects is taken into consideration together with the significance of the identified effects. The performance (direction and severity) against the SA objectives is recorded in the matrix using the symbols shown below.

|     |   |
|-----|---|
| ++  | Strongly contributes to the achievement of the SA objective   |
| +   | Contributes to the achievement of the SA objective  |
| 0   | There is no clear relationship with the achievement of the SA objective or the relationship is negligible                             |
| -   | Detracts from the achievement of the SA objective   |
| --  | Strongly detracts from the achievement of the SA objective  |
| +/- | Both contributes and detracts from the achievement of the SA objective  |
| ?   | Is dependent on the way in which the aspect is managed. Sufficient information may be unavailable to enable an assessment to be made. |

1.14 In assessing the impact of each element of the LDP, the following aspects were considered while carrying out the appraisal:

- **Direction of impact:** Whether the effects are positive, negative or neutral
- **Significance:** Whether the effects would be slightly or greatly significant
- **Spatial Scale:** Since the LDP will seek to address issues either common to the Vale or those that exist in a discrete area, the appraisal considers the locality of the effects in the Vale of Glamorgan i.e. whether they would affect the rural and/or urban areas or both. In addition, any potential trans-boundary effects outside the study area were also considered.
- **Temporal:** Whether the LDP would have a positive, neutral or negative effect in the short, medium or long-term. This aspect is measured in 5 year intervals to reflect the 15 year plan period
- **Secondary, Synergistic and Cumulative impacts (positive or negative):**
  - Secondary effects are indirect effects, for example health effects of air pollution as a result of increased road transport.

<sup>4</sup> Annex 10 of the *Sustainability Appraisal of Regional Spatial Strategies and Local Development Frameworks*, ODPM, November 2005

- Synergistic effects are those which relate to the outcome of a number of objectives that interact to produce a total effect greater than the sum of the individual effects, for example improved access to services, affordable housing and built environment together would result in enhancing community spirit.
- Cumulative effects are the overall effect of the LDP, and include secondary and synergistic effects.
- **Mitigation-** The identification of potential intervention measures that may assist in reducing negative impacts or enhancing outcomes in support of the SA objectives. In most instances this involves recommendations for issues that need to be addressed through planning policies contained within the LDP.

### Stages of the SA to date

- 1.15 The SA of the emerging LDP is intended to be an iterative process, with feedback between successive stages of appraisal and the production of the LDP. This approach is to allow the potential sustainability implications of policy formulation to be made explicit, thereby, allowing these to be taken into account in the choices made by the Council and helping consultees respond to the LDP.

### Scoping

- 1.16 The first stage of the SA was a scoping exercise to identify the main sustainability issues in the plan area, to set out the approach to SA and the sustainability framework. During 2006, the Council began work on its LDP SA Scoping Report to assist the Council to identify the key environmental, social and economic issues which the Council would consider during the preparation of the LDP. This Scoping Report involved a review of relevant international, national, regional and local plans, policies and programmes (PPP's) and relevant local information. This allowed the Council to develop an appreciation of the sustainability issues affecting the Vale of Glamorgan as well as key sustainability objectives contained within other documents that would also need to be considered within the SA framework.
- 1.17 Prior to drafting the Scoping Report, the Council held an external stakeholder workshop with the environmental consultation bodies and relevant stakeholders on 11 October 2006. In addition, an internal officer workshop was held on 19 October 2006 to further discuss the findings of the external stakeholder workshop. Reports on these workshops are attached at Appendices 1 and 2.
- 1.18 Consultation on the Council's Sustainability Appraisal Draft Scoping report was undertaken between the 12 February and the 19 March 2007. Responses to the consultation exercise and proposed amendments to the scoping report were reported to the Council's Cabinet on the 6 June 2007 (Appendix 8).
- 1.19 A fuller account of the sustainability issues, baseline information and key sustainability objectives that have informed the SA framework is contained within the Vale of Glamorgan Local Development Plan Sustainability Appraisal Approved Scoping Report (July 2007), which is attached at Appendix 3.

### SA of the Strategic Options Report.

- 1.20 On May 24<sup>th</sup> 2007, the Council held a workshop with relevant stakeholders to discuss the suitability of six Strategic LDP Options developed by the Council that could, in land use terms provide a framework for guiding future development within the Vale of Glamorgan. As a result of this workshop a further three hybrid options were suggested by stakeholders and as such nine strategic options were assessed against the SA methodology. The Vale of Glamorgan Local Development Plan Strategic Options, Stakeholder Workshop Report of Consultation (June 2007) outlines the views expressed at this workshop. Subsequently, and on the 25<sup>th</sup> July 2007, the Council held a workshop with relevant Council officers to discuss the suitability of the nine Strategic LDP Options. The Vale of Glamorgan Local Development Plan Strategic Options, Officer Workshop Report (June 2007) outlines the views expressed at this workshop. Both reports are attached at Appendices 4 and 5.
- 1.21 The Council undertook a Sustainability Appraisal of all strategic options, which options included the six strategic options initially identified by the Council and the three additional strategic options that emerged as a consequence of the stakeholder workshop undertaken on the 24<sup>th</sup> May 2007. The LDP Initial Sustainability Appraisal Report (2007) (ISA) highlighted the relative sustainability impacts of implementing the alternative approaches to growth in the Vale of Glamorgan and is attached at Appendix 7 to this report. The LDP Sustainability Appraisal – Options Appraisal Report (November 2007) is also attached at Appendix 6. The purpose of this stage was to give an indication of the relative sustainability implications of implementing the alternative spatial strategy and growth options, as well as the sustainability impacts of the preferred strategy. Each of the strategic policies were appraised against the sustainability objectives and using a standardised matrix to ensure a systematic appraisal.

### Pre-Deposit Proposals Consultation Stage

- 1.22 A report was considered by Cabinet on 12<sup>th</sup> December 2007, where it was resolved that the LDP Draft Preferred Strategy and Initial Sustainability Appraisal Report be endorsed for public consultation purposes in the Spring of 2008. In accordance with the recommendation, the Council undertook consultation on the Draft Preferred Strategy (DPS) and the Initial Sustainability Appraisal (ISA) Report in January and February 2008. The purpose of this stage was to give an indication of what the relative sustainability implications would be of implementing the alternative spatial strategy and growth options, as well as the sustainability impacts of the chosen approach. The LDP at this stage contained policies for implementing the preferred strategy. Each of the policies were appraised against the sustainability objectives and using a standardised matrix to ensure a systematic appraisal.
- 1.23 As a result of the public consultation on the LDP Draft Preferred Strategy and the ISA report, a further spatial strategy option (option 8a) was presented as an alternative to the Council's preferred option (option 5). The Council subsequently undertook a further SA of each option including that further option (option 8a) suggested through consultation process. Appendix 9 contains the full assessment of all the strategic options which is contained within the LDP Sustainability Appraisal - Revised Options Appraisal Report (March 2009).

### Current Stage: SA of the Deposit Local Development Plan

- 1.24 This stage of the SA is the appraisal of the Deposit stage LDP. At this stage the Deposit Plan will be subjected to suitable Sustainability Appraisal. It should be noted that the spatial strategy, vision along with the majority of the spatial objectives contained within the Draft Preferred Strategy remain the same as they appear in the current Deposit LDP. As a consequence the Assessment previously undertaken remains valid and is repeated in the SA.

### Format of the remainder of this report

The remaining sections of this report is organised into six further sections.

**Section 2** - Identifies the objectives of other strategies and plans that the LDP and sustainability appraisal should have regard to as part of achieving a wider understanding of the sustainability issues in the Vale of Glamorgan. This section also describes the main environmental, economic and social characteristics of the Vale of Glamorgan identified through the 'scoping' exercise undertaken early in the SA process. The section also provides information on the SA methodology and the stages of appraisal that have been completed to date.

**Section 3** – This details the previous SA stages undertaken, summarising the appraisal of the pre-deposit Draft Preferred Strategy, including the Vision and Objectives, Core Strategic Policies and the spatial options considered. The Appendices contained in the Initial Sustainability Appraisal Report at Appendix 7 provides details on and the outcomes and results of the earlier appraisal work undertaken.

**Section 4** – This provides for the appraisal of the Deposit LDP as a whole, including the SA of the strategic and detailed policies set out in the LDP, and revisits those elements that have changed or been amended since the pre-deposit stage. This also summarises how potential impacts of the LDP on sustainable development can be mitigated, supported by the appraisal matrices in Appendices 10-13.

**Section 5** – This summaries the main impacts (both positive and negative), and details the recommendations to improve sustainability performance of the Deposit LDP.

**Section 6** – This section sets out the monitoring proposals for the SA.

**Section 7** Sets out the next steps of the SA process, including formal consultation requirements.

## 2. SUSTAINABILITY CONTEXT AND OBJECTIVES

### Introduction

- 2.1 This Section summarises the process undertaken by the Council and the key issues encountered in analysing data and establishing a Sustainability Framework. The full details of the review of relevant plans and programmes, the analysis of baseline information, and the analysis of the characteristics of Vale of Glamorgan are contained in the LDP Sustainability Appraisal Approved Scoping Report – July 2007 (Appendix 3).

### Review of Relevant Plans and Programmes

- 2.2 As part of the development of the SA framework for the Vale of Glamorgan, it was necessary for the Council to understand the relationships between the Local Development Plan (LDP) and sustainability objectives contained in other relevant policies, plans and programmes. In order to do this the Council identified and reviewed international, national, regional and local policies, plans and programmes (PPPs) to identify any social, environmental or economic objectives that should be reflected in the SA framework.
- 2.3 During the PPP Review, consideration was given to identifying any synergies and inconsistencies between the documents being reviewed. It was found, through the review that in general, the policies, plans and programmes relating to the same themes or topic areas tended to be consistent with one another as they sat within a policy hierarchy. Care was taken to review up-to date documents, and no obvious inconsistencies were identified within the PPP review.
- 2.4 The review of PPPs highlighted a series of objectives that the Council has included within its SA framework relating to a range of social, environmental and economic issues and objectives that feature prominently in the relevant policies, plans and programmes as shown in Table 2 below:

| Table 2: Key Sustainability Themes within Plans, Programmes and Policies Reviewed |   |
|---|---|
| Theme   | Over arching principle  |
| Climate Change  | To address the causes of climate change through reducing emissions of greenhouse gases.   |
| Sustainable Development   | To maintain sustainable and equitable economic development this recognises the need to protect the environmental alongside the careful management of natural resources. |
| Sustainable Resources: Energy   | To promote energy efficient development, address energy poverty and encourage renewable sources of energy generation.   |
| Sustainable Resources: Minerals   | To encourage the prudent use of natural resources through efficient use and recycling   |
| Sustainable Resources: Waste  | To achieve a reduction in waste production and disposal through encouraging   |
| Natural Resources: Water  | To maintain and improve water quality and to achieve sustainable water resource management.   |

| Theme                                  | Over arching principle  |
|--|---|
| Biodiversity and habitat protection    | To conserve and enhance biodiversity and protect and enhance wildlife habitats  |
| Air Quality                            | To reduce air pollution and ensure air quality continues to improve.  |
| Flood Risk                             | To reduce the risk of flooding and its impact on public well-being, the economy and the environment.  |
| Landscape & Townscape                  | To protect and enhance landscape character, encourage sustainable design solutions, enhance the built environment and ensure ease of access for all.  |
| Agriculture & The Rural Economy        | To enhance the quality of life in rural areas by encouraging a sustainable, diverse and viable rural economy.   |
| Economic Development & Regeneration    | To promote the spread of economic prosperity through facilitating economic development and stimulating economic regeneration in priority areas  |
| Retail                                 | To support the viability and vitality of retail centres   |
| Tourism                                | To encourage the development of a buoyant sustainable tourism sector through maximising economic and social benefits whilst safeguarding cultural and environmental assets.                   |
| Transport and Accessibility            | To reduce the impact that transport has on the environment by tackling reliance on car use, encourage public transport and ensuring good access to essential services and facilities for all. |
| Housing including Affordable Housing   | To meet local housing needs by ensuring that everyone has the opportunity to live in a decent, affordable home.   |
| Community Involvement Social Inclusion | To reduce poverty and social exclusion.   |
| Crime Reduction & Community Safety     | To reduce crime and fear of crime.  |
| Culture and Cultural Heritage          | To create and sustain vibrant communities and protect and enhance cultural heritage   |
| Education & Lifelong Learning          | To raise educational achievement levels and provide the opportunities for everyone to acquire the skills needed to find and remain in work.   |
| Health & Well Being                    | To improve the health and well-being of the population and reduce inequalities in health  |

### Description of Baseline Conditions

- 2.5 Collection of baseline information is required under SEA legislation, and this is fundamental to the SA process in providing a background to, and evidence base for, identifying sustainability issues within the Vale of Glamorgan as well as providing the basis for predicting and monitoring the effects of the LDP. To make judgements about how the emerging content of the LDP will progress or hinder sustainable development, it is essential to understand the economic, environmental and social circumstances in the Vale of Glamorgan today and their likely evolution in the future. The aim is to

collect only relevant and sufficient data on the present and future state of the Vale of Glamorgan to allow the potential effects of the LDP to be adequately predicted.

- 2.6 The LDP Manual produced by the WAG in 2006, proposes a practical approach to data collection, recognising that information may not yet be available, and that information gaps to allow for future improvements should be reported as well as the need to consider uncertainties in data. Collection of baseline information should be continuous as the SA process progresses.

#### **Limitations and Assumptions**

- 2.7 The LDP Manual, produced by WG in 2006 requires that difficulties encountered with data collection be identified. There is a wide range of information available for the Vale of Glamorgan that can be used to profile the current conditions of the environment. However, the information is often held by a range of national and regional organisations within different datasets. In addition, the baseline dates relative to those datasets are sometimes inconsistent. The main issues surrounding the collection of the baseline information, and subsequently the development of the indicators, are:

- Data was not always available at the local level. It was considered that using national or regional data would not be an adequate substitute as it would have failed to give a clear indication of the main issues affecting the Vale;
- Information was often only available on specific issues, and did not necessarily match the ideal sets of information in terms of the environmental, economic and social baseline
- It was difficult to identify trends for a number of the indicators due to limited data.

#### **The Sustainability Characteristics of the Vale of Glamorgan**

- 2.8 The collection of baseline data provides a picture of the current social, economic and environmental issues within and affecting the Vale of Glamorgan that the Council has sought to address via the LDP. The data also provides a basis for predicting and monitoring the effects of the Plan. A robust understanding of the baseline position is important in ensuring a sound evidence base for the Local Development Plan (LDP).

- 2.9 The detailed baseline data for the Vale of Glamorgan is contained within the LDP Sustainability Appraisal Approved Scoping Report – July 2007 (Appendix 3), and the information recorded for each indicator includes:

- Quantified information;
- Comparators and trends; and
- Issues for the Sustainability / LDP.

A brief overview of the social, environmental and economic issues of the Vale of Glamorgan is outlined below.

### Location and Regional Context

- 2.10 The Vale of Glamorgan is Wales' most southerly Unitary Authority, lying west of Cardiff between the M4 and the Severn Estuary and covering 33,097 hectares, of which approximately 85% (28,132 hectares) is agricultural land. The Vale of Glamorgan has 53 kilometres of coastline, of which 19 kilometres is designated as Heritage Coast. Its neighbouring authorities are Bridgend County Borough Council to the west, Cardiff Council to the east and Rhondda Cynon Taf County Borough Council to the north.
- 2.11 The A48 links the Vale of Glamorgan to the south east region and beyond, with the M4 motorway located to the north of the administrative boundary. Barry is also connected to the wider region by the main rail line between Bridgend and Cardiff. The only commercial airport in South East Wales is located at Rhoose, some 8 kilometres to the west of Barry Town Centre. A runway also exists at MoD St Athan

### Socio Economic Portrait

- 2.12 The 2010 mid year estimates indicate that the population of the Vale of Glamorgan is now 124,976 of which approximately 50,000 reside in Barry. A further 46,000 are distributed amongst the larger towns of Penarth, Llantwit Major, Dinas Powys and Cowbridge. The remaining population is accommodated throughout the Vale of Glamorgan's smaller rural villages and hamlets.
- 2.13 The Population Projections (2008) indicate that the population of the Vale of Glamorgan is set to rise from 126,654 in 2011 to 139,729 by 2026. Whilst the gender profile will remain largely unchanged with 48% males and 52% females, the age of the population shows a projected increase of 8% in children under 18 and 37% increase in people of retirement age.
- 2.14 The Vale of Glamorgan exhibits considerable socio-economic diversity containing some of the most affluent and the most deprived communities in Wales. The Index of Multiple Deprivation (2008) shows that of the 78 lower super output areas (LSOA) in the Vale of Glamorgan, 5 LSOAs in Barry fall within the top 20% of most deprived areas in Wales. Particular areas of concern relate to high indices of deprivation in respect of employment, income, education, health and community safety. As a result of these socio economic factors the Welsh Government designated the town as a Strategic Regeneration Area in 2011. The designation will help to provide a focused approach to regeneration and assist in delivering both economic and social benefits to the town.
- 2.15 Conversely, many of the other towns and villages in the Vale of Glamorgan are prosperous. The Index of Multiple Deprivation (2010) shows that 71 of the LSOAs in the Vale of Glamorgan are the least deprived areas in Wales.
- 2.16 The proximity of the Vale of Glamorgan to Cardiff coupled with the rich and diverse nature of the towns and villages in the area have resulted in significant pressure for new residential development. An average house building rate of 426 dwellings per annum between 1998 and 2009 clearly demonstrates the strength of the housing market. The net result of this pressure is exhibited through relatively high land values

and house prices. The Local Housing Market Assessment (2010) indicated that the average house price in the Vale of Glamorgan was £203,511.

- 2.17 High property prices contribute to an increase in the number of residents unable to enter the private property market. The Local Housing Market Assessment (2010) shows an overall housing need of 915 affordable dwellings per annum for the period 2010 to 2015. The findings of the assessment make clear that the area of greatest need is Barry followed by the coastal settlements of Rhoose, Llantwit Major and Penarth as well as the Rural and Eastern Vale.
- 2.18 The economic profile of the Vale of Glamorgan is one of diversity. The Employment Land Study (2007) indicates the range of the employment sectors currently operating in the Vale. The employment sector is dominated by public administration, education and health, which accounts for nearly 36% of all employment distribution. Hotels and restaurants provide nearly 16% of the employment base, whilst banking, finance and insurance account for 14%. Agriculture and fishing, once dominant in the Vale of Glamorgan, accounts for only 1% of the employment market.
- 2.19 The Office of National Statistics Unemployment Briefing (2010) indicates that unemployment in the Vale of Glamorgan is 6.8%, significantly below the Welsh average of 9.2%. The Office of National Statistics Survey of Hours and Earnings indicates that the average salary in the area is £30,676, significantly above the Welsh average of £26,838.
- 2.20 The Employment Land Study (2007) indicates that the market in the Vale of Glamorgan is comparatively strong with average take up of employment land over the period 1996-2007 of 4.1 hectares per annum. However, the analysis also indicates that some of the current employment land supply does not meet the needs of the market. The study indicates that there is a need to provide a high quality B1 business park in Barry and to provide policy support for the development and diversification of the economy in the rural Vale.
- 2.21 The presence of Cardiff Airport and MoD St Athan represent a significant opportunity to bring aerospace related inward investment to the area. This opportunity is enhanced with the declaration in September 2011 that St Athan had been selected to accommodate an Enterprise Zone, based around the aerospace sector.
- 2.22 A key factor in the employment market is the proximity of the Vale of Glamorgan to Cardiff. The Regional Transport Plan (2010) estimates that 28,000 people, equivalent to 46% of Vale residents, travel out of the area every day to work. This is counter balanced by the 13,400 workers who travel into the Vale of Glamorgan for employment. The result of this commuting is peak time congestion on key routes between the Vale of Glamorgan, Cardiff and the wider regional transportation network.
- 2.23 The retail sector in the Vale of Glamorgan is made up of a range of convenience and comparison stores centred principally in the settlements of Barry, Penarth, Llantwit Major and Cowbridge. The Retail Study (2009) indicates that the retail sector in the Vale of Glamorgan is worth £554 million per annum. Currently nearly 85% of the total expenditure in relation to convenience goods and 30% of expenditure in relation to comparison goods is retained within the area.

- 2.24 The study indicates that there is potential to retain a greater proportion of the expenditure on convenience goods by providing additional floorspace in Barry, Penarth and Cowbridge. The leakage of comparison spend out of the area is attributable to a number of factors the most significant of which is the proximity to Cardiff.

#### **Environmental Portrait**

- 2.25 The Vale of Glamorgan benefits from a wide range of environmental resources, some of which are recognised for their value by international and national designations such as the Severn Estuary and the Glamorgan Heritage Coast. There are also a large number of national and locally important designated sites of nature conservation value which provide important habitats for local biodiversity including protected species. The Vale of Glamorgan has 23 Sites of Special Scientific Interest, 1 Special Areas of Protection and 3 Special Areas of Conservation.
- 2.26 In terms of cultural heritage, the Vale of Glamorgan has approximately 740 Listed Buildings and over 100 Scheduled Ancient Monuments as well as 39 Conservation Areas and 18 included in the Register of Historic Parks and Gardens. The long term management of these important cultural assets is a key consideration.
- 2.27 As a coastal authority, potential rises in sea levels as a result of climate change may pose a threat to the Vale of Glamorgan's coastal environment as well as the towns and villages situated on the coast. The Shoreline Management Plans (2010) for the Vale of Glamorgan paint a picture of erosion and cliff falls causing some small scale recession along the coastline. The Plans indicate a need for limited long term intervention to prevent erosion in key areas such as Barry. The remainder of the coast line will be subject to non intrusive management to prevent further erosion.

#### **Key Sustainability Issues**

- 2.28 From the review of policies, plans and programmes, and the analysis of the baseline data, including the findings from the stakeholder and officer workshops (Appendices 1 and 2), it is possible to identify a number of key sustainability issues which should be addressed through the objectives and indicators in the SA framework. Table 3 provides a list of the key sustainability issues identified.

Table 3: Key Sustainability issues for the Vale of Glamorgan

|        | Key Issue                | Identifying factors  |
|--------|--------------------------|--|
| SOCIAL | Housing                  | <ul style="list-style-type: none"> <li>• Lack of affordable housing and shortage of temporary accommodation</li> <li>• Increased housing demand / need</li> <li>• Increasing house prices</li> <li>• Increasing need for smaller dwellings due to smaller households – under occupation of large dwellings</li> <li>• Lack of range and choice of property types and tenure to meet demand</li> <li>• Potential conflict between housing development and other land uses e.g. open countryside, biodiversity, landscape, employment, retail etc.</li> </ul>  |
|        | Lack of local facilities | <ul style="list-style-type: none"> <li>• Residents need to travel outside the Vale for some types of health care</li> <li>• Lack of local retailing facilities e.g. shops, pubs, restaurants, cafes etc.</li> <li>• Lack of public open space (formal and informal, indoor and outdoor), pressure for development of existing sites</li> <li>• Lack of local employment opportunities</li> <li>• Lack of local facilities in new residential developments (e.g. Rhoose Point, Pencoedtre, Cogan Hall Farm etc.)</li> <li>• High level of outward movement and expenditure especially to Cardiff, e.g. services, retail spend, employment etc.,</li> <li>• Lack of burial land / crematoria within the Vale</li> <li>• Over capacity in schools and falling need / demand for school places in some areas – potential to lead to school closures</li> </ul> |
| SOCIAL | Access for all           | <ul style="list-style-type: none"> <li>• Lack of provision for special needs groups, especially mobility impaired e.g. ramps, lifts, hearing loop systems, signage etc. in public buildings, streetscape and new housing developments.</li> <li>• Ageing population, therefore more people affected by mobility issues</li> </ul>  |
|        | Deprivation              | <ul style="list-style-type: none"> <li>• Isolated areas of deprivation especially in Barry and Penarth:</li> <li>• Low economic activity (e.g. unemployed)</li> <li>• Low educational achievement (e.g. Gibbonsdown and Court)</li> <li>• Poor health (Barry, Penarth, St. Athan and St. Brides)</li> <li>• Income inequality – Gibbonsdown and Court wards average salaried approximately £22,000 less than Peterston-Super-Ely</li> </ul>  |
|        | Lack of Community spirit | <ul style="list-style-type: none"> <li>• Missed opportunity to work together as a community</li> <li>• Lack of community facilities</li> <li>• Lack of community ownership / responsibility</li> <li>• Lack of local identity, especially in new developments</li> <li>• Lower levels of crime than national average but high perception of crime</li> </ul>   |

Table 3: Key Sustainability issues for the Vale of Glamorgan

|             | Key Issue   | Identifying factors  |
|-------------|---|--|
| ENVIRONMENT | Climate change  | <ul style="list-style-type: none"> <li>• Causes: pollution (pockets of pollution in the eastern Vale) from traffic and industry, over-reliance on energy generated from fossil fuels, loss of woodlands and countryside, etc.</li> <li>• Consequences: increased risk of flooding, changes to farming practices (e.g. growing different crops), impact on biodiversity, economic impact, human lifestyle impact etc.</li> </ul>  |
| ENVIRONMENT | Waste   | <ul style="list-style-type: none"> <li>• Increased levels of municipal waste produced year on year</li> <li>• Lack of waste management / recycling facilities</li> <li>• Fly-tipping throughout the Vale of Glamorgan</li> </ul>   |
| ENVIRONMENT | Impact of development on built and natural environment    | <ul style="list-style-type: none"> <li>• Visual impact on open countryside / landscape / coast</li> <li>• Consequences for biodiversity, flora and fauna – Vale has a large number of statutory and non-statutory designated nature conservation sites</li> <li>• Loss of open spaces / recreation (urban and rural)</li> <li>• Impact on built environment and threat to cultural heritage</li> <li>• The majority of housing (60%) in recent years has been built on sustainable brownfield sites, but this is a dwindling resource</li> <li>• Long-term demand for minerals across the South Wales Region</li> <li>• Impact on water quality and water resources</li> </ul> |
| ENVIRONMENT | Quality of new development particularly residential       | <ul style="list-style-type: none"> <li>• Poor design – visually uninspiring without local distinctiveness (e.g. public art, finishing materials etc)</li> <li>• Lack of local community facilities</li> <li>• Estates designed for motorcars - poor permeability for pedestrians and lack of facilities for cyclists</li> <li>• Lack of off-street car parking</li> <li>• Missed potential for sustainable building design, drainage and materials</li> </ul>  |
| ENVIRONMENT | Degradation of cultural heritage and historic environment | <ul style="list-style-type: none"> <li>• Large number of historic buildings, designations and protected monuments</li> <li>• Insensitive new development damaging built environment</li> <li>• Proliferation of highway signs and modern infrastructure in historic towns e.g. Cowbridge.</li> <li>• Lack of funding to protect or enhance historic environment</li> <li>• Some neglect of listed buildings, conservation areas, ancient monuments etc.</li> <li>• Ignorance and complacency</li> <li>• Lack of cultural facilities e.g. theatres, museums, art galleries, public art, etc.</li> </ul>   |

Table 3: Key Sustainability issues for the Vale of Glamorgan

|         | Key Issue                   | Identifying factors  |
|---------|-----------------------------|--|
| ECONOMY | Transport and accessibility | <ul style="list-style-type: none"> <li>• Congestion at peak times on key routes to Cardiff</li> <li>• Inappropriate traffic management measures</li> <li>• General lack of parking (e.g. town centres, new housing developments etc)</li> <li>• Insufficient public transport (especially in rural Vale)</li> <li>• Lack of provision for cyclists and pedestrians</li> <li>• Lack of 'park and ride' and 'park and share' sites</li> <li>• Increased car ownership</li> <li>• Increased reliability on cars for access to goods and services</li> <li>• Increasing commuter distances to work</li> <li>• Environmental impact of vehicular traffic e.g. noise, emissions etc</li> <li>• Continued growth of air freight and passenger transport</li> <li>• Increase in total freight movements, but sustained decrease in rail freight</li> <li>• Access to MoD St Athan and Cardiff International Airport</li> </ul> |
| ECONOMY | Retail                      | <ul style="list-style-type: none"> <li>• Higher proportion of vacant units in Barry town centre than Cowbridge</li> <li>• Congestion, traffic and perceived lack of parking</li> <li>• Missed potential for an evening economy – potential for local jobs</li> <li>• Growth of out-of-town retail developments especially for food goods e.g. Culverhouse Cross, and in adjoining authorities - Cardiff Bay, Talbot Green.</li> <li>• Lack of suitable sites for bulky goods retailers within town centres</li> <li>• Infrequent public transport to Cowbridge town centre</li> </ul>  |
| ECONOMY | Employment                  | <ul style="list-style-type: none"> <li>• Limited employment opportunities within Vale</li> <li>• Pressure for development for alternative uses on employment sites e.g. retail, car parking, residential etc.</li> <li>• Reliance on travel to work by car</li> <li>• Existing industrial sites with insufficient infrastructure for HGVs and poor public transport links e.g. Llandow</li> <li>• Reliance on Cardiff / Bridgend for employment</li> <li>• Decline in traditional agricultural industry</li> <li>• Potential for increased home working</li> <li>• Rural diversification</li> </ul>  |

Table 3: Key Sustainability issues for the Vale of Glamorgan

|         | Key Issue | Identifying factors  |
|---------|-----------|--|
| ECONOMY | Tourism   | <ul style="list-style-type: none"> <li>• Predominance of residential development at Barry Waterfront, Penarth Marina and promenade - not enough mixed use development to encourage tourism</li> <li>• Lack of evening economy in Barry, especially Barry Island</li> <li>• Growth in tourism has potential to conflict with other land uses e.g. farming, biodiversity, landscape, coast etc.</li> <li>• Growth in farm diversification</li> <li>• Tourism uses generally accessed by car</li> </ul> |

### The Sustainability Appraisal Framework

2.29 The key sustainability issues identified for the Vale of Glamorgan and the objectives identified in the PPP review have been used as the basis for the sustainability objectives in the SA framework. In addition, the discussions held at the stakeholder workshops have been taken into account.

2.30 Table 4 shows the SA Objectives developed for the Vale of Glamorgan LDP. In accordance with the LDP Manual, the number of objectives has been kept to a manageable level, with a balance between social, environmental and economic (LDP Manual paragraph 5.6.5 refers). For clarity and ease of interpretation, each broad objective is accompanied by aims, which demonstrate the purpose of the objective in terms of the issues it seeks to address.

Table 4 Vale of Glamorgan Sustainability Appraisal Objectives & Aims

| 1. Housing                          |   |
|-------------------------------------|---|
| Origin                              | Objective   |
| Social<br>Environmental<br>Economic | <p><b>To provide the opportunity for people to meet their housing needs.</b></p> <p><u>Aims:</u></p> <ul style="list-style-type: none"> <li>• Provide a mix of dwelling types and tenure</li> <li>• Build in sustainable locations, with good access to local facilities</li> <li>• Provide affordable housing</li> <li>• Preference for previously developed land in sustainable locations</li> </ul>  |
| 2. Local Facilities                 |   |
| Origin                              | Objective   |
| Social<br>Economic                  | <p><b>To maintain, promote and enhance the range of local facilities.</b></p> <p><u>Aims:</u></p> <ul style="list-style-type: none"> <li>• Meet the needs of existing communities throughout the Vale of Glamorgan</li> <li>• Provide appropriate facilities within new developments to meet the needs of future users</li> <li>• Ensure local facilities are suitable for purpose and easily accessible</li> <li>• Prevent the loss of existing well-used and valued local facilities</li> </ul> |

**Table 4 (Contd.) Vale of Glamorgan Sustainability Appraisal Objectives & Aims**

| 3. Access for all                   |   |
|-------------------------------------|---|
| Origin                              | Objective   |
| Social<br>Environmental             | <p><b>To maintain and improve access for all.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Ensure the built and natural environment is easily accessible to all the Vale's community</li> <li>• Improve public perception of access</li> <li>• Benefit health and well being through social inclusion within the physical environment</li> <li>• Promote 'life-time' homes</li> </ul>   |
| 4. Deprivation                      |   |
| Origin                              | Objective   |
| Social<br>Economic                  | <p><b>Reduce the causes of deprivation.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.</li> <li>• Prevent the isolation of deprived communities</li> </ul>   |
| 5. Community Spirit                 |   |
| Origin                              | Objective   |
| Social                              | <p><b>To maintain, protect and enhance community spirit.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Reduce the fear of crime</li> <li>• Provide community facilities</li> <li>• Encourage local distinctiveness (e.g. development having regard to its context and public art)</li> <li>• Encourage community ownership of the environment (e.g. promote shared spaces, good design)</li> </ul>   |
| 6. Climate Change                   |   |
| Origin                              | Objective   |
| Social<br>Environmental<br>Economic | <p><b>To minimise the causes and manage the effects of climate change.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Reduce air pollution (e.g. transport / industry emissions)</li> <li>• Reduce energy consumption (e.g. promote energy efficient building)</li> <li>• Promote renewable energy generation</li> <li>• Reduce flood risk to people, property and maintain the integrity of floodplains</li> <li>• Protect biodiversity, flora and fauna from the effects of climate change</li> <li>• Protect and promote the development of carbon sinks.</li> </ul> |
| 7. Waste                            |   |
| Origin                              | Objective   |
| Environmental                       | <p><b>To minimise waste.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Promote the use of secondary resources (e.g. convert existing buildings/reuse materials)</li> <li>• Provide and promote recycling facilities.</li> <li>• Avoid landfill of waste</li> </ul>   |

**Table 4 (Contd.) Vale of Glamorgan Sustainability Appraisal Objectives & Aims**

| <b>8. Land use</b>                                    |   |
|---|---|
| <b>Origin</b>   | <b>Objective</b>  |
| Environmental   | <p><b>To use land effectively and efficiently.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Retain greenfield land</li> <li>• Bring previously developed land in sustainable locations back into use</li> <li>• Promote good quality high density developments where appropriate and having regard to the local context.</li> <li>• Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value.</li> <li>• Restore contaminated land to beneficial use.</li> </ul>                                  |
| <b>9. Environmental Assets</b>                        |   |
| <b>Origin</b>   | <b>Objective</b>  |
| Environmental   | <p><b>To protect and enhance the built and natural environment.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.</li> <li>• Improve and protect the quality and quantity of inland and coastal water resources.</li> <li>• Protect or enhance the built environment including historic buildings and conservation areas.</li> <li>• Protect cultural heritage and archaeology.</li> <li>• Enhance public access to and appreciation of the Vale's environmental assets.</li> </ul> |
| <b>10. Quality of new development</b>                 |   |
| <b>Origin</b>   | <b>Objective</b>  |
| Social<br>Environmental                               | <p><b>To provide a high quality environment within all new developments.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Ensure development meets the needs of current and future users.</li> <li>• Promote a sense of community pride (e.g. shared spaces, public art, local materials)</li> <li>• Promote sustainable design and construction solutions.</li> <li>• Enhance access for cyclists and pedestrians.</li> <li>• Provide adequate green spaces.</li> <li>• Provide adequate vehicular parking and manoeuvring space.</li> </ul>   |
| <b>11. Cultural heritage and historic environment</b> |   |
| <b>Origin</b>   | <b>Objective</b>  |
| Social<br>Environmental                               | <p><b>To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Protect and enhance existing cultural heritage and historic environments</li> <li>• Promote new opportunities for culture in the Vale</li> </ul>  |

**Table 4 (Contd.) Vale of Glamorgan Sustainability Appraisal Objectives & Aims**

| <b>12. Transport and accessibility</b> |  |
|--|--|
| <b>Origin</b>                          | <b>Objective</b>   |
| Social<br>Environmental<br>Economic    | <p><b>To reduce the need to travel and enable the use of more sustainable modes of transport.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Ensure new development is located in accessible locations from a range of travel modes</li> <li>• Promote technologies to reduce need to travel (e.g. home working)</li> <li>• Enable the movement of people and freight by sustainable means</li> <li>• Provide and maintain effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</li> </ul> |
| <b>13. Employment</b>                  |  |
| <b>Origin</b>                          | <b>Objective</b>   |
| Social<br>Economic                     | <p><b>To provide for a diverse range of local job opportunities.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Protect existing and potential employment sites for employment uses</li> <li>• Support a culture of entrepreneurship</li> <li>• Encourage a range employment sites in locations accessible by a range of transport modes</li> <li>• Support the enhancement of skills to meet employment needs</li> <li>• Promote and enable sustainable rural diversification</li> </ul>  |
| <b>14. Retail</b>                      |  |
| <b>Origin</b>                          | <b>Objective</b>   |
| Economic                               | <p><b>To maintain and enhance the vitality and viability of the Vale's town, district and local centres.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Ensure retail centres are accessible by a range of modes of transport</li> <li>• Ensure a range of uses within retail centres</li> <li>• Avoid out-of-town retail development</li> <li>• Enhance the public realm within existing centres and facilitate regeneration programmes</li> <li>• Promote the evening economy in the Vale's town centres</li> </ul>  |
| <b>15. Tourism</b>                     |  |
| <b>Origin</b>                          | <b>Objective</b>   |
| Economic                               | <p><b>To promote appropriate tourism.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>• Promote local economic growth through tourism</li> <li>• Enable tourism uses to be accessed by sustainable travel modes</li> <li>• Manage tourism to protect the Vale's natural and built assets</li> <li>• Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)</li> <li>• Enable specialist tourism (e.g. sustainable, sports, cultural etc).</li> </ul>  |

2.31 To satisfy the requirements of the SEA Directive, as transposed into the SEA Regulations (Schedule 2), the SA objectives should have regard to each of the issues outlined below. Table 5 shows which objectives relate to each issue, and it illustrates that in each case a number of objectives relate to the same SEA issue.

| <b>SEA Directive Issue</b> | <b>Relevant SA Objectives</b>                     |
|----------------------------|---|
| a) Biodiversity            | 6, 8, 9, 10, 12, 15                               |
| b) Population*             | 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 13, 14, 15    |
| c) Human Health            | 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 12, 13, 14, 15    |
| d) Fauna                   | 6, 7, 8, 9, 10, 15                                |
| e) Flora                   | 6, 7, 8, 9, 10, 15                                |
| f) Soil                    | 6, 7, 8, 9,                                       |
| g) Water                   | 6, 9, 15  |
| h) Air                     | 6, 9, 12  |
| i) Climatic factors        | 6, 7, 8, 9, 10, 12                                |
| j) Material Assets*        | 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 |
| k) Cultural heritage       | 2, 3, 5, 8, 9, 10, 11, 14, 15                     |
| l) Landscape               | 6, 7, 8, 9, 11, 12, 15                            |

\*These terms are not clearly defined by the SEA Directive.

2.32 Undertaking the Sustainability Appraisal of the emerging Local Development Plan involved appraising the Preferred Strategy and the subsequent Deposit Plan against the SA Framework. For each option/policy, a matrix is used. Within the matrix, a 'score' is assigned for each sustainability objective using the key shown in Table 6 below. This score is accompanied by commentary, evidence and references as appropriate setting out the justification for the score. The scores and commentary are then used to identify opportunities to reduce conflicts with sustainability objectives, and increase the progression of more sustainable outcomes.

|            |   |
|------------|---|
| <b>++</b>  | Strongly contributes to the achievement of the SA objective   |
| <b>+</b>   | Contributes to the achievement of the SA objective  |
| <b>0</b>   | There is no clear relationship with the achievement of the SA objective or the relationship is negligible                             |
| <b>-</b>   | Detracts from the achievement of the SA objective   |
| <b>--</b>  | Strongly detracts from the achievement of the SA objective  |
| <b>+/-</b> | Both contributes and detracts from the achievement of the SA objective  |
| <b>?</b>   | Is dependent on the way in which the aspect is managed. Sufficient information may be unavailable to enable an assessment to be made. |

### 3. Pre-Deposit Stage-Sustainability Appraisal of the Vale of Glamorgan Preferred Strategy (2007)

- 3.1. A Sustainability Appraisal incorporating Strategic Environmental Assessment was carried out on the Draft Preferred Strategy for The Vale of Glamorgan in 2007. This section summarises the key findings from the process. The full report (Vale of Glamorgan LDP Initial Sustainability Appraisal report 2007) can be viewed at [www.valeofglamorgan.gov.uk](http://www.valeofglamorgan.gov.uk) as well as within Appendix 7.

#### SA of LDP Vision

- 3.2 The overall aim of the Vale of Glamorgan LDP is derived from the Council's Community Plan Vision. The LDP vision for the Vale of Glamorgan is a place:

*"That is safe, clean and attractive, where individuals and communities have sustainable opportunities to improve their health, learning and skills, prosperity and wellbeing and*

*Where there is a strong sense of community in which local groups and individuals have the capacity and incentive to make an effective contribution to the future sustainability of the area."*

- 3.3 The Vision is an over arching and succinct statement, containing social, economic and environmental elements, a strategic overview of the sustainability implications of the draft Vision was undertaken and included within the LDP Initial Sustainability Appraisal Report 2007 (Appendix 7).
- 3.4 The SA highlights that the Visions' aspiration for people to be able to enjoy a high quality of life in a safe environment, providing opportunities to improve health, prosperity and well being for individuals and the wider community is strongly compatible with the key sustainability objectives for reducing the causes of deprivation and encouraging social inclusion (e.g. housing, local job opportunities and improving access). Similarly, the SA indicated a direct relationship with the SA objectives for maintaining, protecting and enhancing community spirit.
- 3.5 The appraisal identified a number of uncertain outcomes relating to the SA objectives for climate change and waste minimisation. This is considered inevitable given that the economic aspect of the vision would require new development to take place, thus involving increased use of natural resources and energy. Therefore, the SA suggested that further consideration of these issues should be undertaken in the development of the LDP strategic objectives and policies.

#### SA of the Strategic Objectives

- 3.6 The Preferred Strategy outlined 8 strategic objectives which set out the guiding principles of the Plan and were subject to detailed appraisal using the SA Framework.
- **Objective 1:** To ensure that development within the Vale of Glamorgan uses land both effectively and efficiently; and to promote the sustainable use and management of natural resources.

- **Objective 2:** To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of, and mitigating against the adverse effects of climate change.
- **Objective 3:** To provide the opportunity for people in the Vale of Glamorgan to meet their housing needs.
- **Objective 4:** To maintain, enhance and promote community facilities and services in the Vale of Glamorgan.
- **Objective 5:** To foster the development of a diverse and sustainable local economy that meets the needs of the Vale of Glamorgan and that of wider South East Wales Region.
- **Objective 6:** To reduce the need for Vale residents to travel to meet their daily needs and enabling them greater access to sustainable forms of transport.
- **Objective 7:** To protect and enhance the Vale of Glamorgan's historic, built, and natural environment.
- **Objective 8:** To sustain and further the development of sustainable communities within the Vale of Glamorgan, providing opportunities for living, learning, working and socialising for all.

3.7 The appraisal of the LDP objectives sought to test their compatibility against the SA objectives, thereby identifying any potential conflict or omission between both sets of objectives. The appraisal matrices (see table 6 below) revealed that the objectives are broadly consistent with the sustainability objectives. In some instance, however, the appraisal indicated a level of uncertainty (annotated with a '?') in relation to outcomes, as these were dependent on the nature and scale of development. Given the strategic nature of the policies it was considered acceptable for such uncertainties to be revealed at this stage of the SA appraisal, as it was anticipated that the level of uncertainty would be reduced as work on the LDP progressed, for example through the identification of site specific allocations, which would have regard to site specific issues.

3.8 In some instances, the appraisal did reveal areas of potential conflict (+/-) between the LDP objectives and the SA objectives. For example, the LDP objectives for housing and employment (3 and 5) conflicted with SA objectives for climate change and waste minimisation.

3.9 At this stage of the plan preparation, the appraisal also provided a valuable insight into the type and scope of policies within the LDP that would further support the cumulative benefits that the LDP objectives sought to provide. Policies that were identified included those that sought to reduce the potential effects relating to climate change, waste generation and protection of natural and built assets. The assessment is provided in Table 6 below.

Table 7: Compatibility of Key LDP Objectives with the SA Framework Objectives

| Key   |                       |     |  | SA OBJECTIVE | 1. To provide the opportunity for people to meet their housing needs | 2. To maintain, promote and enhance the range of local facilities | 3. To maintain and improve access for all | 4. Reduce the causes of deprivation | 5. To maintain, protect and enhance community spirit | 6. To minimise the causes and manage the effects of climate change | 7. To minimise waste | 8. To use land effectively and efficiently | 9. To protect and enhance the built and natural environment | 10. To provide a high quality environment within all new developments | 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage | 12. To reduce the need to travel and enable the use of more sustainable modes of transport | 13. To provide for a diverse range of local job opportunities | 14. To maintain and enhance the vitality and viability of the Vale's town, district and local area | 15. To promote appropriate tourism |
|---|-----------------------|-----|--|--------------|--|---|---|-------------------------------------|--|--|----------------------|--|---|---|---|--|---|--|------------------------------------|
| ++  | Major Positive Effect | --  | Major Negative Effect                        |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |
| +   | Positive Effect       | -   | Negative Effect                              |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |
| 0   | No Effect/ Neutral    | +/- | Positive or Negative Effect                  |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |
|   |                       | ?   | Uncertain effect – more information required |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |
| LDP Objective   |                       |     |  |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |
| 1: To ensure that development within the Vale of Glamorgan uses land both effectively and efficiently; and to promote the sustainable use and management of natural resources.        |                       |     |  | +/-          | +/-  | +   | +   | +                                   | ++   | ++   | ++                   | +  | +   | +   | +   | +  | +/-   | +/-  | 0                                  |
| 2: To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of, and mitigating against the adverse effects of climate change |                       |     |  | +/-          | 0  | 0   | 0   | 0                                   | ++   | ++   | ++                   | +  | +   | +   | ++  | +  | 0   | +  |                                    |
| 3: To provide the opportunity for people in the Vale of Glamorgan to meet their housing needs   |                       |     |  | ++           | ?  | 0   | +   | +                                   | +/-  | +/-  | +/-                  | +/-  | +/-   | 0   | +   | 0  | ?   | 0  |                                    |
| 4: To maintain, enhance and promote community facilities and services in the Vale of Glamorgan  |                       |     |  | 0            | ++   | +   | +   | +                                   | +  | +  | ?                    | +/-  | 0   | 0   | +   | +  | +   | +  |                                    |

**SA of Strategic Policies**

- 3.10 The Council's Draft Preferred Strategy included 12 strategic policies, which were subject to detailed sustainability appraisal using the SA Framework. The detailed assessment matrices are included within the LDP Initial Sustainability Appraisal Report, December 2007 (Appendix 7), and the main findings are summarised below.

**CSP1: SUSTAINABLE DEVELOPMENT**

- 3.11 The policy was seen to inherently promote sustainable and accessible development and the promotion of development of brownfield land. However the appraisal highlighted that opportunities for sustainable development may be less in rural settlements than in urban areas where opportunities for brownfield development is greater. It was also commented that enhancements and improvements to transport facilities had the potential to reduce isolation and improve access to facilities in deprived areas. The assessment also noted that encouraging mixed-use development could lead to a concentration of development in particular areas which could potentially increase air pollution in these areas. Whilst promoting reduction in waste, it was noted that the policy did not specifically promote recycling facilities. The policy was also judged for not directly referring to the sustainable movement of freight. It was also considered that the policy would benefit from a definition of what was meant by social and economic well being.

**CSP2: CLIMATE CHANGE**

- 3.12 Overall, the SA highlighted positive outcomes in respect of a requirement for sustainable design measures to be incorporated within new developments. However the SA noted that the policy did not specifically address climate change in relation to greenhouse gas emissions as a result of access to new developments, although this issue was addressed through other policies. The SA also highlighted that it was unclear as to the extent of the role that this policy would play in protecting natural assets such as biodiversity, flora and fauna, wildlife habitats landscape and soil against the effects of climate change.

**CSP3: RENEWABLE ENERGY**

- 3.13 The SA noted that the policy sought to reduce future energy demand rather than overall energy consumption. The promotion of renewable energy generation was seen as potentially having a negative impact on the built and natural environments, although this could be addressed through other policies in the plan, notably CSP1 (Climate Change) and CSP9 (Built Environment). Encouraging generation of power and heat from renewable sources such as biomass would promote farm diversification as by products/waste are made available for energy generation.

**CSP4: HOUSING NEED**

- 3.14 The SA highlighted that the policy would allow for housing development in a number of locations across the Vale of Glamorgan and as a consequence would allow for a mix of dwelling types and tenure to be provided in sustainable locations and positively

assist in meeting the needs of existing communities. The policy was seen as not directly supporting the retention of Greenfield development; however the policy did encourage the reuse of vacant dwellings and buildings and in this respect scored positively against the SA objective. It was also highlighted that housing could have a negative impact in terms of meeting the objectives for protecting biodiversity and the historic environment, and suggested that mitigation would be required through detailed policies in the LDP and through the site selection process.

**CSP5: AFFORDABLE HOUSING**

- 3.15 The SA highlighted that the policy scored positively in respect of the SA objectives for meeting housing needs and the provision of community facilities but it was unclear at this stage as to how the policy would assist in reducing the causes of deprivation, especially for isolated communities.

**CSP6: PLANNING OBLIGATIONS**

- 3.16 The SA highlighted that the policy would bring about the delivery of a range of community services and facilities alongside new developments. However it noted that the provision would be dependent on new development taking place and would therefore not necessarily provide new facilities in areas of actual need but rather in locations where development occurred. It was recommended that the proposal could be improved through the inclusion of reference to lifetime homes.

**CSP7: RETAILING**

- 3.17 The SA highlighted that the securing a wide range of uses within retail centres would support a number of the SA objectives including providing good access to services and facilities. However, the appraisal noted that the performance of the policy could be improved through clarifying how the vitality, viability and attractiveness of retail centres would be safeguarded.

**CSP8: EMPLOYMENT**

- 3.18 The SA highlighted potential conflict between the provision of employment land and the housing objectives for promoting the re-use of brownfield land, which could encourage the redevelopment of existing employment sites for housing.

**CSP9: MINERALS**

- 3.19 The SA highlighted potential conflict between the extraction and transportation of minerals and addressing climate change within the plan. It was also noted that the extraction of minerals could have a significant adverse affect on the natural environment, which would need to be mitigated at the local level. It was however acknowledged that other policies seek to ensure that the natural environment is protected.

**CSP10 BUILT AND NATURAL ENVIRONMENT**

- 3.20 The SA did not reveal any issues associated with this policy.

### **CSP11: STRATEGIC TRANSPORT IMPROVEMENTS**

- 3.21 The SA noted that the provision of transport would positively assist the sustainability aims of meeting the needs of existing communities, assist the economic and social needs of deprived areas and prevent isolation. However, the SA noted that the large transport infrastructure schemes could have a major impact on those communities affected by those projects.

### **CSP12: SUSTAINABLE WASTE MANAGEMENT**

- 3.22 The SA highlighted that the policy did not explicitly promote new waste facilities to be easily accessible by a range of transport modes.
- 3.23 All of the strategic policies received an average neutral or positive sustainability score and recommendations were provided to further improve the sustainability rating of individual policies as summarised above. The SA also highlighted areas where some policies were in conflict with a number of the environmental SA objectives, in particular those relating to the use of resources, climate change, energy efficiency and protection of the natural environment. In terms of the compatibility of the policies with the social and economic objectives of the SA, the strategic policies scored positively particularly those relating to housing, employment, strategic transport and community facilities.
- 3.24 The results of the SA of the initially drafted strategic policies have been taken forward by the Council in the development of revised Strategic Policies that feature in the Deposit LDP and furthered by criteria based policies set out within the Managing Development and Managing Growth Sections of the LDP. The SA appraisal of these policies is provided at section 5 of this report.

### **SA of Spatial Strategy Options**

- 3.24 Originally the Council identified six spatial strategy options for the Vale of Glamorgan LDP. Following consultation with key stakeholders through stakeholder workshops (Appendices 4 and 5) a further three options were put forward, with a further option promoted following pre-deposit consultation on the Draft Preferred LDP Strategy during January and February 2008. In total 10 spatial strategy options have been considered and appraised as part of the LDP preparation as follows:

#### **Council Strategy Options**

**Option1:** Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy – the business as usual scenario).

**Option 2a:** Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).

**Option 2b:** Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).

**Option 3:** Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).

**Option 4:** A rural new settlement able to promote sustainable self – containment.

**Option 5:** Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development

#### **Stakeholder Hybrid Options**

**Option 6:** A hybrid of option 1 and Option 4: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.

**Option 7:** A hybrid of options 2b and 5. Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test. (Based on current populations)

**Option 8:** A hybrid of options 5 and 4. Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

#### **Post Pre Deposit Consultation Option**

**Option 8a:** (Combination of option 5 and a new rural settlement at Llandow): Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement at Llandow known as Llandow Newydd) to accommodate further housing and associated development.

3.25 Full details of the appraisal of the options are provided within the LDP Sustainability Appraisal – Options Appraisal Report (November 2007) at Appendix 6 and within the LDP Sustainability Appraisal – Revised Options Appraisal Report (March 2009) at Appendix 9. The November 2007 Options Appraisal Report relates to the appraisal of options 1-9 and was undertaken by Hyder Consultants. The March 2009 Revised Options Appraisal Report relates to the appraisal of all 10 options and was undertaken by the Council and it is this appraisal that is summarised below:

3.26 For **Options 1, 2b, 5 and 7** the SA identified that spatially these would result in positive outcomes for both urban and rural areas, with Options 5 and 7 performing the strongest. Whilst the appraisal indicates that Option 5 and 7 also had the potential for providing mixed benefits in both rural and urban areas, it was considered that a combination of policy measures and the candidate site assessment stage would assist in mitigating potentially negative outcomes and also enhancing further positive outcomes identified.

- 3.27 For **Option 2a**, the SA highlighted that some benefits for both urban and rural areas would be realised, but the effectiveness of the options would be limited in both areas, and could also give rise to negative outcomes in the rural Vale. It was considered that this mixed effect was primarily due to the approach of allocating new development on a pro rata basis within all settlements according to current populations. The cumulative effects of this approach would take the form of limited benefits being realised in most settlements and additional pressures being placed on existing services in rural areas. In addition there would be reduced opportunities to address social and economic issues where they arise, as well as an increase in the need to travel, all of which would be difficult to address through the policy measures identified.
- 3.28 For **Option 3**, the SA indicated that as a result of development being concentrated primarily within the larger settlements in the rural Vale, this would produce the least favourable outcome against the SA objectives for urban areas. As with option 2a, mitigation through policy intervention would have limited impact on the overall performance against the SA objectives, especially in relation to addressing economic and social disparities and affordable housing need that exists in the urban south eastern Vale of Glamorgan.
- 3.29 **Options 4, 6, 8 and 8a** all included a new settlement either wholly or as part of the options considered. For these options the SA highlighted that option 4, would lead to the least overall benefit in both rural and urban areas due to the concentration of all development within a new settlement. Similar negative outcomes were also identified for Option 6, and whilst this revealed some improved outcomes over option 4 for the urban settlements, these benefits would diminish over the plan period as development opportunities in these settlements reduced, limiting the influence of mitigation measures. The identification of a new rural settlement at Llandow (Llandow Newydd) within option 8a allowed the appraisal to consider more site specific issues that resulted in the appraisal identifying more mixed benefits and negative outcomes with the rural Vale. However common to all options involving a new settlement, was the limited ability to address outcomes through mitigation due to the relationship between the location of a new settlement and the ability to provide equal benefits across the area, including reduced opportunities for new development opportunities to address issues where they exist.
- 3.30 From the results of all Options appraised, in combination with the sustainability issues identified at the scoping stage of the SA, and the wider spatial planning policy framework such as that contained within Planning Policy Wales, Technical Advice Notes and the Wales Spatial Plan, the Council considered Option 5 to be the most appropriate spatial option for the Vale of Glamorgan.

## 4. SUSTAINABILITY APPRAISAL OF THE DEPOSIT VALE OF GLAMORGAN LDP

### Introduction

- 4.1 The Deposit Plan is the next stage in the production of the Vale of Glamorgan Local Development Plan and follows the 'consultation undertaken in January and February 2008 on the Draft Preferred Strategy and the Initial Sustainability Appraisal Report. A Sustainability Appraisal incorporating SEA has been carried out on the emerging Deposit Local Development Plan.
- 4.2 In order to satisfy the requirement to undertake the Sustainability Appraisal of the LDP, all of the policy content of the LDP needs to be assessed. Consequently, as work on the LDP has progressed between the pre deposit Draft Preferred Strategy and Deposit Plan stages, it has been necessary to re-assess those elements of Deposit Plan which were originally assessed as part of the Council's Initial Sustainability Appraisal (ISA) Report (December 2007), contained at Appendix 7, but have subsequently been subject to changes.
- 4.3 The following sections include an updated SA of changes made to the LDP Strategy, Strategic Objectives and Strategic Policies. In addition the Managing Development and Managing Growth sections as well as the site allocations contained within the Deposit Plan have been subject to Sustainability Appraisal.

### SA of the LDP Strategy

- 4.4 The Council's Draft Preferred Strategy as set out in the LDP Draft Preferred Strategy paper (December 2007) was:
- "To concentrate development opportunities in Barry and the South East Zone. The St Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development"*
- 4.5 That Strategy has been carried forward and forms the basis of the Deposit LDP. The wording has however been amended slightly to accurately reflect the content of the above paper and to take into account the strategic role of Cardiff Airport.
- 4.6 In this regard, paragraph 14.2 of the LDP Draft preferred Strategy paper (December 2007) referred to plans for the development of St Athan and the synergy with plans to expand Cardiff International Airport (as it was referred to at this time) as follows:
- 'Similarly as a result of major investment planned at RAF St Athan, the St Athan area has also been identified as an area of opportunity, the focus of development being aimed at capitalising on economic development opportunities arising from this and future expansion plans at Cardiff International Airport'.*
- 4.7 The role of the Airport was also an issue that was raised during the consultation on the Draft Preferred Strategy during January and February 2008, and the Cabinet Meeting of 3rd February, 2010, considered this issue when a report was presented to allow a

Consideration of Progress on the Local Development Plan and Consideration of Consultation Responses on the Draft Preferred Strategy and Initial Sustainability Appraisal Report. The following is an extract from that report.

29. It was recommended that consideration be given to the inclusion of a policy on Cardiff International Airport. The addition of a reference to the Airport Access Road (AAR) in Core Strategic Policy 11 was also suggested. It is proposed that the Deposit Draft Plan will contain more detail on the role of the Airport during the plan period and the need to improve access to the Airport .
30. On 15th July 2009 the WAG announced that it is not planning to provide improved surface access to Cardiff International Airport. It intends to focus its resources on making better use of the existing surface accesses, including improvements to Five Mile Lane. The WAG also intends to improve the frequency of bus services to Cardiff International Airport and upgrade the train service at Rhoose from hourly to half hourly. This train service links to Cardiff International Airport with a short bus service. All these initiatives have synergies with the DPS which is focussed around the development of Barry and St. Athan, and the need to provide for a range of choice of travel options'.

- 4.8 As a consequence, the Airport was a key component of the Strategy, although not expressed as such in the actual Strategy description or statement, and the decision has been made to include reference to the strategic importance of the Airport within the Strategy description, as follows:

*'To promote development opportunities in Barry and the South East Zone. The St Athan area to be a key development opportunity and Cardiff Airport to be a focus for transport and employment investment. Other sustainable settlements to accommodate further housing and associated development'*

- 4.9 This amendment to the strategy description is a more accurate reflection and expression of the previously adopted Draft Preferred Strategy and as a consequence, does not necessitate a further Sustainability Appraisal, over and above that already undertaken for the Draft Preferred Strategy. In any event, the strategic allocations at the Airport have been subject to SA given that Policy SP2 indicates the provision of a Strategic Site at the Airport, which is also referred to within Policy SP5 and SP, all of which have been subjected to SA.

#### **SA of Revised Strategic Objectives**

- 4.10 The Draft Preferred Strategy originally contained 8 strategic objectives. Subsequent amendments during the production of the Deposit Plan have seen further objectives relating to Retailing (new Objective 6) and Tourism (new Objective 9) being added to the Plan. As a result the LDP includes the following 10 strategic objectives that set out the guiding principles of the Plan:

**Objective 1 (Previously Objective 8):** To sustain and further the development of sustainable communities within the Vale of Glamorgan, providing opportunities for living, learning, working and socialising for all.

**Objective 2 (Previously Objective 2):** To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of, and mitigating the adverse effects of climate change.

**Objective 3 (Previously Objective 6):** To reduce the need for Vale residents to travel to meet their daily needs and enabling them greater access to sustainable forms of transport.

**Objective 4 (Previously Objective 7):** To protect and enhance the Vale of Glamorgan's historic, built, and natural environment.

**Objective 5 (Previously Objective 4):** To maintain, enhance and promote community facilities and services in the Vale of Glamorgan.

**Objective 6 (New Objective):** To reinforce the vitality, viability and attractiveness of the Vale of Glamorgan's district, local and neighbourhood shopping centres.

**Objective 7 (Previously Objective 3):** To provide the opportunity for people in the Vale of Glamorgan to meet their housing needs.

**Objective 8 (Previously Objective 5):** To foster the development of a diverse and sustainable local economy that meets the needs of the Vale of Glamorgan and that of wider South East Wales Region.

**Objective 9 (New Objective):** To create an attractive tourism destination with a positive image for the Vale of Glamorgan, encouraging sustainable development and quality facilities to enrich the experience for visitors and residents

**Objective 10 (Previously Objective 1):** To ensure that development within the Vale of Glamorgan uses land both effectively and efficiently; and to promote the sustainable use and management of natural resources.

**Key findings of the SA of the Strategic LDP Objectives.**

- 4.11 The Sustainability Appraisal of the LDP objectives sought to test their compatibility against the SA objectives, thereby identifying any potential conflict or omission between both sets of objectives. The appraisal matrices (see table 8 below) revealed that the objectives are broadly consistent with the sustainability objectives. Nevertheless, in some instances the appraisal indicated a level of uncertainty (?) in relation to outcomes, as these outcomes would be dependent on the specific nature and scale of development.
- 4.12 As previously identified, the appraisal did, in certain cases, reveal areas of potential conflict (+/-) between the LDP objectives and the SA objectives. For example, the LDP objectives for housing and employment (former objectives 3 and 5) conflicted with SA objectives for climate change and waste minimisation. The appraisal also indicated the potential for other LDP objectives to offset these potential conflicts, such as the former objectives 2 and 9 (climate change and waste management). The addition of an objective specifically on sustainable tourism is seen to strengthen local employment

opportunities and provide support for local services and facilities. Consequently, when taken cumulatively, the SA appraisal of the LDP objectives indicate that they are generally compatible, with any potential conflicts between certain objectives being offset by other objectives.

Table 8: Compatibility of Key LDP Objectives with the SA Framework Objectives

| Key   |                             | SA OBJECTIVE | 1. To provide the opportunity for people to meet their housing needs | 2. To maintain, promote and enhance the range of local facilities | 3. To maintain and improve access for all | 4. Reduce the causes of deprivation | 5. To maintain, protect and enhance community spirit | 6. To minimise the causes and manage the effects of climate change | 7. To minimise waste | 8. To use land effectively and efficiently | 9. To protect and enhance the built and natural environment | 10. To provide a high quality environment within all new developments | 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage | 12. To reduce the need to travel and enable the use of more sustainable modes of transport | 13. To provide for a diverse range of local job opportunities | 14. To maintain and enhance the vitality and viability of the Vale's town, district and local centres. | 15. To promote appropriate tourism |    |
|---|-----------------------------|--------------|--|---|---|-------------------------------------|--|--|----------------------|--|---|---|---|--|---|--|------------------------------------|----|
| ++  | Major Positive Effect       |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |    |
| +   | Positive Effect             |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |    |
| +/-   | Positive or Negative Effect |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |    |
| 0   | No Effect/ Neutral          |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |    |
| -   | Negative Effect             |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |    |
| ---   | Major Negative Effect       |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |    |
| 1: To sustain and further the development of sustainable communities within the Vale of Glamorgan, providing opportunities for living, learning, working and socialising for all.     |                             |              | +  | +   | +   | +                                   | ++   | +/-  | ?                    | +  | +   | +   | +   | +  | +   | +  | +                                  | +  |
| 2: To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of, and mitigating against the adverse effects of climate change |                             |              | +/-  | 0   | 0   | 0                                   | 0  | ++   | ++                   | ++   | +   | +   | +   | ++   | +   | 0  | +                                  | +  |
| 3: To reduce the need for Vale residents to travel to meet their daily needs and enabling them greater access to sustainable forms of transport.                                      |                             |              | 0  | +   | +   | ++                                  | +  | ++   | 0                    | +  | +   | 0   | 0   | ++   | 0   | +  | +                                  | 0  |
| 4: To protect and enhance the Vale of Glamorgan's historic, built, and natural environment.   |                             |              | +/-  | +/-   | +   | 0                                   | +  | +/-  | 0                    | ++   | ++  | +   | ++  | 0  | 0   | +  | ++                                 | ++ |
| 5: To maintain, enhance and promote community facilities and services in the Vale of Glamorgan  |                             |              | 0  | ++  | +   | +                                   | +  | +  | ?                    | +/-  | 0   | 0   | +   | +  | +   | +  | +                                  | +  |
| 6: To reinforce the vitality, viability and attractiveness of the Vale of Glamorgan's district, local and neighbourhood shopping centres  |                             |              | 0  | ++  | ++  | +                                   | +  | +/-  | -                    | +  | +/-   | 0   | 0   | ++   | +   | ++   | +                                  | +  |
| 7: To provide the opportunity for people in the Vale of Glamorgan to meet their housing needs   |                             |              | ++   | ?   | 0   | +                                   | +  | +/-  | +/-                  | +/-  | +/-   | +/-   | 0   | +  | 0   | ?  | 0                                  | 0  |
| 8: To foster the development of a diverse and sustainable local economy that meets the needs of the Vale of Glamorgan and that of wider South East Wales Region.                      |                             |              | 0  | 0   | 0   | ++                                  | +  | +/-  | +/-                  | +/-  | +/-   | +/-   | 0   | +  | ++  | +  | +                                  | +  |

| Key  |                             | SA OBJECTIVE | 1. To provide the opportunity for people to meet their housing needs | 2. To maintain, promote and enhance the range of local facilities | 3. To maintain and improve access for all | 4. Reduce the causes of deprivation | 5. To maintain, protect and enhance community spirit | 6. To minimise the causes and manage the effects of climate change | 7. To minimise waste | 8. To use land effectively and efficiently | 9. To protect and enhance the built and natural environment | 10. To provide a high quality environment within all new developments | 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage | 12. To reduce the need to travel and enable the use of more sustainable modes of transport | 13. To provide for a diverse range of local job opportunities | 14. To maintain and enhance the vitality and viability of the Vale's town, district and local centres. | 15. To promote appropriate tourism |  |
|--|-----------------------------|--------------|--|---|---|-------------------------------------|--|--|----------------------|--|---|---|---|--|---|--|------------------------------------|--|
| ++   | Major Positive Effect       |              |  |   |   |                                     |  |  |                      |  |   |   |   |  |   |  |                                    |  |

| 9: To create an attractive tourism destination with a positive image for the Vale of Glamorgan, encouraging sustainable development and quality facilities to enrich the experience for visitors and residents |                             | 0            | ++   | 0   | +   | +/-                                 | +/-  | +/-  | +/-                  | ++   | +/-   | ++  | +/-   | ++   | ++  | ++   |                                    |  |
| 10: To ensure that development within the Vale of Glamorgan uses land both effectively and efficiently; and to promote the sustainable use and management of natural resources.                                |                             | +/-          | +/-  | +   | +   | +                                   | ++   | ++   | ++                   | +  | +   | +   | +   | +/-  | +/-   | 0  |                                    |  |

### SA of Deposit Plan Strategic Policies

- 4.13 The Deposit LDP includes 11 strategic policies, which have been subject to detailed sustainability appraisal using the SA Framework. It should be noted that the Draft Preferred Strategy contained 12 strategic policies and as a result of the consultation on the Draft Preferred Strategy a number of policies have been either amended or replaced by new policies. Consequently for completeness all 11 Strategic LDP Policies have been reappraised and the main findings are summarised below, and a full record of the appraisal provided at Appendix 10. Changes to the policies in light of the SA are provided at Table 9.

#### POLICY SP1- THE STRATEGY

- 4.15 The SA indicates that the policy realises very positive effects overall. The strong positive effects reflect the strong emphasis towards regeneration, tourism development and focussing development at sustainable locations. A number of negative effects identified relate to climate change and environmental protection issues, which often go hand in hand with development based regeneration policies. The positive nature of the policy is backed up by the absence of any major negative effects that would normally be expected from climate change impacts. However mitigation from sustainable transport (to a certain degree) and secondary effects of protecting Greenfield land by focussing on brownfield, within-settlement development has modified the overall effect.
- 4.16 The SA recommended a number of amendments that would improve the sustainability performance of the policy, namely, the promotion of sustainable transport, the development of brownfield sites and restoration of contaminated land, and the protection and enhancement of built and natural assets.

#### POLICY SP2- STRATEGIC SITES

- 4.17 The SA indicates that overall the policy realises positive effects. However the policy also realises major negative effects associated with climate change issues, as well as a number of other potentially negative effects. This reflects the nature of the policy, which addresses the development of two markedly differing settlements; the Barry redevelopment seeking to regenerate the historic built environment whilst the St Athan development seeking to build on the existing aerospace specialisation and using greenfield development to bolster employment and housing supply.
- 4.18 Many of the anticipated effects are tempered by the differences between the settlements and their proposed development. It is highly likely that, if the settlements were addressed independently, the anticipated effects would be more striking, both positively and negatively. However, given that the purpose of the SEA/SA is to ensure environmental considerations are taken into account in decision-making, the strategic approach of offsetting effects from differing policies (or settlements) is appropriate for determining the strategic effects of the plan.
- 4.19 The SA recommended that the performance of the policy could be improved through the inclusion of measures to protect the maritime environment.

### **POLICY SP3 - RESIDENTIAL REQUIREMENT**

- 4.20 The SA highlighted that as a policy promoting development (housing in this instance) it would be normally be expected that the effects would show a balance of positives and negatives as a result of the competing economic and environmental factors. Accordingly the SA revealed a number of major negative effects associated with climate change, waste and negatives resulting from Greenfield development associated with the allocated development at St Athan. Conversely the development of Barry Waterfront, with its significant brownfield development will realise economic and environmental positives. On balance, the assessment concluded that the positive effects slightly outweigh the negatives, and taken as a whole the policy was considered to be produce neutral effects overall.
- 4.21 No changes to the policy were recommended as a consequence of the appraisal.

### **POLICY SP4 - AFFORDABLE HOUSING PROVISION**

- 4.22 The SA noted that the policy addresses the numbers of affordable units to be provided, but does not provide any spatial direction to where the affordable housing will be provided. It was also noted that the Reasoned Justification identifies that Registered Social Landlords can develop sites that lie outside settlement boundaries without stating any restrictions. Given this, the only assumption that can be made for the assessment is that the policy allows affordable housing development anywhere in the county borough.
- 4.23 As a result the SA revealed a number of major negative effects, particularly those associated with the SA objectives for Climate Change, Waste Management, and the effective and efficient use of land. Additionally, the appraisal realised a number of unknown affects, as the impact would be dependent on the location of the affordable housing to be provided through the Plan. Despite this, the SA noted that it would not be inappropriate to assume that given affordable housing has strong links to volume house building it would as a result be developed largely in areas where market housing would take place.
- 4.25 On the basis of the above, the SA recommended a number of changes to enhance the sustainability performance of the policy. Namely;
- Directly address the spatial distribution of affordable housing. It is recommended that the policy and/or Reasoned Justification include simple cross-referencing to other policies (especially the general housing policy CSP3) and address how affordable housing is delivered through (and therefore in the same locations as) general volume building. In addition, whilst the Reasoned Justification sets out the areas of highest need, it fails to link the need to delivery. A simple reference to this would resolve the issue.
  - The statement in paragraph 5.36 relating to Registered Social Landlords building outside settlement limits raises significant issues in SEA/SA terms, particularly when there is no acknowledgement to restrictions being applied. It is recommended that the Reasoned Justification be reworded, referencing an

exceptions policy that includes appropriate criteria to ensure that delivery is sustainable.

- Climate change is a particular concern in this policy, particularly as it realises significantly more negative effects than the general housing policy CSP3. Whilst it may be repetitive, it is concluded that it is worth including references to:
- Social housing being generally built to higher environmental standards than general housing
- Promoting sustainable construction
- Potential for local renewable energy generation.

#### **POLICY SP5 - EMPLOYMENT REQUIREMENTS**

4.26 The SA of the policy highlighted that the policy realised positive effects in respect of objectives for social and economic factors, including addressing deprivation and promoting accessibility, with secondary affects realised through protecting the countryside by focussing development onto specific sites and areas. Conversely the appraisal highlighted negative impacts associated with Climate Change and Waste Management, whilst noting that is to be expected from a policy that seeks to promote economic and employment growth.

4.27 Overall the SA highlighted that the policy is likely to deliver positive outcomes and with other policies in the plan, realise a strongly positive effects. On this basis the SA did not recommend changes to the policy, but suggested that the supporting Reasoned Justification make reference to policies elsewhere in the plan that support rural diversification.

#### **POLICY SP6 - RETAIL**

4.28 The SA of the policy highlighted that the policy was in general positive reflecting the focus of development in accessible and sustainable locations in support of objectives for Climate Change. A number of negative effects were identified in relation to the generation of waste. It was also noted that the policy did not directly address protection of built heritage in relation to concentrating retail development in existing retail centres.

4.29 Consequently, the appraisal indicated that the policy could be strengthened by addressing the issue of protection and enhancement of the built environment, in seeking to maximise reuse of existing buildings, and the promotion of new retail development.

#### **POLICY SP7 - TRANSPORTATION**

4.30 The SA of the policy highlighted that the policy realised strong positive effects associated with the provision of transport infrastructure and the associated benefits derived from increasing accessibility.

4.31 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY SP8 - SUSTAINABLE WASTE MANAGEMENT**

4.32 The SA of the policy highlighted that the policy overall realised neutral impacts largely due to the policy being associated with a specific land use and therefore not directly of relevance to many of the SA objectives.

4.33 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY SP9 - MINERALS**

4.34 The SA of the policy highlighted that the policy generally scored neutrally against the SA objectives, with positive outcomes realised in respect of the protection of land and promoting the sustainable use of minerals and secondary aggregates.

4.35 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY SP10 - BUILT ENVIRONMENT**

4.36 The SA of the policy highlighted that the policy scored positively in respect of environmental factors directly associated with the policy, but also noted that this may result in negative outcomes for economic factors resulting from the protection of the built environment assets. However, the appraisal also noted positives for the local economy in relation to tourism as a result of the built heritage.

4.37 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY SP11 - TOURISM AND LEISURE**

4.39 The SA of the policy highlighted that the policy scored positively in respect of social and economic factors, realising a number of positive effects associated with the expansion of rural based tourism and the secondary effects associated with the impact on natural and built environment assets as well as increasing the need to travel. Notwithstanding this, the SA concluded that the policy realises an overall neutral assessment.

4.40 No changes to the policy were recommended as a consequence of the appraisal.

**Incorporation of the Sustainability Appraisal of the Strategic Policies into the Deposit LDP**

4.41 The following table summarises the key SA recommendations in respect of the Strategic Policies and where recommended changes have been incorporated into the Deposit LDP.

Table 9 SA Recommended Changes to Strategic Policies

| Policy | SE/SA Recommendations  | Responses and Changes to LDP  |
|--------|--|---|
| SP1    | <p>1. The policy promotes sustainable transport <b>solely for the purposes of reducing congestion</b>. Amending the policy to reflect the promotion of sustainable transport as a principle, with particular proposals aimed at addressing specific congestion issues, would realise greater positive effects.</p> <p>2. The policy promotes the regeneration of Barry as a cornerstone of the LDP, but <b>does not address either brownfield development or restoring contaminated land to beneficial use</b>, both of which would realise significantly positive effects.</p> <p>3. Policy only seeks the positive management of built and natural assets. Addressing their protection and enhancement would realise significant positive effects.</p> | <p>1. Noted. Delete "to reduce congestion" from criteria 4.</p> <p>2. Noted. This issue is covered in Policy MD 1(6) – "makes beneficial use of previously developed land and buildings." No change.</p> <p>3. Noted. Delete "Providing positive management of" from criteria 5 and replace with "Protecting and enhancing..."</p>  |
| SP2    | <p>1. The policy promotes development at Barry waterfront that could lead to significant adverse impacts upon the maritime environment. Addressing the issue of the protection of the Maritime environment would realise greater positive effects in terms of flood risk, water quality and, potentially, climate change issues.</p>   | <p>1. Noted. Add the following sentence to the end of paragraph 7.18: "In line with the Vision, proposals will also be required to have regard to its maritime context and where appropriate, protect and enhance the marine environment."</p>  |
| SP4    | <p>1. The policy only addresses the required level of provision of affordable housing. The policy should address the spatial delivery of affordable housing as well.</p> <p>2. The Reasoned Justification does not qualify the issue of RSLs being able to develop anywhere (outside settlement boundaries).</p> <p>3. There are three Objective sets (6 - Climate Change, 7 - Waste Management</p>  | <p>1. Noted. Paragraph 5.43 amended to reflect concerns. Reference to policies MG1, MG2, MG5 and MG6 added.</p> <p>2. Noted. Paragraph 5.44 amended to read: "In order to assist in the provision of affordable residential units, Policy MD 7 will provide a framework which allows for the development of affordable housing in sustainable locations outside the settlement boundaries of the towns and villages identified in the LDP settlement hierarchy."</p> <p>3. Add the following sentence to the end of paragraph 5.43: "The council will</p> |

**Table 9 SA Recommended Changes to Strategic Policies**

| <b>Policy</b> | <b>SEA/SA Recommendations</b>  | <b>Responses and Changes to LDP</b>  |
|---------------|--|--|
|               | <p>and 8 - Efficient and effective Use of Land) that are realising highly negative effects. Addressing the relevant issues for these could significantly reduce the negative effects.</p> <p>4. There are two objective sets (9 - Protect and Enhance Built and Natural Environment, 14 - Vitality/Viability of Centres) that realise significant unclear effects. Addressing the relevant issues for these could realise more positive effects.</p> | <p>expect the provision of new affordable housing to be constructed to Welsh Quality Housing Standards and include measures for managing the reduction of energy use through construction and occupation."</p> <p>4. Disagree. Policy SP4 provides a framework for the delivery of affordable housing in the Vale of Glamorgan as a whole. Issues of site specific delivery are addressed in policies MG2, MG6 and MD7 as well as the Delivery and Implementation section of the Plan.</p> |
| SP6           | 1. Policy could be bolstered by reference to protection and enhancement of the built heritage in maximising reuse of existing buildings and new development.   | 1. Noted. The issue is addressed in the Policy and supporting text.  |
| CSP11         | 1. The policy is heavily biased toward the promotion of tourism at the expense of protecting the existing tourism and, to a lesser extent, natural assets. A positive and direct reference to ensuring that new tourism development does not adversely impact the existing tourism asset would realise positive effects.   | 1. Noted. Policy SP11(3) amended to read "protect existing tourism assets and promote ..."   |
| CSP Overall   | <p>1. A policy addressing the issues of climate change is included in the Core Strategic Policies.</p> <p>2. A policy addressing sustainable construction, reuse of existing buildings and use of secondary and recycled materials be included within the policy framework.</p> <p>3. The protection of high-grade agricultural land be included within the plan, preferably within the policy framework to provide formal policy backing.</p>       | <p>1. Noted. This issue is addressed in national planning guidance. Sustainable development is addressed through a number of policies in the Plan.</p> <p>2. Policy MD 1 criteria 6 amended to read "Promotes sustainable construction and makes beneficial use of previously developed land and buildings."</p> <p>3. Noted but this is contained in national planning guidance.</p>  |

### Sustainability Appraisal - Managing Development Policies

4.42 The Deposit LDP contains 13 criteria based Managing Development Policies. These policies seek to provide detailed guidance on specific issues associated with all forms of development. A summary of the SA of the Managing Development policies is provided below, and a full record of the appraisal provided at Appendix 11. Changes to the policies in light of the SA are provided at Table 10.

**POLICY MD1: LOCATION OF DEVELOPMENT**

- 4.43 The SA of the policy highlighted that the policy is principally a policy for controlling the location of development and therefore generally realised a high number of positive effects. A similar number of +/- effects were realised due to the diverse range of aims of promoting development and protecting the built and natural environment and those associated with climate change and minimisation of waste.
- 4.44 As a result the SA did not recommend changes to the policy, but suggested clarification be provided in the Reasoned Justification in respect of "equine facilities" as well as how proposed development related to existing infrastructure.

**POLICY MD2: PLACE MAKING**

- 4.45 The SA of the policy highlighted that the policy overall realises positive effects with only a relatively small number of negative effects being recorded. These negative effects were associated with the potential constraints placed on development in relation to promoting sustainable design and creating a sense of place.
- 4.46 As a result the SA did not recommend changes to the policy, but suggested clarification be provided in the Reasoned Justification in respect of whether development will be required to meet all the criteria contained within the policy and whether the policy would only be relevant in the "urban environment" as implied by the Reasoned Justification.

**POLICY MD3: DESIGN OF NEW DEVELOPMENT**

- 4.47 The SA of the policy highlighted that the policy overall realises a high number of significant positive effects, and only one negative affect associated with the efficient use of land due to the potential impacts of such development locally. Notwithstanding this, the SA recommended that criteria 8 be worded so that new development would minimise the causes of climate change, rather than as worded. i.e. "contribute towards tackling climate change"

**POLICY MD4: COMMUNITY INFRASTRUCTURE AND PLANNING OBLIGATIONS**

- 4.48 The SA of the policy highlighted that the policy overall realises a high number of significant positive effects due to it being a policy that seeks to deliver a wide range of infrastructure to support the principle of sustainable development.
- 4.49 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD5: ENVIRONMENTAL PROTECTION**

- 4.50 The SA of the policy highlighted that as a result of the policy having a very specific focus, the policy realised a high number of neutral affects due to the policy not being directly relevant to many of the SA objectives, and where directly relevant, positive outcomes were realised.

4.51 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD6: PROMOTING BIODIVERSITY**

4.52 The SA of the policy highlighted that overall, the policy would realise slightly positive effects. This was due to the competing interests of a policy that seeks protection of the environment and associated benefits for the environment and climate change with the wider economic SA objectives.

4.53 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD7: AFFORDABLE HOUSING IN RURAL AREAS**

4.54 The SA of the policy highlighted that the policy could result in a high number of negative affects as it allows for the provision of affordable housing to take place outside settlement boundaries in Minor Rural Settlements. The negative affects identified were those associated with SA Objectives on Sustainable Transport, protection and enhancement of built environment, protecting countryside/greenfield land and delivering high quality development.

4.55 Conversely, the policy also realised a number of positive effects associated with the SA objectives for affordable housing provision, rural diversification, community spirit and address deprivation; highlighting that the policy is geared specifically towards addressing social factors.

4.56 On the basis of the appraisal, the SA recommended that cross references to other policies within the LDP be made within the Reasoned Justification so as to clarify how the competing interests highlighted by the SA are to be resolved in the implementation of the policy.

**POLICY MD8: CONVERSION AND RENOVATION OF RURAL BUILDINGS**

4.57 The SA of the policy highlighted that the policy realised a number of negative effects largely due to the isolated locations of most rural buildings within the Vale of Glamorgan, and therefore performed poorly against the SA objectives associated with sustainable transport and climate change. Conversely, the policy was shown to realise positive outcomes in respect of enhancing the built environment and promoting tourism and rural diversification. Overall, the SA concluded that on balance the policy performed positively against the SA objectives.

4.58 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD9: REPLACEMENT DWELLINGS IN THE COUNTRYSIDE**

4.59 The SA of the policy highlighted that the policy realised overall neutral effects, reflecting the specific nature of the policy not being directly relevant to many of the SA objectives, and where directly relevant positive outcomes were realised.

- 4.60 Overall, the SA concluded that on balance the policy performed neutrally against the SA objectives. However, the SA noted that the policy as worded allowed for the extension of the existing residential curtilage, and as such recommended that the policy be amended to restrict such development

**POLICY MD10: TOURISM AND LEISURE**

- 4.61 The SA of the policy highlighted that the policy realised a high number of +/- due to the mixed approach of allowing new tourism developments within both identified settlements and rural locations, such as that in association with rural diversification schemes. It was concluded that this could create tensions between the SA objectives for promoting development in sustainable locations and rural diversification. Notwithstanding this, the SA indicated that the policy realised a significant number of major positive effects associated with the promotion of tourism development that were considered to outweigh the negative affects.
- 4.62 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD11: EMPLOYMENT LAND AND PREMISES**

- 4.63 The SA of the policy highlighted that the policy scored highly in respect of the social and economic SA objectives and a number of negative outcomes associated with new development and SA objectives for climate change, waste management and sustainable transport. The SA concluded that the policy would on balance realise overall neutral effects.
- 4.64 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD12: GYPSY AND TRAVELLER ACCOMMODATION**

- 4.65 The SA of the policy highlighted that the policy overall would realise neutral effect. This was due to the negative affects relating to the SA objectives for protection of the natural environment, promoting local distinctiveness and promoting high quality development being offset by the provision of housing, addressing the causes of deprivation and promoting development in sustainable locations
- 4.66 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MD13: LOW CARBON AND RENEWABLE ENERGY GENERATION**

- 4.67 The SA of the policy highlighted that the policy would overall realise major positive effects as a result of the inclusion of "non unacceptable impact" within the policy. However, the SA recommended that this phrase be amended to "no adverse impact" in order to provide a degree of flexibility.

**Incorporation of the Sustainability Appraisal of the Managing Development Policies into the Deposit LDP**

4.68 Table 10 summarises the key SA recommendations in respect of the Managing Development Policies and where recommended changes have been incorporated into the Deposit LDP.

| <b>Table 10 SA Recommended Changes to Managing Development Policies</b> |  |  |
|---|--|--|
| <b>Policy</b>   | <b>SEA/SA Recommendations</b>  | <b>Responses and Changes to LDP</b>  |
| MD1 - Location of New Development                                       | <p>1. Despite the positive nature of the policy, the policy itself is difficult to interpret, as it does not set out how the criteria within the policy apply, i.e. does a development proposal have to satisfy all of them, some of them, and if so which are optional. Without this direction on how to implement the policy there is no method of resolving conflict between the Criteria, i.e. brownfield land can be of high ecological value, which could realise conflict between Criterion 8 and Criterion 9. Similarly farm development in the rural Vale is not going to support the objectives of the South Eastern Zone. For assessment purposes it was assumed that development would be required to satisfy all criteria. The policy would benefit from direction on how the policy is to be applied.</p> <p>2. The term "EQUINE FACILITIES" in Criterion 3 is not defined and so it is unclear whether the policy is seeking to promote commercial horse related activities (e.g. pony trekking, breeding stables) or whether it seeks to proliferate individual provision for pet horses and horse culture. This should be clarified.</p> <p>3. Criterion 6 supports development that "benefits" from existing infrastructure provision. The meaning of this is unclear. For assessment purposes it was assumed that this meant that proposed development would not compromise or overload existing infrastructure or would provide compensatory provision. The policy would benefit from clarification of this criterion.</p> | <p>1. Development proposals should aim to meet as many of the criteria as possible, although it is accepted that there will be instances where conflicts arise between criteria. Criterion 1 "Supports the objectives of the south east zone" has been deleted to reflect the strategy as a whole. Criterion 3 has also been amended for clarification purposes " In the case of residential development ..."</p> <p>2. Having considered the remarks it is considered that the reference to equine facilities is superfluous in any event as it is covered by the terms new enterprises and leisure. Accordingly, this has now been removed from the policy.</p> <p>3. Agree – add reference to impact on existing Infrastructure in paragraph 6.2.</p> |
| MD2 - Place Making  | <p>1. The policy and the Reasoned Justification do not accord on the scope of the policy, i.e. the policy sets out it applies in all cases, the RJ only</p>  | <p>1. Noted. Policy relates to existing towns and villages - change 'urban environment'</p>  |

Table 10 SA Recommended Changes to Managing Development Policies

| Policy                                 | SEA/SA Recommendations  | Responses and Changes to LDP   |
|--|---|--|
|  | <p>relevant to “urban environment”. The policy would benefit from a change that would address this issue.</p> <p>2. The policy is a list of criteria, but the policy does not set out whether one, some, or all, criteria need to be satisfied. In addition there is no guidance on how conflict between criteria is to be considered.</p>  | <p>to ‘local environment’ in paragraph 6.5.</p> <p>2. Noted. The word ‘and’ has been added between criteria 8 and 9. The Council acknowledges that not all criteria will be relevant e.g. criteria 4 &amp; 6. Conflicts between criteria will need to be considered during the planning application process on a case by case basis.</p>                                     |
| <p>MD3 – Design of New Development</p> | <p>1. Criterion 8 requires development to make a positive contribution toward tackling climate change, whilst most new development (housing, employment retail etc.) would only increase the causes of climate change. It may be more appropriate for the criterion to address the issue of a development minimising the causes of climate change related to that development, rather than seeking an overall reduction. The second part of the Criterion could also play a significant part in that, wherever possible, provision to facilitate the adaptation to climate change could also be secured. It is recommended that the criterion be reviewed in light of this.</p> | <p>1. Agree – Amend criterion 8 to read ‘They minimise the causes of climate change and incorporate renewable and low carbon energy use features’.</p>   |
| <p>MD5 – Environmental Protection</p>  | <p>1. The Policy is contradictory. The Policy, in the first paragraph, seeks to ensure that the development can demonstrate that it will not result in unacceptable impacts. However, the second paragraph of the policy sets out what may be requires where proposals do have unacceptable impacts. As such it would be difficult to implement the policy. It is recommended that the Policy be amended to provide consistency.</p>  | <p>1. Noted. Second part of policy amended to read: “Where impacts are identified the Council will require applicants to demonstrate that appropriate measures can be taken to minimise the impact identified to an acceptable level. Planning conditions may be imposed or legal obligation entered into, to secure any necessary mitigation and monitoring processes.”</p> |
| <p>MD6 – Promoting Biodiversity</p>    | <p>1. The policy and the Reasoned Justification do not accord on the scope of the policy, i.e. the policy sets out it applies in all cases, the RJ only relevant to “urban environment”. The policy would benefit from a change that would address this</p>   | <p>1. Applies in all cases. The Council disagrees that the reasoned justification is only relevant to the urban environment.</p>   |

Table 10 SA Recommended Changes to Managing Development Policies

| Policy   | SEA/SA Recommendations  | Responses and Changes to LDP  |
|--|---|---|
|  | <p>issue.</p> <p>2. The policy is a list of criteria, but the policy does not set out whether one, some, or all, criteria need to be satisfied. In addition there is no guidance on how conflict between criteria is to be considered.</p>  | <p>2. Both criteria need to be satisfied (see word and) - enhance biodiversity by doing (ii). Policy acknowledges what is required if negative impacts are identified. Further clarification to be provided in Biodiversity SPG.</p>  |
| <p>MD7 – Affordable Housing in Rural Areas</p> | <p>1. The policy would benefit from amendment to include, or cross reference to, factors that will be taken into account in considering the appropriateness of the proposed location for affordable housing development, and how conflicting issues will be addressed.</p>  | <p>1, Criteria sets out factors to be considered when assessing such proposals. Proposals would need to satisfy all of the criteria- word 'and' added. Criterion 5 is a key part of policy. Plan needs to be read as a whole- there are other policies on scale, form, impact on environment.</p> |
| <p>MD9 – Replacement Dwellings in the</p>      | <p>1. The policy and Reasoned Justification are contradictory. The policy requires proposals to satisfy both Criterion 2 and Criterion 3, but the Reasoned Justification identifies that proposals need satisfy only one of the criteria. The Policy and Reasoned justification should be amended to ensure they are compatible.</p> <p>2. The policy does not require that the replacement dwelling be built on the same footprint as the previous building (there would be exceptions for those buildings that are constrained from appropriate extension). This could result in buildings being removed and being relocated a significant distance from their original position and incorporating land that was originally outside the curtilage of the existing dwelling. The policy would benefit from addressing the location of the replacement dwelling within the site.</p> <p>3. The policy does not address the issue of curtilages. If a dwelling is relocated outside the original curtilage (as outlined in 2 above), a new residential curtilage would need to be identified which could significantly increase the extent of residential curtilage. The policy would benefit from</p> | <p>1. Disagree</p> <p>2. Disagree- may be cases where changing the position of a dwelling may be favourable i.e. a positive change. This matter should be assessed on a case by case basis.</p> <p>3. New criteria added on residential curtilage</p>   |

**Table 10 SA Recommended Changes to Managing Development Policies**

| Policy  | SEA/SA Recommendations  | Responses and Changes to LDP  |
|---|---|---|
|   | addressing this issue and the potential adverse impacts this may cause.   |   |
| MD13 – Low Carbon & Renewable Energy Generation | <p>1. The policy sets out a non-exhaustive list of energy generation methods covered by the policy. By including a specified list there is potential that methods not included on the list will be treated more negatively than those that are included. In order to ensure that all methods of low carbon and renewable energy generation are considered consistently and fairly, it would be better to omit the list from the policy text and, if appropriate, the various methods can be set out and considered in the reasoned justification.</p> <p>2. The policy requires that proposals have no adverse impact upon a range of factors if they are to be permitted. Proposals for all forms of low carbon and renewable energy generation will have an adverse impact upon one or more of the factors. It would be better if the policy qualifies the level of adverse impact to introduce an element of flexibility, which could be realised by simply substituting the term “unacceptable impact” for “no adverse impact”</p> <p>3. The policy does not address the issue of using mitigation to overcome adverse impacts. Its inclusion in the policy would provide a further element of flexibility.</p> | <p>1. Agree. Amend policy accordingly. At the same time additional criteria has been added to the policy to take account of the potential impacts on electrical, radio or other communications due to the existence of Cardiff Airport and RAF St Athan</p> <p>2. Agree. Amend “unacceptable impact” to “no adverse impact”.</p> <p>3. Agree. Amend paragraph 6.55 accordingly.</p> |

**Sustainability Appraisal - Managing Growth Policies**

4.69 The Deposit LDP contains 29 Managing Growth Policies, which are a combination of site allocation policies and criteria based policies. A summary of the SA of the Managing Growth policies is provided below, and a full record of the appraisal provided at **Appendix 12**. Changes to the policies in light of the SA are provided at Table 11.

**POLICY MG1: HOUSING SUPPLY IN THE VALE OF GLAMORGAN**

4.70 The SA of the policy highlighted that the policy would realise a large number of positive effects associated with the economic and social SA objectives including those relating housing provision, addressing community needs and deprivation. The significant positive scoring is associated with the location of allocated sites, which form the consideration of the SA for this policy. Notwithstanding this, the policy identified a number of negative effects associated with impact of development on climate change, which the SA noted would always be realised for such a policy. Other negatives were

associated with the potential for windfall sites to take place on Greenfield sites and also for a number of allocated sites to similarly be located on greenfield sites.

- 4.71 Overall the assessment concluded that the policy would realise both positive and negative affects which when considered in relation to other policies in the LDP (notably MD1- Location of Development) would limit the negative effects identified. On this basis the SA considered the policy to be neutral overall.
- 4.72 No changes to the policy were recommended as a consequence of the appraisal.

#### **POLICY MG2: HOUSING ALLOCATIONS**

- 4.73 As with Policy MG1: Housing Supply within the Vale of Glamorgan, the SA highlighted that the policy would realise a large number of positive effects associated with the economic and social SA objectives including those relating to housing provision, addressing community needs and deprivation. The high occurrence of positive score is associated with the location of allocated sites which form the consideration of the SA for this policy. Notwithstanding this, the policy identified a number of negative effects associated with impact of development on climate change, which the SA noted would always be realised for such a policy. Other negatives were associated with the potential for windfall sites to take place on Greenfield sites and potential secondary affects relating to flooding and loss of biodiversity.
- 4.74 Overall the assessment concluded that the policy would realise both positive and negative affects, especially when considered in relation to other policies in the LDP. The proposed phasing of sites across the plan period, which gives preference to the released of brownfield sites in the early stages of the plan was also seen as a significant factor.
- 4.75 No changes to the policy were recommended as a consequence of the appraisal.

#### **POLICY MG3: STRATEGIC SITE AT BARRY WATERFRONT**

- 4.76 Due to the site specific nature of the policy, the SA highlighted that the policy would realise significant positive benefits as a result of mixed use redevelopment on brownfield land, the sustainable location of the proposal, meeting housing needs, the provision of community facilities and addressing deprivation. Overall the assessment concluded that the policy is considered to be highly positive, realising significant sustainability benefits.
- 4.77 No changes to the policy were recommended as a consequence of the appraisal

#### **POLICY MG4: STRATEGIC SITE AT ST ATHAN**

- 4.78 The SA of the policy highlighted that the policy would realise a high number of negative effects associated with the SA objectives associated with sustainable transport, protection of the natural environment and climate change. The SA noted that these negative affects are a result of a significant level of development being located in and around a small scale settlement that is not presently served by high levels of public transport. Conversely, the SA highlighted major positive effects associated with the

proposed housing and employment, which is the purpose of the policy. This highlighted the social and economic bias of the policy.

- 4.79 Notwithstanding this, the SA recognised the role of other policies within the LDP which seek to mitigate the negative effects identified, and recommended that the Reasoned Justification for this policy be amended to reflect the other requirements in the policy framework, which would assist in realising a more positive assessment.

#### **POLICY MG5: AFFORDABLE HOUSING**

- 4.80 The SA of the policy highlighted that the policy would realise a high number of major positives associated with the provision of affordable housing and SA objectives associated with social elements which the plan seeks to address, notably meeting the housing need and deprivation. However, the SA also highlighted potential environmental impact associated with new developments and tensions between the provision of affordable housing and economic objectives. Generally, the SA concluded that on balance the policy is balanced in its effects and is considered to be neutral

- 4.81 No changes to the policy were recommended as a consequence of the appraisal

#### **POLICY MG6: RESIDENTIAL DEVELOPMENT IN KEY, SERVICE AND PRIMARY SETTLEMENTS**

- 4.82 The SA of the policy highlighted that the policy would realise major positives as it seeks to direct new development to settlements considered to be the most sustainable in terms of accessibility to services and facilities, scoring well against the a broad range of social, economic and environmental SA objectives. The appraisal also noted potential negative impacts associated with other uses with could be located outside of the settlements within the hierarchy, noting out of town retailing and employment as such examples.

- 4.83 On the basis of the appraisal it was considered that the policy was overall positive, but it was recommended that the policy makes reference for new development to accord with the role and function of the settlement within which it is located.

#### **POLICY MG7: RESIDENTIAL DEVELOPMENT WITHIN MINOR RURAL SETTLEMENTS**

- 4.84 The SA of the policy highlighted that the policy would realise slightly less positive results than identified in the appraisal of Policy MG6 (Residential Development in Key, Service and Primary Settlements) due to the absence of settlement boundaries, thereby allowing greater flexibility in the implementation of the policy. Additionally, it was noted that minor rural settlements do not contain the level of services and facilities as those other settlements featured elsewhere in the hierarchy.

- 4.85 The key issue raised by the appraisal was the potential for flexibility in the implementation of the policy which could result in inappropriate development, and as such the policy as worded was considered to be negative overall. Consequently, the appraisal recommended that the policy be worded more definitely and strongly so as to remove potential ambiguities in its interpretation and implementation.

**POLICY MG8: HOUSING DENSITIES**

- 4.86 The SA of the policy highlighted that overall the policy would realise a neutral effect.
- 4.87 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG9: GYPSY AND TRAVELLER SITE**

- 4.88 The SA of the policy highlighted that the policy overall would realise neutral effect. This was due to the negative affects relating to the SA objectives for protection of the natural environment, promoting local distinctiveness and promoting high quality development being offset by the provision of housing, addressing the causes of deprivation and promoting development in sustainable locations Notwithstanding this, the levels of gypsy and traveller accommodation identified within the LDP was considered to relatively low thereby realising an overall neutral effect.
- 4.89 No changes to the policy were recommended as a consequence of the appraisal

**POLICY MG10: PROVISION OF EDUCATIONAL FACILITIES**

- 4.90 The SA of the policy highlighted that overall the policy would realise a neutral effect.
- 4.91 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG: 11 LLANDOUGH HOSPITAL**

- 4.92 The SA of the policy highlighted that overall the policy would realise a neutral effect.
- 4.93 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG12: EMPLOYMENT ALLOCATIONS**

- 4.94 The SA of the policy highlighted that overall the policy would realise a neutral effect.
- 4.95 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG13: STRATEGIC SITE ADJACENT TO CARDIFF AIRPORT AND PORT ROAD RHOOSE**

- 4.96 The SA of the policy highlighted that overall the policy would realise a neutral effect. This was based on the assumption that the associated rail link would be provided within the mid part of the plan period thereby mitigating potential negative effects identified within the assessment.
- 4.97 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG14: RURAL ENTERPRISE**

- 4.98 The SA of the policy highlighted that overall the policy would realise a neutral effect.

4.99 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG15: REPLACEMENT CATTLE MARKET**

4.100 The SA of the policy highlighted that overall the policy would realise a neutral effect.

4.101 No changes to the policy were recommended as a consequence of the appraisal

**POLICY MG16: RETAIL ALLOCATIONS**

4.102 The SA of the policy highlighted that the policy would realise major positives across a range of economic, social and environmental objectives, which was largely as a result of the location of the retail allocations set out in the policy.

4.103 No changes to the policy were recommended as a consequence of the appraisal

**POLICY MG17: RETAIL HIERARCHY**

4.104 The SA of the policy highlighted that overall the policy would realise a neutral effect.

4.105 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG18: NON A1 RETAIL USES WITHIN TOWN AND DISTRICT RETAIL CENTRES**

4.106 The SA of the policy highlighted that the policy realised positive effects across a broad range of SA objectives these including retail provision, effective and efficient use of land, accessibility, design, protection of built environment/heritage and culture, deprivation, community spirit and provision of facilities. For areas where the policy scored either neutrally or negatively the SA noted that these were as a result of the policy seeking to address a specific use, for example the policy realised negative scores for objectives relating to housing provision.

4.107 Consequently, the appraisal concluded that the effect of the policy to be neutral overall with no recommended changes to the policy. However, the SA recommended that the Reasoned Justification would benefit from clarification on "over concentration" referred to in the policy.

**POLICY MG19: NON A1 RETAIL USES WITHIN LOCAL AND NEIGHBOURHOOD SHOPPING CENTRES**

4.108 The SA of the policy highlighted that the policy performed positively in relation to a number of SA objectives, namely retail provision and the effective, efficient use of land, addressing causes of deprivation and the provision of facilities. For areas where the policy scored either neutrally or negatively the SA noted that these were as a result of the policy seeking to address a specific use, for example the policy realised negative scores for objectives relating to housing provision.

- 4.109 Consequently, the appraisal concluded that the effect of the policy to neutral overall with no recommended changes to the policy. However, the SA recommended that the policy could split into a policy relating to local retail centres and a separate policy for neighbourhood retail centres, and an explanation as to where the “other areas” cited in the policy related to. Additionally it was recommended that the Reasoned Justification would benefit from clarification on “over concentration”, where referred to in the policy.

#### **POLICY MG20: TRANSPORT PROPOSALS**

- 4.110 The SA of the policy highlighted that the policy performed positively in relation to a number of SA objectives, namely improving accessibility, providing effective infrastructure and providing facilities, and also realised 57 single positive effects across a range of economic, social and environmental factors. Where negative effects were identified these related to the potential loss of greenfield land as a result of new transport infrastructure. Despite these factors the assessment considered the policy to be overall positive.
- 4.111 No changes to the policy were recommended as a consequence of the appraisal.

#### **POLICY MG21: SPECIAL LANDSCAPE AREAS**

- 4.112 The SA of the policy highlighted that the policy performed positively across a broad range of SA objectives, and only a small number negative effects associated with renewable energy generation. Also given the specific nature of the policy, a high number of neutral scores were also realised and as such the SA concluded that on balance the policy would realise a neutral effect.
- 4.113 No changes to the policy were recommended as a consequence of the appraisal, however it was recommended that the Reasoned Justification be amended to read “new development must not detract from the special qualities”

#### **POLICY MG22: GREEN WEDGES**

- 4.114 The SA of the policy highlighted that the policy performed positively across a broad range of SA objectives including retention of greenfield land, protection of the natural environment and the beneficial effects on community spirit as a result of maintaining well known settlement boundaries. However, given the specific nature of the policy, a high number of neutral scores were also realised and as such the SA concluded that on balance the policy overall the policy would realise a neutral effect.
- 4.115 No changes to the policy were recommended as a consequence of the appraisal

#### **POLICY MG23: SITES OF IMPORTANCE FOR NATURE CONSERVATION**

- 4.116 The SA of the policy highlighted that the policy performed positively in relation to the SA objectives including protection of Greenfield land and the natural environment, access and community facilities. A small number of negative effects were identified relating to the potential for the policy to restrict housing and employment opportunities. However on balance the SA concluded that the policy would realise positive effects.

4.124 No changes to the policy were recommended as a consequence of the appraisal

**POLICY MG24: DEVELOPMENT IN MINERALS SAFEGUARDING AREAS**

4.117 The SA of the policy highlighted that the policy realised a high number of +/- due to the nature of the policy, for example on the one hand the policy safeguards land, but conversely allows for the winning of minerals. A number of negative affects were also identified, and related to the potential impact of the working of minerals resources.

4.118 The SA noted that whilst the assessment does realise more negatives than positives, many of the negative effects may not be realised within the plan period and therefore on balance concluded that overall the policy is considered to be neutral in effect.

**POLICY MG25: BUFFER ZONES**

4.119 The SA of the policy highlighted that the policy overall realised a high number of neutral effects, and only a small number of negative effects directly associated with the working of minerals. Consequently, the SA concluded that on balance the policy overall the policy would realise a neutral effect.

4.120 No changes to the policy were recommended as a consequence of the appraisal

**POLICY MG26: DORMANT MINERAL SITES**

4.121 The SA of the policy highlighted that overall the policy would realise a neutral effect.

4.122 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG27: GLAMORGAN HERITAGE COAST**

4.123 The SA of the policy highlighted that the policy performed positively in relation to the SA objectives for the character of the Vale of Glamorgan, heritage and the protection of the natural environment as well as a broader range of social factors. Negative effects identified related to the SA objectives for housing, employment and community facility provision and sustainable transport which emanated from the protectionist nature of the policy. The SA therefore concluded that the policy would realise positive effects overall.

4.124 Whilst no changes to the policy were recommended as a consequence of the appraisal, the SA did recommend that further clarification be provided on the types of development considered to be appropriate which within the Heritage Coast

**POLICY MG28: COSMESTON LAKES AND PORTHKERRY COUNTRY PARKS**

4.125 The SA of the policy highlighted that overall the policy would realise a neutral effect.

4.126 No changes to the policy were recommended as a consequence of the appraisal.

**POLICY MG29: TOURISM AND LEISURE FACILITIES IN BARRY**

4.127 The SA of the policy highlighted that the policy performed positively across a broad spectrum of social, economic and environmental objectives. It was also noted that as there are no firm development proposals for tourism development identified within the policy, and as such the policy also realised an equal number of neutral effects. Notwithstanding this, the SA concluded that on balance the policy would realise positive effects overall.

4.128 Whilst no changes to the policy were recommended as a consequence of the appraisal, the SA recommended that the Reasoned Justification would benefit from the inclusion of more detail on what is likely to comprise appropriate enabling development, which in turn could realise significantly more positive effects.

#### **Incorporation of the Sustainability Appraisal of the Managing Growth Policies into the Deposit LDP**

4.129 The following table summarises the key SA recommendations in respect of the Managing Growth Policies and where recommended changes have been incorporated into the Deposit LDP.

| <b>Policy</b>  | <b>SEA/SA Recommendations</b>   | <b>Responses and Changes to LDP</b>  |
|--|---|--|
| MG2 – Housing Allocations                                    | 1. The assessment process uses the precautionary approach and takes a worst-case scenario of effect where they are unclear. Increased certainty for this policy, through identifying whether the allocations are greenfield or brownfield, would be likely to realise more positive effects. Further consideration should be given to providing annotation on whether the site is Greenfield or brownfield.   | 1. Noted, However, information on Greenfield / brownfield status is provided in the Delivery and Implementation section of the Plan. No change required. |
| MG4 – Strategic Site at St. Athan Strategic Opportunity Area | 1. The Reasoned Justification identifies potential impacts upon local biodiversity and heritage factors but states that they can be mitigated so as to not preclude development. Other policies in the policy framework set out a no net loss, or even a net gain, requirement where adverse impacts are identified. The Reasoned Justification for this policy could be amended to reflect the other policies in the policy framework and this would realise a more positive assessment. | 1. Noted. Add reference to biodiversity in Delivery and Implementation Section of the Plan.  |
| MG6 – Residential Development in Key, Service Centre and     | 1. The hierarchy of settlements has been defined by the particular roles and functions that each settlement play in the overall picture. However, the policy makes no reference to this important   | 1. Noted. However, it is considered that this issue is addressed in criteria (iii).  |

Table 11 SA Recommended Changes to Managing Growth Policies

| Policy   | SEA/SA Recommendations   | Responses and Changes to LDP   |
|--|--|--|
| Primary Settlements  | factor. Consideration should be given to amending the policy to include a requirement for development to accord with the role and function of the settlement within which it is located  |  |
| MG7 – Residential Development Within Minor Rural Settlements           | 1. In the absence of defined settlement boundaries the policy needs to be worded very definitively and strongly to avoid potential difference in interpretation and to provide certainty. The Criteria are not written in a definitive manner and, as a result, introduces flexibility that could lead to significant negative environmental impacts. Rewording the criteria to be specific and definitive would remove much of this potentially harmful flexibility.  | 2. The absence of residential settlement boundaries in minor rural settlements seeks to encourage appropriate new development in these areas. However, it is considered that policy MG7 as worded together with other relevant policies in the plan will help to reduce the possibility of any negative environmental impacts occurring.   |
| MG8 – Housing Densities  | 1. The policy sets out the development density for residential development, but does not set out the background context of why the figures of 30 and 25 dwellings per hectare have been chosen. A nominal average density for residential development is generally accepted at 35 dwellings per hectare and, given that it is a government aim, and a SEA/SA aim in the assessment framework, to seek higher density development, the policy would benefit from the inclusion of background information explaining why the targets set represent high density development. | 1. Noted. This figure reflects past trends and the sensitive nature of much of the Vale of Glamorgan. Policy MG8 states a minimum of 30 net dwellings per hectare for the main towns and villages so in reality the density in these locations could be higher eg. Barry Waterfront. The following text has been added to the end of paragraph 7.39 to clarify “This reflects the sensitive nature of many rural villages and the character of existing built form.” |
| MG13 – Strategic Site Adjacent to Cardiff Airport and Port Road, Rhose | 1. The Employment, Transport allocations and the extension to Porthkerry Park have already been allocated under separate policies. This policy seeks to allocate them a second time, which is unnecessary and could lead to confusion.<br><br>2. The purpose of the policy is unclear. As outlined above the allocations are allocated under separate policies, and there is little, if any, evident cohesion between the different proposals. The Policy seeks to identify  | 1. Disagree. This is a strategic allocation and this policy brings together all the essential components of the allocation.<br><br>2. Amend paragraph 7.52 to state “The Strategic site includes the following elements ...”Add the following after first sentence of paragraph 7.51 “The site will be served by a new direct rail link,   |

Table 11 SA Recommended Changes to Managing Growth Policies

| Policy  | SEA/SA Recommendations  | Responses and Changes to LDP  |
|---|---|---|
|   | <p>a Strategic Site, but without an explanation of how the component parts work together to be a Strategic Site, the policy fails. Therefore the Reasoned Justification needs to set out, in detail, how the component parts relate to one another.</p> <p>3. The policy realises significant negative effects for climate change/transport related factors that are not offset by any appreciable positive effects. Consideration should be given to amending the Policy or the Reasoned Justification to address these issues and provide mitigation or offsetting benefits where possible.</p> | <p>which will provide passenger and freight services. In order to ensure the site fits within the fine landscape of the Vale of Glamorgan and promotes sustainability the site includes an extension to Porthkerry Country Park.</p> <p>3. Whilst the assessment in respect of climate change is noted, the proposal does include the provision of a direct rail link which has the potential to reduce car borne trips. In addition, the proposal includes a transport hub with the potential to provide for a park and ride and park and share, further reducing dependency on the private car. With reference to energy consumption, future proposals will need to be assessed against sustainability criteria and furthermore the proposals do suggest the provision of an energy centre to serve the development. This important element has now been incorporated in to the reasoned justification at paragraph 7.52.</p> |
| <p>MG17 – Retail Hierarchy</p>  | <p>1. The policy is an administrative action without any policy content. The policy context for the retail hierarchy is contained in the subsequent policy MG13 and MG14 and consideration should be given to the deletion of this policy and the incorporation of the retail hierarchy into the subsequent 2 policies.</p>   | <p>3. Whilst it is accepted that the policy as written sets a context for the retail policies that follow, it is important that this context is set through a managing growth policy to provide certainty and clarity.</p>  |
| <p>MG19 - Retail Uses Within Local and Neighbourhood Shopping Centres</p> | <p>1. The policy contains two policy statements, one that relates to Local Centres and one that relates to Neighbourhood Centres, with differing policy content. Given that the policy sets out different policy requirements for the different types of centre, the policy framework may benefit from splitting the two policy elements into separate policies, which could provide</p>  | <p>4. 1. Noted. However, the Council wishes the Policy to remain as drafted.</p> <p>2. Accepted and amended accordingly</p>   |

Table 11 SA Recommended Changes to Managing Growth Policies

| Policy                                   | SEA/SA Recommendations  | Responses and Changes to LDP  |
|--|---|---|
|  | <p>more clarity.</p> <p>2. The policy makes reference to an "<i>over concentration</i>" of non A1 retail uses in local retail centres. However the term is not defined in the policy or reasoned justification and therefore the term is unclear and ambiguous. The policy would benefit from amendment to provide more certainty over what is meant by "<i>over concentration</i>".</p> <p>3. The policy also makes reference to neighbourhood centres and "<i>other retail areas</i>". The retail hierarchy set out as Policy MG12 sets out Local Centres and Neighbourhood Centres and it is assumed they have a defined area. However the hierarchy makes no reference to "other retail areas" and, as such, it is assumed that they do not have identified boundaries. The policy would benefit from clarification what "other retail areas" are, where they stand in the hierarchy and how the policy is to be applied to them.</p> | <p>3. Agreed and amended accordingly</p>  |
| MG 26 – Dormant Mineral Sites            | <p>1. It is unclear what alternative uses would be acceptable for the sites. The policy would benefit from an amendment to the Reasoned Justification outlining what uses would be considered appropriate for the sites.</p>  | <p>1. No change required. Given the specific policy does not refer to alternative uses, there is no need for clarification. Any alternative proposals would need to be considered having regard to other policies in the Plan, on a site by site basis.</p> |
| MG27 – Glamorgan Heritage Coast          | <p>1. Criterion 3, as drafted, is very open, potentially allowing any development that might require a coastal location, irrespective of the potential damage it may cause. The Criterion would benefit from rewording to address appropriate coastal development that would not result in adverse impact to the Heritage Coast.</p>  | <p>1. Noted. Criterion 3 amended to read "other development for which a coastal location is essential". This is now – ties in with Policy MD10 (Tourism and Leisure).</p>   |
| MG23 – Tourism and Leisure Facilities in | <p>1. The reasoned justification to the policy alludes to enabling development being required to realise the tourism allocations, and it also advises that</p>  | <p>1. Noted. Paragraph 7.113 amended to read "In allocating the site for tourism and leisure uses the Council is aware that a level of</p>  |

|---------------|--|---|
| Barry         | overly residential biased development will not be permitted. This lacks clarity and certainty. The reasoned justification would benefit from the inclusion of more detail on what is likely to comprise appropriate enabling development, which in turn could realise significantly more positive effects. | enabling development in the form of residential or other commercial development is likely to be required to make a scheme commercially viable." |

### **Sustainability Appraisal of Deposit Plan Site Allocations**

- 4.130 The Council developed a 3-stage assessment process for appraising sites submitted to the Council for consideration within the Deposit LDP. The site assessment methodology was developed by the Council and is outlined below. Further details of the findings of the candidate assessment process are provided in the Council's Findings of the Candidate Site Assessment Process Background Paper. Stage 3 of the candidate site methodology involved a Sustainability Appraisal of individual sites allocated within the Deposit Plan for development, including sites which were previously allocated for development in the Adopted Vale of Glamorgan Unitary Development Plan.

### **Incorporation of the Sustainability Appraisal of Candidate Sites into the Deposit LDP**

- 4.131 The purpose of the appraisal was to determine how each site performed against each of the Sustainability Objectives of the Vale of Glamorgan LDP Sustainability Appraisal Framework. Through this appraisal, the Council was able to identify issues associated with development of the site in question, and appropriate mitigation measures to address issues identified. For example the provision of buffer zones between development areas within sites and areas of biodiversity interest, or specific site development requirements which are set in the Section 8 Delivery and Implementation of the Deposit LDP. In this regard, it should be noted that as a consequence of the SA appraisal, site boundaries for allocated development sites within the LDP may not correspond with those originally submitted to the Council for consideration. Table 12 summarises the sustainability appraisal of each site allocated for development within the LDP. Full Sustainability Appraisals of all allocated sites contained within the LDP are provided at Appendix 13.

Table 12 - Sustainability Appraisal Scores for allocated Candidate Sites

| Sustainability objectives |  | To provide the opportunity for people to meet their housing needs | To maintain, promote and enhance the range of local facilities | To maintain and improve access for all | Reduce the causes of deprivation | To maintain, protect and enhance community spirit | To minimise the causes and manage the effects of climate change | To minimise waste | To use land effectively and efficiently | To protect and enhance the built environment and natural environment | To provide a high quality environment within all new developments | To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage | To reduce the need to travel and enable the use of more sustainable modes of transport | To provide for a diverse and wide range of local job opportunities | To maintain and enhance the viability of the Vale's town, district and local centres | To promote appropriate tourism |

## 5. Cumulative Effects Analysis

### Introduction

- 5.1 In addition to the appraisal of individual policies undertaken in the SA/SEA, the SEA Directive requires consideration of the overall effects of the Plan including secondary, synergistic and cumulative effects of policies. These may include incremental effects that can have minor impacts or effects when considered individually, but cumulatively can accrue to have significant environmental effects. Alongside the many positive effects of the plan identified by the SA, some significant negative effects were also identified. The following tables summarise the key effects including the cumulative effects (intra-plan effects) and where relevant the combined effects with other relevant plans and projects (inter-plan effects).
- 5.2 Appendices 10-12 provide detailed assessments of the Strategic, Managing Development and Managing Growth Policies set out in the Deposit LDP. The following section provides commentary on the headline positive, negative and cumulative effects identified through the SA.

### Cumulative Effects Analysis of the Strategic Policies

**Table 13: SA Summary of the Cumulative Effects of the Strategic Policies**

|    |   |   |    |     |   |   |    |   |   |    |   |   |   |
|----|---|---|----|-----|---|---|----|---|---|----|---|---|---|
| ++ | 0 | + | 24 | +/- | 4 | 0 | 43 | - | 8 | -- | 0 | ? | 0 |
|----|---|---|----|-----|---|---|----|---|---|----|---|---|---|

- 5.3 The Strategic Policies are the over-arching policies that set out the policy requirements and the broad spatial distribution of development for the LDP. As such they do not include detailed policies that address specific topic areas and do not address detailed site development considerations. In undertaking the assessment, the policies realised 8 overall negative effects that are addressed below. However, these negatives reflect, in part, the absence of detailed considerations that would otherwise follow from a further assessment of the Managing Development policies contained within the Plan..
- 5.4 By contrast the Strategic Policies realise 24 overall positive effects, predominantly related to the provision of development, bringing brownfield and contaminated land into beneficial use and in protecting the built and natural environment (as a result of focussing development within existing settlements).
- 5.5 These positive effects greatly outweigh the negative effects. Given that the purpose of the SA assessment is to ensure that sustainability (including environmental) considerations are taken into account, thereby making the LDP more sustainable, the positive effects identify that the policies as drafted are realising benefits in sustainability terms.
- 5.6 The most significant negative issues revolve around SA Objective Set 6 – Climate Change, where over half of the overall effects were deemed to be negative. Generally, where negative effects are identified for a strategic policy, it is possible to mitigate or minimise those effects through the provision of detailed policies that would as a

consequence be included within the overall policy framework. However these assessments raise a significant issue at a strategic level that is considered unlikely to be resolved through more detailed and focussed managing Development and Managing Growth policies. However, sustainability is an issue that is reflected in a number of detailed policies as well as being reflected in national policy and guidance.

5.7 The other main issue raised in the SA of the Strategic Policies is the need for the plan to address the sources of waste generation, rather than the sustainable handling of waste. However, the scope for a Development Plan to address the issue of waste generation is limited and, as such the plan should focus on specific areas that it can influence. It was therefore recommended that the plan included policies that address sustainable construction, prioritising the reuse of existing buildings and the use of secondary materials in developments.

### Cumulative Effect Analysis of the Managing Development Policies

**Table 14: SA Summary of the Cumulative Effects of the Managing Development Policies**

|    |   |   |    |     |   |   |    |   |   |    |   |   |   |
|----|---|---|----|-----|---|---|----|---|---|----|---|---|---|
| ++ | 0 | + | 17 | +/- | 5 | 0 | 55 | - | 2 | -- | 0 | ? | 0 |
|----|---|---|----|-----|---|---|----|---|---|----|---|---|---|

5.8 The Managing Development policies set a policy framework for managing and controlling development across the county borough. The policies are more detailed in nature than the Strategic Policies and are more likely to realise definitive effects as a result. It is usually the case that the more detailed and focussed the policy, the more negative are the assessments.

5.9 Nevertheless, the SA realised a significant number of overall positive effects (17), with three (3) objective sets (1 – Housing provision; 2 – provision of facilities; and 4 – reducing causes of deprivation) also being generally positive. Nevertheless, the positive effects are spread across a broad spectrum of SA objectives, indicating that the policy framework, when implemented, should achieve positive sustainability benefits across the Vale of Glamorgan.

5.10 By contrast only two (2) overall negative effects have been identified, these relating to energy consumption and minimising waste, and a further 5 positive/negative effects. Given that the Managing Development Policies are relevant across a broad spectrum of issues and circumstances, the Positive/Negative effects of the policies realised from the SA reflect the conflicts inherent in land use planning. Consequently the SA concluded that on balance the policy framework would result in positive outcomes in those areas in which the plan had direct influence.

### Cumulative Effects Analysis of the Managing Growth Policies

**Table 15: SA Summary of the Cumulative Effects of the Managing Growth Policies**

|    |   |   |   |     |   |   |    |   |   |    |   |   |   |
|----|---|---|---|-----|---|---|----|---|---|----|---|---|---|
| ++ | 0 | + | 7 | +/- | 3 | 0 | 64 | - | 5 | -- | 0 | ? | 0 |
|----|---|---|---|-----|---|---|----|---|---|----|---|---|---|

- 5.11 The Managing Growth Policies provide the policy framework to guide development over the plan period and a number of policies seek to allocate sites for specific uses.. These policies are the most detailed of all the policies within the LDP as they relate to specific land uses or specific sites. Given the nature of such policies the SA would generally realise more negative effects, as the effects can be more readily defined. Despite the more detailed nature of the policies, the assessments realised only five (5) overall negative results.
- 5.12 By contrast the assessments realised seven (7) positive results, with two (2) positive results for economic factors ('range and mix of housing' and 'maintain and enhance retail centres'). Four (4) positive results were noted for social factors ('meeting community needs', 'promote improvement in deprivation', 'provide a range of local facilities' and 'meeting needs of users'), and a positive result for one (1) environmental factor (efficient and effective use of land). A total of three (3) Positive/Negative effects were also realised through the assessments.
- 5.13 The assessments realised a low overall number of defined effects. This, in part, is due to the specific and detailed nature of the policies and the how they interact with the overall strategy of the LDP, including the settlement hierarchy.

### Conclusions

- 5.14 Overall the SA indicated that the Strategic Policies are positive as they and would realise significant sustainability benefits. Addressing the issues raised by the assessments would strengthen the positive nature of the policies further, and where feasible this has been undertaken.
- 5.15 The SA of the Managing Development Policies realised a very high level of positive effects , whilst only realising two (2) negative effects, which themselves are down to the role of the Plan in promoting development.
- 5.16 The Managing Growth Policies realise only 15 identified effects out of a total of 79 Objectives and Aims. This means that less than one in five of the objectives and aims realised an overall effect. In addition the nature of the effects was skewed towards being positive. The low level and the positive leaning of the identified effects, in conjunction with the 65 neutral effects realised in the assessment can only lead to the conclusion that, as a policy set, the Managing Growth Policies will not have a detrimental effect.
- 5.18 Table 16 below provides a summary of the cumulative positive and negative effects of the Strategic, Managing Development and Managing Growth Policies of the Deposit LDP. This table highlights that the likely Significant Negative Effects of the Plan are those associated directly with new development, and are as a consequence of the increased demand for energy, transport, and increased waste generation.
- 5.19 The systematic appraisal of the various components that make up the Deposit LDP has assisted in the development and subsequent refinement of a series of strategic objectives consistent with the sustainability framework set out in the SA Scoping Report. This included the appraisal of strategic options that informed the Council in the identification of a Draft Preferred Strategy for the LDP that is best placed to address

the key economic, social and environmental issues affecting the Vale of Glamorgan. The SA has assisted in the development of a suite of LDP policies that seek to mitigate any potential adverse affects identified during the production of the Deposit Plan.

**Table 16: Potential Cumulative Positive and Negative Effects of the LDP Strategic, Managing Development and Managing Growth Policies**

| SA objective and Sub Aim |  | Overall Affect |
|--------------------------|--|----------------|
| 1                        | To provide the opportunity for people to meet their housing needs.   | 0              |
| A                        | Provide a mix of dwelling types and tenure   | 0              |
| B                        | Build in sustainable locations, with good access to local facilities   | 0              |
| C                        | Provide affordable housing   | 0              |
| D                        | Preference for previously developed land in sustainable locations  | 0              |
| 2                        | To maintain, promote and enhance the range of local facilities.  | +              |
| A                        | Meet the needs of existing communities throughout the Vale of Glamorgan  | +              |
| B                        | Provide appropriate facilities within new developments to meet the needs of future users                                 | 0              |
| C                        | Ensure local facilities are suitable for purpose and easily accessible   | 0              |
| D                        | Prevent the loss of existing well-used and valued local facilities   | 0              |
| 3                        | To maintain and improve access for all.  | 0              |
| A                        | Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community                   | 0              |
| B                        | Improve public perception of access  | 0              |
| C                        | Benefit health and well being through social inclusion within the physical environment                                   | 0              |
| D                        | Promote 'life-time' homes  | 0              |
| 4                        | Reduce the causes of deprivation.  | +              |
| A                        | Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all. | +              |
| B                        | Prevent the isolation of deprived communities.   | 0              |
| 5                        | To maintain, protect and enhance community spirit.   | 0              |
| A                        | Reduce the fear of crime   | 0              |
| B                        | Provide community facilities   | 0              |

**Table 16: Potential Cumulative Positive and Negative Effects of the LDP Strategic, Managing Development and Managing Growth Policies**

| SA objective and Sub Aim |  | Overall Affect |
|--------------------------|--|----------------|
| C                        | Encourage local distinctiveness (e.g. development having regard to its context and public art)   | 0              |
| D                        | Encourage community ownership of the environment (e.g. promote shared spaces, good design)   | 0              |
| 6                        | To minimise the causes and manage the effects of climate change.   | -              |
| A                        | Reduce air pollution (e.g. transport / industry emissions)   | -              |
| B                        | Reduce energy consumption (e.g. promote energy efficient building)   | -              |
| C                        | Promote renewable energy generation  | 0              |
| D                        | Reduce flood risk to people, property and maintain the integrity of floodplains  | 0              |
| E                        | Protect biodiversity, flora and fauna from the effects of climate change   | 0              |
| F                        | Protect and promote the development of carbon sinks  | 0              |
| 7                        | To minimise waste.   | -              |
| A                        | Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | 0              |
| B                        | Provide and promote recycling facilities.  | 0              |
| C                        | Avoid landfill of waste  | 0              |
| 8                        | To use land effectively and efficiently.   | +              |
| A                        | Retain greenfield land   | + / -          |
| B                        | Bring previously developed land in sustainable locations back into use   | + / -          |
| C                        | Promote good quality high density developments where appropriate and having regard to the local context  | 0              |
| D                        | Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value | + / -          |
| E                        | Restore contaminated land to beneficial use  | 0              |

**Table 16 (Contd.) : Potential Cumulative Positive and Negative Effects of the LDP Strategic, Managing Development and Managing Growth Policies**

| SA objective and Sub Aim |  | Overall Affect |
|--------------------------|--|----------------|
| 9                        | To protect and enhance the built and natural environment.  | +              |
| A                        | Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | + / -          |
| B                        | Improve and protect the quality and quantity of inland and coastal water resources   | 0              |
| C                        | Protect or enhance the built environment including historic buildings and conservation areas.  | 0              |
| D                        | Protect cultural heritage and archaeology.   | 0              |
| E                        | Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | 0              |
| 10                       | To provide a high quality environment within all new developments.   | 0              |
| A                        | Ensure development meets the needs of current and future users.  | +              |
| B                        | Promote a sense of community pride (e.g. shared spaces, public art, local materials)   | 0              |
| C                        | Promote sustainable design and construction solutions.   | 0              |
| D                        | Enhance access for cyclists and pedestrians.   | 0              |
| E                        | Provide adequate green spaces.   | 0              |
| F                        | Provide adequate vehicular parking and manoeuvring space.  | 0              |
| 11                       | To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.   | 0              |
| A                        | Protect and enhance existing cultural heritage and historic environments   | 0              |
| B                        | Promote new opportunities for culture in the Vale of Glamorgan   | 0              |
| 12                       | To reduce the need to travel and enable the use of more sustainable modes of transport.  | -              |
| A                        | Ensure new development is located in accessible locations from a range of travel modes   | + / -          |
| B                        | Promote technologies to reduce need to travel (e.g. homeworking)   | 0              |
| C                        | Enable the movement of people and freight by sustainable means   | 0              |
| D                        | Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way) | 0              |

**Table 16 (Contd.) : Potential Cumulative Positive and Negative Effects of the LDP Strategic, Managing Development and Managing Growth Policies**

| SA objective and Sub Aim |  | Overall Affect |
|--------------------------|--|----------------|
| 13                       | To provide for a diverse range of local job opportunities.   | 0              |
| A                        | Protect existing and potential employment sites for employment uses  | 0              |
| B                        | Support a culture of entrepreneurship  | 0              |
| C                        | Encourage a range of employment sites in locations accessible by a range of transport modes                              | 0              |
| D                        | Support the enhancement of skills to meet employment needs   | 0              |
| E                        | Promote and enable sustainable rural diversification   | 0              |
| 14                       | To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.          | 0              |
| A                        | Ensure retail centres are accessible by a range of modes of transport  | 0              |
| B                        | Ensure a range of uses within retail centres   | 0              |
| C                        | Avoid out-of-town retail development   | 0              |
| D                        | Enhance the public realm within existing centres and facilitate regeneration programmes                                  | 0              |
| E                        | Promote the evening economy in the Vale of Glamorgan's town centres  | 0              |
| 15                       | To promote appropriate tourism.  | 0              |
| A                        | Promote local economic growth through tourism  | 0              |
| B                        | Enable tourism uses to be accessed by sustainable travel modes   | 0              |
| C                        | Manage tourism to protect the Vale of Glamorgan's natural and built assets   | 0              |
| D                        | Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential) | 0              |
| E                        | Enable specialist tourism (e.g. sustainable, sports, cultural etc).  | 0              |

## 6. IMPLEMENTATION AND MONITORING

### Introduction

- 6.1 This section outlines potential indicators and targets which will be used through the SA/SEA process. Possible targets and/or indicators for each sustainability objective have been identified (from the SA Framework) and these indicators have been iteratively developed by the Council.

### The requirement for Monitoring

- 6.2 The Strategic Environmental Assessment Directive requires that the significant environmental effects of implementing a plan or programme are monitored in order to identify unforeseen adverse effects and if necessary, to identify the need for remedial action. Government also requires local planning authorities to produce Annual Monitoring Reports to track the progress of the Vale of Glamorgan Local Development Plan. According to official guidance, *'These need to include the findings of SA monitoring'*. Therefore, the monitoring strategy for the SA/SEA should be integrated with the Local Development Framework Annual Monitoring Report.

### SA Monitoring Proposals for the Local Development Plan

- 6.3 Table 17 sets out the proposed LDP monitoring framework and indicators which the Council will use to seek to measure all relevant aspects of the areas addressed by the SA/SEA. These indicators relate to social and economic as well as environmental Factors. The targets and indicators have been developed in order to assess the sustainability of the LDP. The aim has been to identify a set of objectives that can be used to assess how well the Plan meets the goals of sustainable development both at a global and local scale.
- 6.4 The framework has been developed by considering, the key sustainability issues identified for the Vale of Glamorgan, the objectives identified in the PPP review, baseline data review, consultation with key stakeholders and statutory consultees and representations received at pre-deposit consultation. They are also drawn from objectives and targets set out in the LDP – some of which are quantitative and may be expressed as maps, graphs, diagrams or percentages (e.g. Percentage of new housing built on brownfield land, target of 10% of energy on major new developments to be provided by renewables etc.);
- 6.5 The indicators are based on information already gathered by the Council and other relevant organisations where this has been identified in the monitoring table below and therefore at this stage envisage that annual monitoring against the indicators is both achievable and realistic.

Table 17 Proposed LDP monitoring framework and indicators

| 1. Housing                        |  |   |  |  |
|-----------------------------------|--|---|--|--|
|                                   | Objective  | Indicator   | Source   | Target   |
| Social   Environmental   Economic | <b>To provide the opportunity for people to meet their housing needs.</b><br><b>Aims:</b> <ul style="list-style-type: none"> <li>Provide a mix of dwelling types and tenure</li> <li>Build in sustainable locations, with good access to local facilities</li> <li>Provide affordable housing</li> <li>Preference for previously developed land in sustainable locations</li> </ul>  | Annual affordable housing provision as a % of all house builds  | JHLA Studies                                   | Increase the level of affordable housing to meet the identified need.                                  |
|                                   |  | Proportion of households unable to purchase a property  | VOG Housing Strategy                           | Decrease the proportion of households unable to purchase a property                                    |
|                                   |  | Population / household structure  | Census   | Match dwelling type to population needs  |
|                                   |  | Dwelling type / tenure  | VOG Housing Strategy                           | Increase the range and choice of dwelling types and tenures to meet demand                             |
|                                   |  | % of new housing built on previously developed land   | JHLA Studies                                   | Increase the % of new housing built on previously developed land                                       |
|                                   |  | House build rates   | JHLA Studies                                   | Match house build rates with population needs.   |
| 2. Local Facilities               |  |   |  |  |
|                                   | Objective  | Indicator   | Source   | Target   |
| Social   Economic                 | <b>To maintain, promote and enhance the range of local facilities.</b><br><b>Aims:</b> <ul style="list-style-type: none"> <li>Meet the needs of existing communities throughout the Vale of Glamorgan</li> <li>Provide appropriate facilities within new developments to meet the needs of future users</li> <li>Ensure local facilities are suitable for purpose and easily accessible</li> <li>Prevent the loss of existing well-used and valued local facilities</li> </ul> | Number of new facilities (e.g. shops, restaurants, pubs, community centres, libraries, medical centres, recreational facilities, places of worship etc.) as a ratio of new house builds and / or population | Planning application database<br>Census        | Increase in the number of new local facilities as a proportion of new house builds and / or population |
|                                   |  | Numbers of 'change of use' developments resulting in a loss of a community facility   | Planning application database                  | Reduce the loss of community facilities where appropriate.   |
|                                   |  | Number of people who travel outside the Vale to access goods, services or employment  | Census<br>Sewta surveys<br>VOG Opinion Surveys | Reduce the number of people who travel outside the Vale to access goods, services or employment        |

**3. Access for all**

|                      | Objective  | Indicator   | Source                               | Target   |
|----------------------|--|---|--------------------------------------|--|
| Social Environmental | <b>To maintain and improve access for all.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>Ensure the built and natural environment is easily accessible to all the Vale's community</li> <li>Improve public perception of access</li> <li>Benefit health and well being through social inclusion within the physical environment</li> <li>Promote 'life-time' homes</li> </ul> | Number of alterations to public buildings and spaces to provide for disabled persons access | Planning / building control database | Increase the number of alterations to public buildings and spaces to provide for disabled access |
|                      |  | Number of new developments with special provision for disabled persons                      | Planning application database        | Increase special provision for disabled persons within new developments                          |
|                      |  | Number of life time homes as a proportion of all new homes                                  | Planning / building Control database | Increase the number of life time homes as a proportion of all new homes                          |

**4. Deprivation**

|                 | Objective  | Indicator                                | Source | Target   |
|-----------------|--|--|--------|--|
| Social Economic | <b>Reduce the causes of deprivation.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>Promote improvements to: employment, income, health and wellbeing, education, housing, environment and access, for all.</li> <li>Prevent the isolation of deprived communities.</li> </ul> | Welsh Index of Multiple Deprivation:     | WIMD   | Reduce overall deprivation                         |
|                 |  | Educational achievement (WIMD indicator) | WIMD   | Improve educational achievement                    |
|                 |  | Health and well-being (WIMD indicator)   | WIMD   | Improve health and well being                      |
|                 |  | Housing (WIMD indicator)                 | WIMD   | Improve access to good quality, affordable housing |
|                 |  | Environment (WIMD indicator)             | WIMD   | Improve the environment in deprived areas          |
|                 |  | Access (WIMD indicator)                  | WIMD   | Improve access for deprived areas                  |
|                 |  | Employment (WIMD indicator)              | WIMD   | Increase employment opportunities                  |

| 5. Community Spirit                 |  |   |                                      |  |
|-------------------------------------|--|---|--------------------------------------|--|
|                                     | Objective  | Indicator   | Source                               | Target   |
| Social                              | <b>To maintain, protect and enhance community spirit.</b><br><b>Aims:</b> Reduce the fear of crime <ul style="list-style-type: none"> <li>▪ Provide community facilities</li> <li>▪ Encourage local distinctiveness (e.g. development having regard to its context and public art)</li> <li>▪ Encourage community ownership of the environment (e.g. promote shared spaces, good design)</li> </ul>  | Public perception of crime rates and fear of crime  | Crime statistics                     | Reduce actual and perceived crime levels in the Vale of Glamorgan.   |
|                                     |  | New developments with local distinctiveness e.g. finishing materials, public art, facilities etc. | Planning application database        | Increase the number of new developments with local distinctiveness   |
| 6. Climate Change                   |  |   |                                      |  |
|                                     | Objective  | Indicator   | Source                               | Target   |
| Social<br>Environmental<br>Economic | <b>To minimise the causes and manage the effects of climate change.</b><br><b>Aims:</b> <ul style="list-style-type: none"> <li>▪ Reduce air pollution (e.g. transport / industry emissions)</li> <li>▪ Reduce energy consumption (e.g. promote energy efficient building)</li> <li>▪ Promote renewable energy generation</li> <li>▪ Reduce flood risk to people, property and maintain the integrity of floodplains</li> <li>▪ Protect biodiversity, flora and fauna from the effects of climate change</li> <li>▪ Protect and promote the development of carbon sinks.</li> </ul> | Emissions of greenhouse gases   | WAG Statistics                       | Reduce emissions of greenhouse gases   |
|                                     |  | Number of trips made by car.  | Census/ Sewta Surveys                | Reduction in the number of trips made by car.  |
|                                     |  | Renewable energy generation   | Planning/Building Control Database   | Increase the level of energy generated by renewable means.<br>Number of new developments with renewable energy generation on site. |
|                                     |  | Number of incidents of flooding within the Vale of Glamorgan / Properties at risk of flooding     | Environment Agency                   | Reduce number of incidents of flooding within the Vale of Glamorgan / Properties at risk of flooding                               |
|                                     |  | Proportion of new developments with Sustainable Urban Drainage Systems                            | Planning / building control database | Increase proportion of new developments with Sustainable Urban Drainage Systems  |
|                                     |  | Development within flood plains   | Planning/Building Control database   | No inappropriate development within flood plains   |
|                                     |  |   |                                      |  |

|  |                             |                       |                                    |
|--|-----------------------------|-----------------------|------------------------------------|
|  | Energy consumption per head | DTI Energy Statistics | Reduce energy consumption per head |
|--|-----------------------------|-----------------------|------------------------------------|

**7. Waste**

|               | Objective  | Indicator                        | Source         | Target  |
|---------------|--|----------------------------------|----------------|---|
| Environmental | To minimise waste.   | Annual volume of municipal waste | Waste Strategy | Reduce amount of municipal waste                    |
|               | <u>Aims:</u>   | % of waste re-used or recycled   | Waste Strategy | Increase the amount if of waste re-used or recycled |
|               | <ul style="list-style-type: none"> <li>▪ Promote the use of secondary resources (e.g. convert existing buildings/reuse materials)</li> <li>▪ Provide and promote recycling facilities.</li> <li>▪ Avoid landfill of waste</li> </ul> | % of waste land-filled           | Waste Strategy | Reduce tonnage of waste to landfill                 |

**8. Land use**

|               | Objective   | Indicator   | Source                                 | Target   |
|---------------|---|---|--|--|
| Environmental | To use land effectively and efficiently.  | % of new development on brownfield land           | JHLA and planning application database | Increase the % of new development on previously developed land     |
|               | <u>Aims:</u>  | Proportion of new development on greenfield land. | JHLA and planning application database | Reduce the proportion of greenfield land being developed           |
|               | <ul style="list-style-type: none"> <li>▪ Retain greenfield land</li> <li>▪ Bring previously developed land in sustainable locations back into use</li> <li>▪ Promote good quality high density developments where appropriate and having regard to the local context.</li> <li>▪ Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value.</li> <li>▪ Restore contaminated land to beneficial use.</li> </ul> | Density of new developments                       | JHLA and planning application database | Increase the density of new developments                           |
|               |   | Agricultural land quality                         | Agricultural land classification maps  | Maintain the quality of agricultural land in the Vale of Glamorgan |

| 9. Environmental Assets |   |  |   |  |
|-------------------------|---|--|---|--|
|                         | Objective   | Indicator  | Source  | Target   |
| Environmental           | <p><b>To protect and enhance the built and natural environment.</b><br/> <b>Aims:</b></p> <ul style="list-style-type: none"> <li>▪ Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.</li> <li>▪ Improve and protect the quality and quantity of inland and coastal water resources.</li> <li>▪ Protect or enhance the built environment including historic buildings and conservation areas.</li> <li>▪ Protect cultural heritage and archaeology.</li> <li>▪ Enhance public access to and appreciation of the Vale's environmental assets.</li> </ul> | % of new development on brownfield land  | JHLA and planning application database  | Increase the % of new development on previously developed land   |
|                         |   | % change in the Vale's priority habitats and species   | LBAP and CCW  | Improve priority habitats and species  |
|                         |   | Proportion of new developments delivering habitat creation or restoration                              | Planning application database   | Increase proportion of new developments delivering habitat creation or restoration                           |
|                         |   | Proportion of new developments with Sustainable Drainage Systems                                       | Planning application database   | Increase proportion of new developments with Sustainable Drainage Systems                                    |
|                         |   | Water quality  | Environment Agency and VOG data   | Maintain or improve water quality within and around the Vale of Glamorgan                                    |
|                         |   | Water use per household  | Dwr Cymru Welsh Water   | Reduction in water use   |
|                         |   | Improvement of fish stocks within the water environment  | Environment Agency  | Increase in fish stocks  |
|                         |   | Landscape quality  | LANDMAP Register of Historic Parks and Garden Register Historic Landscape Interest in Wales | Maintain or improve the Landscape quality of the Vale of Glamorgan   |
|                         |   | % of total length of footpaths and other rights of way which are easy to use by members of the public. | VOG Data  | Increase in the % of footpaths and other public rights of way which are easy to use by members of the public |

|  |  |  |   |   |
|--|--|--|---|---|
|  |  | Historic townscape (Conservation Areas, Listed Buildings, Scheduled Ancient Monuments) | Conservation Area Appraisals, CADW data<br>Buildings at Risk Register | Maintain or improve the historic townscape of the Vale of Glamorgan                         |
|  |  | Area (ha) of accessible green space per 1000 population                                | VOG Data, NPFA  | Maintain or increase level of accessible green space  |
|  |  | Number of new developments, which bring historic buildings back to beneficial use.     | Planning application database<br>CADW                                 | Increase number of new developments, which bring historic buildings back to beneficial use. |

**10. Quality of new development**

|                         | Objective   | Indicator   | Source                        | Target   |
|-------------------------|---|---|-------------------------------|--|
| Social<br>Environmental | <p><b>To provide a high quality environment within all new developments.</b></p> <p><b>Aims:</b></p> <ul style="list-style-type: none"> <li>▪ Ensure development meets the needs of current and future users.</li> <li>▪ Promote a sense of community pride (e.g. shared spaces, public art, local materials)</li> <li>▪ Promote sustainable design and construction solutions.</li> <li>▪ Enhance access for cyclists and pedestrians.</li> <li>▪ Provide adequate green spaces.</li> <li>▪ Provide adequate vehicular parking and manoeuvring space.</li> </ul> | Proportion of new developments delivering benefits for the public realm | Planning application database | Increase proportion of new developments delivering benefits for the public realm |
|                         |   | Number of new developments recognised by national design awards         | Design Awards (various)       | Increase number of new developments recognised by national design awards         |

|             | <ul style="list-style-type: none"> <li>▪ Manage tourism to protect the Vale's natural and built assets</li> <li>▪ Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)</li> <li>▪ Enable specialist tourism (e.g. sustainable, sports, cultural etc).</li> </ul> | <p>Length of stay</p>                             | <p>VOG Tourism Strategy</p> | <p>Increase the average length of stay in the Vale of Glamorgan per tourist</p>     |

**7. NEXT STEPS**

- 7.1 This SA Report will be subject to consultation, including consultation with all statutory consultees and the public (along with other stakeholder organisations). This consultation will be undertaken alongside the consultation on the deposit LDP.
- 7.2 Consultation is an important part of developing the LDP. Following this, all responses received will be collated and incorporated as appropriate into decision-making for finalising the LDP. The consultation on the LDP is being undertaken in parallel to the consultation on the SA report, and feedback is anticipated on both the LDP and the SA Report.
- 7.3 After adoption of the LDP, a SEA Statement must be produced in order to document how the SA / SEA and consultation on the SA has influenced the development of the LDP. It will also set out the final SEA monitoring commitments. This will be undertaken at the earliest practicable opportunity upon adoption of the LDP.

VALE OF GLAMORGAN  
LOCAL DEVELOPMENT PLAN

SUSTAINABILITY  
APPRAISAL  
STAKEHOLDER  
WORKSHOP

REPORT OF CONSULTATION

October 2006

## Executive Summary

---

This Consultation Report outlines the findings of the Vale of Glamorgan Local Development Plan (LDP) Sustainability Appraisal (SA) stakeholder workshop held on Wednesday 11<sup>th</sup> October 2006, at the YMCA Hub, Barry.

The purpose of the stakeholder workshop was to engage relevant stakeholders in initial discussions to provide a foundation upon which the Council could base its sustainability framework against which the Plan can then be appraised. The stakeholders were asked to:

- Identify the Sustainability Issues for the Vale of Glamorgan; and
- Discuss ways in which the LDP can address these issues.

The workshop had 43 attendees representing a wide variety of interests from the Vale and neighbouring areas (see Appendix A). The aim of the workshop was to determine key sustainability issues for the Vale relating to the economy, the environment and the society, and to establish objectives for these issues.

The findings from the discussions show that the key sustainability issues for the Vale, according to stakeholders at the workshop include:

- Transport and accessibility;
- Employment related issues;
- Housing provision, especially affordable housing;
- Increasing development pressures;
- Community cohesion;
- Waste disposal and pollution; and
- Threats to cultural heritage, biodiversity and landscape.

Participants gave feedback on the stakeholder workshop and 93% felt their overall experience of the day was neutral to excellent.

The findings provide the foundation on which the Council will develop the Sustainability Objectives against which the LDP will be appraised. These will be outlined in the Sustainability Appraisal Scoping Report, which will be drafted for wider written consultation prior to the final approval of the Sustainability Appraisal framework.

# 1 Introduction

---

The Vale of Glamorgan Local Development Plan (LDP) will govern how land within the Vale of Glamorgan is used between 2011 and 2026.

An integral part of preparing the LDP is carrying out a Sustainability Appraisal (SA) of the Plan, incorporating the requirements of the Strategic Environmental Assessment Directive (2001/42/EC), to ensure that it is consistent with the principles of Sustainable Development. In particular, the purpose of the SA is to assess the economic, environmental and social effects of the LDP.

To assist in carrying out the SA of the LDP, the Vale of Glamorgan Council has appointed specialist consultants, Hyder Consulting, to provide expert advice throughout the process to ensure that best practice is followed and the legal requirements are satisfied.

One of the first parts of the SA process is to establish the Sustainability Appraisal framework against which the LDP can be assessed. The Council recognised in its LDP Delivery Agreement, the importance of stakeholder involvement in the process. Therefore, the Council felt it appropriate to seek stakeholder participation prior to drafting its Sustainability Appraisal framework, so that the views of stakeholders provide the foundation for the framework.

To establish the Sustainability Appraisal framework, an external stakeholder workshop was held on Wednesday 11th October 2006, at the YMCA Hub in Barry, to:

- Identify the Sustainability Issues for the Vale of Glamorgan; and
- Discuss ways in which the LDP can address these issues.

Invitations were sent out to over 250 relevant external stakeholders from the LDP contact database, of which 43 attended, representing a wide variety of interests from the Vale and neighbouring areas, including: secondary school pupils, Town and Community Councillors, community groups, environmental consultation bodies, business and developer interests and local societies. A list of attendees is provided in **Appendix A**.

Prior to the workshop, attendees were allocated a topic area, either 'Our Economy', 'Our Environment' or 'Our Society'. They were given background information on baseline data for the Vale to help them identify sustainability issues, and a summary of key objectives from relevant policies, plans or programmes to base their discussions on. The background information is attached at **Appendix B**.

## 1.1 Workshop structure

As an introduction to the workshop, Rob Thomas, Head of Planning & Transportation for the Vale of Glamorgan Council, gave a presentation outlining the Local Development Plan and the aims of the Sustainability Appraisal Workshop. This was followed by a presentation by David Hourd of Hyder Consulting, explaining the need for a Sustainability Appraisal of the LDP. The presentations were followed by the main workshop discussions.

The workshop was sub divided into two groups for each of the three categories of interest: 'Our Economy', 'Our Society' and 'Our Environment' (six groups in total).

Each group had a facilitator and scribe to ensure that discussions were focused, provided the essential feedback required, and were accurately recorded. The workshop was structured to hold two discussion sessions.

The first session encouraged each group to "mind-map" and suggest sustainability issues relating to the Vale of Glamorgan. Each group was asked to identify which were the five

main issues pertaining to their category (economy, society or environment), outlining for each issue:

- Where the issue is occurring?
- When the issue is happening?
- Who the issue relates to and who can affect it?; and
- Why the issue is deemed to be a problem?

The second session was focused on determining the objectives for dealing with and addressing each of these five issues.

The full agenda, and participant instruction sheets for the Workshop are provided in **Appendix C**.

The results of the discussions from each of the groups at the workshop are summarised within this Consultation Report. This feedback provides the foundation on which the Council will write the Sustainability Objectives against which the LDP will be appraised. These will be outlined in the Sustainability Appraisal Scoping Report, which will be drafted for wider written consultation prior to the final approval of the Sustainability Appraisal framework.

## 2 Sustainability Issues and Objectives

---

This section of the report outlines the Sustainability Issues that the stakeholders felt were pertinent to the Vale of Glamorgan and ways in which they might be tackled. It should be noted that these comments reflect the views of the workshop participants and not necessarily the views of the Vale of Glamorgan Council. In due course the Council will produce its Sustainability Appraisal Scoping Report, which will clarify the Council's position in respect of these matters.

The following tables outline the main Sustainability Issues identified by the stakeholders, alongside the aims and objectives derived by them to tackle these issues. The discussions expanded on each issue identified to consider where the issue is most apparent, when the issue has occurs, whom it affects and why it's happening.

|  |   |                                   |
|--|---|-----------------------------------|
| <b>ISSUE 1:</b><br><b>Transport and Accessibility</b><br><b><i>Congestion, traffic, lack of public transport and parking, environmental impact</i></b> |   | Economy<br>Environment<br>Society |
| <b>Where?</b>  | <ul style="list-style-type: none"> <li>▪ Traffic congestion               <ul style="list-style-type: none"> <li>- on routes to and from Cardiff</li> <li>- on all routes to and from schools (e.g. Cardiff Road during school term time)</li> <li>- Culverhouse Cross, Barons Court roundabout, Penarth (worsened by current traffic works), Dinas Powys, town centres</li> <li>- Barry: outgoing traffic congestion in the mornings and incoming traffic in the afternoon</li> </ul> </li> <li>▪ Parking in town centres (Penarth, Barry etc.)</li> <li>▪ Rural areas – poor public transport provision leading to isolation and a lack of integration</li> </ul>   |                                   |
| <b>When?</b>   | <ul style="list-style-type: none"> <li>▪ Peak periods at Culverhouse Cross and Barons Court roundabouts</li> <li>▪ Anticipated to get worse when International Sports Village and other developments in Cardiff are completed</li> <li>▪ Worse at peak periods for school run / commuting. Noticeably better during school holidays</li> </ul>  |                                   |
| <b>Who?</b>  | <ul style="list-style-type: none"> <li>▪ Non car owners (elderly, young, low income groups)</li> <li>▪ Students, commuters and the school run</li> <li>▪ Rural communities</li> </ul>   |                                   |
| <b>Why?</b>  | <ul style="list-style-type: none"> <li>▪ General development of Cardiff. An excessive economic focus on Cardiff increases the pressure on the transport network within and around the city</li> <li>▪ A perceived lack of traffic planning for new developments</li> <li>▪ Low frequency and unreliability of public transport services particularly in the evening and weekend. It was considered that the public is less likely to use public transport services where the frequency is less than 15 minutes (particularly to existing employment sites)</li> <li>▪ Increasing levels of employment increases pressure on transport infrastructure. There is also an increase in commuting distances to work and school, resulting in “commuter villages”</li> <li>▪ Increase of car ownership as cars have become more affordable, and there is a dependence on the private car for access to core services such as schools, health facilities, shopping, leisure and places of employment.</li> <li>▪ Cycle routes throughout the Vale are thought to be unsafe and have inadequate linkages into adjoining areas</li> <li>▪ Conflict was highlighted between the provision of public transport and the car parking facilities in the rural parts of the Vale. There is also a lack of parking, Park and Ride facilities, and ‘park and share’ sites. Parking facilities have not increased to reflect the increase in traffic volume. Car park charges at service stations discourage car sharing.</li> <li>▪ The barriers to improvements in transport infrastructure (including development at the airport) were identified as being: noise, land take and emissions.</li> </ul> |                                   |
| <b>Objective</b>   | <ul style="list-style-type: none"> <li>▪ Reducing Congestion:               <ul style="list-style-type: none"> <li>- Improve road network.</li> <li>- By pass congestion hot spots.</li> </ul> </li> <li>▪ Reducing the need to travel:               <ul style="list-style-type: none"> <li>- Reduce the need to travel to jobs/services etc.</li> <li>- Improve access to services including health.</li> <li>- Provide localised services to discourage longer distance private transport.</li> <li>- Concentrate development around public transport nodes.</li> <li>- Encourage working from home through provision of IT and telecommunications services.</li> </ul> </li> <li>▪ Promoting sustainable travel alternatives:               <ul style="list-style-type: none"> <li>- Provision of bus lanes/car share lanes.</li> <li>- Promote green travel plans</li> <li>- Address school transport congestion by promoting alternatives to car e.g. walking and cycling – safe routes to schools initiatives.</li> <li>- Prioritise alternative modes of transport other than the car</li> <li>- Increase provision of Park and Ride schemes.</li> <li>- Make use of Barry Docks for bringing in raw materials.</li> <li>- Increase use of rail for transportation of industrial freight.</li> <li>- Provide safe walking and cycle routes.</li> </ul> </li> <li>▪ Improving existing infrastructure:               <ul style="list-style-type: none"> <li>- Provide flexible transport facilities both locally and on a regional basis.</li> </ul> </li> </ul>   |                                   |

|  |   |
|--|---|
|  | <ul style="list-style-type: none"> <li>- Integrated transport plans are key.</li> <li>- Review existing provision.</li> <li>- Improve quality of existing infrastructure.</li> <li>- Realise potential to link capital city, airport, tourism, employment and housing.</li> <li>- Ensure access for emergency services.</li> <li>- Increase frequency of existing public transport facilities.</li> <li>- Focus on problem routes.</li> </ul> <ul style="list-style-type: none"> <li>▪ Improving safety: <ul style="list-style-type: none"> <li>- Address the perception of crime.</li> <li>- Ensure walking, cycling routes and green spaces are safe for users.</li> <li>- Improve public information, including safety information.</li> <li>- Control speed and weight on rural roads.</li> </ul> </li> </ul> |
|--|---|

|  |  |                                   |
|--|--|-----------------------------------|
| <b>ISSUE 2:</b><br><b>Housing</b><br><b><i>Increasing Housing demand, increasing house prices and lack of affordable housing</i></b> |  | Economy<br>Environment<br>Society |
| <b>Where?</b>  | <ul style="list-style-type: none"> <li>▪ Throughout the Vale there has been an increase in house prices</li> <li>▪ Communities (e.g. Cowbridge, Llantwit Major, Penarth) were described as being commuter settlements and this is deemed as being undesirable.</li> <li>▪ Throughout the Vale there is an under occupancy of some properties from a poor range of property types.</li> </ul>   |                                   |
| <b>When?</b>   | <ul style="list-style-type: none"> <li>▪ Last decade</li> <li>▪ Since 1980s (right to buy policy)</li> <li>▪ Cost of housing currently 36% higher than previous years (the comparator was not specified)</li> </ul>  |                                   |
| <b>Who?</b>  | <ul style="list-style-type: none"> <li>▪ Young people, particularly 20 to 40 year olds</li> <li>▪ Low income households that cannot afford to buy property</li> <li>▪ Those on a medium income who cannot afford to move up the property ladder</li> <li>▪ Persons relocating to the Vale, especially from elsewhere in Wales</li> <li>▪ Single person households</li> <li>▪ Elderly and disabled people</li> <li>▪ Homes are not currently provided for all sectors of society.</li> <li>▪ The strength of Cardiff's economy has had an impact on house prices/housing demand.</li> </ul>   |                                   |
| <b>Why?</b>  | <ul style="list-style-type: none"> <li>▪ There is a lack of supply to meet the demand / need and lack of more affordable housing throughout the Vale (including Council housing). There is not enough new housing land available, particularly in rural areas, and there is a change in household structure with more single households than before. The 'Right to buy' also had a direct impact on the availability of affordable housing and has also led to a view that society encourages owner occupancy. A lack of affordable housing also leads to problems of homelessness.</li> <li>▪ The Vale is being affected by people moving out along main corridors as a result of high costs in Cardiff.</li> <li>▪ There is a need to balance housing supply against environmental issues e.g. loss of countryside and landscape, as protection of the countryside prevents development or change of use particularly around nature/development borders</li> <li>▪ Where land is required for commercial development or has tourism potential (e.g. Penarth and Barry) there is a conflict with the demand for housing development. (e.g. housing/flats etc. on the Glamorgan Heritage Coast)</li> <li>▪ There is a loss of the younger population due to high property prices, which is resulting in an ageing population although higher prices in Cardiff are forcing some people to move to the Vale</li> <li>▪ There is a general lack of temporary housing (e.g. bed and breakfast) as well as housing for the less able. The existing housing stock is not currently suitable for the ageing population and those that are disabled.</li> </ul> |                                   |
| <b>Objective</b>   | <ul style="list-style-type: none"> <li>▪ Increase housing supply and the mix of house type and tenure to meet the need</li> <li>▪ This is a cross boundary issue that needs to be addressed through cooperation with Cardiff City Council.</li> <li>▪ A clear definition is needed for affordable housing and then specific allocations for affordable housing, including Council housing should be provided so that a higher percentage of all housing is affordable</li> <li>▪ Adopt a flexible approach to new rural housing</li> <li>▪ Convert and renovate existing buildings (in rural areas employment facilities should come first).</li> </ul>  |                                   |

|  |  |
|--|--|
|  | <ul style="list-style-type: none"> <li>▪ The Council needs to take a more proactive position in determining the quantity and location of affordable housing whilst encouraging a range and choice of housing</li> <li>▪ Regulate provision of suitable types of housing for elderly and disabled groups</li> <li>▪ Formulate policy for new and redeveloped housing to adhere to certain baseline standards in terms of quality and energy efficiency whilst meeting the needs of society</li> <li>▪ Ensure appropriate location and design of housing to be near existing facilities for employment, transport (public) and leisure and ensuring that new developments do not lead to isolation of communities and individuals</li> <li>▪ Reconsider affordable housing legislation to include more flexible solutions to cater for all needs and not simply for the limited section of the public who qualify for affordable housing.</li> <li>▪ Provide or encourage employment housing (e.g. farmers employ staff and provide accommodation)</li> <li>▪ Increase consultation with the public throughout the planning process</li> </ul> |

| <b>Tourism</b><br><b>A missed opportunity</b> | Economy<br>Environment  |
| <b>Where?</b>                                 | <ul style="list-style-type: none"> <li>▪ Throughout the Vale, particularly historic towns (Llantwit Major and Cowbridge)</li> <li>▪ Glamorgan Heritage Coast, particularly Barry Island and Penarth seafront</li> <li>▪ Barry, where long stay has declined significantly and there are seasonal fluctuations</li> <li>▪ Cowbridge, as it is a specialist area</li> </ul> |
| <b>When?</b>                                  | <ul style="list-style-type: none"> <li>▪ Seasonal Influence</li> </ul>  |
| <b>Who?</b>                                   | <ul style="list-style-type: none"> <li>▪ Everyone in the Vale</li> </ul>  |

|                  |  |
|------------------|--|
| <b>Why?</b>      | <ul style="list-style-type: none"> <li>▪ Barry not viewed as a long stay location - Multiple trips from Cardiff sub region, primarily for 'days out'.</li> <li>▪ Development of residential uses on Barry Island and Penarth waterfront has restricted focus on tourism. There is a general conflict between the development of the tourism potential and demand for housing.</li> <li>▪ Current retail viability of town centres and congestion problems act as a deterrent to potential visitors.</li> <li>▪ Transport issues including congestion, reliability and currently poor airport linkages e.g. Airport Access Road</li> <li>▪ Lack of a tourism strategy</li> <li>▪ There is excessive economic focus on Cardiff with consequent issues for transport and local employment and vitality.</li> <li>▪ Footpaths in the Vale are not well maintained. Coastal paths in particular, suffer from rock falls along the whole of the Vale of Glamorgan coast.</li> <li>▪ Issues with maintenance of Penarth Pier and environs.</li> <li>▪ Public transport affects the development of the tourism industry.</li> <li>▪ Not capitalising on the proximity of Cardiff.</li> </ul> |
| <b>Objective</b> | <ul style="list-style-type: none"> <li>▪ Develop a high profile marketing strategy for the Vale to raise its profile and highlight Vale attractions separately from neighbouring areas.</li> <li>▪ Protect current attractions with investment and invest in new attractions.</li> <li>▪ Integrate variety in tourism attractions throughout the entire Vale.</li> <li>▪ Focus on Barry's industrial heritage as a tourism attraction.</li> <li>▪ Link various services through strong public transport links.</li> <li>▪ Create new transport links to encourage tourism, but be sympathetic to local residents needs</li> <li>▪ Avoid land uses that are likely to discourage tourism.</li> <li>▪ The development of heritage and cultural tourism needs to be encouraged</li> <li>▪ Ensure the development of a market that is active all year round</li> </ul>   |

|  |  |                |
|--|--|----------------|
| <b>ISSUE 7:</b><br><b>Health</b><br><b><i>Lack of care and health facilities</i></b> |  | <b>Society</b> |
| <b>Where?</b>  | <ul style="list-style-type: none"> <li>▪ There is a lack of care and health facilities throughout the Vale. Most people currently need to travel outside the Vale for healthcare facilities.</li> </ul>  |                |
| <b>When?</b>   | <ul style="list-style-type: none"> <li>▪ Currently</li> </ul>  |                |
| <b>Who?</b>  | <ul style="list-style-type: none"> <li>▪ The elderly</li> <li>▪ Those that have long term health problems</li> <li>▪ The less abled requiring special care</li> </ul>  |                |
| <b>Why?</b>  | <ul style="list-style-type: none"> <li>▪ People tend to live longer</li> <li>▪ People are not actively encouraged to have healthy lifestyles leading to arise in obesity and general lack of fitness</li> <li>▪ Unhealthy lifestyles are exacerbated by insufficient provision of sports facilities (e.g. outdated Colcot Sports Centre)</li> <li>▪ Insufficient investment for local clinics and GP surgeries</li> <li>▪ Although we now have EU working time regulation, people living in the Vale still tend to work long hours.</li> </ul> |                |
| <b>Objective</b>   | <ul style="list-style-type: none"> <li>▪ Encourage people to develop healthy life-styles.</li> <li>▪ Improve access to health facilities, green spaces, footpaths and cycle ways.</li> <li>▪ Monitor and maintain the quality of open space.</li> <li>▪ Encourage communities to take ownership of open space and community facilities after development.</li> <li>▪ Carry out local surveys and registers of GP surgeries and dental practices.</li> </ul>  |                |

|   |   |                                  |
|---|---|----------------------------------|
| <b>ISSUE 8:</b><br><b>Loss of local facilities e.g. schools, shops, pubs etc. and lack of new provision</b> |   | <b>Society</b><br><b>Economy</b> |
| <b>Where?</b>   | <ul style="list-style-type: none"> <li>▪ A lack of facilities in new developments (e.g. Rhose Point) was also identified as being a cause for settlements becoming "commuter villages".</li> <li>▪ Church School on Placey Street granted permission for housing development</li> </ul> |                                  |

|                  |  |
|------------------|--|
|                  | <ul style="list-style-type: none"> <li>▪ High vacancy rates of retail spaces within Barry, Penarth and Llantwit Major were highlighted.</li> <li>▪ Poor quality community facilities e.g. Colcot Sports Centre which is outdated</li> </ul>  |
| <b>When?</b>     | Currently  |
| <b>Who?</b>      | Entire communities   |
| <b>Why?</b>      | <ul style="list-style-type: none"> <li>▪ Focus has been on housing development without the associated services and facilities e.g. schools</li> <li>▪ Under-use of local facilities affecting economic viability</li> <li>▪ There has been a change in the patterns of land use in urban areas (e.g. out town retail/employment).</li> <li>▪ Access to training/jobs is affected by transport problems.</li> <li>▪ The lack of suitable properties for retail to relocate i.e. lack of larger retail units for typical 'out-of-town' stores (bulky goods stores) within town centres.</li> <li>▪ Housing development throughout the Vale has increased but no related increase in retail provision.</li> <li>▪ Lack of provision of services and infrastructure for new development, particularly waste disposal and recycling facilities, sewerage infrastructure and power supply. The cost implications for the Council in providing waste facilities, especially exporting to landfill sites, were also noted.</li> <li>▪ Congestion and parking problems affect the use of local facilities.</li> <li>▪ Lack of crematoria and shortage of burial land (especially green burial sites) in the Vale</li> </ul> |
| <b>Objective</b> | <ul style="list-style-type: none"> <li>▪ Actively and positively encourage the UWIC development proposal.</li> <li>▪ Encourage the use of community centres in villages as training facilities.</li> <li>▪ Increase provision of broadband.</li> <li>▪ Encourage centres of excellence.</li> <li>▪ Basic services e.g. shopping, leisure, need to be a walking distance from places of residence.</li> <li>▪ Provide an all weather leisure facility for Barry and surrounding areas.</li> </ul>   |

|  |   |                        |
|--|---|------------------------|
| <b>ISSUE 9:</b>  |   |                        |
| <b>Disability / Accessibility Issues – Not enough provision for special needs groups</b> |   | Society<br>Environment |
| <b>Where?</b>  | <ul style="list-style-type: none"> <li>▪ Public buildings / facilities e.g. some railway station platforms and town centres</li> <li>▪ Throughout the Vale</li> <li>▪ Footpaths in the Vale are not well maintained. Coastal paths in particular, suffer from rock falls along the whole of the Vale of Glamorgan coast.</li> </ul>   |                        |
| <b>When?</b>   | <ul style="list-style-type: none"> <li>▪ At all times</li> </ul>  |                        |
| <b>Who?</b>  | <ul style="list-style-type: none"> <li>▪ Lack of access for disadvantaged e.g. disabled, non-car owners, the elderly, other infirm, single parents and families with pushchairs.</li> </ul>   |                        |
| <b>Why?</b>  | <ul style="list-style-type: none"> <li>▪ System 'loaded' toward car use and individual mobility.</li> <li>▪ Prejudice against those disadvantaged, mentioned above.</li> <li>▪ Historic lack of facilities for less mobile and lack of investment to improve situation</li> <li>▪ Insufficient disabled parking</li> <li>▪ Housing not suitably adapted</li> <li>▪ Issues relating to the elderly and less abled throughout the Vale include: access to buildings; facilities such as hearing loop systems in public buildings; access to services; provision of suitable residential accommodation (e.g. blocks of flats need to have lifts); and access needs of those providing care</li> <li>▪ There is generally limited consultation with the elderly and less abled</li> </ul> |                        |
| <b>Objective</b>   | <ul style="list-style-type: none"> <li>▪ Improve access to services within each community.</li> <li>▪ Provide facilities within housing development and enhance existing facilities in local areas</li> <li>▪ Improve local access for public transport through effective design.</li> <li>▪ Provide improved land use patterns to improve accessibility.</li> <li>▪ Ensure convenient location of housing sites in relation to employment sites.</li> <li>▪ Improve the design of the local environment to sustain walking/cycling/local access.</li> <li>▪ Improve the design and layout of facilities such as pedestrian access: (e.g. improved lighting and surveillance).</li> </ul>   |                        |

| <b>Why?</b>  | <ul style="list-style-type: none"> <li>▪ There is a concern that loss of biodiversity may result from continued development pressure</li> <li>▪ Climate change.</li> <li>▪ There is an issue with invasive plant species in some areas of the Vale</li> </ul>  |                    |
| <b>Objective</b>   | <ul style="list-style-type: none"> <li>▪ Ensure the protection of all designated sites and increase the buffer zones around them.</li> <li>▪ Make provision for buffer zones for wildlife along key wildlife corridors (e.g. rivers).</li> <li>▪ Seek to ensure all habitats achieve “favourable conditions” by 2020 (designated sites by 2013 – SSSIs/SACs).</li> <li>▪ Enhance areas for wildlife / halt the loss of biodiversity.</li> <li>▪ Efforts need to be made to meet national targets for biodiversity.</li> <li>▪ Reduce water and air pollution to protect biodiversity.</li> <li>▪ Prevent erosion of protected essential areas.</li> <li>▪ Educate children and their parents about our fragile natural environment.</li> <li>▪ There is a need to protect agricultural land from development pressures.</li> </ul> |                    |

## 3 Conclusion

---

The workshop highlighted a range of perceived key issues in the Vale of Glamorgan and devised objectives to tackle these issues. This provides the foundation on which the Council will write the Sustainability Objectives against which the LDP will be appraised. These will be outlined in the Sustainability Appraisal Scoping Report, which will be drafted for wider written consultation prior to the final approval of the Sustainability Appraisal framework. The Council will take these findings into consideration whilst developing the Local Development Plan and in undertaking the Sustainability Appraisal.

### Feedback from participants

Following the workshop discussions, the attendees were asked to complete feedback sheets to express their opinions on the stakeholder workshop to enable any necessary improvements to be made for future consultation exercises.

The overwhelming response from the participants was positive with 93% saying their overall experience of the day was neutral to excellent.

## Appendix B: Background Information

Vale of Glamorgan Local Development Plan – Sustainability Appraisal Workshop

### Background Information for Stakeholders

#### Sustainability Issues - OUR ECONOMY

| Indicator                         | Issues derived from baseline data collection   | Source   |
|-----------------------------------|--|--|
| Employment land supply and demand | <p>Range and choice of vacant allocated employment land in the Vale of Glamorgan for companies to locate.</p> <p>Allocated employment sites being developed for alternative uses e.g. Hotel, Retail etc.</p>   | <p>VOG UDP 1996-2011.</p> <p>Planning applications and enquiries.</p>  |
| Skills & Education                | <p>Overall good level of educational achievement in Vale.</p> <p>Isolated wards of underachievement, i.e. Court and Gibbonsdown.</p>   | <p>VOG, Local Area Economic Data Comparison (2005)</p> <p>WAG Baseline Data (2004)</p>   |
| Economic Activity                 | <p>High number of inactive retired people throughout the Vale, and pockets of economically inactive (unemployed) in Barry.</p> <p>Pressure on facilities for economically inactive population e.g. leisure / community facilities, transport, health care etc.</p> | <p>VOG, Local Area Economic Data Comparison (2005)</p> <p>NOMIS</p> <p>Census 2001</p> <p>NAW, Economic Inactivity In Wales 2003</p> |
| Employment patterns               | <p>Declining jobs in mining and quarrying, manufacturing, construction and public administration industries.</p> <p>More home working in rural areas than urban areas - Implications for transport and IT infrastructure.</p>                                      | <p>NOMIS</p> <p>Census 2001</p> <p>VOG, Local Area Economic Data Comparison (2005)</p>   |
| Agricultural Industry             | <p>The Vale has a significant agricultural industry – employment and land use implications.</p> <p>Decline in traditional agricultural industry alongside growth in farm diversification e.g. tourism, holiday lets etc.</p>                                       | <p>VOG, Local Area Economic Data Comparison (2005)</p> <p>Planning applications and enquiries.</p>                                   |

|                                   |   |  |
|-----------------------------------|---|--|
|                                   | Pressure for development on / adjoining agricultural land.  |  |
| Tourism Industry                  | <p>Growth in tourism has potential conflict with other land uses e.g. farming, and biodiversity, landscape designations etc.</p> <p>Tourism uses are generally accessed by the private motorcar, which causes harmful impacts upon the environment.</p>   | <p>VOG Council STEAM Report 2005</p> <p>Wales Tourist Board (2004)</p>   |
| Retail Industry                   | <p>Higher proportion of vacant retail units within Barry Town Centre than other town centres e.g. Cowbridge.</p> <p>Out-of-town shopping is increasing, especially for food goods.</p>  | VOG Surveys  |
| Income                            | <p>There are disparities between levels of income throughout the Vale. Gibbonsdown and Court ward salaries average approximately £22,000 less than Peterston-Super-Ely.</p> <p>Lowest 6 wards for Income are all in Barry.</p> <p>As a rural authority, the Vale of Glamorgan compares well with a lower % of low-income households than other rural Welsh authorities.</p> | <p>Local Government Association, CACI – PAYCHECK data (2004)</p> <p>Living and Working in Rural Wales (2004)</p> |
| Housing Need                      | <p>Shortage of temporary accommodation</p> <p>Shortage of affordable housing</p> <p>Pressure for new housing – potential conflict with other land uses and protective designations.</p>   | <p>JHLA Studies</p> <p>VOG, Local Housing Strategy 2004-9</p>  |
| Housing tenure                    | Fewer residents in rented accommodation than elsewhere in Wales and higher proportion of 'owned with a mortgage'.   | ONS, Derived from 2001 Census  |
| House Price                       | <p>House prices in the Vale of Glamorgan are 36% higher than the Welsh average for all house types.</p> <p>Pressure for housing development in Countryside and potential for town-cramming within settlements</p>   | <p>VOG, Local Housing Strategy 2004-2009</p> <p>Planning applications and enquiries</p>                          |
| Access to services                | Poor perception of access to services (e.g. local hospital) amongst residents, especially in the rural Vale.  | VOG Council Opinion Survey   |
| Movement                          | High level of outward movement for services, retail spend, employment etc., especially to Cardiff and Bridgend.   | NAW, Economic Inactivity In Wales 2003   |
| Car ownership and travel patterns | Growth in car ownership and car use year on year, which causes harmful impacts upon the environment.  | Census 1971-2001   |

|                       |   |   |
|-----------------------|---|---|
|                       | <p>Increased reliance upon private car for access to goods and services. Most people commute to work by car, which causes harmful impacts upon the environment.</p> <p>57% of all car trips are less than 5 miles.</p> <p>Link between increased car use and increased road accidents.</p>  | VOG Cycling Strategy (1997)   |
| Parking               | Parking problems and lack of car parking within town centres – high circulation of traffic and congestion in town centres.  | VOG Town Centre Parking Study (2005)                                      |
| Congestion            | Congestion is a daily problem at peak times at the two main gateways to the Vale of Glamorgan from Cardiff, i.e. Culverhouse Cross and Baron's Court junctions.   | VOG Council Surveys   |
| Bus Service provision | Some settlements are lacking adequate bus service provision: Aberthaw (West), Welsh St. Donats, Cog, Llancafán, Penmark, Colwinston, Corntown, Llanblethian, and Llanmaes.  | VOG, Assessment of Bus Service Provision (2005).                          |
| Train service         | No rail services in much of rural Vale and larger settlements of Sully, Cowbridge and Wenvoe.   | VOG Public Transport Guide 2006   |
| Cycling provision     | <p>Lack of designated cycle paths and parking in the Vale</p> <p>No network of designated cycle routes within the Vale.</p>   | <p>VOG Cycle Study Report (1997)</p> <p>Sewta Transport Survey (2005)</p> |
| Air Travel            | <p>Continued growth in air freight and passenger travel – implications for the environment.</p> <p>Potential pressure for airport related development – may conflict with other land uses / designations.</p> <p>Airport has a positive economic impact providing employment within the local economy.</p> <p>Access to airport for employees and passengers.</p> | Cardiff International Airport Master Plan (2006)                          |
| Freight               | Increase in total freight movements but decline in rail freight over long period.   | DFT Statistics  |

## Vale of Glamorgan Local Development Plan – Sustainability Appraisal Workshop

**Background Information for Stakeholders****Sustainability Issues - OUR SOCIETY**

| <b>Indicator</b>                  | <b>Issues derived from baseline data collection</b>   | <b>Source</b>                            |
|-----------------------------------|---|--|
| Population Change and Composition | <p>Higher proportion of children (aged 0-15 years) than UK average.</p> <p>Fewer persons aged 20-40 than UK average.</p> <p>Aging population in line with UK.</p> <p>Range, choice and type of housing.</p> <p>Provision of and access to community facilities / services particularly for young and old e.g. schools, libraries, health care, public transport.</p>                    | Census 2001                              |
| Ethnicity                         | <p>Predominantly White British, which reflects the overall picture in Wales.</p> <p>Provision of and access to community facilities / services.</p>   | Census 2001                              |
| Welsh Language                    | <p>Number of Welsh speakers is steadily increasing but figure is still low compared to rest of Wales.</p> <p>Cultural heritage and equality issues.</p>   | Census 2001                              |
| Approximated Social Grade         | <p>Large percentage of people in professional, managerial and administrative posts.</p> <p>Proportion of those working in skilled trades, plant and machine operation and elementary occupations (i.e. farming, quarrying etc) is amongst the lowest in Wales.</p> <p>Skill levels and training, barriers to learning, range and choice of employment opportunities.</p>                | Census 2001                              |
| Deprivation                       | <p>Most deprived wards in the Vale are Castleland and Gibbonsdown in Barry. (Deprivation refers to problems caused by a general lack of resources and opportunities. Measures are derived from several factors, namely income, employment, health, education, housing, access to services and environment).</p> <p>Access to employment, shops, cultural and leisure opportunities.</p> | Welsh Index of Multiple Deprivation 2005 |
| Housing Need                      | House prices have risen sharply in the last 5 years in line with UK.  | VOG Local Housing Strategy 2004-2009     |

|                                       |   |   |
|---------------------------------------|---|---|
|                                       | <p>Average house prices in the Vale are significantly greater than Wales average.</p> <p>Shortage of affordable housing, especially in Rural Vale.</p> <p>Increase in the total number of households as average household size falls.</p> <p>Pressure for new housing- potential conflict with other land uses and protective designations.</p>   |   |
| Housing Conditions                    | <p>Low proportion of unfit housing compared to the rest of Wales although pockets of high percentages of unfit houses in Barry.</p> <p>Relationship between housing conditions and health/wellbeing.</p>  | Welsh House Condition Survey 1998   |
| Access to Services / Public Transport | <p>Access to local services (e.g. hospital) is perceived as poor, particularly in the Rural Vale.</p> <p>11 settlements have lower bus service provision than the recommended level in the Local Authority Bus Strategy (LABS).</p> <p>Much of the Rural Vale together with some larger settlements such as Cowbridge, Sully and Wenvoe are not served by rail.</p> <p>High percentages of journeys are made by car.</p> <p>Few designated cycle paths and cycle parking facilities.</p> <p>Pollution, congestion, road safety, social exclusion issues evident</p> | <p>VOG Council and LHB, Health, Social Care and Well being Assessment (Draft) 2003</p> <p>VOG Council Opinion Survey 2003</p> <p>VOG Council, Assessment of Bus Service Provision 2005</p> <p>Sewta Transport Survey 2005</p> |
| General Health                        | <p>Personal health generally perceived as being good but pockets of poor health perception in Penarth, Barry, St.Athan, St. Brides and Hensol (which reflects former Hensol hospitable operational in 2001).</p> <p>Provision and access to health and leisure facilities.</p>  | Census 2001   |
| Crime                                 | <p>Lower levels of reported crime than national average but perception of crime remains high.</p>   | <p>Home Office Crime Statistics.</p> <p>Vale of Glamorgan Council</p>   |

|  |  | Crime and Disorder Strategy   |
|--|--|---|
| Skills and Education                               | <p>Overall good level of education achievement in the Vale.</p> <p>Isolated wards of underachievement e.g. Court and Gibbonsdown.</p> <p>High concentrations of full time students in east and west Vale.</p> <p>Lifelong learning, student accommodation and social exclusion.</p>  | <p>VOG, Local Area Economic Data Comparison 2005</p> <p>WAG baseline data</p> |
| Arts and Cultural Provision                        | <p>Relatively good provision of local galleries, museums, castles, theatres etc.</p> <p>Access to and protection of existing arts and cultural facilities.</p>   | VOG Leisure and Tourism department  |
| Recreational Land Provision – Parks and Open Space | <p>Lack of formal Public Open space (such as parks and playing fields) but a large amount of informal open space (such as the open countryside, coastal strips and woodlands).</p> <p>However access is limited in some areas to informal open space placing pressure on the limited formal Public Open spaces.</p> <p>Health and wellbeing benefits attributed to access to open space.</p> | Vale of Glamorgan Council   |

## Vale of Glamorgan Local Development Plan – Sustainability Appraisal Workshop

**Background Information for Stakeholders****Sustainability Issues - OUR ENVIRONMENT**

| Indicator                      | Issues derived from baseline data collection   | Source  |
|--------------------------------|--|---|
| <b>Natural Environment</b>     |  |   |
| Nature Conservation            | <p>Large number and range of sites important for nature conservation including International, National and Local sites e.g. Special Areas of Conservation, SSSIs, Nature Reserves.</p> <p>Threat from development and informal recreation.</p>   | CCW, JNCC, Vale of Glamorgan Local Biodiversity Action Plan.  |
| Development in the Countryside | <p>Continued pressure for development in open countryside especially around the urban fringe.</p> <p>Loss of flora and fauna, landscape, views, high quality agricultural land, public rights of way, informal recreational space, light pollution, road traffic etc.</p>  | Planning enquiries and applications   |
| Agricultural Land              | <p>Large proportion of agricultural land within the Vale of Glamorgan.</p> <p>Pressure for development on agricultural land, especially around the urban fringe.</p> <p>Farm diversification, removal of agricultural land from farming to other uses.</p>   | <p>Digest of Welsh Local Statistics 2004.</p> <p>Planning applications and enquiries.</p>                         |
| Recreation                     | <p>Changing leisure habits have brought about an intensification of use of existing sites for informal for recreation. Inappropriate use and management issues on common land. Good Public Rights of Way Network.</p> <p>Threats to recreational sites, designated site(s) and habitats e.g. Glamorgan Heritage Coast. Litter and vandalism.</p> | <p>Vale of Glamorgan Council.</p> <p>Vale of Glamorgan Council Register of Common Land</p>                        |
| Public Open Space              | <p>Lack of public open space within many areas of the Vale of Glamorgan.</p> <p>Development pressure on existing areas of public open space.</p> <p>Issues for recreation, health and well-being, flora and fauna.</p>   | <p>Adopted Vale of Glamorgan Unitary Development Plan 1996 – 2011</p> <p>Planning applications and enquiries.</p> |
| Minerals                       | Continued demand for minerals supply throughout South Wales. Vale of Glamorgan area is a net supplier of minerals and aggregates to the region.  | South Wales Regional Aggregates Working Party, Annual Report (2004)   |

|                          |   |  |
|--------------------------|---|--|
|                          | <p>Long-term demand for quarry extensions and/or new sites, need to ensure continuance of supply.</p> <p>Impact upon the environment e.g. noise, visual intrusion, and loss of agricultural land, vehicle movements.</p>  |  |
| Energy                   | <p>Increase in energy consumption. Over reliance on energy generated from fossil fuels with low levels retrieved from renewable energy sources.</p> <p>Impact upon the global environment. Resource depletion. Implications for energy efficient construction.</p>  | DTI, Vale of Glamorgan Council.  |
| Flooding                 | <p>A number of rural villages and areas of main settlements within the Vale of Glamorgan at risk of flooding.</p> <p>Damage to property and sterilisation of land for development. Minimal risk to life and disruption to way of life.</p>  | Environment Agency Development Advice Maps (2004).   |
| Water Quality            | <p>Positive general increase in bathing water and river water quality at monitored sites in the Vale of Glamorgan.</p>  | VOG Council – Bathing Water Archive<br>Environment Agency  |
| Air Quality              | <p>Air quality generally good in most of the Vale however pockets of air pollution especially within the eastern Vale.</p> <p>Levels of road traffic, congestion, location of development.</p>  | Air quality archive.   |
| Transport                | <p>Continued reliance upon the private car for access to services, employment and recreation. Congestion of major roads in eastern Vale.</p> <p>Increasing use of air travel for business, pleasure and freight.</p> <p>Continued use of road for movement of freight.</p> <p>Impacts upon the environment through air pollution, noise, congestion.<br/>Impacts on health and well being.</p>  | Census (2001)<br>VOC Council, Report of Study – Local Area Economic Data Comparison (2005).<br><br>Cardiff International Airport Master Plan (2006). |
| <b>Built Environment</b> |   |  |
| Historic Environment     | <p>Large number of historic buildings, designations and features of historic importance within the Vale of Glamorgan e.g. Parks &amp; Gardens, Conservation Areas, Listed Buildings, Ancient Monuments etc.</p> <p>General degradation of historic environment through piecemeal development and infrastructure provision e.g. traffic schemes, small-scale development, overhead power lines etc.</p> <p>Continued pressure for development.</p> | CADW, Vale of Glamorgan Council.   |

|                        |   |  |
|------------------------|---|--|
| Housing Development    | <p>Pressure for housing development. Insensitive infilling and development, especially within rural villages.</p> <p>Loss of character of rural villages and impact upon services.</p>  | Planning applications and enquiries.                                 |
| Brownfield Development | <p>The majority of housing (60%) in recent years has been built on brownfield sites.</p> <p>Dwindling resource, increased pressure on Greenfield sites.</p>   | JHLA Studies 2001 - 2005   |
| Waste                  | <p>Increased levels of municipal waste produced year on year despite increases in level of recycling. Increasing pressure on existing disposal sites. Difficulty in finding alternative disposal sites. No landfill sites within the Vale of Glamorgan.</p> | Municipal Waste Management Strategy for the Vale of Glamorgan (2004) |

## Sustainability Objectives - OUR ECONOMY

## Appendix C: Workshop Agenda

---

- 9.00 Arrival, Registration and Coffee**
- 9.15 Welcome and Introduction to the Vale of Glamorgan LDP**  
Rob Thomas – Head of Planning & Transportation, Vale of Glamorgan Council
- 9.30 Question & Answer**
- 9.35 Introduction to Sustainability Appraisal**  
Specialist SA Consultants - Hyder Consulting
- 9.50 Question & Answer**
- 10.00 Group Discussions – Sustainability Issues**  
Stakeholders divided into areas of interest, i.e. Our Economy, Our Society or Our Environment.
- 11.15 Break – Tea and Coffee**
- 11.30 Group Discussions – Sustainability Objectives**  
Stakeholders divided into areas of interest, i.e. Our Economy, Our Society or Our Environment.
- 12.45 Close and way forward.**  
Rob Thomas – Head of Planning & Transportation, Vale of Glamorgan Council  
**Buffet lunch.**

## Group Discussion 1 – Sustainability Issues

### Instruction sheet

The discussion should be informed by the baseline information provided as well as your own knowledge of the issues as they affect the Vale of Glamorgan.

1. Use flip chart and pens to 'mind-map' ideas of what the sustainability issues are for the Vale of Glamorgan for your topic area (Approx 30 minutes).

If basing issues on your own experience please say so and provide names.

2. Decide amongst you what the main five sustainability issues are and write them on the sheet provided. (Approx 15 minutes)

If you feel there are more than five main issues – please add more.

3. Discuss the main issues and determine who they affect and when / where they happen. (Approx 30 minutes)

## Group Discussion 2 – Sustainability Objectives

*“An objective is a statement of what is intended, specifying a desired direction of change.” (ODPM, SA Guidance 2005)*

### Instruction sheet

The discussion should be informed by the policies, plans and programmes overview provided as well as your earlier discussions about what the main sustainability issues for the Vale of Glamorgan are.

1. Use the flip charts and pens to discuss what should be done about the five main sustainability issues raised in Discussion 1. Try to write aims / objectives between you. (Approximately 45 minutes)

E.g. If a trend shows a noticeable increase in an issue – should we seek to promote the increase, halt the increase, or reverse the trend?

*Think about whether the objectives you derive are:*

- *Consistent with the national and local policy context (from the PPP review)?*
- *Achievable within the land use planning framework?*

2. Once you have agreed the main objectives think about how we could measure these objectives to monitor the effects of the Plan (i.e. what indicators / targets)? (Approximately 30 minutes)

VALE OF GLAMORGAN  
LOCAL DEVELOPMENT PLAN

SUSTAINABILITY  
APPRAISAL  
OFFICER  
WORKSHOP

REPORT OF CONSULTATION

October 2006

**Executive Summary**

The Sustainability Appraisal (incorporating Strategic Environmental Assessment) process is important in ensuring the Vale of Glamorgan Local Development Plan (LDP) is developed in accordance with the principles of sustainable development. The first phase of SA is to establish the context and this is done through consultation with stakeholders.

The SA officer workshop was held on 19<sup>th</sup> October 2006 involving officers representing a range of service areas across the Vale of Glamorgan Council (see Appendix D). The aim of the workshop was to discuss the issues and objectives raised by the external stakeholders at an earlier workshop and their relevance to the Vale of Glamorgan. This was also an opportunity to add any other relevant issues, which had not been previously raised. Issues and objectives are addressed in Chapters 2 and 3 of the report.

On the whole, the officers present agreed with the views of the stakeholders with only a few anomalies. There were several suggestions with regards to new objectives that are listed in Chapter 4 of this report.

Strategic Environmental Assessment:  
Officer Workshop

**1.0 Introduction**

- 1.1 This report summarises the findings of the Sustainability Appraisal (SA) Officer Workshop held on 19<sup>th</sup> October 2006 at the Civic Offices, Barry. This was following the external stakeholder workshop held on 11<sup>th</sup> October 2006 at The YMCA Hub, Barry.
- 1.2 The previous workshop had involved various external stakeholders in setting the context for the sustainability appraisal. It was split into two group discussions; the first discussion allowed the attendees to air their views on what they considered to be sustainability issues affecting the Vale of Glamorgan. The second discussion asked the attendees to consider what could be done about those issues with a view to forming the SA objectives.
- 1.3 The Officer Workshop followed a similar format and took the issues raised by the stakeholders and allowed officers from a diverse range of service areas within the Council, the opportunity to agree or disagree with the issues / objectives raised by the external stakeholders and given an opportunity to add additional issues.

## 2.0 Sustainability Issues

2.1 The group considered the issues that were raised in the stakeholder workshop and attendees were asked to comment on their relevance to the Vale of Glamorgan. The attendees were also able to expand on and make additional notes as necessary. The issues raised at the external stakeholders workshop are listed at Appendix A, and a graphical representation of the officer's views can be seen at Appendix C. The summary of issues is shown below.

### 2.2 **Transport and Accessibility Issues Congestion, traffic, lack of public transport and parking, environmental impact of transport**

2.2.1 All of the attendees at the workshop agreed that transport and accessibility are a sustainability issue. Many of the issues raised were duplicated by several of the officers. The key issues raised can be categorised as follows:

- Availability of public transport particularly in the rural Vale.
- Effects of growth in private car use.
- Car parking and infrastructure provision.
- Congestion.
- Environmental impact of transport.
- Potential impact on land values and development opportunities.

### 2.3 **Lack of Housing (especially affordable) Increasing housing demand from demographic change, increasing house prices and lack of affordable housing**

2.3.1 All of the attending officers agreed that lack of housing is an issue but one stated that was probably an issue but they had "...no personal knowledge of this". A number of officers mentioned that they felt this was a national issue. The main issues regarding housing and the lack of in the Vale are summarised below:

- House prices are high in the Vale particularly the rural Vale.
- Town centre and brownfield redevelopment.
- Pressure for new housing development.
- Changing demographic structure.
- Urban/rural shortage of affordable housing.
- Market forces and patterns dictating high prices.

### 2.4 **Land Use A Self-Reliant Vale or Commuter Belt? Lack of facilities / services/ employment etc. within villages**

2.4.1 62% of the attendees agreed that land use is a sustainability issue, 17% disagreed and 21% provided no firm answer either way. The main issues are summarised below:

- Lack of employment and services provision in rural Vale.
- Some major employment sites but need for more local elements
- Individual choice to locate – it's a regional issue
- The prospect of home working
- Villages should be maintained

- Need for self-reliance v commuter belt for Cardiff/Bridgend
- Need to develop both
- Changing expectations of citizens.
- Maximise use of brownfield sites

## **2.5 Employment and Location Poor accessibility to employment in the Vale**

2.5.1 54% of the attendees agreed that employment and location is a sustainability issue, 29% disagreed and 17% provided no firm answer either way. The main issues are summarised below:

- Low unemployment rate in the Vale.
- Limited employment opportunities in rural Vale.
- Reliance on Cardiff/Bridgend as an employment location.
- Travel to work issues – reliance on car.
- Importance of St Athan and Rhoose

## **2.6 Economic Change Vale needs to be able to respond to unpredictable economic change**

2.6.1 88% of the attendees agreed that economic change is a sustainability issue, 4% disagreed and 8% provided no firm answer either way. The main issues are summarised below:

- The impact of service provision.
- Regional manner of economic change.
- Flexibility especially concerning developing technologies.
- Reservations on how LDP can achieve this.
- Need to attract future growth/development

## **2.7 Tourism Missed opportunity for more tourism (economic growth) in Vale.**

2.7.1 79% of the attendees agreed that tourism is a sustainability issue, 13% disagreed and 8% provided no firm answer either way. The main issues are summarised below:

- Lack of quality facilities for visitors.
- Opportunities to exploit – e.g. Heritage Coast, Historic Environment.
- Development of a marketing scheme.
- Focus on maximum value added type.
- Over exploitation could cause further harm.
- Need to be balanced against aspiration of local community

## **2.8 Health Lack of care and health facilities throughout Vale.**

2.8.1 46% of the attendees agreed that health is a sustainability issue, 25% disagreed and 29% provided no firm answer either way. The main issues are summarised below:

- Aging population
- Split between NHS trusts
- Trend towards centralised services
- Reliance on facilities in Cardiff/Bridgend

- Many officers (15) felt unable to comment on this issue.

## 2.9 **Education Lack of educational facilities – conversion of schools to alternative uses.**

2.9.1 29% of the attendees agreed that education is a sustainability issue, 46% disagreed and 25% provided no firm answer either way. The main issues are summarised below:

- Smaller class sizes.
- Improved provision for pre-school children.
- Alternative (community) use of schools during non-school periods.
- Quality of school buildings
- Pressure on school sites from developers.
- Many officers (12) felt unable to comment on this issue.

## 2.10 **Disability/Accessibility Issues Not enough provision for special needs groups (e.g. Life-time homes, railway stations, public buildings, insufficient disabled parking etc)**

2.10.1 54% of the attendees agreed that disability/accessibility is a sustainability issue, 25% disagreed and 21% provided no firm answer either way. The main issues are summarised below:

- Aging population.
- Particularly at transport facilities.
- Several officers identified that the issue is addressed by legislation.
- Quality of sheltered accommodation.

## 2.11 **Lack of Sustainable Communities Need for rural employment, development and housing**

2.11.1 75% of the attendees agreed that a lack of sustainable communities is a sustainability issue, 8% disagreed and 17% provided no firm answer either way. The main issues are summarised below:

- Need for flexibility.
- Vitality of towns/village at risk.
- Particular impact on rural Vale.
- Concentration of resources in urban areas.
- Community development
- Realism due to commuter nature of Vale.
- Requirement for services v the need to protect rural Vale.
- Current rural employment under pressure. Diversification.

## 2.12 **Deprivation Isolated areas of deprivation in Barry and Penarth**

2.12.1 92% of the attendees agreed that deprivation is a sustainability issue, no one disagreed and 8% provided no firm answer either way. The main issues are summarised below:

- Communities first areas.
- Targeted focus of resources in these areas.
- Some officer's thought that improvements have been made already, perhaps focus should switch to groups rather than areas.
- Gentrification of Barry may cause conflict.

- Several officers agree it is an issue but did not comment further.

### 2.13 **Lack of Community Spirit Missed potential to work together as a community to improve things**

2.13.1 42% of the attendees agreed that lack of community spirit is a sustainability issue, 25% disagreed and 33% provided no firm answer either way. The main issues are summarised below:

- Dependant on location (rural/urban).
- Isolation of some communities.
- Make better use of community facilities.
- Involve community in decision-making.
- Several officers agree it is an issue but did not comment further.

### 2.14 **Pressure from Development Protection of open space (urban and rural) from development**

2.14.1 92% of the attendees agreed that pressure from development is a sustainability issue, no one disagreed and 8% provided no firm answer either way. The main issues are summarised below:

- Pressure on open spaces/countryside.
- Need to balance against other issues.
- Encourage brownfield site development
- Future role of Development Control
- Wider impact of development – e.g. transport, health etc
- Several officers agree it is an issue but did not comment further.

### 2.15 **Waste disposal and pollution Fly-tipping, waste disposal, gaseous emissions, waste water**

2.15.1 88% of the attendees agreed that waste disposal and pollution is a sustainability issue, 4% disagreed and 8% provided no firm answer either way. The main issues are summarised below:

- Regional issue
- Lack of landfill sites in the Vale.
- Need to promote recycling.
- Reduce waste and reliance on fossil fuels
- Need for Environment Agency involvement
- Economic benefits of chemical industry in Vale.
- Waste processing treatment
- Fly tipping issues
- Noise pollution is also an issue
- More enforcement required

### 2.16 **Cultural Heritage Threatened by development pressure**

2.16.1 71% of the attendees agreed that cultural heritage is a sustainability issue, 21% disagreed and 8% provided no firm answer either way. The main issues are summarised below:

- To include culture in general – e.g. theatres, galleries etc.
- Some key elements – e.g. historic towns.
- Good policies in place at present.

- There is now increased awareness.
- Several officers agree it is an issue but did not comment further.

## **2.17 Climate Change Causes and consequences**

2.17.1 All of the attendees agreed that climate change is a sustainability issue. The main issues are summarised below:

- Concerns in floodplains and coastal locations.
- Central Government matter but LDP can play a part.
- A need to be proactive.
- Is the LDP able to deliver this?
- Need to upgrade older buildings.
- Several officers agree it is an issue but did not comment further.

## **2.18 Open Spaces Lack of management and maintenance**

2.18.1 54% of the attendees agreed that open spaces are a sustainability issue, 17% disagreed and 29% provided no firm answer either way. The main issues are summarised below:

- Need to prioritise.
- Attracts fly tipping.
- Encourage more open spaces in new developments.
- Resource issue.
- Small pockets rather than a Vale wide issue.
- Access to open space – e.g. Heritage Coast.
- Bring park managers.

## **2.19 Wildlife, Biodiversity and Water Threatened by development pressure**

2.19.1 92% of the attendees agreed that are Wildlife, Biodiversity and Water a sustainability issue, 4% disagreed and 4% provided no firm answer either way. The main issues are summarised below:

- Extent legislation and EIAs cover this.
- Pressure from development
- Dredging off coast
- Balance is needed.
- Treat as a resource in its own right.

**3.0 Sustainability Objectives**

3.1 The second phase of the workshop was to consider the objectives that were established in stakeholder workshop and to make comment on them, and make additions as necessary. The objectives can be seen at Appendix B. The summary of issues is below.

**3.2 Transport and Accessibility issues**

3.2.1 On the whole the objectives were agreed with by the Officers, however, the following points were raised:

- To be considered as a core issue.
- “Too many road safety measures increase traffic congestion”.
- Congestion is a localised issue.
- Infrastructure to include parking provision.
- Improvements to public transport provision.
- Reliability and efficiency.
- “Cycling is not well served or comprehensively considered”.
- Improvements to facilities for walkers. Footpaths and pavements.
- Sustainable transport must be quality not “...more of the same”.
- Air Quality Management Areas

**3.3 Lack of Housing (especially affordable)**

3.3.1 The following points were raised in relation to lack of housing:

- Demand is a key issue
- “...’demand’ in VOG insatiable” so an increase would not be beneficial.
- Regional demand could be met by the Vale of Glamorgan, which would trigger growth, but this might not solve affordability issues.
- Regeneration/redevelopment of redundant buildings/brownfield sites.
- Locate near public transport nodes.
- Locate near ‘cottage industry’ and allow for home working.
- Population moving out of Vale due to lack of affordable housing.
- New homes provided should be sustainable in nature.
- Affordable housing as a separate objective.
- Mixed tenure developments
- Locating new housing near existing services etc may exclude the rural Vale.

**3.4 Land Use**

- 3.4.1 The following points were raised in relation to land use:
- Promote Vale but accept that commuters are inevitable.
  - Viability of local services over long term.
  - Respect the character of any settlement when providing new services.
  - Encourage regeneration and reduce 'leakage' though retail provision.
  - Balance of protecting rural Vale against development pressure from large conurbation.
  - Need for Regional overview.
  - One officer thought that both objectives were irrelevant.
  - Loss of facilities due to economic viability issues.

**3.5 Employment and Location**

- 3.5.1 The following points were raised in relation to land use:
- Interlinked with Housing, Transport and Land Use.
  - Balance of protecting rural Vale against need to provide employment opportunities.
  - Difficulties in ensuring take up of employment opportunities.
  - Accessibility of the motorway.
  - Lorry/rail transfer facilities.
  - Should be viewed in terms of character of local employment.
  - Diverse range of employment.
  - Encourage inward investment.

**3.6 Economic Change**

- 3.6.1 The following points were raised in relation to economic change:
- Use of technology should be encouraged.
  - Care not to compromise SEA.
  - Difficulties in achieving this over the plan period.
  - Should not be concentrated too locally.

**3.7 Tourism**

3.7.1 The following points were raised in relation to tourism:

- Resource issue of enhancing public transport for tourism purposes.
- Improvements to accessibility in rural areas.
- Care should be taken to ensure the special interest of the area is maintained.
- Tourism by its nature may be inherently 'unsustainable'
- Some tourism facilities are in 'unsustainable locations'.
- Promotion of eco-tourism.
- Concentrate resources on more urban tourism facilities where economic regeneration is needed most such as Barry Island, or historic towns.
- Ensure additional employment
- Barry Island could be marketed as a regional (SE Wales) asset.

**3.8 Health**

3.8.1 The following points were raised in relation to health:

- More than a land use issue.
- Difficult to achieve through land use policy.
- Resource limitations.
- Access to primary care should be ensured.
- Targeting provision on need.
- Open space and opportunities for 'healthy' activities should be increased.
- Regeneration of run down areas.

**3.9 Education**

3.9.1 The following points were raised in relation to education:

- Relevance to land use planning was questioned.
- Improved facilities and management.
- Community focused establishments.
- Pressure should be applied to developers to provide educational facilities.
- Resource limitations.
- All levels – all ages.
- Potential for a school of excellence for top achievers.

**3.10 Disability/Accessibility Issues**

3.10.1 The following points were raised in relation to disability and access issues:

- May be dependant on location of facilities.
- Statutory duty and guidance in place.
- Better provision of sheltered accommodation.

**3.11 Lack of Sustainable Communities**

3.11.1 The following points were raised in relation to the lack of sustainable communities issues:

- A strategic option to adopt.
- Dependant on several other issues being controlled. Eg transport, development in the countryside etc.
- Encourage mixed developments.
- Issue of commuter belt status of the Vale.
- Difficulties in achieving this in rural Vale.
- Fundamental issue is reducing the need to travel.

**3.12 Deprivation**

3.12.1 The following points were raised in relation to deprivation issues:

- Should be targeted not just by area but also by group.
- Extent of deprivation is small but significant
- Linked to overall quality of life, health and well-being.
- Encourage urban regeneration.

**3.13 Lack of Community Spirit**

3.13.1 Views ranged from “crucial” to “not a land use planning issue” whilst some officers thought that this was an ambiguous objective. The following points were raised in relation to a lack of community spirit issues:

- Community facilities/events with capacity building activities for local groups.
- Involving the community in decision-making.
- Improved ‘ownership’ of communities e.g. best kept village/area etc.
- A forum for the community – although wariness of an ‘alternative agenda’ was raised by one officer.

**3.14 Pressure from Development**

3.14.1 The following points were raised in relation to pressure from development issues:

- A key policy.
- Encourage brownfield developments although the number of sites is diminishing.
- Establish difference between sensitive areas and greenfield sites.
- Minor rural developments can contribute to other sustainability objectives e.g. construction of a village shop.
- Protect pockets of green space to maintain open space in built environment.

**3.15 Waste disposal and pollution**

3.15.1 The following points were raised in relation to waste disposal and pollution issues:

- Landfill in the Vale is not the answer.
- Encourage local produce, which uses less packaging/transport.
- Waste treatment.
- One response to location of land fill sites was “NO, NO, NO!!”
- Education to promote “reduce - reuse - recycle”.
- Communal recycling facilities in new developments.

**3.16 Cultural Heritage**

3.16.1 The following points were raised in relation to cultural heritage issues:

- Importance role of Development Control.
- Link to tourism – footpath/cycle route.
- Existing listed buildings policies are strong.
- Role of ‘County Treasures’ as a local list and opportunity to protect through policy.
- Important for tourism, could be linked to eco-tourism.
- Can be widened to include ‘culture’ such as theatre and the arts.
- Need to ensure degradation is prevented

**3.17 Climate Change**

3.17.1 The following points were raised in relation to climate change issues:

- Higher level strategic policies required. E.g. Building regulations and planning considerations that is linked to many other issues.
- Need to address small-scale renewables e.g. solar panels, wind turbines. Particularly an issue in conservation areas – the new satellite dish?
- Developers should be encouraged to build energy efficient/eco-homes.
- Encouragement of alternatives to travel by private car.
- Flood protection

**3.18 Open Spaces**

3.18.1 The following points were raised in relation to open space issues:

- Resource issue for maintenance and promotion.
- Incorporate into biodiversity balanced with recreational needs.
- Opportunity for community ownership of smaller, local open spaces.
- Use school playing fields as an open space resource.
- Linked to health and wellbeing
- Better provision within new developments.

**3.19 Wildlife, Biodiversity and Water**

3.19.1 The following points were raised in relation to wildlife, biodiversity and water issues:

- Buffer zones concept already in place through countryside policy?
- Buffer zones should only be used where essential.
- Restrict development that causes harm.
- Natural Environment and Rural Communities (NERC) Act 2006 to provide guidance.
- Wildlife corridors just as important as buffer zones – to include hedgerows, roadside verges, streams etc.
- Protection of existing trees and inclusion of new trees in new developments.
- Other statutory bodies deal with water and air pollution.
- Increasing buffer zone sizes may shift problems elsewhere rather than dealing with them.

#### 4.0 New Issues and Objectives

- 4.2 The following have been identified as potential new objectives:
- |  |  |
|--|--|
| Transport and Accessibility  | <ul style="list-style-type: none"> <li>• The use of Air Quality Management Areas in congestion 'hot spots'.</li> </ul>   |
| Lack of Housing  | <ul style="list-style-type: none"> <li>• Definition of demand required.</li> <li>• Make beneficial use of brownfield sites where possible.</li> <li>• Encourage mixed use and mixed tenure developments.</li> </ul>  |
| Land Use   | <ul style="list-style-type: none"> <li>• Maintain balance between development and intrinsic value of the Vale.</li> </ul>  |
| Employment and Location  | <ul style="list-style-type: none"> <li>• Maintain balance between development and intrinsic value of the Vale.</li> <li>• Encourage inward investment.</li> <li>• Encourage use of new technologies.</li> <li>• Protect, enhance and promote as regional asset.</li> <li>• New tourism uses to include eco-tourism.</li> </ul> |
| Economic Change<br>Tourism   | <ul style="list-style-type: none"> <li>• Role of urban regeneration in health and wellbeing.</li> <li>• Community role for schools facilities for all members of the community.</li> <li>• In line with statutory guidance.</li> </ul>   |
| Health   |  |
| Education  |  |
| Disability/Accessibility<br>Lack of Sustainable<br>Communities<br>Deprivation<br>Lack of Community Spirit<br>Pressure from Development | <ul style="list-style-type: none"> <li>• Encourage rural developments that contribute to sustainability of the rural Vale.</li> <li>• Delete landfill in the Vale.</li> </ul>  |
| Waste Disposal and<br>Pollution<br>Cultural Heritage   | <ul style="list-style-type: none"> <li>• Promote culture as a whole in the Vale. To include the arts etc.</li> </ul>   |
| Climate Change<br>Open Spaces  | <ul style="list-style-type: none"> <li>• Incorporate open space and biodiversity.</li> </ul>   |

Strategic Environmental Assessment:  
Officer Workshop

- 14 -

Wildlife, Biodiversity and  
Water

- Adopt guidelines from Natural Environment and Rural Communities (NERC) Act 2006

4.3 Many of the objectives by their nature are crosscutting and will apply to more than one issue. This will obviously need to be considered further in the SA process.

## **Sustainability Issues from Stakeholder Workshop**

### **Transport and Accessibility**

Congestion, traffic, lack of public transport and parking, environmental impact of transport

### **Lack of housing (especially affordable)**

Increasing housing demand from demographic change, increasing house prices and lack of affordable housing

### **Land Use**

A Self-Reliant Vale or Commuter Belt? Lack of facilities / services/ employment etc. within villages

### **Employment and Location**

Poor accessibility to employment in the Vale

### **Economic Change (Unpredictable)**

Vale needs to be able to respond to unpredictable economic change

### **Tourism**

Missed opportunity for more tourism (economic growth) in Vale.

### **Health**

Lack of care and health facilities throughout Vale.

### **Education**

Lack of educational facilities – conversion of schools to alternative uses.

### **Disability / Accessibility Issues**

Not enough provision for special needs groups (e.g. Life-time homes, railway stations, public buildings, insufficient disabled parking etc)

### **Lack of Sustainable Communities**

Need for rural employment, development and housing

### **Deprivation**

Isolated areas of deprivation in Barry and Penarth

### **Lack of Community Spirit**

Missed potential to work together as a community to improve things

### **Pressure from Development**

Protection of open space (urban and rural) from development

### **Waste disposal and pollution**

Fly-tipping, waste disposal, gaseous emissions, waste water

### **Cultural heritage**

Threatened by development pressure

**Climate Change**

Causes and consequences

**Open Spaces**

Lack of management and maintenance

**Wildlife, biodiversity, water**

Threatened by development pressure

## Sustainability Objectives from Stakeholder Workshop

| Issue   | Objective  |
|---|--|
| <b>Transport and Accessibility</b>                      | <ul style="list-style-type: none"> <li>• Reduce congestion</li> <li>• Reduce need to travel</li> <li>• Promote sustainable travel alternatives</li> <li>• Improve existing infrastructure</li> <li>• Improve safety on roads</li> </ul>                  |
| <b>Lack of housing (especially affordable)</b>          | <ul style="list-style-type: none"> <li>• Increase supply of housing to meet demand</li> <li>• Locate new housing near employment, transport, services and facilities.</li> </ul>   |
| <b>Land Use (A Self-reliant Vale or Commuter Belt?)</b> | <ul style="list-style-type: none"> <li>• Create a more self-reliant economy, so that the Vale does not act merely as a commuter belt for Cardiff</li> <li>• Provide more facilities within the settlements to reduce the need to go elsewhere</li> </ul> |
| <b>Employment and Location</b>                          | <ul style="list-style-type: none"> <li>• Increase employment opportunities where there is demand</li> <li>• Locate employment near existing transport links and near communities</li> </ul>  |
| <b>Economic Change (Unpredictable)</b>                  | <ul style="list-style-type: none"> <li>• Need to acknowledge and respond to economic and market changes</li> <li>• Need flexibility to respond to unexpected changes during the Plan period</li> </ul>   |
| <b>Tourism</b>  | <ul style="list-style-type: none"> <li>• Protect and enhance existing tourism uses</li> <li>• Provide for new tourism uses where they are accessible by public transport</li> </ul>  |
| <b>Health</b>   | <ul style="list-style-type: none"> <li>• To improve health and well-being of the Vale's community</li> <li>• To improve access to health facilities, green spaces, footpaths etc.</li> </ul>   |
| <b>Education</b>  | <ul style="list-style-type: none"> <li>• Improve educational achievement at all levels</li> </ul>  |
| <b>Disability / Accessibility Issues</b>                | <ul style="list-style-type: none"> <li>• Improve access for all users to public facilities, services, transport, housing etc.</li> </ul>   |
| <b>Lack of Sustainable Communities Deprivation</b>      | <ul style="list-style-type: none"> <li>• Provide integrated housing, employment and services throughout the Vale</li> <li>• Reduce deprivation in need areas through focussed investment and support</li> </ul>  |
| <b>Lack of Community Spirit</b>                         | <ul style="list-style-type: none"> <li>• Encourage a sense of community throughout the Vale to empower local communities to make positive improvements</li> </ul>  |
| <b>Pressure from Development</b>                        | <ul style="list-style-type: none"> <li>• Target development to suitable areas, prioritise brownfield sites and protect sensitive areas</li> </ul>  |
| <b>Waste disposal and pollution</b>                     | <ul style="list-style-type: none"> <li>• Ensure sensitive and local location of landfill sites</li> <li>• Encourage waste minimisation</li> </ul>  |

| <b>Issue</b>   | <b>Objective</b>   |
|--|--|
| <b>Cultural heritage</b>   | <ul style="list-style-type: none"> <li>• Protect and enhance cultural heritage sites</li> <li>• Encourage appropriate re-use of heritage buildings</li> </ul>  |
| <b>Climate Change</b>  | <ul style="list-style-type: none"> <li>• Promote the cultural heritage of the Vale</li> <li>• Reduce the causes and protect against the consequences of climate change</li> <li>• Promote renewable energy, sustainable drainage, eco-homes etc.</li> </ul>        |
| <b>Open Spaces</b><br>Lack of management and maintenance                   | <ul style="list-style-type: none"> <li>• Maintain, protect and enhance existing recreation facilities</li> <li>• Improve access to open spaces etc</li> </ul>  |
| <b>Wildlife, biodiversity, water</b><br>Threatened by development pressure | <ul style="list-style-type: none"> <li>• Protect and enhance all designated sites and increase buffer zones around them</li> <li>• Reduce water and air pollution to protect biodiversity</li> <li>• Spread awareness and educate about sensitive sites</li> </ul> |

# LOCAL DEVELOPMENT PLAN

## SUSTAINABILITY APPRAISAL

### APPROVED SCOPING REPORT

July 2007

**The Vale of Glamorgan Local Development Plan**  
**Sustainability Appraisal**  
**Approved Scoping Report**

**JULY 2007**

## Executive Summary

In January 2007, the Vale of Glamorgan Council formally commenced work on its Local Development Plan (LDP), which will set out the Council's land use strategy and policies for planning and development in the Vale of Glamorgan from 2011 to 2026.

As part of the LDP preparation the Council is required to undertake a Sustainability Appraisal (SA) of the Plan incorporating Strategic Environmental Assessment (SEA). The overall aim of the SA is to ensure that the LDP's policies and proposals are consistent with the principles of sustainable development.

This Scoping Report outlines the initial stage of the SA process. It establishes the sustainability context and baseline for the Vale of Glamorgan and sets sustainability objectives against which the LDP will be assessed during its preparation.

The main Sustainability Issues identified for the Vale of Glamorgan, following a widespread review of relevant policies, plans and programmes, a collection of baseline data and discussions with stakeholders, officers and Members, are as follows:

### SOCIAL

- Housing
- Local Facilities
- Access for all
- Deprivation
- Lack of community spirit

### ENVIRONMENTAL

- Climate change
- Waste
- Impact of new development on built and natural resources
- Quality of new development, particularly residential
- Degradation of cultural heritage and historic environment

### ECONOMIC

- Transport and accessibility
- Employment
- Retail
- Tourism

For each of these issues, Sustainability Objectives have been developed in accordance with relevant policies, plans and programmes. An SA Framework shows the methodology for assessing the LDP throughout its preparation. Indicators and targets have been proposed as a way to measure the effectiveness of the SA Framework in due course.

This document has been amended to reflect comments made to the Draft Scoping Report during the public consultation exercise undertaken 12<sup>th</sup> February 2007 and the 19<sup>th</sup> March 2007. The proposed changes having been reported to the Council's Cabinet on the 6<sup>th</sup> June 2007.

## 1. Introduction

### Background

- 1.1 The Planning and Compulsory Purchase Act 2004 and The Town and Country Planning (Local Development Plan)(Wales) Regulations 2005, place a statutory duty on all Local Authorities in Wales to prepare a Local Development Plan (LDP) for their administrative areas. In January 2007, the Vale of Glamorgan Council formally commenced work on its LDP, which once adopted will replace the Vale of Glamorgan Adopted Unitary Development Plan 1996 - 2011. The LDP will set out the Council's land use strategy and policies for planning and development in the Vale of Glamorgan from 2011 to 2026.

### Sustainability Appraisal (SA)

- 1.2 As part of the preparation of the LDP the Council is required to undertake a Sustainability Appraisal<sup>1</sup> (SA) of the Plan incorporating Strategic Environmental Assessment<sup>2</sup> (SEA). The Welsh Assembly Government defines Sustainability Appraisal as: *"a systematic and iterative process undertaken during the preparation (and review) of a plan which identifies and reports on the extent to which implementation of the plan will achieve the environmental, social and economic objectives by which sustainable development can be defined and identifies opportunities for improving plan performance in relation to these"*<sup>3</sup>.
- 1.3 The overall aim of the SA is to ensure that the LDP's policies and proposals are consistent with the principles of sustainable development. Sustainable development is defined by the Welsh Assembly Government as *"Development which meets the needs of the present without compromising the ability of future generations to meet their own needs"*<sup>4</sup>. The purpose of the SA framework is to inform the decision-making process throughout the preparation of the Vale of Glamorgan LDP.
- 1.4 To assist in carrying out the SA of the LDP, the Vale of Glamorgan Council has appointed specialist consultants, Hyder Consulting, to provide expert advice throughout the process to ensure that best practice is followed and the legal requirements are satisfied.

### The Sustainability Appraisal Process

- 1.5 The Welsh Assembly Government's LDP Manual defines the five main stages in conducting a Sustainability Appraisal as:

**STAGE A:** Setting the context and objectives, establishing the baseline and deciding on the scope;

**STAGE B:** Developing and refining options and assessing effects;

<sup>1</sup> The Environmental Assessment of Plans and Programmes (Wales) Regulations 2004

<sup>2</sup> European Union Directive 2001/42/EC Strategic Environmental Assessment

<sup>3</sup> Welsh Assembly Government (2002) Sustainability Appraisal of Unitary Development Plans: A Good Practice Guide

<sup>4</sup> Welsh Assembly Government (2004) Sustainable Development Scheme

- STAGE C:** Preparing the Sustainability Appraisal Report;
- STAGE D:** Consulting on the preferred option of the development plan and SA report; and
- STAGE E:** Monitoring significant effects of implementing the development plan.

### SA Scoping Report

- 1.6 This Scoping Report relates to Stage A in this process. It contains five discrete elements:

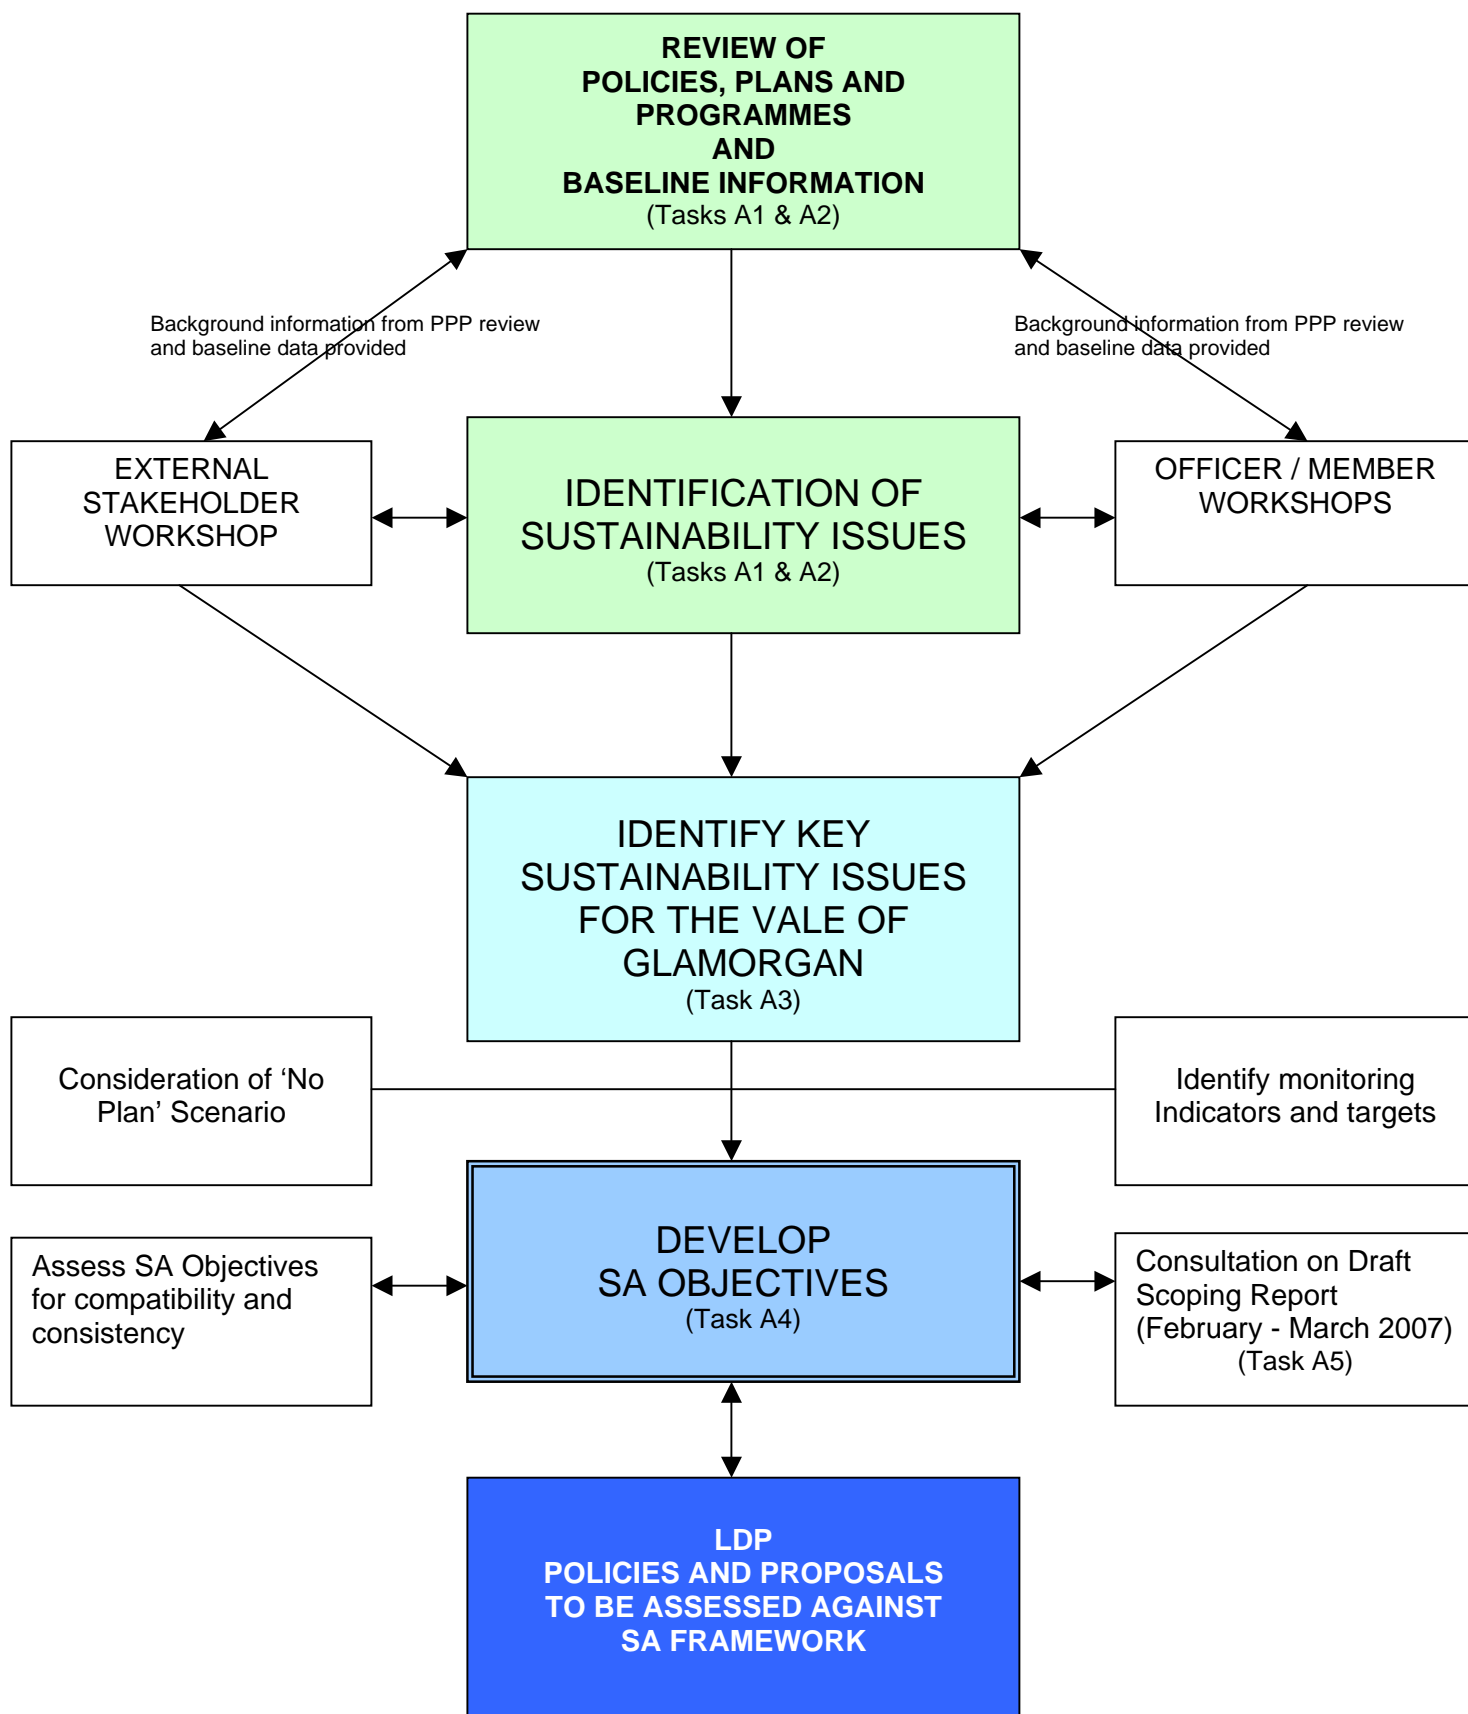

|                 |  |
|-----------------|--|
| <b>Task A1.</b> | Review other relevant policies, plans, and programmes and sustainability objectives.           |
| <b>Task A2.</b> | Collect relevant social, environmental and economic baseline and other information             |
| <b>Task A3.</b> | Identify sustainability issues and problems.   |
| <b>Task A4.</b> | Develop the SA framework, consisting of the sustainability objectives, indicators and targets. |
| <b>Task A5.</b> | Prepare and consult on the SA Scoping Report   |

- 1.7 Figure 1, overleaf, shows the process for developing the SA Framework in a flow diagram, illustrating the relationship between the key elements of the process.
- 1.8 Once this SA Scoping Report has been subjected to wider public consultation and amended as necessary, the SA framework within it will be used to assess the LDP's policies and proposals throughout its preparation.

### Appropriate Assessment

- 1.9 European Community Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora (otherwise known as the Habitats Directive) requires any plans that may have an impact on designated sites under the Directive to undergo an appropriate assessment. The purpose of appropriate assessment is to assess whether the plan proposals would have any significant adverse effects on such sites. Where adverse effects are identified, the Council must consider whether there are alternative solutions, and / or appropriate mitigation and compensation.
- 1.10 Within the Vale of Glamorgan, there are 2 sites that are designated at European level for their importance for nature conservation under the Habitats Directive. These are Dunraven Bay and Severn Estuary. At this stage in the LDP process,

**Figure 1: Process for Developing the SA Framework (Stage A)**

the policies and proposals have not been prepared. Therefore, the Council will need to consider the likely effects in due course, in order to consider at a later stage whether there is a need for appropriate assessment.

- 1.11 The consultation draft Annex to TAN 5 (October 2006), which outlines how the Habitats Regulations should be implemented in respect of LDPs, states: “[Habitats Regulations Assessments] should not be incorporated into the SA or SEA. It should be run parallel with these processes.” However, the guidance does note that the reporting can be done alongside the SA provided it is clearly signposted.

### **Stakeholder Involvement**

- 1.12 In accordance with the Vale of Glamorgan Local Development Plan Delivery Agreement (August 2006), the Council has engaged the environmental consultation bodies<sup>5</sup> and relevant stakeholders prior to drafting the SA Scoping Report by holding an external stakeholder workshop on 11<sup>th</sup> October 2006. The stakeholders were provided with background information beforehand from the policies, plans and programmes review and the baseline data collection. A detailed consultation report outlining the findings of the external stakeholder workshop is available separately. The sustainability issues and objectives derived at the workshop have been considered and included, where appropriate, within the SA framework.
- 1.13 Following the external stakeholder workshop, the planning and transportation division held an officer workshop to discuss the findings with representatives from various service areas of the Council, such as waste management, highways, housing, education and countryside. The officers were generally in agreement with the findings from the external stakeholder workshop and were able to offer some additional expertise to the debate. This feedback has also been used to develop this Scoping Report.
- 1.14 The Council's Members have been involved in the preparation of this Scoping Report, by Informal Cabinet and Planning Committee sessions. The feedback from these sessions has been used to develop this Scoping Report.

### **Consultation**

- 1.15 The Approved LDP Delivery Agreement sets out the Council's Community Involvement Scheme, including details of any public participation and consultation at each stage in the preparation of the LDP.
- 1.16 In accordance with the Delivery Agreement, this draft Scoping Report will be the subject of a 5 week consultation period, which will take place between February and March 2007. All stakeholders on the LDP database will be notified of the consultation including the environmental consultation bodies. Written comments on the content will be welcomed and where appropriate changes will be made prior to adopting the final SA framework.

## **2. Policy Context Review**

- 2.1 This section covers *Task A1: The review of other relevant policies, plans, and programmes and sustainability objectives*.
- 2.2 In preparing the SA framework the Council must take into account the relationships between the Local Development Plan (LDP) and other relevant policies, plans and programmes, and sustainability objectives.
- 2.3 In order to do this the Council has identified and reviewed international, national, regional and local policies, plans and programmes (PPPs) in partnership with the appointed specialist consultants. In reviewing these PPPs, the Council has sought to identify any social, environmental or economic objectives that should be reflected in the SA framework.
- 2.4 Appendix 1 contains a comprehensive list and overview of the policies, plans and programmes that have been reviewed for the Vale of Glamorgan LDP and the SA. The Council is satisfied that this is a comprehensive and appropriate list, however it is not intended to be exhaustive. The information recorded for each PPP includes:
- Key objectives relevant to the LDP and SA;
  - Key targets and indicators relevant to the LDP and SA;
  - Implications for the LDP; and
  - Implications for SA.
- 2.5 Each plan or programme will need to be taken into account, to a greater or lesser degree. In general, plans at European or International level have little direct relevance to the LDP and objectives have been transposed into UK specific strategies, guidance and legislation. They have however been included to provide strategic direction and for completeness.
- 2.6 During the PPP Review, consideration was given to identify any synergies or inconsistencies between the documents. On the whole the policies, plans and programmes reviewed within the same theme tend to be consistent with one another as they sit within a policy hierarchy, and care was taken to review up-to-date documents, which would be expected to be consistent with one another. No obvious inconsistencies were identified within the PPP review.
- 2.7 Figure 2, overleaf, provides a summary list of key sustainability objectives emerging from the review of policies, plans and programmes.

### **Implications for SA and LDP**

- 2.8 The review of PPPs highlighted a series of objectives that the Council must try to address when preparing the Vale of Glamorgan LDP. In particular the SA framework needs to address a range of social, environmental and economic issues and objectives which feature prominently in the relevant policies, plans and programmes. As shown in Figure 1, these issues and objectives have been fed into the SA Framework objectives.

### **3. Baseline Information**

- 3.1 This section covers *Task A2: Collect relevant social, environmental and economic baseline and other information.*
- 3.2 The collection of baseline data provides a picture of the current social, economic and environmental issues within and affecting the Vale of Glamorgan that will need to be considered in the SA and LDP. The data also provides a basis for predicting and monitoring the effects of the Plan. A robust understanding of the baseline position is important in ensuring a sound evidence base for the Local Development Plan (LDP).
- 3.3 To gather the relevant data, the Council used a range of sources of statistical information at local, regional and national levels. In addition the Council obtained qualitative data through the stakeholder workshops held prior to drafting this report.
- 3.4 The detailed baseline data for the Vale of Glamorgan is contained at Appendix 2. The Council has endeavored to obtain up-to-date and reliable baseline information. However, where it is not available any gaps have been highlighted in the detailed table. If practicable these gaps will be filled with baseline data still to be gathered throughout the LDP's preparation. Where consultees are able to provide data to fill these gaps this will be welcomed.
- 3.5 The information recorded for each indicator includes:
- Quantified information;
  - Comparators and trends; and
  - Issues for the Sustainability / LDP.

A brief overview of the social, environmental and economic issues of the Vale of Glamorgan is outlined below.

#### **Our Society**

- 3.6 The Vale of Glamorgan has a diverse society. It has some of the most affluent wards in Wales, such as Peterston-Super-Ely where the average annual income is £44,839. However, it also contains parts of Barry that fall within the highest 10% of most deprived areas in Wales. The Vale has an 'ageing population', and whilst population numbers have steadily increased over the last few decades, average household size has decreased, therefore increasing overall housing need. Geographically, the Vale is part rural and part urban, and as such it has a relatively low population density compared to the rest of the South East Wales region. There are different social issues in the rural Vale, such as poor access to services, compared to the urban Vale where issues such as poor health are more apparent. Whilst actual crime in the Vale is lower than the Welsh average, the community's perception of crime is still an issue. In respect of Welsh language, only 8.5% of the Vale's population can speak, read and write Welsh, compared to the national average of 15.8%.

## Our Environment

- 3.7 The Vale of Glamorgan benefits from a wide range of environmental assets (see Figures I and II at Appendix 3). It contains a vast number of locally and nationally designated sites of nature conservation value, including two designated as European sites under the Habitats Directive. The Vale also contains areas of ancient woodland, woodland trust reserves, country parks and areas of common land. Around half of the Vale's coastline falls within the designated Glamorgan Heritage Coast and a vast area of the authority has been designated as Special Landscape Area. In terms of cultural heritage, the Vale has an extensive range of Listed Buildings, County Treasures and Scheduled Ancient Monuments. The Vale has 38 Conservation Areas, including one in Penarth which is specially protected under Article 4 of the Town and Country Planning Act 1990 (as Amended). The abundance of natural and built environmental assets in the Vale creates issues in terms of protection against harmful impacts; at a local level from new development and at a global level from climate change. The vast majority of the land in the Vale of Glamorgan is agricultural land, which is increasingly subject to pressure for new development, particularly as the number of brownfield sites is depleted. Another issue for the Vale is the overall deficit in public open space and playing field provision. Flooding is also an issue, with a number of settlements in the Vale being at risk of potential flooding (see Figure III at Appendix 3). Waste levels have increased year on year, despite an increase in the amount of recycling, and like the national trend, energy consumption has increased annually in the Vale.

## Our Economy

- 3.7 The Vale's economy must be considered in the regional context due to the close proximity to Cardiff, for example, a large proportion of the Vale's residents working population work outside the authority (46%). In addition, Cardiff is a source of goods, services and leisure activities for the Vale's residents. Vacancy rates in the town centres of Barry and Llantwit Major are high, in part due to the competition from the regional shopping centre of Cardiff. However, Cowbridge is a more vibrant town centre due to its niche market / tourism appeal. Unemployment rates in the Vale are comparable with the national trends. However, there are fairly large numbers of economically inactive (e.g. retired persons) especially in the rural parts of the Vale, and certain parts of Barry have higher unemployment rates. The Vale has a number of large employers and has a range and choice of designated employment sites. However, a number of these have been subjected to pressure for alternative development uses e.g. housing. The rural Vale has witnessed the gradual decline in traditional agricultural industries, therefore increased emphasis has been given to farm diversification. The Vale has the opportunity to increase appropriate tourism due to its coastal setting and attractive landscape.
- 3.8 Transport is a major factor for the Vale, car ownership has increased and communities are becoming more dependant on the private car to access goods and services. In addition congestion is an issue at peak times on the routes into and out of Cardiff at key junctions. The Vale is home to Cardiff International Airport and the port of Barry.
- 3.9 Housing is also a significant issue. House prices have steadily increased in the Vale across all house types and there is a general lack of affordable housing provision. The fall in the size of households has implications in terms of under-occupation of the existing housing stock and need for new housing.

#### **4. Key Sustainability Issues for the Vale of Glamorgan**

- 4.1 This section covers: *Task A3 - Identify sustainability issues and problems*. The identification of sustainability issues is an opportunity to define key issues for the LDP and to develop sustainable plan objectives and options. The issues are used within the SA Framework to develop key SA objectives against which the Plan can be assessed.
- 4.2 From the review of policies, plans and programmes, and the analysis of the baseline data, including the findings from the stakeholder workshop, it is possible to identify a number of key sustainability issues which should be addressed through the objectives and indicators in the SA framework.
- 4.3 Figure 3 provides a list of the key sustainability issues identified through tasks A1 and A2, and gives details of their source.

**Figure 3: Key Sustainability Issues**

|               | <b>Key Issue</b>                | <b>Identifying factors</b>   | <b>Source</b>  |
|---------------|---------------------------------|--|--|
| <b>SOCIAL</b> | <b>Housing</b>                  | <ul style="list-style-type: none"> <li>▪ Lack of affordable housing and shortage of temporary accommodation</li> <li>▪ Increased housing demand / need</li> <li>▪ Increasing house prices</li> <li>▪ Increasing need for smaller dwellings due to smaller households – under occupation of large dwellings</li> <li>▪ Lack of range and choice of property types and tenure to meet demand</li> <li>▪ Potential conflict between housing development and other land uses e.g. open countryside, biodiversity, landscape, employment, retail etc.</li> </ul>  | <ul style="list-style-type: none"> <li>▪ JHLA Studies</li> <li>▪ Land Registry</li> <li>▪ VOG, Local Housing Strategy 2004-2009</li> <li>▪ Neighbourhood Statistics</li> <li>▪ Census 1971, 81, 91 &amp; 2001</li> <li>▪ PPPs (Themes: Affordable Housing, Landscape and Townscape)</li> <li>▪ Stakeholder workshop</li> <li>▪ Officer workshop</li> </ul>   |
| <b>SOCIAL</b> | <b>Lack of local facilities</b> | <ul style="list-style-type: none"> <li>▪ Residents need to travel outside the Vale for some types of health care</li> <li>▪ Lack of local retailing facilities e.g. shops, pubs, restaurants, cafes etc.</li> <li>▪ Lack of public open space (formal and informal, indoor and outdoor), pressure for development of existing sites</li> <li>▪ Lack of local employment opportunities</li> <li>▪ Lack of local facilities in new residential developments (e.g. Rhose Point, Pencoedre, Cogan Hall Farm etc.)</li> <li>▪ High level of outward movement and expenditure especially to Cardiff, e.g. services, retail spend, employment etc.,</li> <li>▪ Lack of burial land / crematoria within the Vale</li> <li>▪ Over capacity in schools and falling need / demand for school places in some areas – potential to lead to school closures</li> </ul> | <ul style="list-style-type: none"> <li>▪ VOG Council Opinion Survey 2003</li> <li>▪ NAW, Economic Inactivity in Wales (2003)</li> <li>▪ VOG Adopted Unitary Development Plan 1996-2011</li> <li>▪ Planning applications and enquiries</li> <li>▪ VOG, Assessment of Bus Service Provision (2005)</li> <li>▪ WIMD</li> <li>▪ PPPs (Themes: Retail, Transport and Accessibility, Community Involvement Social Inclusion, Health and Well Being)</li> <li>▪ Stakeholder workshop</li> <li>▪ Officer workshop</li> </ul> |
| <b>SOCIAL</b> | <b>Access for all</b>           | <ul style="list-style-type: none"> <li>▪ Lack of provision for special needs groups, especially mobility impaired e.g. ramps, lifts, hearing loop systems, signage etc. in public buildings, streetscape and new housing developments.</li> <li>▪ Ageing population, therefore more people affected by mobility issues</li> </ul>  | <ul style="list-style-type: none"> <li>▪ Draft Walking Strategy</li> <li>▪ Census 2001</li> <li>▪ PPPs (Themes: Transport and Accessibility, Community Involvement Social Inclusion, Health and Well Being)</li> <li>▪ Stakeholder workshop</li> <li>▪ Officer workshop</li> </ul>   |

### The 'No Plan' Scenario

- 4.4 The SEA Directive requires identification of *“the relevant aspects of the current state of the environment and the likely evolution thereof without the implementation of the plan or programme”* (Annex 1 (b)).
- 4.5 Therefore, the key sustainability issues identified for the Vale of Glamorgan from all sources, have been analysed to assess the likely scenario if there was no Local Development Plan for 2011-2026 (see Figure 4 overleaf). This prediction is difficult as it is dependant upon a wide range of unknown factors. Therefore, this scenario is based on existing patterns and trends identified by tasks A1 and A2. It does not take account of other plans and strategies that could have potential effects on these issues.

**Figure 4: Key Sustainability Issues with a 'No Plan' Scenario**

|                      | Issue  | Potential 'No Plan' Scenario for the Vale of Glamorgan  |
|----------------------|--|---|
| <b>SOCIAL</b>        | <b>Housing</b>   | <ul style="list-style-type: none"> <li>▪ Continual increase in demand for and potential shortfall of houses alongside increase in house prices</li> <li>▪ Continued fall in the provision of affordable housing</li> <li>▪ Development of housing on a windfall basis without a strategic framework – an appeal led development control system</li> </ul>                   |
|                      | <b>Lack of Local Facilities</b>                                  | <ul style="list-style-type: none"> <li>▪ Continued loss of local facilities with no significant new provision e.g. open space</li> <li>▪ Continued movement outside Vale to access goods and services elsewhere</li> </ul>  |
|                      | <b>Access for all</b>  | <ul style="list-style-type: none"> <li>▪ Continued minimum provision for mobility impaired</li> <li>▪ Protection provided under the Disability Discrimination Act 1995</li> </ul>   |
|                      | <b>Deprivation</b>   | <ul style="list-style-type: none"> <li>▪ Continued isolation of deprived communities</li> </ul>   |
|                      | <b>Lack of community spirit</b>                                  | <ul style="list-style-type: none"> <li>▪ Continued missed opportunity for community resource</li> <li>▪ Continued high perception of crime</li> </ul>   |
| <b>ENVIRONMENTAL</b> | <b>Climate change</b>  | <ul style="list-style-type: none"> <li>▪ Causes of climate change at a local level would continue to increase</li> <li>▪ Consequences of climate change at a local level would pose an increasing threat of flooding</li> </ul>   |
|                      | <b>Waste</b>   | <ul style="list-style-type: none"> <li>▪ Continual increase in municipal waste levels and fly tipping despite increase in recycling</li> <li>▪ Continued lack of waste management facilities in the Vale</li> </ul>   |
|                      | <b>Impact of development on built and natural environment</b>    | <ul style="list-style-type: none"> <li>▪ No strategic policy framework to control the impact of new development – an appeal led development control system</li> <li>▪ Listed Buildings, Habitats and Biodiversity are protected by other legislation (but does not encourage enhancement).</li> <li>▪ Loss of biodiversity and continuing pressures on landscape</li> </ul> |
|                      | <b>Quality of new development, particularly residential</b>      | <ul style="list-style-type: none"> <li>▪ No improvement in the quality of design of new developments due to a lack of statutory framework – an appeal led development control system</li> </ul>   |
|                      | <b>Degradation of cultural heritage and historic environment</b> | <ul style="list-style-type: none"> <li>▪ Continued degradation of historic environment with no strategic framework for improvement or protection</li> <li>▪ Listed Buildings are protected by other legislation (but does not encourage enhancement).</li> <li>▪ Continued lack of cultural facilities</li> </ul>   |
| <b>ECONOMIC</b>      | <b>Transport and accessibility</b>                               | <ul style="list-style-type: none"> <li>▪ Continued reliance on the car to access goods, services and employment, and associated traffic, congestion, parking problems and negative impact on the environment.</li> <li>▪ Continued growth in freight by unsustainable means e.g. air and road.</li> </ul>   |
|                      | <b>Employment</b>  | <ul style="list-style-type: none"> <li>▪ Continued pressure on existing and allocated employment sites for alternative uses</li> <li>▪ Continual increase in reliance on Cardiff and beyond for employment</li> <li>▪ Continual decline in the rural economy</li> </ul>   |
|                      | <b>Retail</b>  | <ul style="list-style-type: none"> <li>▪ Continued fall in the vitality and viability of Barry Town Centre</li> <li>▪ Continued pressure for growth of out-of-town retailing</li> <li>▪ Continued increase in retail expenditure outside the Vale</li> </ul>  |
|                      | <b>Tourism</b>   | <ul style="list-style-type: none"> <li>▪ Unfettered tourism growth in some areas could harm the Vale's natural resources e.g. landscape, biodiversity, heritage etc.</li> <li>▪ Continued missed opportunities for tourism weaken the Vale's economy</li> </ul>   |

## **5. The Sustainability Appraisal Framework**

- 5.1 This section covers: *Task A4- Develop the SA framework, consisting of the sustainability objectives, indicators and targets.*
- 5.2 The key sustainability issues identified for the Vale of Glamorgan (as detailed under Task A3) and the objectives identified in the PPP review (Task A1) have been used as the basis for the sustainability objectives in the SA framework (see Figure 7 - pg18). In addition, the discussions held at the stakeholder workshops have been taken into account. This relationship between the SA tasks is illustrated clearly by Figure 1 on page 3 of this report.
- 5.3 Figure 7 (pages 18-25) shows the SA Objectives developed for the Vale of Glamorgan LDP. In accordance with the LDP Manual, the number of objectives has been kept to a manageable level, with a balance between social, environmental and economic (LDP Manual paragraph 5.6.5 refers). For clarity and ease of interpretation, each broad objective is accompanied by aims, which demonstrate the purpose of the objective in terms of the issues it seeks to address.
- 5.4 To satisfy the requirements of the SEA Directive, as transposed into the SEA Regulations (Schedule 2), the SA objectives should have regard to each of the issues outlined below. Figure 5 shows which objectives relate to each issue, and it illustrates that in each case a number of objectives relate to the SEA issue.

**Figure 5: Interrelationship Between SEA Directive Issues and SA Objectives**

| <b>SEA Directive Issue</b>  | <b>Relevant SA Objectives</b>                     |
|---|---|
| a) Biodiversity   | 6, 8, 9, 10, 12, 15                               |
| b) Population*  | 1, 2, 3, 4, 5, 7, 8, 9, 10, 11, 12, 13, 14, 15    |
| c) Human Health   | 1, 2, 3, 4, 5, 6, 7, 9, 10, 11, 12, 13, 14, 15    |
| d) Fauna  | 6, 7, 8, 9, 10, 15                                |
| e) Flora  | 6, 7, 8, 9, 10, 15                                |
| f) Soil   | 6, 7, 8, 9,                                       |
| g) Water  | 6, 9, 15  |
| h) Air  | 6, 9, 12  |
| i) Climatic factors   | 6, 7, 8, 9, 10, 12                                |
| j) Material Assets*   | 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15 |
| k) Cultural heritage, including architectural and archaeological heritage | 2, 3, 5, 8, 9, 10, 11, 14, 15                     |
| l) Landscape  | 6, 7, 8, 9, 11, 12, 15                            |

\* These terms are not clearly defined by the SEA Directive.

- 5.5 The sustainability objectives contained in the SA Framework have been compared in terms of compatibility and the results (shown at Appendix 4) conclude that none of the objectives are considered to be incompatible with each other. Within the SA framework, no one sustainability objective carries more weight than another.

## Assessing the LDP Against the SA Framework

5.6 Throughout the process, the LDP policies and proposals will be assessed against the SA framework to see if they are consistent with the principles of sustainable development as they relate to the Vale of Glamorgan. Figure 6, shows the proposed method by which the policies and proposals will be compared against the Sustainability Objectives in a matrix style format. The findings of these assessments will be published in a Sustainability Appraisal Report (known as the Environmental Report for the purpose of SEA). An example structure of an SA Report is attached at Appendix 5.

**Figure 6: Method for Assessment of LDP policies and proposals against SA Framework**

|           |  |
|-----------|--|
| <b>++</b> | Policy / Proposal is highly likely to assist the Sustainability Objective        |
| <b>+</b>  | Policy / Proposal is likely to assist the Sustainability Objective               |
| <b>0</b>  | Policy / Proposal is likely to have no effect on the Sustainability Objective    |
| <b>-</b>  | Policy / Proposal is likely to conflict with the Sustainability Objective        |
| <b>--</b> | Policy / Proposal is highly likely to conflict with the Sustainability Objective |
| <b>?</b>  | The effect of the Policy / Proposal on the Sustainability Objective is unclear   |

| LDP Policy / Option: <b>XXXXXXX</b>  |            |             |           |          |
|--|------------|-------------|-----------|----------|
| SA Objective and aims  | Short term | Medium Term | Long Term | Comments |
| <b>1. HOUSING - To provide the opportunity for people to meet their housing needs.</b> |            |             |           |          |
| Provide a mix of dwelling types and tenure   | <b>+</b>   | <b>++</b>   | <b>++</b> |          |
| Build in sustainable locations, with good access to local facilities                   | <b>0</b>   | <b>?</b>    | <b>?</b>  |          |
| Provide affordable housing   | <b>+</b>   | <b>+</b>    | <b>+</b>  |          |
| Preference for previously developed land in sustainable locations                      | <b>-</b>   | <b>--</b>   | <b>--</b> |          |

[NB. The above assessment is shown for illustrative purposes only as work has not commenced on the LDP policies and options to date]

## **Monitoring the Effectiveness of the LDP SA Framework**

- 5.7 Figure 7 (overleaf) outlines a range of possible indicators, sources and targets that could be used to monitor the effectiveness of the SA Framework and the LDP in due course. At this stage the targets have been kept broad and will be further developed as the SA/LDP process progress. The SEA Directive requires that the Council monitor the significant environmental effects of the Plan and state in the Environmental Report the measures proposed for monitoring. This is to ensure that any unforeseen adverse effects are identified at an early stage in order to take any appropriate remedial action. Therefore, the Council will pursue this in more detail at the relevant stage in the process.

### Figure 7: Sustainability Appraisal Framework

Note: These objectives are not ranked in any order of weighting. The order corresponds with the list of key sustainability issues outlined in Figure 3 of this report.

The following table includes indicative aims and targets that will monitor the significant effects of the Local Development Plan. As the production of the Local Development Plan is an iterative process these may be modified as the plan develops if they are considered to be inadequate.

| 1. Housing                          |  |  |                      |  |
|-------------------------------------|--|--|----------------------|--|
| Origin                              | Objective  | Indicator  | Source               | Target   |
| Social<br>Environmental<br>Economic | <b>To provide the opportunity for people to meet their housing needs.</b><br><br><u>Aims:</u><br><ul style="list-style-type: none"> <li>▪ Provide a mix of dwelling types and tenure</li> <li>▪ Build in sustainable locations, with good access to local facilities</li> <li>▪ Provide affordable housing</li> <li>▪ Preference for previously developed land in sustainable locations</li> </ul> | Annual affordable housing provision as a % of all house builds | JHLA Studies         | Increase the level of affordable housing to meet the identified need.      |
|                                     |  | Average house price compared to average incomes                | VOG Housing Strategy | Bring average house prices closer to average incomes                       |
|                                     |  | Proportion of households unable to purchase a property         | VOG Housing Strategy | Decrease the proportion of households unable to purchase a property        |
|                                     |  | Population / household structure                               | Census               | Match dwelling type to population needs                                    |
|                                     |  | Dwelling type / tenure   | VOG Housing Strategy | Increase the range and choice of dwelling types and tenures to meet demand |
|                                     |  | % of new housing built on previously developed land            | JHLA Studies         | Increase the % of new housing built on previously developed land           |
|                                     |  | House build rates  | JHLA Studies         | Match house build rates with population needs.                             |

| 2. Local Facilities |   |   |  |  |
|---------------------|---|---|--|--|
| Origin              | Objective   | Indicator   | Source   | Target   |
| Social<br>Economic  | <b>To maintain, promote and enhance the range of local facilities.</b><br><br><u>Aims:</u><br><ul style="list-style-type: none"> <li>▪ Meet the needs of existing communities throughout the Vale of Glamorgan</li> <li>▪ Provide appropriate facilities within new developments to meet the needs of future users</li> <li>▪ Ensure local facilities are suitable for purpose and easily accessible</li> <li>▪ Prevent the loss of existing well-used and valued local facilities</li> </ul> | Number of new facilities (e.g. shops, restaurants, pubs, community centres, libraries, medical centres, recreational facilities, places of worship etc.) as a ratio of new house builds and / or population | Planning application database<br><br>Census    | Increase in the number of new local facilities as a proportion of new house builds and / or population |
|                     |   | Numbers of 'change of use' developments resulting in a loss of a community facility   | Planning application database                  | Reduce the loss of community facilities where appropriate.   |
|                     |   | Number of people who consider services / facilities are difficult to access   | VOG Opinion Surveys                            | Reduce the number of people who consider services / facilities are difficult to access                 |
|                     |   | Number of people who travel outside the Vale to access goods, services or employment  | Census<br>Sewta surveys<br>VOG Opinion Surveys | Reduce the number of people who travel outside the Vale to access goods, services or employment        |

| 3. Access for all       |  |   |                                      |  |
|-------------------------|--|---|--------------------------------------|--|
| Origin                  | Objective  | Indicator   | Source                               | Target   |
| Social<br>Environmental | <b>To maintain and improve access for all.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Ensure the built and natural environment is easily accessible to all the Vale's community</li> <li>▪ Improve public perception of access</li> <li>▪ Benefit health and well being through social inclusion within the physical environment</li> <li>▪ Promote 'life-time' homes</li> </ul> | Number of alterations to public buildings and spaces to provide for disabled persons access | Planning / building control database | Increase the number of alterations to public buildings and spaces to provide for disabled access |
|                         |  | Public perception of ease of access within the built environment                            | VOG Opinion Surveys                  | Improve public perception of ease of access within the built environment                         |
|                         |  | Public perception of ease of access within the natural environment                          | VOG Opinion Surveys                  | Improve public perception of ease of access within the natural environment                       |
|                         |  | Number of new developments with special provision for disabled persons                      | Planning application database        | Increase special provision for disabled persons within new developments                          |
|                         |  | Number of life time homes as a proportion of all new homes                                  | Planning / building Control database | Increase the number of life time homes as a proportion of all new homes                          |

| 4. Deprivation     |   |  |        |  |
|--------------------|---|--|--------|--|
| Origin             | Objective   | Indicator                                | Source | Target   |
| Social<br>Economic | <b>Reduce the causes of deprivation.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.</li> <li>▪ Prevent the isolation of deprived communities.</li> </ul> | Welsh Index of Multiple Deprivation:     | WIMD   | Reduce overall deprivation                         |
|                    |   | Educational achievement (WIMD indicator) | WIMD   | Improve educational achievement                    |
|                    |   | Health and well-being (WIMD indicator)   | WIMD   | Improve health and well being                      |
|                    |   | Housing (WIMD indicator)                 | WIMD   | Improve access to good quality, affordable housing |
|                    |   | Environment (WIMD indicator)             | WIMD   | Improve the environment in deprived areas          |
|                    |   | Access (WIMD indicator)                  | WIMD   | Improve access for deprived areas                  |
|                    |   | Employment (WIMD indicator)              | WIMD   | Increase employment opportunities                  |

| 5. Community Spirit |  |   |   |  |
|---------------------|--|---|---|--|
| Origin              | Objective  | Indicator   | Source                                      | Target   |
| Social              | <b>To maintain, protect and enhance community spirit.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Reduce the fear of crime</li> <li>▪ Provide community facilities</li> <li>▪ Encourage local distinctiveness (e.g. development having regard to its context and public art)</li> <li>▪ Encourage community ownership of the environment (e.g. promote shared spaces, good design)</li> </ul> | Public perception of crime rates and fear of crime  | Crime statistics                            | Reduce actual and perceived crime levels in the Vale of Glamorgan.                                     |
|                     |  | Number of new facilities (e.g. shops, restaurants, pubs, community centres, libraries, medical centres, recreational facilities, places of worship etc.) as a ratio of new house builds and / or population | Planning application database<br><br>Census | Increase in the number of new local facilities as a proportion of new house builds and / or population |
|                     |  | New developments with local distinctiveness e.g. finishing materials, public art, facilities etc.   | Planning application database               | Increase the number of new developments with local distinctiveness                                     |

| 6. Climate Change                   |  |   |                                      |  |
|-------------------------------------|--|---|--------------------------------------|--|
| Origin                              | Objective  | Indicator   | Source                               | Target   |
| Social<br>Environmental<br>Economic | <b>To minimise the causes and manage the effects of climate change.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Reduce air pollution (e.g. transport / industry emissions)</li> <li>▪ Reduce energy consumption (e.g. promote energy efficient building)</li> <li>▪ Promote renewable energy generation</li> <li>▪ Reduce flood risk to people, property and maintain the integrity of floodplains</li> <li>▪ Protect biodiversity, flora and fauna from the effects of climate change</li> <li>▪ Protect and promote the development of carbon sinks.</li> </ul> | Number of new developments which use sustainable / renewable materials and / or which reduce the overall reliance on fossil fuels (BREEM Standards) | Planning / building control database | Increase the number of new developments which use sustainable / renewable materials and / or which reduce the overall reliance on fossil fuels (BREEM Standards) |
|                                     |  | Emissions of greenhouse gases   | WAG Statistics                       | Reduce emissions of greenhouse gases   |
|                                     |  | Number of trips made by car.  | Census<br>Sewta Surveys              | Reduction in the number of trips made by car.  |
|                                     |  | Renewable energy generation   | Planning/Building Control Database   | Increase the level of energy generated by renewable means.   |
|                                     |  |   |                                      | Number of new developments with renewable energy generation on site.   |
|                                     |  | Number of incidents of flooding within the Vale of Glamorgan / Properties at risk of flooding   | Environment Agency                   | Reduce number of incidents of flooding within the Vale of Glamorgan / Properties at risk of flooding   |
|                                     |  | Proportion of new developments with Sustainable Urban Drainage Systems  | Planning / building control database | Increase proportion of new developments with Sustainable Urban Drainage Systems  |
|                                     |  | Development within flood plains   | Planning/Building Control database   | No inappropriate development within flood plains   |

|  |  |  |                                 |  |
|--|--|--|---------------------------------|--|
|  |  | Vale of Glamorgan's ecological footprint                               | Stockholm Environment Institute | Reduce the size of the Vale's ecological footprint |
|  |  | Energy consumption per head  | DTI Energy Statistics           | Reduce energy consumption per head                 |
|  |  | Change in seasonal weather e.g. average temperatures or precipitation. | Met Office Statistics           | N/A  |

| 7. Waste      |   |  |                                      |   |
|---------------|---|--|--------------------------------------|---|
| Origin        | Objective   | Indicator  | Source                               | Target  |
| Environmental | <b>To minimise waste.</b><br><br><u>Aims:</u><br><ul style="list-style-type: none"> <li>▪ Promote the use of secondary resources (e.g. convert existing buildings/reuse materials)</li> <li>▪ Provide and promote recycling facilities.</li> <li>▪ Avoid landfill of waste</li> </ul> | Annual volume of municipal waste                                       | Waste Strategy                       | Reduce amount of municipal waste  |
|               |   | % of waste re-used or recycled   | Waste Strategy                       | Increase the amount if of waste re-used or recycled                                 |
|               |   | Access to household recycling schemes                                  | Waste Strategy                       | Increase the % of households with access to (or using) curb-side recycling schemes  |
|               |   | Number of new developments which use sustainable / renewable materials | Planning / building control database | Increase the number of new developments which use sustainable / renewable materials |
|               |   | % of waste land-filled   | Waste Strategy                       | Reduce tonnage of waste to landfill   |

| 8. Land use   |   |   |  |  |

### 10. Quality of new development

| Origin                  | Objective  | Indicator   | Source   | Target   |
|-------------------------|--|---|--|--|
| Social<br>Environmental | <b>To provide a high quality environment within all new developments.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Ensure development meets the needs of current and future users.</li> <li>▪ Promote a sense of community pride (e.g. shared spaces, public art, local materials)</li> <li>▪ Promote sustainable design and construction solutions.</li> <li>▪ Enhance access for cyclists and pedestrians.</li> <li>▪ Provide adequate green spaces.</li> <li>▪ Provide adequate vehicular parking and manoeuvring space.</li> </ul> | Community perception of design quality  | VOG Surveys                                      | Improved community perception of design quality  |
|                         |  | Proportion of new developments delivering benefits for the public realm   | Planning application database                    | Increase proportion of new developments delivering benefits for the public realm   |
|                         |  | Number of new developments recognised by national design awards   | Design Awards (various)                          | Increase number of new developments recognised by national design awards   |
|                         |  | Proportion of new developments delivering local distinctiveness   | Planning application database                    | Increase proportion of new developments delivering local distinctiveness   |
|                         |  | Proportion of new developments providing community facilities   | Planning application database                    | Increase proportion of new developments providing community facilities   |
|                         |  | Number of new developments which use sustainable / renewable materials and / or which reduce the overall reliance on fossil fuels (BREEM Standards) | Planning application / building control database | Increase number of new developments which use sustainable / renewable materials and / or which reduce the overall reliance on fossil fuels (BREEM Standards) |

### 11. Cultural heritage and historic environment

| Origin                  | Objective   | Indicator  | Source                                  | Target   |
|-------------------------|---|--|---|--|
| Social<br>Environmental | <b>To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Protect and enhance existing cultural heritage and historic environments</li> <li>▪ Promote new opportunities for culture in the Vale</li> </ul> | Number of new cultural facilities in the Vale of Glamorgan                             | VOG Tourism Strategy                    | Increase number of new cultural facilities in the Vale of Glamorgan          |
|                         |   | Historic townscape (Conservation Areas, Listed Buildings, Scheduled Ancient Monuments) | Conservation Area Appraisals, CADW data | Maintain or improve the historic townscape of the Vale of Glamorgan          |
|                         |   | Community perception of design quality within the historic landscape                   | VOG Surveys                             | Improve community perception of design quality within the historic landscape |

| 12. Transport and accessibility     |  |  |                         |   |
|-------------------------------------|--|--|-------------------------|---|
| Origin                              | Objective  | Indicator  | Source                  | Target  |
| Social<br>Environmental<br>Economic | <b>To reduce the need to travel and enable the use of more sustainable modes of transport.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Ensure new development is located in accessible locations from a range of travel modes</li> <li>▪ Promote technologies to reduce need to travel (e.g. homeworking)</li> <li>▪ Enable the movement of people and freight by sustainable means</li> <li>▪ Provide and maintain effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</li> </ul> | Proportion of people living and working in the Vale of Glamorgan         | Census                  | Increase proportion of people living and working in the Vale of Glamorgan         |
|                                     |  | Car ownership  | Census                  | Reduce total levels of car ownership  |
|                                     |  | Modal shift  | Census<br>Sewta Surveys | Increased use of alternative transport modes.                                     |
|                                     |  | Levels of congestion   | VOG Surveys             | Reduce levels of congestion   |
|                                     |  | Proportion of freight moved by rail                                      | Sewta surveys, DoT.     | Increase proportion of freight moved by rail                                      |
|                                     |  | Length of cycle ways in the Vale   | VOG data                | Increase length of cycle ways in the Vale   |
|                                     |  | Public perception of access to services                                  | VOG Opinion Surveys     | Improve public perception of access to services                                   |
|                                     |  | Number of businesses/organisations with green travel plans               | VOG, Sewta              | Increase in number of green travel plans  |
|                                     |  | Number of school with travel plans and/or safe routes to schools schemes | VOG, Sewta              | Increase in number of schools with travel plans or safe routes to schools schemes |

| 13. Employment     |  |  |              |   |
|--------------------|--|--|--------------|---|
| Origin             | Objective  | Indicator  | Source       | Target  |
| Social<br>Economic | <b>To provide for a diverse range of local job opportunities.</b><br><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Protect existing and potential employment sites for employment</li> </ul> | Percentage of working age population in employment | Census       | Increase total number in employment                                     |
|                    |  | Percentage of population receiving benefits        | WIMD         | Decrease the number of people receiving benefits                        |
|                    |  | Distribution of employment across sectors          | Census, ONS. | Maintain an economically sustainable split of employment across sectors |

|  |   |   |             |  |
|--|---|---|-------------|--|
|  | <ul style="list-style-type: none"> <li>▪ uses</li> <li>▪ Support a culture of entrepreneurship</li> <li>▪ Encourage a range employment sites in locations accessible by a range of transport modes</li> <li>▪ Support the enhancement of skills to meet employment needs</li> <li>▪ Promote and enable sustainable rural diversification</li> </ul> | Proportion of people living and working in the Vale of Glamorgan          | Census      | Increase the proportion of people living and working in the Vale of Glamorgan          |
|  |   | Percentage of allocated employment land developed for employment purposes | VOG Surveys | Increase the percentage of allocated employment land developed for employment purposes |

| 14. Retail |   |  |  |   |
|------------|---|--|--|---|
| Origin     | Objective   | Indicator  | Source   | Target  |
| Economic   | <p><b>To maintain and enhance the vitality and viability of the Vale's town, district and local centres.</b></p> <p><u>Aims:</u></p> <ul style="list-style-type: none"> <li>▪ Ensure retail centres are accessible by a range of modes of transport</li> <li>▪ Ensure a range of uses within retail centres</li> <li>▪ Avoid out-of-town retail development</li> <li>▪ Enhance the public realm within existing centres and facilitate regeneration programmes</li> <li>▪ Promote the evening economy in the Vale's town centres</li> </ul> | Vacancy rates for properties within the retail centres | VOG Retail Surveys                               | Reduce the proportion of vacant units within town centres                                       |
|            |   | Proportion of A1, A2 and A3 uses in the town centre    | VOG Retail Surveys                               | Ensure a mix of uses within the town centre with sufficient A1 to maintain the retail function. |
|            |   | Opening hours of premises in retail centres            | VOG Retail Surveys / Planning applications       | Increase average opening hours into evening hours.  |
|            |   | Availability of short stay car parking                 | VOG Parking Surveys                              | Increase the availability of short stay car parking   |
|            |   | Access by public transport, walking and cycling        | Public Transport Guide, Walking / Cycling Audits | Improve access by public transport, walking and cycling   |

| 15. Tourism |  |  |  |   |
|-------------|--|--|--|---|
| Origin      | Objective  | Indicator  | Source   | Target  |
| Economic    | <b>To promote appropriate tourism.</b><br><u>Aims:</u> <ul style="list-style-type: none"> <li>▪ Promote local economic growth through tourism</li> <li>▪ Enable tourism uses to be accessed by sustainable travel modes</li> <li>▪ Manage tourism to protect the Vale's natural and built assets</li> <li>▪ Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)</li> <li>▪ Enable specialist tourism (e.g. sustainable, sports, cultural etc).</li> </ul> | Number of new tourist related developments   | VOG Tourism Strategy                               | Increase the number of tourist related developments in the Vale of Glamorgan                          |
|             |  | Visitor numbers  | VOG Tourism Strategy                               | Increase the total number of tourists visiting the Vale of Glamorgan                                  |
|             |  | Visitor spend  | VOG Tourism Strategy                               | Increase the value of tourism spend per head  |
|             |  | Length of stay   | VOG Tourism Strategy                               | Increase the average length of stay in the Vale of Glamorgan per tourist                              |
|             |  | Mode of travel - % of tourists who used public transport whilst on holiday.              | VOG Tourism Strategy                               | Increase % of tourists who used public transport whilst on holiday.                                   |
|             |  | Number of business clusters promoting/ developing tourism - geographically and by sector | VOG Tourism Strategy Planning application database | Increase the number of business clusters promoting/ developing tourism - geographically and by sector |

## INTERNATIONAL POLICIES, PLANS AND PROGRAMMES

| <b>Rio Declaration on Environment and Development</b>  |   |   |   |
|--|---|---|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| Adopted by the United Nations Conference on Environment and Development at the Earth Summit of 1992, the Rio Declaration is a statement of 27 principles supporting sustainable development upon which nations have agreed to base their actions in dealing with environment and development issues.   | Key International framework for sustainable development   | Key to the development of sustainable principles of the LDP.                                      | Key to the development of sustainable principles of the SA.   |
| <b>United Nations Framework Convention on Climate Change 1994 (UNFCCC)</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The United Nations Framework Convention on Climate Change was adopted in May 1992 and entered into force in May 1994. The Convention's objective is to achieve stabilisation of atmospheric concentrations of greenhouse gases at levels that prevent dangerous human-induced interference with the climate system.</p> <p>Nations at the Convention committed to reduce their emission of greenhouse gases.</p>  | Key international targets agreed by member nations and integrated into the UK's Climate Change Programme (2000) (see below). Review was launched on 15 September 2004 looking at how existing policies are performing and the range of policies that might be put in place in the future.   | Addressing climate should be a key element of the LDPs sustainable development objectives.        | Climate change issues should be considered in developing the SA framework.  |
| <b>The Convention on Biological Diversity</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| The Convention on Biological Diversity was an important component of the Earth Summit and was signed at Rio by 153 countries including the UK and the rest of Europe. As the first treaty to provide a legal framework for biodiversity conservation, the Convention established three main goals: the conservation of biological diversity, the sustainable use of its components, and the fair and equitable sharing of the benefits arising from the use of genetic resources.  | Article 6 requires each Contracting Party shall, in accordance with its particular conditions and capabilities to:<br>(a) Develop national strategies, plans or programmes for the conservation and sustainable use of biological diversity or adapt for this purpose existing strategies, plans or programmes which shall reflect, inter alia, the measures set out in this Convention relevant to the Contracting Party concerned; and<br>(b) Integrate, as far as possible and as appropriate, the conservation and sustainable use of biological diversity into relevant sectoral or cross-sectoral plans, programmes and policies. | Addressing biodiversity should be a key element of the LDPs sustainable development objectives.   | Biodiversity issues should be fully considered in developing the SA framework.  |
| <b>Agenda 21 (1992)</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>Agenda 21, adopted at the 1992 Earth Summit in Rio de Janeiro, reflects a global consensus and political commitment at the highest level on development and environmental co-operation. It recognises that sustainable development is primarily the responsibility of governments and addresses global environment and development problems and suggests strategies, plans, policies and processes to achieve a balance between environment and development.</p> <p>The Agenda focuses on "the fulfilment of basic needs, improved living standards for all, better protected and</p> | None.   | Key international framework for the implementation of sustainable development at the local level. | Key international framework for the implementation of sustainable development at the local level, which should be considered in the formulation of the SA objectives. |

|  |  |   |  |
|--|--|---|--|
| <p>managed ecosystems and a safer, more prosperous future". It addresses social and economic dimensions, conservation and management of resources for development, strengthening the role of major groups and means of implementation. Agenda 21 encourages international cooperation and the contribution of United Nations and other international, regional and sub regional organisations. It also encourages public participation and active involvement of non-governmental organisations and other groups.</p>  |  |   |  |
| <b>Kyoto Protocol 1997</b>   |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>Legally binding agreement under which industrialised countries will reduce their collective emissions of <i>greenhouse gases</i> by 5.2% compared to the year 1990 in the commitment period 2008 - 2012.</p> <p>The goal is to lower overall emissions from six greenhouse gases - <i>carbon dioxide, methane, nitrous oxide, sulphur hexafluoride</i>, HFCs, and PFCs - calculated as an average over the five-year period of 2008 -12.</p> <p>Details of the UK's targets are contained within the UK Climate Change Programme (2000), which seeks to deliver its Kyoto target to cut its greenhouse gas emissions by 12.5%, and move towards its domestic goal to cut carbon dioxide emissions by 20% below 1990 levels by 2010.</p> | <p>Key international targets agreed by member nations and integrated into the UK's Climate Change Programme (2000) (see below). Review was launched on 15 September 2004 looking at how existing policies are performing and the range of policies that might be put in place in the future.</p>   | <p>Addressing climate should be a key element of the LDPs sustainable development objectives.</p>         | <p>Climate change issues should be a key consideration in developing the SA framework.</p> |
| <b>Johannesburg Declaration on Sustainable Development (2002)</b>  |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>Signed at the World Summit on Sustainable Development (WSSD) in Johannesburg, South Africa in September 2002, the declaration reaffirms the international commitment to sustainable development.</p>  | <p>Key commitment to ensure that the rich diversity, which is our collective strength, will be used for constructive partnership for change and for the achievement of the common goal of sustainable development. An undertaking to strengthen and improve governance at all levels, for the effective implementation of Agenda 21.</p> | <p>The Plan should support and reflect the sustainability objectives of Agenda 21 at the local level.</p> | <p>Sustainability objectives should underpin the sustainable principles of the SA.</p>     |

## EUROPEAN POLICIES, PLANS AND PROGRAMMES

| <b>Arhus Convention (2001)</b>  |   |   |   |
|---|---|---|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The United Nations Economic Commission for Europe (UNECE) Convention on Access to Information, Public Participation in Decision-Making and Access to Justice in Environmental Matters was adopted on 25 June 1998 in the Danish city of Aarhus (Århus) at the Fourth Ministerial Conference as part of the "Environment for Europe" process. It entered into force on 30 October 2001. It establishes a number of rights of the public (citizens and their associations) with regard to the environment. Public authorities (at national, regional or local level) are to contribute to allowing these rights to become effective.</p> | <p>The Convention provides for:</p> <p>The right of everyone to receive environmental information that is held by public authorities ("access to environmental information"). This can include information on the state of the environment, but also on policies or measures taken, or on the state of human health and safety where this can be affected by the state of the environment.</p> <p>The right to participate in environmental decision-making. Arrangements are to be made by public authorities to enable the public affected and environmental non-governmental organisations to comment on, for example, proposals for projects affecting the environment, or plans and programmes relating to the environment, these comments to be taken into due account in decision-making, and information to be provided on the final decisions and the reasons for it ("public participation in environmental decision-making")</p> <p>The right to review procedures to challenge public decisions that have been made without respecting the two aforementioned rights or environmental law in general ("access to justice").</p> | <p>Requirements should be covered within the Community Involvement Scheme.</p>  | <p>Production of Sustainability Report in consultation with relevant organizations, in accordance with guidance and the Community Involvement Scheme.</p> |
| <b>European Landscape Convention (2000)</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The European Landscape Convention (ELC) is the first international treaty specifically on landscape. It became effective from 1 March 2004, and the signed its agreement to the ELC on the 21st February 2006.</p> <p>It aims to promote the protection, management and planning (including active design and creation) of Europe's landscapes, both rural and urban, and to foster European co-operation on landscape issues.</p>   | <p>None specific. However the Convention stresses the importance of the following principles when considering landscape protection:</p> <ul style="list-style-type: none"> <li>• Put people – from all cultures and communities - and their surroundings, at the heart of spatial planning and sustainable development</li> <li>• Recognise that landscape exists everywhere, not just in special places and, whether beautiful or degraded, is everyone's shared inheritance</li> <li>• Increase awareness and understanding of landscape and its value, as a unifying framework for all land-use sectors</li> <li>• Promote a more accessible, integrated and forward-looking approach to managing inherited landscapes and shaping new landscapes</li> </ul>   | <p>The protection, management and enhancement of both urban and rural landscape will be an important issue for the LDP.</p> | <p>The protection, enhancement and management of townscapes and landscapes should be considered within the SA framework.</p>                              |

| <b>EU Sustainable Development Strategy (May 2001)</b>  |   |  |  |
|--|---|--|--|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The EU's Sustainable Development Strategy aims, in tandem with the Lisbon Strategy for growth and jobs, for a more prosperous, cleaner and fairer Europe. Sustainable Development is an overarching concept. The EU Treaty requires the integration of sustainable development into all European policies, so they are designed in a balanced and mutually reinforcing way to meet economic, environmental and social objectives. This strategy is composed of two main parts. The first proposes objectives and policy measures to tackle a number of key unsustainable trends in the EU and globally. The priorities are to:</p> <ul style="list-style-type: none"> <li>• Combat climate change;</li> <li>• Ensure sustainable transport;</li> <li>• Address threats to public health, such as chemicals pollution, unsafe food and infectious diseases;</li> <li>• Manage natural resources more responsibly and stop biodiversity decline;</li> <li>• Combat poverty and social exclusion; and</li> <li>• Meet the challenge of an ageing population.</li> </ul> <p>The second — and arguably more ambitious — part of the strategy revises the very way that policies are made. It calls for a new approach to policy-making that ensures the EU's economic, social and environmental policies mutually reinforce each other.</p> <p>The Gothenburg Declaration forms the core of what is known as the EU's sustainable development strategy (EU SDS). But this strategy also encompasses other programmes and commitments. For example, it includes the commitments made at the 2002 World Summit on Sustainable Development in Johannesburg and the Millennium Development Goals agreed in 2000, as well as global pledges to increase official development aid and to take account of the needs of developing countries in international trade.</p> | <ul style="list-style-type: none"> <li>• The EU will meet its Kyoto commitment as a first step then aim to reduce atmospheric greenhouse gas emissions by an average of 1% per year over 1990 levels up to 2020.</li> <li>• Break the links between economic growth, the use of resources and the generation of waste.</li> <li>• Protect and restore habitats and natural systems and halt the loss of biodiversity by 2010.</li> <li>• By 2020, ensure that chemicals are only produced and used in ways that do not pose significant threats to human health and the environment.</li> <li>• Protect and restore habitats and natural systems and halt the loss of biodiversity by 2010.</li> <li>• Bring about a shift in transport use from road to rail, water and public passenger transport so that the share of road transport in 2010 is no greater than in 1998 (the most recent year for which data are available)</li> <li>• Raise the employment rate to 67% for January 2005 and to 70% by 2010; Increase the number of women in employment to 57% for January 2005 and to more than 60% by 2010.</li> <li>• Halve by 2010 the number of 18 to 24 year olds with only lower secondary education who are not in further education and training.</li> <li>• Increase the average EU employment rate among older women and men (55-64) to 50% by 2010.</li> </ul> | <p>Key European Context. Sustained economic growth should support social progress and respect the local environment. The Plan should have a sustainable vision and provide sustainable spatial policies.</p> | <p>Key objectives that should underpin the Sustainability Appraisal objectives developed by the Vale of Glamorgan Council.</p> |
| <b>EU Sixth Environmental Action Plan (July 2002) 1600/2002/EEC</b>  |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The sixth Environment Action Programme (6th EAP), adopted in 2002, is the EU's ten-year (2002-2012) policy programme for the environment. The programme identifies four environmental areas to be tackled for improvements:</p> <ul style="list-style-type: none"> <li>• Climate Change</li> <li>• Nature and Biodiversity</li> <li>• Environment and Health and quality of life</li> <li>• Natural Resources and Waste</li> </ul> <p>The Commission will start a mid-term review of the 6th EAP before the end of 2006.</p>  | <p>Numerous actions are identified but few specific targets other than for greenhouse gas emissions:</p> <p>In the short term, the EU is committed, under the Kyoto Protocol, to achieving an 8% reduction in emissions of greenhouse gases by 2008-2012 compared to 1990 level (in the longer term a global reduction of 20-40% will be needed).</p>   | <p>Key European Context. Seek to develop policies that ensure sustainable use of natural resources and the urban environment.</p>  | <p>Key European Context.</p>   |

| EU Habitats Directive 1992/43/EEC   |  |  |  |
|---|--|--|--|
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA  |
| <p>The Directive is the means by which the EU Community meets its obligations as a signatory of the Convention on the Conservation of European Wildlife and Natural Habitats (Bern Convention). The Directive applies to the UK and the provisions of the Directive require Member States to introduce a range of measures including the protection of species listed in the Annexes; to undertake surveillance of habitats and species and produce a report every six years on the implementation of the Directive.</p> <p>In the UK the Directive has been transposed into national laws by means of the Conservation (Natural Habitats, &amp; c.) Regulations 1994 (as amended), and the Conservation (Natural Habitats, &amp; c.) Regulations (Northern Ireland) 1995 (as amended). These are known as 'the Habitats Regulations'</p> | <p>No targets as such but established a network of sites within the EU of Community Importance. Once adopted they are designated by Member States as Special Areas of Conservation (SACs) and along with Special Protection Areas (SPAs) classified under the EC Birds Directive, form a network of protected areas known as Natura 2000.</p>  | <p>The LDP is required to take account of the relevant requirements of the HD. This will typically require consideration of relevant EA and CCW guidance. Any plan or project that is likely to have a significant impact on a designated site should undergo an Appropriate Assessment of its implications for the conservation objectives of the site. Where this process concludes that the plan would adversely affect the integrity of a site, it will not proceed – unless there are no alternative solutions and it needs to be carried out for imperative reasons of overriding public interest.</p> | <p>Habitat protection is an important aspect of sustainability that should be considered in the SA objectives.</p> |
| EU Rural Development Policy 2007-13   |  |  |  |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA  |
| <p>Implications are yet unclear, Sets the legal framework for member states for the development and implementation of agricultural policy centred around 3 core objectives:</p> <ul style="list-style-type: none"> <li>• Improving the competitiveness of the farm and forestry sector through support for restructuring, development and innovation</li> <li>• Improving the environment and the countryside through support for land management</li> <li>• Improving the quality of life in rural areas and encouraging diversification of economic activity</li> </ul> <p>Under each of these broad objectives, Member States or regions can chose from a range of pre-defined support measures to build their programmes.</p>   | <p>No relevant targets however include measures for promotion of sustainable land management (Axis 2) and for the diversification of the rural economy and quality of life (Axis 3). Issues which are of relevance to the SA/LDP</p> <p>Axis 2: Environment/Land Management<br/>Measures targeting the sustainable use of:</p> <p><b>Agricultural land:</b> mountain areas; other areas with handicaps; Natura 2000 areas; agri-environment; animal welfare; support for non-productive investments</p> <p><b>Forestry land:</b> first afforestation; first establishment of agro-forestry systems, Natura 2000 areas; forest-environment; restoring forestry potential and introducing prevention actions; support for non-productive investments.</p> <p><b>Axis 3 : Diversification of the rural economy:</b><br/>Diversification to non-agricultural activities; support for micro-enterprises; tourism</p> <p><b>Improvement of the quality of life:</b><br/>Basic services; village renewal; conservation and upgrading of the rural heritage (natural and cultural)</p> | <p>The LDP should seek to facilitate changes in agricultural practice as a result of the new Rural Development Strategy, particularly in relation to the diversification of the rural economy and sustainable agricultural practices.</p>  | <p>Rural diversification that promotes sustainable development should be a key SA consideration of the SA.</p>     |

| <b>The European Employment Strategy (EES) (1997/2000/02)</b>   |  |  |  |
|--|--|--|--|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The EES is designed as the main tool to give direction to and ensure co-ordination of the employment policy priorities to which Member States should subscribe at EU level.</p>   | <p>The Lisbon European Council (March 2000) set full employment as an overarching long term goal for the new European economy, setting a European Union wide target to achieve 70% overall employment and 60% employment for women by 2010.</p>  | <p>Employment creation and economic development will be a key aspect of the LDP.</p>   | <p>There are potential conflicts between the aim of promoting economic development and sustainable development, which needs to be considered within the SA framework/objectives.</p> |
| <b>EU Biodiversity Strategy (Feb 1998)</b>   |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>This strategy aims to anticipate, prevent and attack the causes of significant reduction or loss of biodiversity at the source. This will help both to reverse present trends in biodiversity reduction or losses and to place species and ecosystems, including agro-ecosystems, at a satisfactory conservation status, both within and beyond the territory of the European Union (EU).</p> <p>The Strategy is developed around four major themes:</p> <ul style="list-style-type: none"> <li>• Conservation and sustainable use of biological diversity;</li> <li>• Sharing of benefits arising out of the utilisation of genetic resources;</li> <li>• Research, identification monitoring and exchange of information;</li> <li>• Education, training and awareness.</li> </ul> <p>Within each Theme the specific objectives that will need to be achieved in the context of Action Plans and other measures are highlighted.</p>  | <p>The Strategy focuses specifically on the integration of biodiversity concerns into relevant sectoral policies, in particular:</p> <ul style="list-style-type: none"> <li>• Conservation of natural resources</li> <li>• Agriculture,</li> <li>• Fisheries,</li> <li>• Regional policies and spatial planning,</li> <li>• Forests,</li> <li>• Energy and transport,</li> <li>• Tourism,</li> <li>• Development and economic co-operation</li> </ul>  | <p>The LDP will need to take account of the relevant requirements of the Strategy in particular the Vale of Glamorgan Council's Local Biodiversity Action Plan (May 2002). The Plan should develop policies that support conservation and the sustainable use of biological diversity.</p> | <p>Safeguarding biodiversity is an important aspect of sustainability which should be considered in the SA objectives</p>  |
| <b>EU Water Framework Directive 2000/60/EC</b>   |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The WFD was transposed into English &amp; Welsh law in December 2003, and will have a significant impact on the spatial planning process.</p> <p>It establishes a framework for the protection of inland surface waters, transitional waters, coastal waters and groundwater which:</p> <ul style="list-style-type: none"> <li>• Prevents further deterioration and protects and enhances the status of aquatic ecosystems and, with regard to their water needs, terrestrial ecosystems and wetlands directly depending on the aquatic ecosystems;</li> <li>• Promotes sustainable water use based on a long term protection of available water resources;</li> <li>• Aims at enhanced protection and improvement of the aquatic environment inter alia through specific measures for the progressive reduction of discharges, emissions and losses of priority substances and the cessation or phasing out of discharges, emissions and losses of the priority hazardous substances.</li> </ul> | <p>The Directive has a series of implementation deadlines which stretch to December 2015 (the date by which environmental objectives must be met). In the UK, implementation of the Directive is being undertaken separately for England, Wales, Scotland, and Northern Ireland.</p> <p>The Directive requires that a River Basin Management Plan (RBMP) is produced for each defined River Basin Districts (RBD). These include provision for assessing and monitoring and should include targets.</p> <p>The overall requirement of the Directive is to achieve "good ecological and good chemical status" by 2015 unless there are grounds for derogation. There is also a general "no deterioration" provision to prevent deterioration in status.</p> | <p>The LDP should consider how the water environment can be protected and enhanced e.g. reduction in pollution. In particular the requirements of TAN 15 Development and Flood Risk and information provided by the Environment Agency.</p>  | <p>The protection of water resources is an important aspect of sustainability that should be considered in the SA objectives.</p>  |

|  |   |  |  |
|--|---|--|--|
| <ul style="list-style-type: none"> <li>• Ensures the progressive reduction of pollution of groundwater and prevents its further pollution; and</li> <li>• Contributes to mitigating the effects of floods and droughts.</li> </ul> <p>The Directive promotes a holistic approach to water management and updates existing EC Water legislation through the introduction of a statutory system of analysis and planning based upon the river basin. It expands the scope of water protection to all waters and sets out clear objectives that must be achieved by specified dates.</p>  |   |  |  |
| <b>EU Bathing Water Quality Directive (2006/7EC)</b>   |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The new Directive was adopted on the 15th February 2006 and lays down provisions for more sophisticated monitoring and classification of bathing water. It also provides for extensive public information and participation in line with the Århus Convention as well as for comprehensive and modern management measures. The Directive requires Member States to draw up a management plan for each site to minimise risks to bathers, based on an assessment of the sources of contamination that are likely to affect it. Users of the site should be actively involved in developing the management plan. Where bathing sites have a history of poor water quality, preventive measures should be taken to close the bathing area when such conditions are forecast. If the quality standards are not respected, remedial measures must be taken.</p> <p>Information on a bathing site's quality classification, the results of water quality monitoring, the site's management plan and other relevant information are to be made readily available to the public, both through displays at the site and through the media and internet.</p> <p>The new directive will complement:</p> <ul style="list-style-type: none"> <li>• The water framework Directive 2000/60/EC</li> <li>• The urban waste water treatment Directive</li> </ul> <p>Directive on nitrates pollution from agricultural sources</p> | <p>The new Directive requires the monitoring of two microbiological indicators of faecal contamination, E. Coli and Intestinal Enterococci. This simplification from the earlier directive reflects recognition that faecal material, for instance due to inadequate sewage treatment and pollution from animal waste, is the primary health threat to bathers. It will apply to surface water where a large number of people are expected to bathe, establishing a method for monitoring bathing water quality during the bathing season</p> | <p>The LDP should consider how the water environment can be protected and enhanced e.g. through the reduction in pollution</p> | <p>The protection of water resources is an important aspect of sustainability that should be considered in the SA objectives</p> |
| <b>Bern Convention on the Conservation of European Wildlife and Natural Habitats (1979)</b>  |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Bern Convention came into force on June 1, 1982 and led to the creation in 1998 of the Emerald network of Areas of Special Conservation Interest (ASCIs) throughout the territory of the parties to the convention, which operates alongside the European Union's Natura 2000 programme.</p> <p>The Convention provides for the monitoring and control of endangered species, and the provision of assistance concerning legal and scientific issues.</p>   | <p>The convention sets out to:</p> <ul style="list-style-type: none"> <li>• Conserve wild flora and fauna and their natural habitats;</li> <li>• Promote co-operation between states;</li> <li>• Monitor and control endangered and vulnerable species;</li> </ul> <p>Assist with the provision of assistance concerning legal and scientific issues.</p>   | <p>Addressing biodiversity should be a key element of the LDPs sustainable development objectives.</p>                         | <p>Biodiversity issues should be fully considered in developing the SA framework.</p>  |

| <b>Bonn Convention on the Conservation of Migratory Species (1979)</b>   |  |   |  |
|--|--|---|--|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The Convention on the Conservation of Migratory Species of Wild Animals (also known as CMS or Bonn Convention) aims to conserve terrestrial, marine and avian migratory species throughout their range. It is an intergovernmental treaty, concluded under the aegis of the United Nations Environment Programme, concerned with the conservation of wildlife and habitats on a global scale. Since the Convention's entry into force, its membership has grown steadily to include 97 (as of 1 May 2006)</p>   | <p>Migratory species threatened with extinction are listed in Appendix I of the Convention. CMS Parties strive towards strictly protecting these animals, conserving or restoring the places where they live, mitigating obstacles to migration and controlling other factors that might endanger them</p>   | <p>Addressing biodiversity should be a key element of the LDPs sustainable development objectives</p>   | <p>Biodiversity issues should be fully considered in developing the SA framework.</p>            |
| <b>Ramsar Convention on Wetlands of International Importance, especially as Waterfowl Habitat (1971)</b>   |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The Ramsar Convention or Wetlands Convention was adopted in Ramsar, Iran in February 1971 and entered into force in December 1975. The Convention covers all aspects of wetland conservation and wise use.</p> <p>The UK ratified the Convention in 1976. The UK has generally chosen to underpin the designation of its Ramsar sites through prior notification of these areas as Sites of Special Scientific Interest (SSSIs). Accordingly, these receive statutory protection under the Wildlife &amp; Countryside Act (WCA) 1981 and the Countryside and Rights of Way (CRoW) Act 2000.</p>   | <p>The Convention has three main 'pillars' of activity:</p> <ul style="list-style-type: none"> <li>• The designation of wetlands of international importance as Ramsar sites;</li> <li>• The promotion of the wise-use of all wetlands in the territory of each country; and</li> </ul> <p>International co-operation with other countries to further the wise-use of wetlands and their resources. The Convention's Contracting Parties have assumed a wide range of related obligations.</p> | <p>Addressing biodiversity should be a key element of the LDPs sustainable development objectives</p>   | <p>Biodiversity issues should be fully considered in developing the SA framework</p>             |
| <b>Environmental Liability Directive 2004</b>  |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The Environmental Liability Directive came into force in April 2004. It is aimed at preventing environmental damage by forcing industrial polluters ("operators") to pay prevention and remediation costs.</p> <p>The Directive aims to establish a framework that would prevent "significant environmental damage" or rectify damage after it has occurred. Significant environmental damage will be defined by reference to:</p> <ul style="list-style-type: none"> <li>• Biodiversity, whether protected at EU or national levels;</li> <li>• Waters covered by the water Framework Directive; and</li> <li>• Human health (including land contamination when it is a threat to human health).</li> </ul> <p>Operators carrying out hazardous activities will be held strictly liable for preventing or restoring any damage caused by those activities to land, water and protected habitats and species.</p> | <p>The Directive provides specific criteria to assess when damage is "significant". Member states will be under a duty to ensure that the necessary preventative measures are actually taken. Member states can decide when measures should be taken by:</p> <ul style="list-style-type: none"> <li>• The relevant operator;</li> <li>• The competent authorities; or a third party.</li> </ul>  | <p>Addressing biodiversity and improving the health and well being of the population should be a key element of the LDPs sustainable development objectives</p> | <p>Biodiversity and health issues should be fully considered in developing the SA framework.</p> |

| <b>EU Waste Framework Directive (75/442/EEC as amended by 91/156/EEC)</b>   |  |  |   |
|---|--|--|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Framework Directive on Waste establishes a framework for the management of waste across the EU and provides for a common definition of waste. The main objectives of the WFD also requires Member States of the EU to establish both a network of disposal facilities and competent authorities with responsibility for issuing waste management authorisations and licenses. Member States may also introduce regulations, which specify which waste recovery operations and businesses are exempt from the licensing regimes and the conditions for those exemptions.</p> <p>An important objective of the WFD is to ensure the recovery of waste or its disposal without endangering human health and the environment.</p> <p>The Directive is supplemented by a series of specific daughter Directives, covering particular waste topics e.g. air pollution from industrial plants and landfill.</p> | <p>Member States shall take the necessary measures to ensure that waste is recovered or disposed of without endangering human health and without using processes or methods which could harm the environment, and in particular:</p> <ul style="list-style-type: none"> <li>• Without risk to water, air, soil and plants and animals.</li> <li>• Without causing a nuisance through noise or odours.</li> <li>• Without adversely affecting the countryside or places of special interest.</li> </ul> <p>Member States shall also take the necessary measures to prohibit the abandonment, dumping or uncontrolled disposal of waste. See Welsh specific targets set out in the Welsh Assembly Governments Wise About Waste Strategy (June 2002) and Regional Targets contained within the South East Wales Regional Waste Strategy (March 2004).</p> | <p>The LDP land use policies for waste will need to support the objectives of National and Regional Waste Strategies.</p>  | <p>The sustainable management of waste arising and encouraging overall waste reduction should be a Key SA objective.</p>  |
| <b>EU Climate Change Program</b>  |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The European Climate Change Programme (ECCP) was launched in June 2000 by the European Union's European Commission. The goal of the ECCP is to identify, develop and implement all the necessary elements of a EU strategy to implement the Kyoto Protocol. ECCP II was launched in October 2005 at a major stakeholder conference in Brussels. It will explore further cost-effective options for reducing greenhouse gas emissions in synergy with the EU's 'Lisbon strategy' for increasing economic growth and job creation.</p>   | <p>To meet its target under the Kyoto Protocol of an 8% reduction in greenhouse gas emissions from 1990 levels by 2008-2012.</p>   | <p>Climate change is a key issue, which the LDP must address through its land use strategy.</p>  | <p>Key SA issue.</p>  |
| <b>EU Wild Birds Directive 1979/409 EC</b>  |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Directive and its amending acts aim at providing long-term protection and conservation of all bird species naturally living in the wild within the European territory of the Member States. It seeks to protect, manage and regulate all bird species naturally living in the wild including their eggs, their nests and their habitats; and regulate the exploitation of these species.</p> <p>Member States must also conserve, maintain or restore the biotopes and habitats of these birds by</p> <ul style="list-style-type: none"> <li>• Creating protection zones;</li> <li>• Maintaining the habitats;</li> <li>• Restoring destroyed biotopes;</li> <li>• Creating biotopes.</li> </ul>   | <p>Specific targets are considered within the EU Habitats Directive and Biodiversity Strategy</p>  | <p>The LDP will need to take account of the relevant requirements of the Strategy and not hinder the protection, management and control of species of naturally occurring wild birds. The Vale of Glamorgan Council's Local Biodiversity Action Plan (May 2002).</p> | <p>Safeguarding biodiversity is an important aspect of sustainability which should be considered in the SA objectives</p> |

| EU Directive Assessment & Management of Environmental Noise 2002/49 EC   |   |  |  |
|--|---|--|--|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA  |
| <p>The new directive from the European Parliament and Council on assessment and management of environmental noise was adopted in June 2002. As part of their implementation of the directive, the individual Member States have to draw up strategic noise maps and action plans aimed at preventing and reducing environmental noise. Environmental noise is noise from road traffic, railways, aircraft, and industrial plant. The directive contains four elements:</p> <ul style="list-style-type: none"> <li>• <b>Monitoring the environmental problem;</b> by requiring competent authorities in Member States to draw up "strategic noise maps" for major roads, railways, airports and agglomerations, using harmonised noise indicators <math>L_{den}</math> (day-evening-night equivalent level) and <math>L_{night}</math> (night equivalent level). These maps will be used to assess the number of people annoyed and sleep-disturbed respectively throughout Europe.</li> <li>• <b>Informing and consulting the public</b> about noise exposure, its effects, and the measures considered to address noise, in line with the principles of the Aarhus Convention.</li> <li>• <b>Addressing local noise issues</b> by requiring competent authorities to draw up action plans to reduce noise where necessary and maintain environmental noise quality where it is good. The directive does not set any limit value, nor does it prescribe the measures to be used in the action plans, which remain at the discretion of the competent authorities.</li> <li>• <b>Developing a long-term EU strategy</b>, which includes objectives to reduce the number of people affected by noise in the longer term, and provides a framework for developing existing Community policy on noise reduction from source. With this respect, the Commission has made a declaration the provisions laid down in article 1.2 with regard to the preparation of legislation relating to sources of noise.</li> </ul> <p>The goal of the directive is to establish a common European approach, which - based on a prioritised foundation - aims to avoid, prevent or limit the effects, including annoyance, caused by exposure to environmental noise.</p> | <p>To achieve a reduction in the number of people regularly affected by long term high levels of noise from an estimated 100 million people in the year 2000 by around 10% in the year 2010 and 20% by 2020</p> | <p>Not directly relevant to the LDP, however policy criteria will need to take account of the impact of development in relation to noise generation.</p> | <p>Noise problems can be seen as an aspect of Quality of Life and therefore should be addressed within the wider context of improving well-being. Looking at this issue in a wider context should be a SA requirement.</p> |

| <b>EU Air Quality Framework Directive 96/62/EC</b>  |  |   |   |
|---|--|---|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>A series of Directives has been introduced to control levels of certain pollutants and to monitor their concentrations in the air. In 1996, the Environment Council adopted Framework Directive 96/62/EC on ambient air quality assessment and management. This Directive covers the revision of previously existing legislation and the introduction of new air quality standards for previously unregulated air pollutants, setting the timetable for the development of daughter directives on a range of pollutants.</p> <p>The general aim of the Directive is to define the basic principles of a common strategy to:</p> <ul style="list-style-type: none"> <li>• Define and establish objectives for ambient air quality in the Community designed to avoid, prevent or reduce harmful effects on human health and the environment;</li> <li>• Assess the ambient air quality in Member States on the basis of common methods and criteria;</li> <li>• Obtain information on ambient air quality and ensure it is made available to the public; and</li> <li>• Maintain or improve ambient air quality.</li> </ul> <p>The Framework Directive was followed by daughter directives, which set the numerical limit values, or in the case of ozone, target values for each of the identified pollutants.</p> | <p>Establishes mandatory standards for air quality and sets limits and guide values for the pollutants identified.</p> <ul style="list-style-type: none"> <li>• Benzene;</li> <li>• 1,3-butadiene;</li> <li>• Carbon monoxide;</li> <li>• Lead;</li> <li>• Nitrogen dioxide;</li> <li>• Ozone;</li> <li>• Particles (PM10); and</li> <li>• Sulphur dioxide.</li> </ul> | <p>Not directly relevant to the LDP, but it should consider any effects policies may have on the levels of air pollution.</p>   | <p>Protection of the environment is a key sustainability objective and improving air quality should be amongst the SA objectives.</p> |
| <b>Pan - European Biological and Landscape Diversity Strategy</b>   |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The Strategy's vision for the future is to achieve conservation and sustainable use of biological and landscape diversity for the whole continent of Europe and its territories within 20 years, and specifically to seek to ensure the following aims:</p> <ul style="list-style-type: none"> <li>• Threats to Europe's biological and landscape diversity are reduced substantially, and, where possible, removed.</li> <li>• Resilience of European biological and landscape diversity is increased.</li> <li>• Ecological coherence of Europe as a whole is strengthened.</li> <li>• Full public involvement in conservation of biological and landscape diversity is assured.</li> </ul> <p>The Strategy sets out to achieve the following objectives over this period:</p> <ul style="list-style-type: none"> <li>• Conservation, enhancement and restoration of key ecosystems, habitats, species and features of the landscape through the creation and effective management of the Pan-European Ecological Network.</li> </ul>  | <p>None set.</p>   | <p>Seeks to Integrate different interests bearing on the planning of rural areas and urban planning in such a way that natural and landscape values are safeguarded, especially in areas with high biological and landscape diversity value and in the wider countryside.</p> | <p>Landscape and biodiversity protection/enhancement should be a key SA objective.</p>  |

|   |  |   |  |
|---|--|---|--|
| <ul style="list-style-type: none"> <li>• Sustainable management and use of the positive potential of Europe's biological and landscape diversity through making optimum use of the social and economic opportunities on a local, national and regional level.</li> <li>• Integration of biological and landscape diversity conservation and sustainable use objectives into all sectors managing or affecting such diversity.</li> <li>• Improved information on, and awareness of, biological and landscape diversity issues, and increased public participation in actions to conserve and enhance such diversity.</li> <li>• Improved understanding of the state of Europe's biological and landscape diversity and the processes that render them sustainable.</li> </ul> <p>Assurance of adequate financial means to implement the Strategy.</p> |  |   |  |
| <b>Nitrates Directive 91/676/EEC</b>  |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>                                     |
| <p>The Nitrates Directive was adopted in Europe in 1991 and has the objective of reducing water pollution caused or induced by nitrates from agricultural sources and preventing further such pollution. It is intended both to safeguard groundwater and to prevent wider ecological damage in the form of eutrophication of freshwater and marine waters generally.</p>   | <p>The Directive requires Member States to implement one of the following two options:<br/> 1. To apply agricultural <i>Action Programme measures</i> throughout their whole territory or;<br/> 2. To apply Action Programme measures within discrete <i>Nitrate Vulnerable Zones (NVZs)</i></p> | <p>Plan policies should support the overall objectives and the requirements of the Directive.</p> | <p>SA should include objectives on water quality.</p>          |
| <b>European Spatial Development Perspective (1999)</b>  |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>                                     |
| <p>The ESDP is, as a legally non-binding document, a policy framework for better co-operation between EU sectoral policies with significant spatial impacts and between Member States, their regions and cities. It is intended to express a shared vision for the European territory as a whole.</p>   | <p>The ESDP pursues three fundamental goals: economic and social cohesion, sustainable development and the competitiveness of the EU territory</p>   | <p>Plan policies to support the overall objectives of the ESDP.</p>                               | <p>Objectives should be reflected within the SA Framework.</p> |

| <b>Waste To Landfill Directive 1999/31/EEC</b>   |   |  |  |
|--|---|--|--|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The EU Landfill Directive [1999/31/EC] was adopted on 16 July 1999 and the bulk of the legislation came into force in the UK in June 2002 under the new Landfill (England and Wales) Regulations 2002. The Directive aims to improve standards of landfilling across Europe, through setting specific requirements for the design, operation and aftercare of landfills, and for the types of waste that can be accepted in landfills. The Directive also intends to prevent or reduce the adverse effects of the landfill of waste on the environment, in particular on surface water, groundwater, soil, air and human health. It defines the different categories of waste and applies to all landfills, defined as waste disposal sites for the deposit of waste onto or into land.</p> | <p>The Directive sets out successive targets for reducing biodegradable municipal waste (BMW). BMW must be reduced to 75% of the 1995 baseline by 2010, 50% by 2013 and 35% by 2020. The Directive also requires Member States to set up a national strategy for the implementation of these targets.</p>   | <p>The LDP should take into account the reduction targets as transposed in UK law, in particular when considering the management of biodegradable municipal waste (BMW).</p> | <p>The SA should include objectives on reduction of BMW sent to landfill.</p>    |
| <b>European Commission White Paper on the European Transport Policy (2001)</b>   |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>On 12 September 2001, the Commission presented its White Paper on the future common transport policy. The 130-page document proposes 60 measures to overhaul the current transport policy in order to make it more sustainable and avoid huge economic losses due to congestion, pollution and accidents.</p>   | <p>The principal measures suggested in the White Paper include:</p> <ul style="list-style-type: none"> <li>• Revitalising the railways</li> <li>• Improving quality in the road transport sector</li> <li>• Striking a balance between growth in air transport and the environment</li> <li>• Turning intermodality into a reality</li> <li>• Improving road safety</li> <li>• Adopting a policy on effective charging for transport</li> </ul> | <p>The Plan should consider how these issues may be addressed at a local level.</p>  | <p>The SA should develop environmental objectives for sustainable transport.</p> |

## NATIONAL (UNITED KINGDOM WIDE) POLICIES, PLANS AND PROGRAMMES

| UK Sustainable Development Strategy 2005   |   |  |  |
|--|---|--|--|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA  |
| <p><b>Living Within Environmental Limits</b><br/>Respecting the limits of the planet's environment, resources and biodiversity – to improve our environment and ensure that the natural resources needed for life are unimpaired and remain so for future generations.</p> <p><b>Ensuring a Strong, Healthy and Just Society</b><br/>Meeting the diverse needs of all people in existing and future communities, promoting personal wellbeing, social cohesion and inclusion, and creating equal opportunity for all.</p> <p><b>Achieving a Sustainable Economy</b><br/>Building a strong, stable and sustainable economy which provides prosperity and opportunities for all, and in which environmental and social costs fall on those who impose them (polluter pays), and efficient resource use is incentivised.</p> <p><b>Promoting Good Governance</b><br/>Actively promoting effective, participative systems of governance in all levels of society – engaging people's creativity, energy, and diversity.</p> <p><b>Using Sound Science Responsibly</b><br/>Ensuring policy is developed and implemented on the basis of strong scientific evidence, whilst taking into account scientific uncertainty (through the precautionary principle) as well as public attitudes and values.</p> | <p>Introduces a new set of high-level indicators: the UK Framework Indicators to give an overview of sustainable development and the priority areas in the UK. Consists of a set of 64 indicators (including some still to be developed e.g. well being index).</p> | <p>Key to Plan Framework</p>   | <p>Key SA framework</p>  |
| The Future of Transport White Paper (DETR, 2004)   |   |  |  |
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA  |
| <p>Sets out Government plans for transport in the long term. The strategy is built around 3 central themes:</p> <ul style="list-style-type: none"> <li>• Sustained investment over the long term</li> <li>• Improvement in transport management, and</li> <li>• Planning ahead</li> </ul>  | <p>The white paper does not contain detailed quantified targets or specific indicators.</p>   | <p>Important policy context, but not directly relevant to the VoG LDP. Nevertheless, effective access to employment, education and services is vital to improving Quality of Life and contributes to social inclusion. But transport, and the infrastructure to support, it has large environmental impacts, including contributing to greenhouse gas emissions.</p> <p>The LDP should consider these issues, and in particular reducing the need to travel by private car; reducing the volume of freight traffic; and Improving accessibility of key services to local communities</p> | <p>The issues surrounding access and travel are important considerations for the SA.</p> |

| <b>UK Air Quality Strategy (2000)</b>  |  |  |   |
|--|--|--|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>This Strategy describes the plans drawn up by the Government and the devolved administrations to improve and protect ambient air quality in the UK in the medium-term. The proposals aim to protect people's health and the environment without imposing unacceptable economic or social costs.</p> | <p>The pollutants covered are:</p> <ul style="list-style-type: none"> <li>• benzene;</li> <li>• 1,3-butadiene;</li> <li>• carbon monoxide;</li> <li>• lead;</li> <li>• nitrogen dioxide;</li> <li>• ozone;</li> <li>• particles (PM10); and</li> <li>• sulphur dioxide.</li> </ul> <p>Targets are set for each of these.</p> | <p>Not directly relevant to the LDP, but it should consider any effects policies may have on the levels of air pollution.</p>  | <p>Protection of the environment is a key sustainability objective and improving air quality should be amongst the SA objectives.</p> |
| <b>The Air Quality Strategy: Addendum (Defra 2003)</b>   |  |  |   |

| <p>Details how the UK plans to deliver its Kyoto target to cut its greenhouse gas emissions by 12.5%, and move towards its domestic goal to cut carbon dioxide emissions by 20% below 1990 levels by 2010.</p> <p>It aims to:</p> <ul style="list-style-type: none"> <li>• Improve business's use of energy, stimulate investment and cut costs;</li> <li>• Stimulate new, more efficient sources of power generation;</li> <li>• Cut emissions from the transport sector;</li> <li>• Promote better energy efficiency in the domestic sector;</li> <li>• Improve energy efficiency requirements of the Building Regulations;</li> <li>• Continue the fall in emissions from agriculture and forestry;</li> <li>• Ensure the public sector takes a leading role.</li> </ul> |  | <p>The LDP policies should take account both of the need to minimise greenhouse gas emissions and the potential impacts of climate change.</p>   | <p>Climate change issues should be considered in developing the SA framework.</p>   |
| <b>Climate Change: The UK Programme 2006</b>  |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>Reaffirms local government responsibilities set out in Energy White Paper. Encouraging more sustainable development and land use, also by facilitating the rollout of low carbon technologies.</p> <p>Also contains a review of progress towards meeting the targets set out in the UK Climate Change Programme (2000). The programme includes new measures for reducing emission arising from the energy, business, agriculture, domestic, transport and public sectors.</p>  | <p>See key targets set in the 2000 Climate Change Programme above.</p>   | <p>The 2006 programme identifies the role that land use policies can contribute towards reducing emissions, especially in relation to the location design, and construction of new buildings.</p>                                  | <p>Climate change issues should be considered in developing the SA framework.</p>   |
| <b>Energy White Paper: Our energy future – creating a low carbon economy (DTI 2003)</b>   |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The aims of the white paper are:</p> <ul style="list-style-type: none"> <li>• To put ourselves on a path to cut the UK's carbon dioxide emissions - the main contributor to global warming - by some 60% by about 2050, as recommended by the RCEP, with real progress by 2020;</li> <li>• To maintain the reliability of energy supplies;</li> <li>• To promote competitive markets in the UK and beyond, helping to raise the rate of sustainable economic growth and to improve our productivity; and</li> <li>• To ensure that every home is adequately and affordably heated.</li> </ul>  | <p>Contains quantified targets for a number of policies, including carbon emissions (See Key Objectives), electricity from renewable sources (10% by 2010, 20% by 2020) and the industrial use of oil and gas.</p> | <p>LDP policies should take account of the need to minimise the use of energy and to reduce greenhouse gas emissions, particular in regard to transport and access, building design and the increased use of renewable energy.</p> | <p>Efficient use of natural resources is a key component of sustainability. The SA framework should include objectives for improving energy efficiency and the reduction of greenhouse gas emissions.</p> |

| <b>Our Energy Challenge: Securing Clean Affordable Energy for the Long Term</b>  |   |  |   |
|--|---|--|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>Sets proposals for tackling the UK's future energy needs and proposes a series of actions to take forward the strategy. The strategy examines the following energy related issues:</p> <ul style="list-style-type: none"> <li>• Carbon Reduction &amp; Climate Change</li> <li>• Energy Efficiency- Homes, Transport and Industry</li> <li>• Renewable Energy- Winds, Solar, Wave, Biomass</li> <li>• Nuclear Energy, Oil, Gas and Coal</li> <li>• Fuel Poverty</li> </ul>  | <p>None specific. However the document urges local planning authorities in England to set ambitious policies for the percentage of energy in new developments to come from on-site renewable. Also indicates that planning authorities should include policies in their development plans that require a percentage of the energy in new developments to come from on-site renewables, wherever viable.</p> | <p>Whilst referring to English Planning Authorities, the need to promote the development of on site renewable energy and carbon neutral developments should also be considered within the LDP.</p>                                 | <p>Fuel Poverty, renewable energy, energy efficiency and reducing carbon emissions should be considered within the SA framework.</p>  |
| <b>The Energy Challenge: Energy Review 2006 (DTI July 2006)</b>  |   |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The review sets out the Governments long-term goals for energy policy:</p> <ul style="list-style-type: none"> <li>• To put the UK on a path to cut our carbon dioxide emissions by some 60% by about 2050, with real progress by 2020;</li> <li>• To maintain reliable energy supplies;</li> <li>• To promote competitive markets in the UK and beyond, helping to raise the rate of sustainable economic growth and to improve our productivity; and</li> <li>• To ensure that every home is adequately and affordably heated.</li> </ul>  | <p>None specific. The report sets out the steps need to respond to the energy challenges facing the United Kingdom. It makes a number of proposals for actions to be taken now, identifies proposals on which Government intends to consult further, and indicates areas where Government considers there is further work to be done.</p>   | <p>LDP policies should take account of the need to minimise the use of energy and to reduce greenhouse gas emissions, particular in regard to transport and access, building design and the increased use of renewable energy.</p> | <p>Efficient use of natural resources is a key component of sustainability. The SA framework should include objectives for improving energy efficiency and the reduction of greenhouse gas emissions.</p> |
| <b>The UK Biodiversity Action Plan (1994)</b>  |   |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The UK Biodiversity Action Plan, published in 1994 set out a programme for the conservation of the UK's biodiversity and the creation of Action Plans for the protection of many of our most threatened species and habitats.</p>   | <p>None specific. However The UK Biodiversity Action Plan highlights a number of priority habitats and species with associated action plans at the species, habitat and local level, which are considered within Local Biodiversity Action Plans (LBAP).</p>  | <p>The LDP will need take account of the UK BAP principles and those contained within the Vale of Glamorgan Council LBAP.</p>  | <p>The SEA should consider biodiversity impacts within its objectives.</p>  |
| <b>Water Resources for the Future: A Strategy for England and Wales, March 2001</b>  |   |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>This strategy has the following objectives:</p> <ul style="list-style-type: none"> <li>• To illustrate the impact of different social and economic choices on future water use;</li> <li>• To manage water resources in a way that causes no long term degradation of the environment;</li> <li>• To improve the state of existing degraded catchments;</li> <li>• To ensure that water is available to those who need it, and that it is used wisely by all;</li> <li>• To indicate the present state of water resources;</li> <li>• To cater robustly for risks and uncertainties;</li> <li>• To promote the value of water to society and the environment;</li> <li>• To review feasible water management options including innovative solutions where appropriate;</li> <li>• To provide a framework for logical decisions to be taken at the right time;</li> <li>• To identify actions and opportunities for the Agency and others to work together to achieve our vision.</li> </ul> | <p>None specific however recognizes the role of planning for promoting sustainable water technologies within new developments.</p>  | <p>Include policies that require new development to use water efficiently and that improve the state of watercourses.</p>  | <p>Sustainability objectives should consider water quality and promote its efficient use.</p>   |

| <b>UK Waste Strategy (Defra 2000)</b>  |   |   |   |
|--|---|---|---|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| <p>This strategy describes the Governments vision for managing waste and resources better.</p> <p>Changing the way we manage waste and resources can make an important contribution to improving our quality of life.</p> <p>To tackle the amount of waste produced, breaking the link between economic growth and increased waste. Where waste is produced, we must put it to good use, through re-use, recycling, composting and recovering energy.</p>  | <p>Key targets:</p> <p>By 2005 to reduce the amount of industrial and commercial waste sent to landfill to 85% of that landfilled in 1998</p> <p>To recover value from 40% of municipal waste by 2005<br/>To recover value from 45% of municipal waste by 2010<br/>To recover value from 67% of municipal waste by 2015<br/>To recycle or compost at least 25% of household waste by 2005<br/>To recycle or compost at least 30% of household waste by 2010<br/>To recycle or compost at least 33% of household waste by 2015</p> <p>(Also see WAG targets contained within Wise about Waste Strategy (June 2002).)</p> | <p>This strategy is relevant to the LDP in that planning policies may affect the delivery of the UK's waste strategy.</p>   | <p>Management of waste is an important SD issue that should be considered in the SA.</p>                        |
| <b>The Commons Act 2006</b>  |   |   |   |
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| <p>The Commons Act enables commons to be managed more sustainably by commoners and landowners working together through new commons councils with powers to regulate grazing, vegetation and other agricultural activities. It updates and improves the controls on works and fencing on commons and ensures that existing statutory protections are applied consistently. This includes reinforcing existing protections against abuse, encroachment and unauthorised development. The Act also safeguards public access by enabling some "missed" commons to be registered, and some wrongly registered land to be deregistered – through an overhaul of the registration system for common land (and town and village greens).</p> | <p>In Wales there are 175,000 hectares of common land representing around 12% of Wales's area. The Act also sets new, clear criteria for registering town or village greens, which will give local people the ability to register places that are of value to them for recreation and green space, and protect them permanently. However the Act has no direct relevance to the production of the LDP.</p>  | <p>The LDP should consider the need to assess developments against having regard to statutorily designated common land.</p> | <p>Biodiversity is a key aspect of sustainable development that should be included within the SA framework.</p> |
| <b>The Natural Environment and Rural Communities Act 2006</b>  |   |   |   |
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| <p>The Natural Environment and Rural Communities Act is designed to help achieve a rich and diverse natural environment and thriving rural communities through modernised and simplified arrangements for delivering Government policy. The Act implements key elements of the Government's Rural Strategy published in July 2004. As well as establishing Natural England, the Act places a duty to conserve biodiversity on all public bodies and also contains a number of additional measures designed to streamline delivery and simplify the legislative framework .</p>   | <p>In exercising their functions, all public bodies must so far as is consistent with the proper exercise of those functions, have regard to biodiversity.</p>  | <p>Addressing biodiversity issues should be a key element of the LDPs sustainable development objectives</p>                | <p>Biodiversity issues should be fully considered in developing the SA framework</p>                            |

## WALES SPECIFIC POLICIES, PLANS AND PROGRAMMES

| People, Places, Futures - The Wales Spatial Plan (2004)  |  |  |   |
|--|--|--|---|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA   |
| <p>The objectives and aims of the WSP are based on 5 key principles:</p> <ul style="list-style-type: none"> <li>• Building Sustainable Communities</li> <li>• Promoting a Sustainable Economy</li> <li>• Valuing our Environment</li> <li>• Achieving sustainable accessibility</li> <li>• Respecting Distinctiveness</li> </ul> <p>The Vision for the South East region which covers the Vale of Glamorgan is:</p> <p><i>“An innovative skilled area offering a high quality of life – international yet distinctively Welsh. It will compete internationally by increasing its global visibility through stronger links between the Valleys and the coast and with the UK and Europe, helping to spread prosperity within the area and benefiting other parts of Wales”.</i></p> | <p>No specific targets or indicators are set within the WSP. However, for The Vale of Glamorgan LDP the following area actions for the ‘South East – The Capital Network’ are of particular relevance:</p> <ul style="list-style-type: none"> <li>• Target improved bus, rail, inter-modal and park and ride services and facilities for commuting to provide real options and reduce dependency on the car.</li> <li>• Increase the transport capacity of the corridors and gateways to Europe and beyond. This will include capacity enhancements on the M4 and A465 corridors through the Trunk Road Forward Programme as well as development of routes from Cardiff International Airport.</li> <li>• The Welsh Assembly Government and South East Wales Transport Alliance will work with relevant local authorities in England to press for appropriate investment in road and rail links between South East Wales and London.</li> <li>• The use of undeveloped land for housing in locations with high development pressure should be minimised, in particular to the South of and along the M4. Local authorities in the area should commission research to identify availability of brownfield land and scope for re-use.</li> <li>• Local authorities are required to meet the Welsh Housing Quality Standard by 2012. The level of committed forward investment realised through this process should act as a catalyst for local social and economic regeneration and skills/training programmes for local people.</li> <li>• Local authorities should collaborate to ensure that their housing plans reflect the interdependence of urban settlement across the area as a whole.</li> <li>• Development should be avoided in areas vulnerable to future flooding in the light of estimates of the impact of climate change following the advice in TAN 15 Development and Flood Risk.</li> <li>• Employment site provision reviewed in consideration of this Plan and the WDA Property Strategy to bring forward new proposals and reallocate sites where necessary, optimise the potential of existing sites and develop proposals for the location of a Premier Business Park in South East Wales.</li> <li>• Reducing health inequalities and promoting healthier lifestyles through Health Challenge Wales and targeted action to tackle health inequalities.</li> <li>• Programmes such as ‘Keep well this winter’ tackling the wider determinants of health including social, environmental and economic wellbeing through Community Plans and Health, Social Care and Wellbeing strategies.</li> </ul> | <p>Key Regional context.</p> <p>There is a statutory requirement for Local Development Plans to take account of the Wales Spatial Plan’s aims and objectives. For The Vale of Glamorgan the Wales Spatial Plan context for South East Wales Region will be of particular importance.</p> <p>The Wales Spatial Plan will be a material consideration for Local Planning Authorities in making planning decisions.</p> | <p>Key Regional context.</p> <p>The SA should consider the objectives outlined to ensure compatibility.</p> |

|  |  |  |  |
|--|--|--|--|
|  | <ul style="list-style-type: none"> <li>Improved collaboration between HE and FE institutions, ELWa, the WDA and business to identify opportunities to strengthen the knowledge economy and intervention on skill development linked to economic priorities.</li> </ul>   |  |  |
| <b>The Sustainable Development Action Plan of the Welsh Assembly Government 2004 –2007</b>   |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Action Plan sets out key actions that the Welsh Assembly Government believe will constitute a 'step change' in delivering sustainable development in Wales.</p>   | <p>The Action Plan contains various targets and indicators under the following themes:</p> <ul style="list-style-type: none"> <li>Climate change</li> <li>Liveable Places, Strong Communities</li> <li>Our Natural Environment</li> <li>Supporting Welsh Business in Sustainable Production</li> <li>Reducing Consumption</li> <li>Leadership and Delivery</li> <li>Creating Organisational Excellence</li> <li>Delivering through our Agents</li> <li>Delivering with Local Government</li> <li>Delivering with Partners</li> <li>Wales: A Global Citizen</li> <li>Promoting awareness and Leadership</li> <li>Education for a Sustainable Future</li> <li>Making our Money Talk – Procurement, Grants</li> <li>Food</li> </ul> | <p>The LDP should assist the statutory duty of the WAG to promote sustainable development.</p> <p>Need to ensure that LDP Policies are consistent with national sustainability objectives and targets.</p> | <p>SA principles should compliment the WAG's vision of sustainable development in Wales.</p> |
| <b>Starting to Live Differently – The Sustainable Development Scheme of the National Assembly for Wales (2004)</b>   |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The National Assembly for Wales has a duty under section 121 of the Government of Wales Act 1998 to promote sustainable development in the exercise of its functions.</p> <p>The Scheme is the National Assembly's overarching strategic framework and sets out the vision of a sustainable future for all of Wales where action for social, economic and environmental improvement work together to create positive change.</p> <p>The Action Plan contains the following vision for sustainable development in Wales:</p> <ul style="list-style-type: none"> <li>Promoting a diverse, competitive, high added value economy, with high skills and education, that responds to sustainable development opportunities, minimises demands on the environment and maximises the distribution of the benefits;</li> <li>Action on social justice that tackles poverty, poor health, and consequences of disadvantage and provides people and their communities with the means to help themselves break out of the poverty trap;</li> <li>Action in our built and natural environment that enhances pride in the community, promotes biodiversity, promotes local employment and</li> </ul> | None.  | <p>The LDP should assist the statutory duty of the WAG to promote sustainable development.</p>   | <p>SA principles should compliment the WAG's vision of sustainable development in Wales.</p> |

|  |  |  |  |
|--|--|--|--|
| <p>minimises waste generation, energy, water and transport demands;</p> <ul style="list-style-type: none"> <li>• Strengthening Wales' cultural identity and helping to create a bilingual country, while looking confidently outwards and welcoming new cultural influences;</li> <li>• Creating a place which values its children and where young people want to live, work and enjoy a high quality of life, and where future generations enjoy better prospects in life and are not landed with a legacy of problems bequeathed by us;</li> <li>• Supporting people to live healthy and independent lives, irrespective of income, location or disability;</li> <li>• Valuing everyone in society and promoting equality of opportunity;</li> <li>• Promoting openness, partnership and participation, so that people can play a part in taking decisions that affect them;</li> <li>• Contributing to sustainable development at a global level as well as locally and taking account of the global impacts of decisions made in Wales.</li> </ul> |  |  |  |
|--|--|--|--|

**Wales: A Better Country – The Strategic Agenda of the Welsh Assembly Government (2003)**

| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA | Implications for Plan   | Implications for SA  |
|---|--|---|--|
| <p>The WAG's over arching vision for health, education, employment for Wales. Key aims relevant to Plan and SA are</p> <ul style="list-style-type: none"> <li>• Promoting openness, partnership and participation;</li> <li>• Ensuring all our children and future generations enjoy better prospects in life, and are not landed with a legacy of problems bequeathed by us;</li> <li>• Promoting a diverse, competitive, high added-value economy, with high quality skills and education, that minimizes demands on the environment;</li> <li>• Strengthening Wales' cultural identity and helping to create a bilingual country;</li> <li>• Action in our built and natural environment that enhances pride in the community, supports bio-diversity, promotes local employment and helps to minimize waste generation, energy and transport demands;</li> <li>• Action on social justice that tackles poverty and poor health, and provides people and their communities with the means to help themselves and break out of the poverty trap; and</li> <li>• Supporting people to live healthy and independent lives.</li> </ul> | <p>Not applicable</p>                              | <p>The LDP should reflect the key principles of the WAG's strategic vision, particularly in regard to its aims relating to economy development and the built environment.</p> | <p>The SA should reflect the integrated economic, environmental and economic aims of the strategy.</p> |

**Climate Change Wales – Learning to Live Differently (2001)**

| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA   |
|--|--|--|---|
| <p>This is the Assembly's framework for recognising and taking action against the causes and consequences of Climate Change.</p> <p>It relates directly to the Kyoto Protocol.</p> | <p>The UK as a whole has a domestic goal of a 20% reduction in carbon dioxide emissions by 2010.</p> <p>"Better Wales, the strategic plan for the National Assembly for Wales, includes the following targets for sustainable development:</p> | <p>The potential effects of climate change must be considered and built into all aspects of the planning process so that it is sufficiently responsive to cope with the impacts of change as they arise.</p> | <p>One of the SA objectives should be to address the causes and consequences of climate change.</p> |

|  |   |   |  |
|--|---|---|--|
|  | <ul style="list-style-type: none"> <li>• The generation of 5% of electricity from renewable sources by 2003;</li> <li>• To pursue a course of developing Wales as a global showcase for clean energy production; and</li> <li>• To encourage the development of strong environmental goods, services and renewables industrial sectors. “</li> </ul>  |   |  |
| <b>The Welsh Assembly Government Environment Strategy (2006)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The Environment Strategy is the Assembly Government’s long term strategy for the environment of Wales, setting the strategic direction up to 2026 and has five main environmental themes:</p> <ul style="list-style-type: none"> <li>• Addressing climate change – covers climate change mitigation and adaptation.</li> <li>• Sustainable resource use – material consumption and waste; water; soils; minerals and aggregates.</li> <li>• Distinctive biodiversity, landscapes and seascapes – biodiversity; the marine environment; landscapes and seascapes and their historic component.</li> <li>• Our local environment – the built environment and access to green space; environmental nuisances; walkability in urban areas and access to the countryside and coast; and flood risk management.</li> <li>• Environmental hazards – pollution, chemicals and radioactivity</li> </ul> <p>For each of these subjects, the Strategy explains the issues and where we are now. It sets out the environmental outcomes we want to achieve and the associated indicators and timelines for delivery</p> | <p>None specific, however the Action Plan for the implementation of the Environment Strategy identifies the following areas of priority:</p> <ul style="list-style-type: none"> <li>• Minimise our greenhouse gas emissions and adapt to the impacts of climate change,</li> <li>• Conserve and enhance our biodiversity, while respecting the dynamics of nature,</li> <li>• Monitor and regulate known and emerging environmental hazards,</li> <li>• Tackle unsustainable practices, like waste production and disposal, and to</li> <li>• Conserve and enhance our land and sea, our built environment, our natural resources and heritage, developing and using them in a sustainable and equitable way and for the long-term benefit of the people of Wales.</li> </ul> | <p>The 5 key themes set out in the Environment Strategy are all of relevance to the LDP, and this is highlighted with the strategy itself particularly in relation to the allocation of sites for Regional Waste Management Facilities, safeguarding both natural and built environments as well as the promotion of good design and the construction of environmentally sensitive buildings.</p> | <p>The 5 main environmental themes of the Environment Strategy are all of relevance to the SA framework and are also key themes highlighted in other plans, policies and programmes.</p> |
| <b>Energy Wales: A Route Map to Clean, Low-Carbon and More Competitive Energy Future for Wales - Consultation Document (2005)</b>  |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>Provides a framework for improvements in energy supply, to promote clean energy production and energy efficiency.</p>   | <p>Welsh energy policy currently has five important strands:<br/>A strong drive in Wales for:</p> <ol style="list-style-type: none"> <li>Securing 4 TWhr per annum of renewable electricity production by 2010 and 7TWhr by 2020. Much greater energy efficiency in all sectors, as is described in our ‘Energy Savings Wales’ energy efficiency action plan published in October 2004.</li> <li>More electricity generation from cleaner, higher efficiency fossil-fuel plants.</li> <li>Significant energy infrastructure improvements, and</li> <li>On a holistic basis, achieving measurable carbon dioxide emission reduction targets for 2020.</li> </ol>   | <p>According to the WAG: “The planning system is crucial to clean energy and associated infrastructure development. The innovative and strategic approach proposed with TAN 8 for onshore wind farms and other renewables will be key to meeting our renewable electricity aspirations.”</p>  | <p>The need for clean energy production and energy efficiency should be reflected in the SA framework.</p>   |

| <b>A Winning Wales - The National Economic Development Strategy of the Welsh Assembly Government (2002)</b>  |  |  |   |
|--|--|--|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>A Winning Wales is the Welsh Assembly Government's Strategy for transforming the economy of Wales, while promoting sustainable development. The Strategy points the need to:</p> <ul style="list-style-type: none"> <li>• Increase the knowledge, research and development, and innovation capacity in all parts of the Welsh economy;</li> <li>• Build on our considerable strengths in manufacturing;</li> <li>• Increase the number of jobs in financial and business services; and</li> <li>• Help more people into jobs to bring down our levels of economic inactivity.</li> </ul> <p>Its vision is: "To achieve a prosperous Welsh economy that is dynamic, inclusive and sustainable, based on successful, innovative businesses with highly skilled, well-motivated people".</p> | <p>Winning Wales sets Wales-wide targets for the next 10 years. These include:</p> <ul style="list-style-type: none"> <li>• Raising total employment by 135,000;</li> <li>• Improving enterprise and innovation;</li> <li>• Raising not just skill levels but our learning performance at every level; ensuring that Wales uses world-class electronic communications to their full potential.</li> <li>• Development of a better coordinated and well-targeted business support network;</li> <li>• Dynamic development of our country's green economy, including sustainable agriculture and energy production;</li> <li>• Smarter ways of connecting Wales to international business opportunities;</li> <li>• Support for the social business sector, which can bring growth and opportunity to disadvantaged communities.</li> </ul>  | <p>The LDP land use strategy should assist in the WAG's economic vision.</p>                                       | <p>The SA should seek the promotion of sustainable economic growth.</p>   |
| <b>Wales: A Vibrant Economy – The Welsh Assembly Government Strategic Framework for Economic Development Consultation (November 2005)</b>  |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>"Our Vision is of a vibrant Welsh economy delivering strong and sustainable economic growth by providing opportunities for all."</p>  | <p>Main priorities are:</p> <ul style="list-style-type: none"> <li>• Increase employment still further, so that over time the Welsh employment rate matches the UK average, even as the UK employment rate itself rises; and</li> <li>• Raise the quality of jobs, so that average earnings increase and close the gap with the UK average.</li> </ul>   | <p>The LDP land use strategy should assist in the WAG's economic vision.</p>                                       | <p>The SA should seek the promotion of sustainable economic growth.</p>   |
| <b>Skills and Employment Action Plan for Wales 2005</b>  |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Welsh Assembly Government aims for a Wales where everyone has the skills, motivation and opportunity to obtain good quality jobs that meet their aspirations and abilities, and where employers work with their employees and public sector agencies to raise skills to the highest possible levels to support high quality jobs in a growing economy.</p>  | <p>The position on skills and employment in Wales is certainly improving but major challenges remain to:</p> <ul style="list-style-type: none"> <li>▪ Reduce the Basic Skills deficit;</li> <li>▪ Provide high quality, joined-up, competitive support for business;</li> <li>▪ Create a more inclusive labour market;</li> <li>▪ Tackle Wales' entrenched economic inactivity problem;</li> <li>▪ Cope with the continued loss of low skilled jobs in certain sectors;</li> <li>▪ Help employers, in particular SMEs, move up the value chain;</li> <li>▪ Help employers adapt to new technologies and advances;</li> <li>▪ Improve the quality of jobs in Wales;</li> <li>▪ Retain our graduates and other key workers;</li> <li>▪ Ensure everyone has the generic skills needed by employers; and</li> <li>▪ Ensure that there are enough people with Welsh language skills needed for certain jobs and sectors.</li> </ul> | <p>The LDP should contain policies and proposals that protect or enhance employment opportunities in the Vale.</p> | <p>The environmental, economic and social implications of policies or proposals promoting skills and employment should be considered within the SA framework.</p> |

| <b>Achieving our Potential-National Tourism Strategy (2000)</b>   |   |   |  |
|---|---|---|--|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>Sets out the over arching tourism strategy for Wales until 2010 and is underpinned by 4 main principles of sustainability, quality, competitiveness and partnership.</p> <p>Sustainability is seen as the key relevant principle, which the strategy recognises must be developed responsibly if it is to achieve wider economic, environmental and cultural benefits for Wales.</p>   | None specific.  | Tourism development and in particular sustainable tourism should be a key consideration of the LDP. | The promotion of sustainable tourism and access to the countryside should be considered within the SA framework. |
| <b>Achieving our Potential 2006-2013 – Tourism Strategy for Wales Mid Term Review</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>A vision for 2013:<br/>A Customer Responsive, Innovative, Sustainable and Profitable industry which makes an increasing contribution to the economic, social, cultural and environmental well being of Wales.</p> <p>This revised vision has been based around four strategic aims, which are designed to achieve long term prosperity for the industry:</p> <ol style="list-style-type: none"> <li>1. Realising the importance of understanding and responding to customer needs.</li> <li>2. Accepting that there is a value to be gained from doing things differently to our competitors through innovative ways of working.</li> <li>3. Acknowledging the need to secure a sustainable, long-term future through responsible destination and business management.</li> <li>4. Seeking to maximise business profitability to drive growth in the tourism economy.</li> </ol> | <p>The Tourism Strategy for South East Wales emphasises the importance of developing urban and business tourism, events, cultural and heritage products as well as golf and luxury breaks.</p> <ul style="list-style-type: none"> <li>• Target - Value of business tourism to increase by a greater rate than tourism overall.</li> <li>• Indicator - Value of business tourism as a percentage of total tourism spend.</li> </ul> <p>Encourage accommodation, attraction businesses and essential infrastructure facilities to stay open for a longer season.</p> <ul style="list-style-type: none"> <li>• Target - 40% of all trips and 35% of all spend to take place during the shoulder season months (October - March)</li> <li>• Indicator - Percentage of trips and spend occurring during shoulder months by 2013.</li> <li>• Target - Increase in number of tourists using public transport to travel to and within Wales.</li> <li>• Indicator - % of tourists who used public transport whilst on holiday.</li> </ul> <p>Integrate development and marketing of activity based tourism (including walking, fishing, mountain biking, horse-riding, cycling, water sports, adventure and golf) and encourage the formation of business clusters.<br/>Target - Increase the number of business clusters promoting / developing tourism - geographically and sectorally.</p> | The Plan should reflect the WAG's aspirations to promote tourism throughout Wales.                  | The promotion of sustainable tourism and access to the countryside should be considered within the SA framework. |
| <b>Sports Tourism in Wales: A Framework for Action (2003)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| None specific. Nevertheless, the document highlights the economic potential of sport as tourism within Wales, which is of relevance to the Vale given its coastal and rural location.   | None specific.  | Tourism and recreation will be an issue within the LDP.   | The promotion of sustainable tourism and access to the countryside should be considered within the SA framework. |

| <b>Cultural Tourism Strategy For Wales (WTB, 2003)</b>  |  |   |   |
|---|--|---|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>This document sets out a strategic framework to develop Wales' potential as a cultural tourism destination: "Our vision is for Wales to be recognised internationally as a destination offering a quality cultural tourism experience based on our unique culture which forms an essential part of the overall visitor experience."</p> <p>"Culture consists of all distinctive spiritual, material, intellectual and emotional features which characterize a society or group."</p> <ul style="list-style-type: none"> <li>• Improving visitor accessibility to culture</li> <li>• To make the culture of Wales more accessible to all visitors and to add value to the total visitor experience.</li> <li>• Improving the quality of the visitor experience</li> <li>• To ensure that there is a quality authentic cultural tourism product that meets and exceeds visitor expectations.</li> <li>• Raising the profile of Wales as a cultural tourism destination</li> <li>• To support and encourage flagship events and festivals and to give an increasing emphasis in our marketing on the cultural tourism product.</li> <li>• Understanding the characteristics and needs of the cultural tourist</li> <li>• To research visitor expectations and needs.</li> </ul> | <p>The socioeconomic and demographic trends indicate that both within the UK and the target overseas markets, the proportion of the population who are likely to be interested in undertaking cultural tourism activities whilst on holiday is likely to grow.</p> <p>By 2010, Wales will be, and be known to be, a nation whose culture:</p> <ul style="list-style-type: none"> <li>• Is indivisible from the rest of its living</li> <li>• Is rich, distinctive and creative</li> <li>• Is both diverse and shared</li> <li>• Treasures its bilingualism as a growing reality</li> <li>• Nurtures and cherishes imagination, innovation and excellence</li> <li>• Nurtures imaginatively the talents of the young</li> <li>• Enables the arts, sport and creative industries to thrive at every level</li> <li>• Supports a creative approach to the promotion and public understanding of science</li> <li>• Ensures a ready outlet for the creativity of us all, individuals and communities</li> <li>• Ensures equality of access for all to participate</li> <li>• Is the springboard for both individual fulfilment and collective prosperity.</li> </ul> | <p>The potential for cultural tourism within the Vale should be recognised and promoted in the LDP.</p> | <p>The promotion of sustainable tourism and access to the countryside should be considered within the SA framework.</p> |

| <b>The Rural Development Plan for Wales 2007-2013 (Draft)</b>  |   |  |   |
|--|---|--|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Wales RDP for the period 2007-2013 will operate under the Rural Development Regulation (Council Regulation (EC) 1698/2005) which offers a new strategic approach to rural development and focuses on these objectives:</p> <ol style="list-style-type: none"> <li>(1) Increasing the competitiveness of the agricultural and forestry sector through support for restructuring;</li> <li>(2) Enhancing the environment and countryside through support for land management; and</li> <li>(3) Enhancing the quality of life in rural areas and promoting the diversification of economic activities through measures targeting the farm sector and other rural actors.</li> <li>(4) Enhancing the use of the Leader approach, which provides a bottom up, community driven approach using local partnerships to inform the implementation of the other objectives.</li> </ol>  | Not applicable  | The Vale of Glamorgan has a large rural area and 'rural issues' must be addressed in the LDP.                          | The SA must balance the need to protect the rural environment against the need to promote the rural economy.                                |
| <b>Farming for the Future: A New Directions for Farming in Wales (2001)</b>  |   |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| None specific. However Farming for the future highlights the t social, cultural, economic and environmental importance of farming and agriculture within Wales and sets out the WAG's strategy for assisting its adaptation post foot and mouth and in light of EU reforms.  | None specific.  | The LDP should seek to facilitate diversification of the rural economy.  | Rural diversification that promotes sustainable development should be a key SA consideration of the SA.                                     |
| <b>The Transport Framework for Wales (November 2001)</b>   |   |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Framework is based on the overall transport target set in Better Wales, which was to: "Develop a better co-ordinated and sustainable transport system to support local communities and the creation of a prosperous economy"</p> <p>Aim to achieve this target by:</p> <ul style="list-style-type: none"> <li>• Improving public and community transport in all areas to improve accessibility for those who do not have a car; in urban areas we have an added aim to attract people away from travelling by car;</li> <li>• Maintaining and enhancing our strategic transport corridors within Wales to provide high quality access and mobility; for internal movement and journeys and those wanting to gain access to the rest of the UK, Europe and beyond for economic, social or other reasons;</li> <li>• Facilitating the sustainable development of the full strategic potential of our major ports and Cardiff</li> </ul> | <p>The following indicators are used:</p> <ul style="list-style-type: none"> <li>• Travel time variability and journey times for all</li> <li>• How people travel to work or school</li> <li>• Road casualties</li> <li>• Accessibility to bus services or essential services.</li> </ul> <p>Target – By 2010 to enable 25% of commuting to work by means other than car.</p> <p>Target – By 2010 to achieve:</p> <ul style="list-style-type: none"> <li>• 40% reduction in the no. of people killed or seriously injured in road accidents</li> <li>• A 50% reduction in the no. of children killed or seriously injured; and</li> <li>• A 10% reduction in the slight casualty rate.</li> </ul> | The LDP land use strategy should address the relationship between the location of developments and the need to travel. | The relationship between land-use, transport and sustainability should be fully recognised in the SA framework and the national objectives. |

|  |  |  |  |
|--|--|--|--|
| <p>International Airport;</p> <ul style="list-style-type: none"> <li>• Maintaining and improving regional and local roads to preserve our assets, and to provide better access and mobility for road-based public transport, freight and private travel;</li> <li>• Contributing to the UK Government's target to increase by 80% the amount of freight moved by rail and to improve the efficiency and quality of the way we move freight by road;</li> <li>• Improving safety, health and environmental conditions particularly on our roads;</li> <li>• Increasing the amount of walking and cycling for necessary journeys, whether for the whole of short journeys or as part of a longer journey involving other means of transport.</li> </ul>  |  |  |  |
| <b>Trunk Road Forward Programme 2002 (update 2004)</b>   |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>                                 | <b>Implications for SA</b>   |
| <p><b>Overarching Objective</b><br/>To maintain and improve the trunk road network in Wales in a sustainable manner, taking into account the social, economic and environmental needs and obligations of the nation.</p> <p>Other Key objectives</p> <ul style="list-style-type: none"> <li>▪ To improve strategic (national and international) and regional accessibility and mobility.</li> <li>▪ To reduce community severance.</li> <li>▪ To meet the needs of disabled people.</li> <li>▪ To promote cycling and walking, and provide opportunities for healthy lifestyles.</li> <li>▪ To minimise any adverse effects on the environment generally;</li> <li>▪ To conserve and enhance, where appropriate, landscapes townscapes and historic and cultural resources.</li> <li>▪ To conserve and enhance, where appropriate biodiversity on the network through the Biodiversity Action Plan.</li> </ul> | <p>None specific, however the 2004 revision included access improvements to Cardiff International Airport Access in Phase 3.</p> | <p>To take account of the key objectives where possible.</p> | <p>The relationship between land-use, transport and sustainability should be fully recognised in the SA framework and the national objectives.</p> |

| <b>Road Safety Strategy for Wales (2003)</b>   |   |   |   |
|--|---|---|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>Sets out the WAG's road safety strategy to 2012, seeking to reduce real and perceived danger on Welsh roads and promote safe sustainable access for all. Key objectives of the strategy are to:</p> <ul style="list-style-type: none"> <li>Improving safety for children – especially as pedestrians and cyclists.</li> <li>Promoting safe use of "vulnerable" transport modes walking, cycling, motorcycling and horse riding.</li> <li>Reducing excessive and inappropriate speed of motor vehicles.</li> <li>Targeting other poor driving practices – use of mobile phones, drink driving, drug driving and driving whilst tired.</li> </ul> | <ul style="list-style-type: none"> <li>By 2010 the strategy seeks to reduce recorded casualties compared with the average for 1994-98:</li> <li>40% reduction in the total number of Killed or Seriously Injured (KSI) casualties.</li> <li>50% reduction in the total number of child Killed or Seriously Injured (KSI) casualties.</li> <li>10% reduction in the rate of slight casualties per 100 million vehicle kilometres travelled.</li> </ul> | <p>As part of the Road Safety Strategy Local Authorities have a duty to implement safety schemes on local roads and promote local road safety education, training &amp; publicity.</p> <p>Consequently, the LDP should ensure that new developments or highway proposals take account of road safety, particularly for non-motorised travellers.</p>  | <p>Road safety should be considered within the SA, as part of improving access to service and facilities.</p> |
| <b>Walking and Cycling Strategy for Wales (2003)</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The vision of the Welsh Assembly Government is to halt the decline in walking and cycling and then to increase their role in how we travel in Wales.</p>  | <p>None.</p>  | <p>Strategy identifies the role land use planning has for the promotion of walking and cycling:</p> <ul style="list-style-type: none"> <li>Adopt cycle parking standards and include them within Unitary Development Plans – for commercial premises these standards should provide cycle parking for both employees and visitors to the premises.</li> <li>Ensure Unitary Development Plans, the proposed Local Development Plans and Community Plans include policies for the protection and enhancement of green spaces to incorporate walking, cycling and horse riding routes and provision for the less able.</li> <li>Ensure Unitary Development Plans, the proposed Local Development Plans and Community plans include policies for the safeguarding of disused railway lines in both rural and urban areas as routes for walkers, cyclists, the less able and here appropriate for horse riders.</li> </ul> | <p>Promotion of sustainable transport modes should be a Key SA objective.</p>                                 |

| Wales Transport Strategy 'Connecting Wales' July 2006   |   |  |  |
|---|---|--|--|
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA  |
| <ul style="list-style-type: none"> <li>• Theme 1: To achieve a more effective and efficient transport system</li> <li>• Theme 2: To achieve greater use of the more sustainable and healthy forms of travel</li> <li>• Theme 3: To minimise the need to travel</li> </ul>   | <p><b>Social</b></p> <ul style="list-style-type: none"> <li>• Improving access to healthcare</li> <li>• Improving access to education and life-long learning;</li> <li>• Improving access to shopping and leisure facilities;</li> <li>• Encouraging healthy lifestyles; and</li> <li>• Improving the actual and perceived safety of travel.</li> </ul> <p><b>Economic</b></p> <ul style="list-style-type: none"> <li>• Improving connectivity (links) within Wales and internationally;</li> <li>• Improving the efficient, reliable and sustainable movement of people;</li> <li>• Improving the efficient, reliable and sustainable movement of freight;</li> <li>• Improving access to employment opportunities;</li> <li>• Improving access to key visitor attractions; and</li> <li>• Increasing the use of more sustainable materials in the maintenance of Wales' transport assets and in the provision new transport infrastructure.</li> </ul> <p><b>Environmental</b></p> <ul style="list-style-type: none"> <li>• Reducing the contribution of transport to greenhouse gas emissions, adapting to the impacts of climate change and reducing the contribution of transport on air pollution and other harmful pollutant emissions;</li> <li>• Reducing the negative impact of transport on the local environment – water pollution, land contamination, noise and vibration, light pollution and links between communities;</li> <li>• Reducing the negative impact of transport on our heritage – landscape, townscape, historical environment and Wales' distinctiveness; and</li> <li>• Reducing the negative impacts of transport on biodiversity and increasing positive impacts.</li> </ul> | See key themes and targets   | The land use planning system has the potential to alter travel patterns, promote sustainable travel choices and contribute to environmental Improvements. This should be reflected in the objective of the SA. |
| Wise about Waste-The National Waste Strategy for Wales (2002)   |   |  |  |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA  |
| <ul style="list-style-type: none"> <li>• To make Wales a model for sustainable waste management by adopting and implementing a sustainable, integrated approach to waste production, management and regulation (including litter and fly tipping) which minimises the production of waste and its impact on the environment, maximises the use of unavoidable waste as a resource, and minimises where practicable, the use of energy from waste and landfill;</li> <li>• To comply with the requirements of relevant European Council (EC) waste Directives and UK legislation.</li> </ul> | <p>The primary Wales specific targets are:</p> <p><b>Public bodies to reduce their own waste arisings:</b></p> <ul style="list-style-type: none"> <li>• By 2005, achieve a reduction in waste produced equivalent to at least 5% of the 1998 arisings figure;</li> <li>• By 2010, achieve a reduction in waste produced equivalent to at least 10% of the 1998 arisings figure.</li> </ul> <p><b>Minimum recycling and composting targets for each local authority to deliver:</b></p> <ul style="list-style-type: none"> <li>• By 2003/04 achieve at least 15% recycling / composting of municipal waste with a minimum of 5% composting (with only compost derived from source segregated materials counting) and 5% recycling;</li> <li>• By 2006/07 achieve at least 25%</li> </ul>   | The Strategy is a material consideration, which the VoG LDP must have regard to. | Management of waste is an important SD issue that should be considered in the SA.  |

|  |  |  |  |
|--|--|--|--|
|  | <p>recycling/composting of municipal waste with a minimum of 10% composting (with only compost derived from source segregated materials counting) and 10% recycling;</p> <ul style="list-style-type: none"> <li>• By 2009/10 and beyond achieve at least 40% recycling/composting with a minimum of 15% composting (with only compost derived from source segregated materials counting) and 15% recycling.</li> </ul> <p><b>Improved segregation of hazardous household waste:</b></p> <ul style="list-style-type: none"> <li>• By 2003/04 all civic amenity sites should have facilities to receive and store, prior to proper disposal, bonded asbestos sheets. All sites should also have facilities for receiving and storing, prior to recycling, oils, paints, solvents and fluorescent light bulbs.</li> </ul> <p>The <b>secondary</b> Wales specific targets are:</p> <p><b>Stabilisation and reduction of household waste:</b></p> <ul style="list-style-type: none"> <li>• By 2009/10 (and to apply beyond) waste arisings per household should be no greater than those (for Wales) in 1997/98;</li> <li>• By 2020 waste arisings per person should be less than 300kg per annum.</li> </ul> <p><b>The Assembly Government encourages businesses to join in with the public sector to meet, and exceed where possible, the following waste minimisation targets:</b></p> <ul style="list-style-type: none"> <li>• By 2005, achieve a reduction in waste produced equivalent to at least 5% of the 1998 arisings figure;</li> <li>• By 2010, achieve a reduction in waste produced equivalent to at least 10% of the 1998 arisings figure.</li> </ul> <p><b>To divert waste from landfill:</b></p> <ul style="list-style-type: none"> <li>• By 2005, to reduce the amount of industrial and commercial waste sent to landfill to less than 85% of that landfilled in 1998;</li> <li>• By 2010, to reduce the amount of industrial and commercial waste going to landfill to less than 80% of that landfilled in 1998.</li> </ul> <p><b>To reduce hazardous waste:</b></p> <ul style="list-style-type: none"> <li>• By 2010, to reduce the amount of hazardous waste generated by at least 20% compared with 2000.</li> </ul> <p><b>To divert biodegradable waste from landfill:</b></p> <ul style="list-style-type: none"> <li>• By 2005, to reduce the amount of biodegradable industrial and commercial waste sent to landfill to 85% of that landfilled in 1998;</li> <li>• By 2010, to reduce the amount of biodegradable industrial and commercial waste going to landfill to 80% of that landfilled in 1998.</li> </ul> <p><b>To re-use and recycle construction and demolition waste:</b></p> <ul style="list-style-type: none"> <li>• By 2005, to re-use or recycle at least 75% of C&amp;D waste produced;</li> <li>• By 2010, to re-use or recycle at least 85% of C&amp;D waste produced.</li> </ul> |  |  |
|--|--|--|--|

| <b>Climbing Higher-Sport and Active Recreation in Wales (2005)</b>  |   |   |   |
|---|---|---|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <ul style="list-style-type: none"> <li>Develop public transport services to ease access to the natural environment and provide more bike racks on public transport.</li> <li>Ensure that the requirement for sport, active recreation and physical activity provision be taken into account in the planning process. For example; new housing developments should make provision for sport, physical activity and play areas and cycle paths, while new office developments should include bike racks, changing rooms, and fitness facilities.</li> <li>Ensure all rights of way are fully open to the public (especially those at a low level and those providing access to higher level footpaths).</li> <li>Improve the quality of the cycle networks in towns and cities, integrated wherever practicable with the National Cycle Network.</li> </ul> | <ul style="list-style-type: none"> <li>The percentage of the people in Wales using the Welsh natural environment for outdoor activities will increase from 40% to 60% and the frequency of experience will treble (Aim 12)</li> <li>A traffic-free footpath, jogging trail or cycle-path should be within a ten-minute walk for 95% of people in Wales (Aim 13)</li> </ul>  | To assist in implement the national objectives in so far as they relate to land use planning.   | Health is a key social issue and impacts upon it should be assessed in the SA.  |
| <b>Improving Health in Wales – A Plan for the NHS with its Partners (2001)</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>A vision for care: meeting the needs of patients, professionals and the public.</p> <p>The National Assembly's goal is to achieve full health potential for all the people of Wales and in this endeavour it has two main aims:</p> <ul style="list-style-type: none"> <li>To promote and protect people's health throughout their lives;</li> <li>To reduce the incidence of the main diseases and injuries experienced in Wales, and to alleviate the suffering they cause.</li> </ul>   | <p>The objectives for primary care over the next decade are as follows:</p> <ul style="list-style-type: none"> <li>To offer universal and faster access to high quality services;</li> <li>To better enable patients to use the primary care system appropriately but to take greater control and responsibility for their own health;</li> <li>To offer an extended range of services in locally accessible primary care settings;</li> <li>To improve the quality of premises, taking the opportunity to develop new models of service delivery;</li> <li>To develop a new primary care workforce with the capacity to deliver new services to patients;</li> <li>To enable primary care, in partnership with others, to play a full part in the protection and promotion of the health and well being of the people of Wales.</li> </ul> | To ensure the policies and proposals reflect the Assemblies aspirations for health and well-being.  | To ensure the wider health and well-being implications of the Plan are assessed through the SA.   |
| <b>Well Being in Wales (2001)</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>None specific. Sets out the Assembly Government's strategy for the improvement of health and reduce inequalities in relation to access to health care services. The strategy highlights the importance of public transport in assisting accessibility to health and leisure facilities and how environmental conditions can both improve and hinder health. Similarly, the benefits of walking and cycling on health are also highlighted.</p>   | <p>No specific. However the strategy highlights a number of issue relevant to the LDP in areas if accessibility, transport, environmental improvement, and walking and cycling.</p>   | Ensure that the LDP includes policies to improve public health e.g. through walking and cycling initiatives and development it locations accessible to other services and facilities etc. | The SA objectives should reflect the need to promote better public health and combat social exclusion. The SA directive refers explicitly to the need to consider 'human health' as an issue. |

| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The overarching strategy for improving the existing housing stock in Wales including a range of topics relating to improving access to affordable accommodation. The Strategy highlights the role of the planning system for delivery affordable housing.</p> <p>The WAG's vision is:<br/>                     "We want everyone in Wales to have the opportunity to live in good quality, affordable, housing; to be able to choose where they live and decide whether buying or renting is best for them and their families."<br/>                     That all households in Wales are given the opportunity to live in good quality homes i.e. homes, which are (inter alia) located in attractive and safe environments.<br/>                     "Good quality social housing must be readily available for those who cannot afford to buy. That is why we will continue to work in partnership with developers and community groups to build on the high standards of housing design and estate layout that are now common across many parts of Wales' social housing stock."</p>  | None specific.  | The issue of housing including affordability will be a key LDP issue.   | Housing for all should be a key SA objective.  |
| <b>Strategy for Older People in Wales (2003)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The Welsh Assembly Government are committed to tackling discrimination against older people, promoting positive images of ageing and giving older people a stronger voice in society.</p> <p>The key themes of the Strategy are:<br/>                     Valuing Older People<br/>                     -Tackling discrimination against older people, promoting positive images of ageing and giving older people a stronger voice in society.<br/>                     A Changing Society<br/>                     -Promoting older people's capacity to continue to work and learn for as long as they want, and to make active contribution once they retire.<br/>                     Living Longer and Healthier<br/>                     -Promoting and improving the health and well-being of older people.<br/>                     Coping with Increasing Dependency: Health, Social Care and Housing<br/>                     -Promoting high quality services and support to enable older people to live as independently as possible in a suitable and safe environment.</p> | None  | That Plan policies and proposals reflect the key aims and objectives of the Strategy for Older People in Wales  | That the needs of older people should be reflected in the social sustainability objectives.    |

| <b>Towards E-Wales – A Consultation on Exploring the Power of ICT in Wales (2006)</b>   |  |   |  |
|---|--|---|--|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| Vision: That our economy and society is dynamic, prosperous, and inclusive, thriving on strong human networks, and underpinned by an electronic infrastructure that is at the leading edge of innovation, which allows all our communities, real or virtual, from our largest towns and cities, to our most rural locations, to engage and thrive in equal measure.   | Ensure businesses, public services and people in Wales have the capacity to maximise exploitation of ICT   | The Plan needs to be sure that its policies reflect how critical ICT is becoming to many aspects of life. | That the role of ICT in enabling sustainable development should be reflected in the Plan and SA. |
| <b>Planning Policy Wales (2002)</b>   |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>Planning policies and proposals should:</p> <ul style="list-style-type: none"> <li>• Promote resource-efficient settlement patterns that minimise land-take (and especially extensions to the area of impermeable surfaces) and urban sprawl, especially through preference for the re-use of suitable previously developed land and buildings, wherever possible avoiding development on greenfield sites</li> <li>• Locate developments so as to minimise the demand for travel, especially by private car</li> <li>• Contribute to climate protection by encouraging land uses that result in reduced emissions of greenhouse gases, in particular energy-efficient development, and promoting the use of energy from renewable sources</li> <li>• Minimise the risks posed by or to, development on or adjacent to, unstable or contaminated land and land liable to flooding. This includes managing and seeking to mitigate the effects of climate change.</li> <li>• Play an appropriate role in securing the provision of infrastructure (including water supplies, sewerage and associated wastewater treatment facilities, waste management facilities, energy supplies and distribution networks) – the basis for sustainable communities – and telecommunications infrastructure, while ensuring proper assessment of their sustainability impacts.</li> <li>• Contribute to the protection and improvement of the environment, so as to improve the quality of life, and protect local and global ecosystems. In particular, planning should seek to ensure that development does not produce irreversible harmful effects on the natural environment. The conservation and enhancement of statutorily designated areas and of the countryside and undeveloped coast; the conservation of biodiversity, habitats, and landscapes; the conservation of the best and most versatile agricultural land; and enhancement of the urban environment all need to be promoted</li> <li>• Help to ensure the conservation of the historic environment and cultural heritage, acknowledging and fostering local diversity.</li> <li>• Minimise the use of non-renewable resources, and, where it is judged necessary to use them, maximise</li> </ul> | <p>None.</p> <p>However the following principles underpin the Assembly Government's approach to planning policy for sustainable development and therefore should be taken into account in both the preparation of the LDP and the scope of the SA-</p> <ul style="list-style-type: none"> <li>• Putting people, and their quality of life now and in the future, at the centre of decision-making;</li> <li>• Ensuring that everyone has the chance to obtain information, see how decisions are made and take part in decision-making;</li> <li>• Taking a long term perspective to safeguard the interests of future generations, whilst at the same time meeting needs of people today;</li> <li>• Respect for environmental limits, so that resources are not irrecoverably depleted or the environment irreversibly damaged. This means, for example, contributing to climate protection, protecting and enhancing biodiversity, minimising harmful emissions, and promoting sustainable use of natural resources;</li> <li>• Applying the precautionary principle. Cost-effective measures to prevent possibly serious environmental damage should not be postponed just because of scientific uncertainty about how serious the risk is;</li> <li>• Using scientific knowledge to aid decision-making, and trying to work out in advance what knowledge will be needed so that appropriate research can be undertaken;</li> <li>• While preventing pollution as far as possible, ensuring that the polluter pays for damage resulting from pollution. In general the Assembly Government will seek to ensure that those meet costs whose actions incur them;</li> <li>• Applying the proximity principle, especially in managing waste and pollution. This means solving problems locally rather than passing them on to other places or to future generations;</li> <li>• Taking account of the full range of costs and benefits, including those which cannot be easily valued in money terms, when making plans and decisions, and taking account of timing, risks and uncertainties.</li> </ul> | The Plan must adopt the policy principles laid out in PPW.  | See key targets  |

|  |  |  |  |
|--|--|--|--|
| <p>efficiencies in their use. The use of renewable resources and of sustainably produced materials from local sources should be encouraged.</p> <ul style="list-style-type: none"> <li>• Encourage opportunities to reduce waste and all forms of pollution and promote good environmental management and best environmental practice.</li> <li>• Ensure that all local communities – both urban and rural – have sufficient good quality housing for their needs, including affordable housing for local needs and for special needs where appropriate, in safe neighbourhoods</li> <li>• Promote access to employment, shopping, education, health, community, leisure and sports facilities and open and green space, maximising opportunities for community development and social welfare.</li> <li>• Foster improvements to transport facilities and services, which maintain or improve accessibility to services and facilities, secure employment, economic and environmental objectives, and improve safety and amenity. In general, developments likely to support the achievement of an integrated transport system should be encouraged.</li> <li>• Foster social inclusion by ensuring that full advantage is taken of the opportunities to secure a more accessible environment for everyone that the development of land and buildings provides. This includes helping to ensure that development is accessible by means other than the private car</li> <li>• Promote quality, lasting, environmentally sound and flexible employment opportunities.</li> <li>• Support initiative and innovation and avoid placing unnecessary burdens on enterprises (especially small and medium sized firms) so as to enhance the economic success of both urban and rural areas, helping businesses to maximise their competitiveness.</li> <li>• Respect and encourage diversity in the local economy.</li> <li>• Promote a greener economy and social enterprises.</li> <li>• Contribute to the protection and, where possible, the improvement of people's health and well being as a core component of sustainable development. Consideration of the possible impacts of developments – positive and/or negative on people's health at an early stage will help to clarify the relevance of health and the extent to which it needs to be taken into account.</li> </ul> |  |  |  |
|--|--|--|--|

| <b>TAN 1: Joint Housing Land Availability Studies (June 2006)</b>  |   |   |   |
|--|---|---|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>Sets out the framework for JLHA studies.</p> <p>The purpose of the studies is to monitor the provision of market and affordable housing, provide an agreed statement of residential land availability for development planning and control purposes and set out the need for action in situations where an insufficient supply is identified.</p>         | <p>Requires Local Planning Authorities to provide a readily available 5-year supply of housing land.</p>  | <p>Local planning authorities must ensure that sufficient land is genuinely available to provide a 5-year supply of land for housing. This land supply must inform the strategy contained in the development plan.</p> <p>JHLA studies provide an important part of the evidence base for plan preparation.</p> <p>Information on past housing completions (market and affordable) and future housing land supply should be included in the AMR.</p>  | <p>The Housing needs of the Vale's current and future population should be assessed and balanced against the need to protect environmental quality and ensure economic viability.</p> |
| <b>TAN 2 Planning and Affordable Housing (2006)</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The guidance defines affordable housing for the purposes of this TAN and provides advice to local planning authorities on how to determine affordability.</p> <p>The concept of affordability is defined as the ability of households or potential households to purchase or rent property that satisfies the needs of the household without subsidy.</p> | <p>None</p>   | <p>One of the key issues that LDPs will need to address is housing land supply both for market and affordable housing.</p> <p>The guidance requires local planning authorities to:</p> <ul style="list-style-type: none"> <li>• Include an affordable housing target in the development plan, which is based on the housing need, identified in the local housing market assessment.</li> <li>• Indicate how the target will be achieved using identified policy approaches.</li> <li>• Monitor the provision of affordable housing against the target (via the Local Development Plan Annual Monitoring Report) and where necessary take action to ensure that the target is met.</li> </ul> | <p>The supply of affordable housing helps maintain sustainable communities and this should be reflected in the SA.</p>  |
| <b>TAN 3 Simplified Planning Zones - 1996</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>None specific, however Simplified Planning Zones are seen as a mechanism for encouraging economic development in areas of high employment.</p>  | <p>None</p>   | <p>None directly, however employment and land use allocations will be a key aspect of the LDP.</p>  | <p>Employment policies and land allocations should be a key aspect of the SA.</p>   |
| <b>TAN 4 Retailing and Town Centres (1996)</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>This offers advice on how to monitor retail centres and how to manage vitality and viability.</p> <p>No specific objectives.</p>  | <p>Car parking standards should seek to achieve an adequate level of town centre parking reflecting the range of uses found and the range and level of public transport alternatives.</p> | <p>Information on the retail industry in a local planning authority's area together with information on the functioning of their town centres will assist the preparation of development plans and the consideration of planning applications. Baseline information and time series data can provide a picture of change and a guide to future trends.</p>  | <p>Ensuring that communities have access to a range of services locally should be a key SA objective.</p>   |

| <b>TAN 5 Nature Conservation and Planning (1996)</b>   |   |   |  |
|--|---|---|--|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| To protect important sites and habitats of nature conservation.  | None.   | Nature conservation surveys and issues should be included in the evidence base for Plan preparation.<br><br>The LDP should consider the need to assess developments against having regard to nature conservation designations.<br><br>Plan should have regard to International, National, Regional or Locally Important Sites of Nature Conservation. | Safeguarding biodiversity is an important aspect of sustainability which should be considered in the SA objectives   |
| <b>TAN 5: Nature Conservation and Planning Consultation Draft (January 2006)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| Once published the TAN shall be a material consideration during the publication of the LDP   |   | Once published the TAN shall be a material consideration during the publication of the LDP  | Nature conservation should be considered within the SA framework.  |
| <b>TAN 6 Agricultural and Rural Development (2000)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| Contains advice on:<br><br>Farm viability<br>Re-use of rural buildings<br>Farm diversification<br>Agricultural Development<br>Agricultural and forestry dwellings<br>Development involving horses  | None  | When preparing development plans and considering planning applications, local planning authorities should consider the quality of agricultural land and other agricultural factors and seek to minimise any adverse affects on the environment.   | The SA objectives and appraisal should take account of the specific issues affecting rural areas.<br><br>There are potential conflicts between the aim of protecting the countryside and economic development requires maintaining and enhancing thriving rural communities. |
| <b>TAN 7 Outdoor Advertisement Control (1996)</b>  |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| Local planning authorities need to recognise the importance of advertisements to the national economy and should not stifle original designs or new display techniques.<br><br>The display of outdoor advertisements can only be controlled in the interests of amenity and public safety. | None  | The Plan should contain policies and guidance on the likely acceptability on proposals for advertisements.  | The control of development to protect visual amenity and public safety whilst enabling economic viability should be considered in the SA.  |

| <b>TAN 8: Renewable Energy (2005)</b>  |  |   |   |
|--|--|---|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| LPA's are expected to consider matters of energy efficiency and energy conservation.   | The Assembly Government has a national target that: <ul style="list-style-type: none"> <li>• 4TWh of electricity per annum to be produced by renewable energy by 2010 and 7TWh by 2020.</li> </ul> | The LDP should take into account the contribution that can be made by the area towards climate change and renewable energy targets.<br>Local Planning Authorities should develop appropriate policies so that they put in place a comprehensive framework for other forms of renewable energy, as well as wind power.                       | The SA should consider the potential for the plan to influence climate change by promoting renewable energy.            |
| <b>TAN 9 Enforcement of Planning Control (1997)</b>  |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| The town and country planning system regulates the development and use of land in the <b>public interest</b> .   | None   | The control of development will be a key function of the LDP and this will be reflected in the plan's policies.   | None  |
| <b>TAN 10 Tree Preservation Orders (1997)</b>  |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| Local Planning Authorities are empowered, in the interest of amenity, to protect trees and woodlands by making Tree Preservation Orders (TPOs).  | None   | The plan policies should include, where appropriate, measures to protect trees and provide for tree planting and landscaping.   | The conservation, preservation and enhancement of trees and woodland should be considered within the SA.                |
| <b>TAN 11 Noise (1997)</b>   |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| Provides advice on how the planning system can be used to minimise the adverse impacts of noise without placing unreasonable restrictions on development or adding unduly to the costs and administrative burden of business.  | No targets, but does provide advice on noise levels in respect of specific uses.   | Area specific noise policies may be useful in some circumstances.<br><br>Where it is particularly difficult to separate noise sensitive development from noisy activities, plans should contain an indication of any general policies that the local planning authority proposes to apply in respect of conditions or planning obligations. | The SA objectives should reflect the need to reduce the potential impact on developments of noise and other pollutants. |
| <b>TAN 12 Design (2002)</b>  |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| The TAN's objective for good design are: <ul style="list-style-type: none"> <li>• Achieving sustainable design solutions</li> <li>• Sustaining or enhancing character</li> <li>• Promoting innovative design</li> <li>• Promoting a successful relationship between public and private space</li> <li>• Promoting high quality in the public realm</li> <li>• Ensuring ease of access for all</li> <li>• Promoting legible development</li> <li>• Designing for change</li> <li>• Promoting quality, choice and variety</li> </ul> | None   | The planning system is seen to be proactive in raising the standard of design and in raising awareness of design issues amongst the general public and the private sector. This should be reflected within the LDP's policies for design.   | Design and in particular sustainable design/construction and energy efficiency should be a key consideration in the SA. |

| <b>TAN 13 Tourism (1997)</b>  |   |   |  |
|---|---|---|--|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>None specific to the TAN, however the TAN itself supports the WAG's objectives for tourism as set out in Planning Policy Wales -</p> <ul style="list-style-type: none"> <li>• To encourage sustainable tourism in Wales, maximising its economic and employment benefits, promoting tourism in all seasons, and encouraging its development in non-traditional destinations, while safeguarding the environment, and the interests of local communities and</li> <li>• To manage change in the tourism sector in ways which respect the integrity of the natural, built and cultural environment to provide for economic growth, employment and environmental conservation.</li> </ul> | None  | The issues tourism raises should be addressed in preparing development plans. Development plans may provide guidance on opportunities for larger scale or innovative projects, appropriate facilities for the countryside or designated areas and the provision of facilities in historic towns or seaside resorts.                       | The promotion of sustainable tourism should be considered within the SA objectives.  |
| <b>TAN 13 Tourism Consultation Draft (2006)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| Once published the TAN shall be a material consideration during the publication of the LDP.   |   | Once published the TAN shall be a material consideration during the publication of the LDP.   |  |
| <b>TAN 14 Coastal Planning (1998)</b>   |   |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>None specific to the TAN, however it supports the WAGs objectives for the coast as set out in Planning Policy Wales-</p> <ul style="list-style-type: none"> <li>• Recognise the importance of the coast for conservation of the natural and historic environment;</li> <li>• Recognise the importance of the coast for urban and rural development, including housing, local industry and agriculture; and</li> <li>• Recognise the importance of the coast for tourism, leisure and recreation.</li> </ul>  | None  | <p>Local Planning Authorities should consider and define the most appropriate coastal zone in its area.</p> <p>It is important to recognise that on-shore development can often have an impact offshore.</p> <p>Development plan policies should not provide for development on the coast, which does not require a coastal location.</p> | <p>The conservation, preservation and enhancement of the Vale of Glamorgan's coastlines should be considered within the wider SA objective for the protection of biodiversity and natural resources.</p> <p>The local planning authority should consult with CCW and the Environment Agency, to undertake an assessment of coastal conditions, concentrating on risk, sediment budgets and sensitivity issues.</p> |

| <b>TAN 15 Development and Flood Risk (2004)</b>  |  |  |   |
|--|--|--|---|
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>Direct new development away from those areas that are at high risk of flooding.</p> <p>Where development has to be considered in high-risk areas (zone C) only those developments, which can be justified.</p>  | <p>Contains methodology with targets for assessing flood consequences.</p>   | <p>The LDPs policies and land allocations will need to take account of the need to avoid unnecessary development in areas prone to flooding. Namely, through:</p> <ul style="list-style-type: none"> <li>• Guiding development to locations at little or no risk from river, tidal or coastal flooding or from run off arising from development in any location;</li> <li>• Bearing in mind that government resources for flood and coastal defence are directed at reducing risks for existing development and are not available to provide defences in anticipation of future development;</li> <li>• Managing the consequences of flooding where development can be justified and the consequences are considered acceptable;</li> <li>• Making provision for future changes in flood risk, for example taking account of climate change, where they can be anticipated;</li> <li>• Bearing in mind measures within Catchment Flood Management Plans or Shoreline Management Plans to restore substantial functionality and/or natural heritage benefits of flood plains through the removal of inappropriate existing built development.</li> </ul> <p>Planning authorities should use the development advice maps to identify whether flooding is a strategic issue and hence likely to influence the overall strategy of the development plan.</p> | <p>The SA should ensure that flood risks are adequately considered in the LDP.</p> <p>Managing flood risk is an important part of contributing towards achieving sustainable development.</p> |
| <b>TAN 16 Sport and Recreation (1998)</b>  |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>Playing fields are of special significance for their recreational and amenity value and, in towns and cities, for their contribution to the urban environment.</p> <p>Undeveloped land that has recreational or amenity value should be protected if it can be demonstrated that there is (or would be) a deficiency in accessible public open space in the area.</p> | <p>Annex A contains illustrative material prepared by the National Playing Fields Association which authorities may find helpful in formulating their own standards for formal sports facilities for adults and informal playing space for children.</p> | <p>Consideration will need to be given in particular areas to the relationship between the recreational use of land and the interests of conservation.</p> <p>It is important that major sports grounds should be readily accessible by a variety of means of transport and that their economic and other benefits are carefully considered in relation to access, amenity and environmental considerations.</p> <p>Where sports activities generate noise, local planning authorities should identify areas where these can be carried on compatibly with other uses.</p>   | <p>Open space has a positive community value for recreation and therefore the SA should consider this issue as part of the wider community and environmental objectives of the SA.</p>        |

| <b>TAN 16 Sport, Recreation and Open Space Consultation Draft (2006)</b>  |  |  |  |
|---|--|--|--|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| Once published the TAN shall be a material consideration during the publication of the LDP  |  | Once published the TAN shall be a material consideration during the publication of the LDP   |  |
| <b>TAN 18 Transport (1998)</b>  |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>None specific to the TAN, however, land use planning can help to achieve the Assembly Government's objectives for transport as set out in Planning Policy Wales:</p> <ul style="list-style-type: none"> <li>• Reducing the need to travel, especially by private car, by locating development where there is good access by public transport, walking and cycling;</li> <li>• Locating development near other related uses to encourage multi-purpose trips and reduce the length of journeys;</li> <li>• Improving accessibility by walking, cycling and public transport; ensuring that transport is accessible to all, taking into account the needs of disabled and other less mobile people;</li> <li>• Promoting walking and cycling;</li> <li>• Supporting the provision of high quality public transport;</li> <li>• Supporting traffic management measures;</li> <li>• Promoting sustainable transport options for freight and commerce;</li> <li>• Supporting sustainable travel options in rural areas;</li> <li>• Supporting necessary infrastructure improvements; and</li> <li>• Ensuring that, as far as possible, transport infrastructure does not contribute to land take, urban sprawl or neighbourhood severance.</li> </ul> | None   | <p>By guiding the location of new development, reducing the need to travel, and promoting transport choices, which are less polluting, land, use planning can contribute in the longer term to environmental improvements.</p> <p>The Plan should reduce the need to use trunk roads and other through routes for short local journeys. Local authorities should identify these routes as corridors for movement where development will be resisted.</p> <p>The extra traffic generated by a proposed development may bring forward the need for transport improvements in the vicinity of the scheme, and beyond.</p> <p>Local Planning Authorities should therefore take account of the local impacts of their locational policies on transport infrastructure and air quality. Traffic management, public transport improvements, transport interchange facilities and parking policies are key tools in combating these pressures.</p> | The land use planning system has the potential to alter travel patterns, promote sustainable travel choices and contribute to environmental improvements. This should be reflected in the objective of the SA  |
| <b>TAN 18 Transport (Draft) 2006</b>  |  |  |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key target s and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| Once published the TAN shall be a material consideration during the publication of the LDP  |  | Once published the TAN shall be a material consideration during the publication of the LDP   | The land use planning system has the potential to alter travel patterns, promote sustainable travel choices and contribute to environmental Improvements. This should be reflected in the objective of the SA. |

| <b>TAN 19 Telecommunications (2002)</b>   |   |  |  |
|---|---|--|--|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>None specific to the TAN, however the TAN itself supports the WAGs main planning objectives for telecommunications as set out in Planning Policy Wales—</p> <ul style="list-style-type: none"> <li>• To facilitate the development of an advanced broadband telecommunications infrastructure throughout Wales;</li> <li>• To promote an integrated approach to the provision and renewal of environmental and telecommunications infrastructure; and</li> <li>• To ensure that environmental and telecommunications infrastructure is provided in such a way as to enable sustainable development objectives to be met, avoiding adverse impacts on the environment (including the natural and historic environment), local communities and health.</li> </ul>  | None  | <p>Development plans should cater for telecommunications development by taking account of the strategic requirements of telecommunications networks.</p> <p>Policies should take account of:</p> <ul style="list-style-type: none"> <li>• The need to minimise the impact of development and in particular the need to protect the best and most sensitive environments; and</li> <li>• The limitations imposed by the nature of the telecommunications network and the technology.</li> </ul> <p>Plans may allocate particular sites for major telecommunications developments to encourage site sharing.</p> | <p>Telecommunications systems can help achieve the sustainability objectives of encouraging a diverse economy and access to services.</p> <p>However, they can have negative environmental impacts, and possibly, health concerns.</p> |
| <b>TAN 20 The Welsh Language - Unitary Development Plans and Planning Control (2000)</b>  |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p><b>The TAN highlights that</b> the land use planning system should take account of the needs and interests of the Welsh language and in doing so contribute to its well-being.</p>   | None  | Where the use of the Welsh language is part of the social fabric of a community, the needs and interests of the language should be taken into account in the formulation of the policies set out in the Plan.  | The Welsh language should be seen as an integral part of planning for sustainable communities  |
| <b>TAN 21 Waste (2001)</b>  |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The land-use planning system has an important role to play in achieving sustainable waste management. It should:</p> <ul style="list-style-type: none"> <li>• Provide a planning framework which enables adequate provision to be made for waste management facilities to meet the needs of society for the reuse, recovery and disposal of waste, taking account of the potential for waste minimisation and the particular needs in respect of special waste<sup>1</sup>;</li> <li>• Help meet the needs of business and encourage competitiveness;</li> <li>• Encourage sensitive waste management practices in order to preserve or enhance the overall quality of the environment and avoid risks to human health;</li> <li>• Have regard to the need to protect areas of designated landscape and nature conservation value from inappropriate development;</li> <li>• Have regard to the need to protect the amenity of the community and of land uses and users affected by existing or proposed waste management facilities;</li> </ul> | None set within the TAN. However the LDP policies for waste will need to take account of how it can contribute to any new targets set by the during the LDP period. | Plans must make explicit the capacity of the area to deal with waste, and also make accurate and quantified assessments about their own waste arisings.  | The SA should consider waste minimisation and appropriate waste management.  |

|  |   |  |   |
|--|---|--|---|
| <ul style="list-style-type: none"> <li>• Minimise adverse environmental impacts resulting from the handling, processing, transport and disposal of waste;</li> <li>• Consider what new facilities may be needed, in the light of wastes forecast to arise; and,</li> <li>• Ensure that opportunities for incorporating re-use/recycling facilities in new developments are properly considered.</li> </ul>   |   |  |   |
| <b>Minerals Planning Policy Wales (MPPW) 2000.</b>   |   |  |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The overriding objective is to provide a sustainable pattern of mineral extraction by adhering to 5 key principles-</p> <ul style="list-style-type: none"> <li>• Provide mineral resources to meet society's needs and to safeguard resources from sterilisation</li> <li>• Protect areas of importance to natural or built heritage</li> <li>• Limit the environmental impact of mineral extraction</li> <li>• Achieve high standard restoration and beneficial after-use</li> <li>• Encourage efficient and appropriate use of minerals and the re-use and recycling of suitable materials</li> </ul> <p>The main aims relating to minerals planning as follows:</p> <ul style="list-style-type: none"> <li>• Social progress which recognises the needs of everyone: to provide for the benefits of increased prosperity through an adequate supply of minerals that society needs now and in the future, together with protecting and improving amenity;</li> <li>• Effective protection of the environment: to protect things that are highly cherished for their intrinsic qualities, such as wildlife, landscapes and historic features; and to protect human health and safety by ensuring that environmental impacts caused by mineral extraction and transportation are within acceptable limits; and to secure, without compromise, restoration and aftercare to provide for appropriate and beneficial after-use;</li> <li>• Prudent use of natural resources: to help conserve non-renewable resources for future generations through efficient use, recycling and minimisation of waste; to protect renewable resources from serious harm or pollution; and to promote the use of appropriate alternative materials;</li> <li>• Maintenance of high and stable levels of economic growth: to ensure an adequate supply of minerals that are needed at prices that are reasonable; and to safeguard mineral resources for future generations.</li> </ul> | None  | Plans should provide a clear guide to where mineral extraction is likely to be acceptable. They should include policies, which protect sensitive environmental features and provide environmental and resource protection. | Mineral extraction is relevant to many aspects of sustainable development such as agriculture, transport, employment, and land use planning and resource use. |

| <b>Minerals Technical Advise Note 1 (MTAN) Wales- Aggregates (2004)</b>  |  |  |  |

| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Draft Wales Coastal Tourism Strategy seeks to identify a clear way forward for the development of Coastal Tourism within Wales which realises and builds on the economic potential of the coastline of Wales whilst respecting its environmental quality and recognising the importance of achieving community benefits. The strategy will provide spatial guidance for the future allocation of funds to support coastal tourism in the regions of Wales through the Spatial Plan. The strategy adopts the following vision and strategic aims:</p> <p><i>'An integrated year round coastal tourism industry, based on an outstanding natural environment and a quality tourism product that meets and exceeds visitor expectations, whilst bringing economic, social and environmental benefits to coastal communities'.</i></p> <ul style="list-style-type: none"> <li>• To encourage economic, social and environmental benefits for coastal communities</li> <li>• To improve the quality of the visitor experience</li> <li>• To achieve an integrated approach to the development and management of coastal tourism</li> <li>• Coastal Tourism is a year round industry</li> </ul> | <p>None specific.</p>  | <p>To ensure that policies and proposals reflect the Welsh Assembly Governments aspirations for Coastal Tourism within Wales.</p>                | <p>The SA objectives should reflect the aims and objectives of the Draft Coastal Tourism Strategy.</p>   |

## REGIONAL POLICIES, PLANS AND PROGRAMMES

| South East Wales Regional Waste Plan (2004)  |  |  |  |
|--|--|--|--|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA  |
| <p>The Regional Waste Plan has the following Vision and Aims:</p> <p>To provide an agreed strategy for the region setting out a land use planning framework for the efficient and effective management of wastes in South East Wales with the following aims:</p> <p>A. To meet the needs of communities and businesses in a sustainable way<br/>           B. To minimise adverse impacts on the environment and health<br/>           C. To accord with the principles, policies and targets set by national and European legislation</p> <p>5 key principles are considered to be fundamental:</p> <ul style="list-style-type: none"> <li>• <b>Sustainability</b> – ensuring “<i>development which meets the needs of the present without compromising the ability of future generations to meet their own needs</i>” and seeking to ‘de-couple’ waste production from economic growth to ensure that the increase in production of waste is slower than the increase in the economy;</li> <li>• <b>The Waste Hierarchy</b> – establishing that waste should be managed by, in descending order of desirability, reduction, re-use, recovery of materials, recovery of energy and, least desirable, disposal;</li> <li>• <b>Proximity</b> - the principle that waste should be managed as near as possible to where it is produced;</li> <li>• <b>Regional Self Sufficiency</b> – the principle that as far as practicable waste should be managed within the region where it is produced;</li> <li>• <b>Flexibility</b> – the principle of leaving options open for as long as possible to monitor change and allow new opportunities to emerge</li> </ul> | <p>The Regional Waste Plan sets the following targets-</p> <ul style="list-style-type: none"> <li>• Aim to achieve the 2020 Landfill Directive targets by 2013</li> <li>• Achieve this principally through maximising recycling and composting</li> <li>• Deal with residual waste by Mechanical Biological Treatment</li> <li>• Choose between either sending the residual waste from MBT to landfill or using it as Refuse Derived Fuel</li> <li>• Limit the amount of waste going to landfill to that which can not be dealt with acceptably in any other way.</li> </ul> <p>In addition to the above, the LDP will have to have regard to any new targets set by the South East Wales Regional Waste Plan during the LDP period.</p> | <p>The LDPs land use framework is required to assist in the implementation of the regional strategy.</p> | <p>The SA objectives should include objectives devoted to waste minimisation and appropriate waste management.</p> |
| An Economic Development Framework for South East Wales Vision & 10-year Strategy. (2005)   |  |  |  |
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA  |
| <p>The South East Wales Economic vision for South East Wales:</p> <p>A region on the way to becoming one of the most prosperous in Europe, and providing opportunities for every individual, enterprise and community to share in that prosperity.</p>   | <p>None.</p>   | <p>None directly, however economic development will be a key aspect of the LDP.</p>                      | <p>Economic development should be a key aspect of the SA.</p>  |

| <b>Strategic Planning Guidance for South East Wales Volume 1 (2001)</b>  |  |   |  |
|--|--|---|--|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA | Implications for Plan   | Implications for SA  |
| <p>The guidance will serves the following purposes:</p> <p>i) To provide a context for the preparation, consideration and revision of Unitary Development Plans (UDPs).</p> <p>ii) To minimise delays and conflicts between planning authorities at the public inquiry stage.</p> <p>iii) To identify areas of agreement on common issues.</p> <p>iv) To identify strategic spatial policy issues that may need resolution and identify the mechanisms for resolving them.</p> <p>v) In addition, it provides an opportunity for interested organisations to contribute to the Regional Planning process.</p> <p>The guidance covers the following areas-</p> <ul style="list-style-type: none"> <li>• Population and Housing</li> <li>• Transportation</li> <li>• Retail Development</li> <li>• Employment Land</li> <li>• Land Reclamation</li> <li>• Green Belts and Green Wedges</li> <li>• Landscape and Nature Conservation</li> <li>• Urban Regeneration</li> </ul> | None.  | The LDP should have regard to the recommendations within the guidance and to any other additional regional planning studies/guidance published during the preparation of the LDP. | All, or most, of the issues covered with the guidance are relevant to sustainable development. The SA framework should ensure these issues have been considered. |
| <b>Strategic Planning Guidance for South East Wales Volume 2 (2001)</b>  |  |   |  |
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA | Implications for Plan   | Implications for SA  |
| <p><b>See above</b></p> <p>The strategy covers the following areas-</p> <ul style="list-style-type: none"> <li>• Minerals</li> <li>• Waste management,</li> <li>• Energy</li> <li>• Sports leisure and recreational development</li> <li>• Tourism</li> <li>• Coastal issues</li> </ul>  | None.  | The LDP should have regard to the recommendations within the guidance and to any other additional regional planning studies/guidance published during the preparation of the LDP. | All, or most, of the issues covered in the guidance are relevant to sustainable development. The SA framework should ensure these issues have been considered.   |

| Once published the RTP shall be a material consideration during the publication of the LDP.  |  | Once published the RTP shall be a material consideration during the publication of the LDP.   | The SA framework should consider improving and increasing the use of sustainable and Integrated transport.   |

| Sewta (South East Wales Transport Alliance) Regional Strategies:  |  |  |   |
|---|--|--|---|
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA   | Implications for Plan  | Implications for SA   |
| <p><b>A Walking and Cycling Strategy, July 2006</b></p> <ul style="list-style-type: none"> <li>- STRATEGIC INTEGRATION To ensure that regional and local transport and non-transport policies and strategies support the delivery of the regional walking and cycling strategy.</li> <li>- HIGH QUALITY INFRASTRUCTURE To develop high quality and attractive walking and cycling networks linking places where people live to places of employment, town centres and essential services through a series of linked, region-wide programmes.</li> <li>- MAKE BETTER USE OF THE TRANSPORT SYSTEM To make better use of existing transport system by giving greater priority to walking and cycling</li> <li>- TECHNICAL EXCELLENCE To improve professional expertise and promote technical excellence in the development of walking and cycling facilities and promotional activities.</li> <li>- INFLUENCE TRAVEL BEHAVIOUR To increase the numbers of people walking and cycling through practical 'soft' measures that encourage modal shift through travel behaviour change.</li> <li>- MEASURING SUCCESS To establish a region-wide programme to monitor walking and cycling trips as part of the monitoring programme for the Regional Transport Plan.</li> </ul> <p><b>Regional Bus Strategy, February 2006</b></p> <ul style="list-style-type: none"> <li>- Modal shift to buses, through providing safe, attractive and reliable alternatives to the car;</li> <li>- Economic growth and prosperity through addressing spatial exclusion; and</li> <li>- Reductions in social exclusion.</li> </ul> <p>To provide guidance for the ongoing review, development, implementation and monitoring of bus services, thus providing coordination and consistency across the region.</p> <p><b>Moving People: Improving Rail: the next five years, July 2005</b></p> <p>Sewta has a 5-year rail improvement plan and has commissioned a longer-term rail strategy. The Rail Improvement programme consists of a range of measures; including new passenger lines and stations, increased service levels capacity and line speed enhancements and improved stations. Target to increase train patronage and to create a modal shift in travel behaviours.</p> | <ul style="list-style-type: none"> <li>• Review relevant public service sector management policies and key national, regional &amp; local policy mechanisms and produce guidance on how they can best integrate and support the delivery of Sewta's walking and cycling objectives.</li> <li>• Develop walking and cycling links to and within town and city centres</li> <li>• Develop walking and cycling links to and between public transport interchanges in conjunction with the Sewta Bus and Rail Strategies</li> <li>• Develop walking and cycling links to centres of learning including expansion of the Safe Routes to Schools programme and school travel plans.</li> <li>• Maintain an attractive environment for walking and cycling through co-ordinating the improvement of local route maintenance regimes and providing sufficient revenue funding.</li> <li>• Develop regional and local accessibility models and maps to identify local exclusion factors and how walking and cycling can overcome these, meet local accessibility needs and help tackle social exclusion.</li> <li>• Re-allocate highway space for walking and cycling facilities as part of traffic management and road safety schemes.</li> <li>• Provide walking and cycling facilities as part of bus corridor improvements in conjunction with the Sewta Bus Strategy.</li> </ul><br><ul style="list-style-type: none"> <li>• The assessment of bus corridors and consensus among stakeholders identified that capital investment should be focused on the core commuter transport corridors, thereby promoting reliable access to the main employment sites - Secondary economic centres include central and eastern Bridgend, Caerphilly, Cwmbran and Merthyr Tydfil where selected schemes are also necessary and supported.</li> <li>• The recommendation of this Strategy is therefore to promote the short-term implementation of the proposed bus priority and infrastructure measures in central Cardiff. The A470, A469 and A48 Cowbridge corridors are all subject to ongoing Transport Grant capital funding support, with works scheduled over the next five years.</li> </ul><br><ul style="list-style-type: none"> <li>• Line and frequency improvements along the Vale of Glamorgan line</li> <li>• The opening of the Ebbw Vale line in late 2007</li> <li>• Maesteg line and frequency improvements completion date in 2010</li> </ul> | <p>Develop Integrated travel</p> <p>Develop cycle and walking paths</p> <p>Influence travel behaviours</p> <p>Increase patronage on sustainable travel modes (e.g. by train, bus, car sharing and walking and cycling)</p> <p>Help to reduce social exclusion – improve access to public transport and services</p> <p>Road safety and congestion levels.</p> <p>Reduce the reliance of the private car.</p> | <p>The SA framework should consider improving and increasing the use of sustainable and Integrated transport.</p> <p>The SA framework should consider improving the access to public transport.</p> |

| <b>Environment Agency Catchment Flood Management Plans- Ogmore to Tawe (including Thawe &amp; Cadoxton) September 2006/ Taff &amp; Ely (August 2006)</b>  |  |   |  |
|---|--|---|--|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>The key objective of a CFMP is to develop complementary policies for long-term management of flood risk within the catchment that take into account the likely impacts of changes in climate, the effects of land use and land management, deliver multiple benefits and contribute towards sustainable development.</p>   | <p>None specific. However CFMP contain the following aims which are considered of relevance:</p> <ul style="list-style-type: none"> <li>• To reduce the risk of flooding and harm to people, the natural, historic and built environment caused by floods</li> <li>• To maximise opportunities to work with natural processes and to deliver multiple benefits from flood risk management, and make an effective contribution to sustainable development</li> <li>• To support the implementation of EU directives, the delivery of Government and other stakeholder policies and targets, and the Environment Agency's Environmental Vision</li> <li>• To promote sustainable flood risk management; and</li> <li>• To inform and support planning policies, statutory land use plans and implementation of the Water Framework Directive.</li> </ul> | <p>Flooding and Climate change are important considerations for the LDP. Consequently, the CMFPs include a series of matters relating to measure for mitigating future climate change as they relate to new development proposals located near existing water courses which should be considered within the LDP, these include:</p> <ul style="list-style-type: none"> <li>• Expansion of floodplain storage areas alongside the watercourses;</li> <li>• Promotion of SUDS;</li> <li>• Capturing runoff and use for water shortages;</li> <li>• Provide household capacity storage facilities;</li> <li>• Rainwater harvesting;</li> <li>• Integrating future development with future defences;</li> <li>• Consider future climate change in development plans;</li> <li>• Stronger restraints on development in risk areas;</li> <li>• Existing reservoirs being used for flood storage, especially in the upper reaches of the Taff catchment; and</li> <li>• Property developers should consider adopting holistic construction methods.</li> </ul> | <p>The issues of flooding and climate change should be considered within the SA framework.</p>     |
| <b>The Swansea Bay and the Severn Estuary Shoreline Management Plans</b>  |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>Shoreline Management Plans (SMP) provide the basis for sustainable coastal defence policies and develop objectives for the future management of the shoreline. Sustainable coastal defence policies need to take account of the inter-relationships between defenses, developments and processes acting upon the coast and they should avoid as far as possible tying future generations into inflexible and expensive options for defence.</p>                            | <p>These have been split into:<br/>General Management Objectives: these are the primary objectives for shoreline management planning in the estuary; and<br/>Topic Objectives: these concern particular issues and supplement the General Management Objectives.</p>   | <p>While SMPs have no statutory status, they can be useful in informing the LDP process. The LDP should consider the SMP management objectives and strategies.</p>  | <p>The issue of coastal defence should be considered within the SA framework.</p>                  |
| <b>Western Wales and Severn River Basin Management Plans</b>  |  |   |  |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>   |
| <p>River Basin Management Plans set out in general terms how the water environment will be managed and will provide a framework for more detailed decisions to be made. The plans include information on the characteristics of each River Basin, a summary of the significant pressures and impacts upon water bodies and the economics analysis of water use and a summary of the programmes pressures and impacts of measures required for the River Basin District to</p> | <p>None specific. The plans perform the following functions:</p> <ul style="list-style-type: none"> <li>• They act as an inventory and documentation mechanism for the information gathered including: environmental objectives for surface and ground waters, quality and quantity of waters, and the impact of human activity on water bodies.</li> <li>• They co-ordinate programmes of measures and other relevant programmes within the river basin district.</li> </ul>  | <p>Not relevant at this time.</p>   | <p>The impact of development upon water resources should be a key feature of the SA Framework.</p> |

|  |   |  |  |
|--|---|--|--|
| <p>achieve Water Framework Directive objectives. A final version of the Severn River Basin Management Plan will be published by 22<sup>nd</sup> December 2009.</p> | <ul style="list-style-type: none"> <li>• They form the main progress reporting mechanism to the EC as required by Directive Article 15.</li> </ul> <p>The first river basin management plans must be published by the end of 2009 and will indicate the quality and quantity objectives to be achieved by 2015.</p> |  |  |
|--|---|--|--|

**LOCAL POLICIES, PLANS AND PROGRAMMES**

| <p><b>Vale of Glamorgan Corporate Plan 2005-2009</b></p>   |   |   |   |
|--|---|---|---|
| <p>Key objectives relevant to Plan and SA</p>  | <p>Key targets and indicators relevant to Plan and SA</p>   | <p>Implications for Plan</p>  | <p>Implications for SA</p>  |
| <p>The plan outlines short, medium and long term actions to achieve the Council's Vision for the Vale as a place</p> <ul style="list-style-type: none"> <li>• That is safe, clean and attractive, where individuals and communities have opportunities to improve their health, prosperity, and well being and</li> <li>• Where there is a strong sense of community in which local groups and individuals have the capacity and incentive to make an effective contribution to the future of the area</li> </ul> <p>It identifies the following strategic objectives:</p> <ul style="list-style-type: none"> <li>• Community Leadership</li> <li>• Lifelong Learning</li> <li>• Community Well Being</li> <li>• The Environment</li> <li>• Regeneration</li> <li>• Corporate Resources</li> </ul> | <p>None specific the LDP/SA.</p> <p>However, the Corporate Plan includes 'corporate priorities' for each strategic objective, stated in broad terms that are implicit to the LDP and SA-</p> <p><b>Community Leadership</b><br/><i>'To work with partners from the voluntary, public, private and other sectors to deliver the shared vision for the future of the Vale and to ensure a co-ordinated approach to realising that vision'</i></p> <p><b>Lifelong Learning</b><br/><i>'To provide high quality, accessible learning opportunities which meet the needs of learners of all ages and to develop and promote a culture of lifelong learning for all.'</i></p> <p><b>Community Well Being</b><br/><i>'To make the Vale a safe, healthy and enjoyable place in which individuals, children and families can live their lives to the full</i></p> <p><b>The Environment</b><br/><i>"To achieve a quality environment through promotion and use of sustainable practices, and by making the best use of current and future resources."</i></p> <p><b>Regeneration</b><br/><i>'To encourage the development of a diversified and sustainable community and to work in partnership with others to promote regeneration and economic development'.</i></p> | <p>A number of strategic objectives are relevant to the LDP, particularly those contained within the themes of Community Well Being The Environment and Regeneration.</p> | <p>All, or most, of the objective proposed are relevant to sustainable development. The SA framework should ensure that all relevant issues have been considered.</p> |

| <p>Key objectives relevant to Plan and SA</p>  | <p>Key targets and indicators relevant to Plan and SA</p>   | <p>Implications for Plan</p>  | <p>Implications for SA</p>  |
| <p>The UDP is the adopted land use plan for the Vale of Glamorgan until it is replaced by the LDP. Its strategic aims and objectives could be incorporated in to the SA and tested as one of the strategic options for the LDP framework.</p>  | <p>See Key Objectives</p>   | <p>The LDP will replace the UDP.</p>  | <p>See Key objectives</p>   |

| <b>Vale of Glamorgan Community Strategy 2003-2013</b>   |  |   |   |
|---|--|---|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The main purposes of the Strategy are:</p> <ul style="list-style-type: none"> <li>• To improve the quality of life of local communities in the Vale</li> <li>• To provide a focus for improved joint working and planning between public agencies and the voluntary and business sectors.</li> <li>• To contribute to the achievement of sustainable development.</li> </ul>   | <p>The strategy includes detailed strategic actions and priorities for addressing issues raised during the consultation process, under the themes of:</p> <ul style="list-style-type: none"> <li>• Economic Regeneration</li> <li>• Community Safety</li> <li>• Lifelong Learning</li> <li>• Health &amp; Well Being</li> <li>• Environmental Improvement</li> </ul> <p>Whilst the strategy does not include any quantified targets indicators, these are implicit in most of the measures proposed.</p> | <p>In preparing LDPs, local planning authorities must have regard to their Community Strategy and where appropriate express in land use planning terms, those elements of the strategy that relate to the development of land providing they conform with national and international policy and obligations.</p> <p>In this respect a number of actions and priorities are directly relevant to the LDP, particularly those contained within the themes of Economic Regeneration and Environmental Improvement.</p> | <p>The SA should consider the issues raised in the strategy.</p>  |
| <b>Vale of Glamorgan Municipal Waste Management Strategy (2004)</b>   |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The objectives of the Strategy is that of the South East Wales Regional Waste Plan-</p> <p>Expansion of recycling and reuse schemes for municipal waste such that the waste strategy targets for each of the target years of 2006/07 and 2009/10 are met and in fact exceeded. All residual waste would be sent to a Mechanical Biological Treatment plant. Continued landfill of waste residues will be required.</p> <p>The principle of the Municipal Waste Management Strategy that is relevant to the LDP is that-</p> <p>“Waste minimisation is central to reducing the amount of waste produced in the Vale, and this will be a priority for the Council over the next few years”</p> | <p>None specific to the period covered by the LDP. Nevertheless the LDP will need to ensure that it supports the continued need to minimise waste production.</p>  | <p>The LDP policies for waste will need to take account of how it can contribute to any new targets set by the WAG and the South East Wales Regional Waste Plan during the LDP period.</p>  | <p>The SA objectives should include objectives devoted to waste minimisation and appropriate waste management.</p>  |
| <b>Vale of Glamorgan Local Transport Plan 2001/02 to 2005/06</b>  |  |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The LTP supports a range of objectives contained within the Council’s Best Value Plan and the Adopted Unitary Development Plan. In addition the objectives of SWIFT (now Sewta) are supported.</p>   | <p>The LTP includes detailed actions and aims, and whilst no quantified targets are set these are implicit in most of the actions proposed.</p>  | <p>The land use planning system has the potential to alter travel patterns, promote sustainable travel choices. This should be reflected in the LDPs strategy and policies.</p>   | <p>The potential to alter travel patterns, promote sustainable travel choices and contribute to environmental Improvements should be reflected in the objective of the SA</p> |

| Vale of Glamorgan Cycling Study 1997  |   |  |   |
|---|---|--|---|
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA   |
| Overall objective of the strategy –<br>“To increase use in the Vale of Glamorgan”   | <ul style="list-style-type: none"> <li>To quadruple the number of cycle trips in the Vale by 2012</li> <li>To increase the modal split for cycling by 5% by 2012</li> </ul> | The land use planning system has the potential to alter travel patterns, promote sustainable travel choices. This should be reflected in the LDPs strategy and policies. | The potential to alter travel patterns, promote sustainable travel choices and contribute to environmental Improvements should be reflected in the objective of the SA. |
| Vale of Glamorgan Draft Walking Strategy 2004   |   |  |   |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA   |
| The strategy’s aim is to promote walking in the Vale of Glamorgan in the context of relevant local and national policy objectives.  | None specific.  | The land use planning system has the potential to alter travel patterns, promote sustainable travel choices. This should be reflected in the LDPs strategy and policies. | The potential to promote sustainable travel choices and should be reflected in the objective of the SA  |
| Vale of Glamorgan Bus Strategy 2004   |   |  |   |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan  | Implications for SA   |
| <p>The key objectives for the Vale of Glamorgan LABS are:</p> <ol style="list-style-type: none"> <li>To improve the bus journey “experience” as a whole.</li> <li>To outline the current provision and spend on all supported/ education bus services and community/taxi services in the Vale of Glamorgan.</li> <li>To identify ways of improving the frequency, reliability and standard of bus services to residential, employment, retail and tourism destinations.</li> <li>To identify opportunities for enhancing bus information and facilities.</li> <li>To ensure that new developments are accessible by bus.</li> <li>To examine the potential for the use of community and taxi transport modes for local public transport services, or parts of.</li> <li>To establish a mechanism for monitoring the patronage and reliability of local public transport services.</li> <li>To identify opportunities for the funding of local public transport services.</li> <li>To consider the needs of all who travel by bus, including those with mobility impairments.</li> <li>To continue to provide support for ‘socially necessary’ services.</li> <li>To establish, where possible, <b>Quality Bus Partnerships</b></li> </ol> | None specific to the period covered by the LDP.   | The land use planning system has the potential to alter travel patterns, promote sustainable travel choices. This should be reflected in the LDPs strategy and policies. | The potential to alter travel patterns, promote sustainable travel choices and contribute to environmental Improvements should be reflected in the objective of the SA  |

|--|---|---|---|
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| <p><b>Local Biodiversity Action Plan</b></p> <p>The overall objective of the Vale of Glamorgan LBAP is to conserve and enhance the biodiversity of the Vale by:</p> <ul style="list-style-type: none"> <li>• Protecting all habitats and species important at a local as well as national or international level for nature conservation;</li> <li>• Promoting optimum management for these sites;</li> <li>• Where appropriate, improving degraded habitats or creating new habitats; and</li> <li>• Creating a healthy environment in which the commoner species can thrive;</li> <li>• Creating public awareness of local biodiversity through education and information to all sectors.</li> </ul> <p><b>Habitat Action Plans</b></p> <p>19 Action Plans have been developed which set priorities for nationally and locally important habitats within the Vale of Glamorgan. Additional Action Plans are being considered for a further 3 Habitats.</p> <p><b>Species Action Plans</b></p> <p>21 Action Plans have been developed which set priorities for nationally and locally important species within the Vale of Glamorgan. Additional Action Plans are being considered for a further 22 species and a range of butterflies.</p> | <p>The plan sets out currently known information and detailed actions in relation to habitats and species relevant to the Vale of Glamorgan. Many of the actions are directed at. It includes detailed targets for particular habitats as appendices. These are mainly stated in broad, rather than quantified terms.</p> | <p>The LDP should consider the need to assess developments against nature conservation designations and other relevant, related criteria.</p>           | <p>Biodiversity is a key aspect of sustainable development that should be included within the SA framework.</p> |
| Landscapes Working for the Vale of Glamorgan 1999  |   |   |   |
| Key objectives relevant to Plan and SA   | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| <p>Provides and an assessment of the different landscape characteristics of the Vale of Glamorgan and provides the overarching strategy for conserving and enhancing those characteristics.</p> <p>The key issues:</p> <ul style="list-style-type: none"> <li>• Conserve the rural character, identity and tranquillity of the Vale</li> <li>• Conserve historically and ecologically valuable landscapes</li> <li>• Conserve and enhance all the coastal landscapes</li> <li>• Enhance the urban fringe</li> <li>• Raise the quality and sustainability of design and landscape management</li> </ul> <p>The broad themes of the strategy are:</p> <ul style="list-style-type: none"> <li>• Towards Sustainable Development</li> <li>• Landscape supporting Economic Development</li> <li>• Protecting Tranquillity</li> <li>• Reinforcing the Vale's Identity</li> <li>• Conserving the Coast</li> </ul>   | <p>The strategy outlines 33 different landscape character areas with descriptions, evaluations and strategies for each. In addition, 38 detailed landscape schemes and 7 detailed initiatives and studies have been compiled into an Action Programme comprising volume 3 of the study.</p>                               | <p>The key issues contained within the strategy will need to be considered within the LDP, particularly in relation to the plans land use strategy.</p> | <p>The key issues of the strategy should be considered as part of the SA.</p>                                   |

|  |   |   |   |
|--|---|---|---|
| <ul style="list-style-type: none"> <li>• Conserving the Rural Vale</li> <li>• Enhancing the Urban Fringe</li> <li>• Conserving the Natural Heritage</li> <li>• Conserving the Historic Heritage</li> <li>• Improving Access</li> <li>• Towards a Woodlands Strategy</li> <li>• Improving Landscape Management</li> </ul>   |   |   |   |
| <b>A Healthy Vale - Health, Social Care and Well-being Strategy 2005-2009</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| The Strategy sets out a prioritised work plan for improving the health and social well being of residents of the Vale of Glamorgan. The Strategy stresses prevention and considers health inequalities.  | The strategy does not suggest quantified local targets, but is intended to address national targets.  | Ensure that the LDP includes policies to improve public health (e.g. through walking and cycling initiatives and better homes) and combat social exclusion.   | The SA objectives should reflect the need to promote better public health and combat social exclusion. The SA directive refers explicitly to the need to consider 'human health' as an issue.   |
| <b>Children &amp; Young People Strategy (2003-2008)</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| Consider the impact on children and young people of all developments across sectors.   | <p>None specific. However the Strategy contains a number of aims relating to children and young people which the LDP can influence, these being;</p> <ul style="list-style-type: none"> <li>• That all children and young people have access to a comprehensive range of educational, training and learning opportunities, including acquisition of essential personal and social skills;</li> <li>• That all children and young people have access to play, leisure, sporting and cultural activities</li> </ul> <p>The Strategy also highlights housing and public transport as being issues affecting children and young people.</p> | The LDP will need to take account of the impact that new developments may have existing services including educational provision. Additionally, that the LDP will include policies that encourage employment and other services as well as ensuring the provision of play /leisure space. | Access to services, transport and educational provision, employment as well as social inclusion are issues that affect children and young people are all issues that need to be addressed with the SA framework. As these are seen as key aspects to achieving sustainable communities. |
| <b>Vale of Glamorgan Local Housing Strategy 2004 - 9</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>Identifies 12 strategic targets</p> <ol style="list-style-type: none"> <li>1. Promote a good quality private housing sector</li> <li>2. Improve supply and facilitate broader access to the private rented sector</li> <li>3. Facilitate broader access to home ownership</li> <li>4. Protect and improve the condition of properties and communities through area renewal</li> <li>5. Improve the supply of affordable rented accommodation in the public sector across the Vale of Glamorgan</li> <li>6. Improve the quality and condition of the Council housing stock</li> <li>7. Reduce the level of homelessness</li> <li>8. Develop housing and support solutions for</li> </ol> | None specific.  | Addressing both housing need and demand will be a key aspect of the LDP.  | The provision of decent, affordable housing is an essential element of sustainability that should be considered in the SA.  |

|  |   |  |  |
|--|---|--|--|
| <p>vulnerable adults, young people and children</p> <p>9. Ensure people from black and minority ethnic communities have equal access to housing</p> <p>10. Ensure that the public have accessible, high quality advice and information in relation to housing matters</p> <p>11. Improve joint working to achieve strategic objectives</p> <p>12. Improve data collection relating to strategic objectives</p>                           |   |  |  |
| <b>Vale of Glamorgan Crime and Disorder Reduction Strategy 2002-2005</b>   |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Strategy sets out the principles for tackling crime and the fear of crime in relation to :</p> <ul style="list-style-type: none"> <li>• Auto-crime,</li> <li>• House burglary,</li> <li>• Substance misuse,</li> <li>• Violent crime;</li> <li>• Youth offending and youth annoyance,</li> <li>• Anti-social behaviour,</li> <li>• Domestic abuse,</li> <li>• Violent crime, and</li> <li>• Creating safer communities</li> </ul> | None.   | Ensure that the LDP takes account of the need for new developments to consider addressing crime and safety through the plans design requirements.  | The issues of community safety should be considered within the SA as part of the wider social aspects of sustainability.   |
| <b>Vale of Glamorgan Tourism Strategy (when finalised)</b>   |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Strategy sets out Key objectives for the promotion and development of tourism across the Vale in support of the Council's vision for tourism:</p> <p>“To create an attractive tourism destination with a positive image for the Vale of Glamorgan, encouraging sustainable development and quality facilities to enrich the experience for visitors and residents”</p>  | None.   | The LPD should seek to promote sustainable tourism.  | Sustainable tourism should be considered as part of the SAs wider priority for promoting sustainable economic growth within the Vale of Glamorgan.                   |
| <b>Improving Countryside Access in the Vale (The Draft Rights of Way Improvement Plan September 2006)</b>  |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Vale of Glamorgan Rights of Way Improvement Plan (ROWIP) is intended as an over arching framework to guide the Vale of Glamorgan Council's work to maintain and improve the county's rights of way network and to prioritise the work that is done. The ROWIP is the Council's response to the Countryside and Rights of Way Act 2000.</p>  | <p>The ROWIP contains 36 specific actions to improve the Public rights of way within the Vale of Glamorgan ranging from increasing facilities on the ground e.g. signage, to engaging and working with local communities and groups in the improvement of the resource.</p> | <p>The LDP should take into account the contribution that can be made by the public rights of way network to recreation provision, improving health, promoting tourism and accessing facilities.</p> | <p>The SA framework should recognise the contribution that the public rights of way network can make towards improving health, access to facilities and tourism.</p> |
| <b>Strategy for the Integration of Artworks in the Public Realm 2006</b>   |   |  |  |
| <b>Key objectives relevant to Plan and SA</b>  | <b>Key targets and indicators relevant to Plan and SA</b>   | <b>Implications for Plan</b>   | <b>Implications for SA</b>   |
| <p>The Vale of Glamorgan Council's Strategy for delivering public art. Its aims are to:</p> <ul style="list-style-type: none"> <li>• Integrate art in the lives of its inhabitants</li> </ul>  | None, however the strategy identifies areas where the opportunity exists to incorporate public art as part of public realm projects.  | The LDP will need to consider issues such as design and improvement to the physical environment, within which public art is recognised, has having key role.   | Physical regeneration and the public realm should be considered within the SA as part of   |

|   |   |   |   |
|---|---|---|---|
| <ul style="list-style-type: none"> <li>• Involve all areas of the Vale – both urban and rural</li> <li>• Provide a legacy of memory for visitors</li> <li>• Raise the Vale's profile for cultural activities and innovation</li> <li>• Deliver a cultural return from a wide range of public and private investments</li> </ul>   |   |   | the wider social and environmental aspects of sustainability.   |
| <b>Building A Brighter Barry - Regeneration vision and strategic framework for the Greater Barry Area 2006</b>  |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>Sets out the 10 year strategic vision and action plan for regeneration projects within the Greater Barry Area, developed around 5 main themes-</p> <ol style="list-style-type: none"> <li>1. People shaping the future of their community. Attractive, well kept towns and cities, which use space and buildings well.</li> <li>3. Good design and planning which makes it practical to live in a more environmentally sustainable way.</li> <li>4. Towns and cities able to create and share prosperity.</li> <li>5. Good quality services – health, education, housing, transport, finance, shopping, leisure and protection from crime.</li> </ol>  | None specific.  | The main themes of the strategy should be considered as part of the Plans wider economic, social and environmental objectives for the Vale of Glamorgan   | All, or most, of the objectives proposed are relevant to sustainable development. The SA framework should ensure that all relevant issues have been considered. |
| <b>Severn Estuary Strategy 2001</b>   |   |   |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b> | <b>Implications for Plan</b>  | <b>Implications for SA</b>  |
| <p>The main objectives of the strategy are to:</p> <ul style="list-style-type: none"> <li>• Provide a detailed overview of estuarine themes;</li> <li>• Highlight issues and opportunities that need to be addressed to ensure the future well-being of the Estuary;</li> <li>• Outline policies to address the issues and opportunities, with detailed background and justification;</li> <li>• Outline proposals for action to act as a catalyst for the preparation of agreed action plans, to address the issues and opportunities;</li> <li>• Support and inform the policies and decision-making framework of existing regulatory, statutory, private and public sector organisations;</li> <li>• Influence organisations, such as those within the Voluntary sector and commercial and industrial sectors,</li> <li>• To use the Strategy document to inform their own policy statements and work plans (e.g. tourism development plans and environmental charters);</li> <li>• Act as an overarching document for Local Environment Agency Plans (LEAPs) around the Estuary.</li> </ul> | None.   | <p>The strategy includes a range of broad policies that seek to protect and enhance the Severn Estuary. Those which are of particular relevance to the LDP are-</p> <p><b>D1:</b> Support the identification of coastal zones where new greenfield development will only be permitted if a coastal location is necessary, where it does not compromise environmental objectives and where it takes account of cumulative impacts.</p> <p><b>D2:</b> Encourage development and land uses, which conserve and enhance the cultural, natural and built heritage.</p> <p><b>D3b:</b> In working towards sustainable transport systems, encourage consideration of the wider benefits of mechanisms such as rail freight terminals, port facilities and ferry services, as well as their potential cumulative impacts.</p> <p><b>D5a:</b> Support the avoidance of new development on low lying land that is at risk from flooding, or would exacerbate flooding elsewhere, or on coastal sites liable to erosion.</p> | The conservation and enhancement of the Severn Estuary and its coastline, as well as the Heritage Coast should be considered as part of the SA.                 |

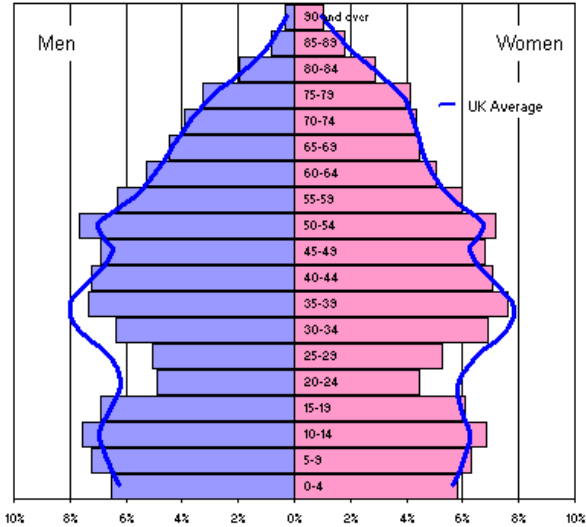

| <b>Cardiff International Airport Draft Masterplan 2006</b>  |  |  |   |
|---|--|--|---|
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Master Plan follows the guidance outlined by the Government to:</p> <ul style="list-style-type: none"> <li>• Provide an indication of Cardiff Airport's expectations for passenger growth in the period to 2015 in detail and beyond to 2030 in outline.</li> <li>• Provide an indication of the infrastructure development required to meet the forecast passenger growth.</li> <li>• Permit interested parties to assess the future impact of the proposals at strategic and local levels and comment.</li> <li>• Inform Welsh Assembly Government strategic policies and to inform local development plans and frameworks as they are developed by the adjacent Local Authorities.</li> <li>• Identify any increased requirement for land take and to safeguard the airport's future development from inappropriate or conflicting development.</li> <li>• Permit Cardiff Airport and others to prepare appropriate plans and investment requirements.</li> <li>• Demonstrate, using accepted criteria, the costs and benefits for Cardiff Airport's growth.</li> <li>• Enable the assessment of direct environmental impacts and, where necessary, propose mitigations.</li> <li>• Align Cardiff Airport to the Government's policies and the air transport industry's proposals for off airport environmental impacts, particularly carbon dioxide and other high level emissions.</li> </ul> | <p>The CIA Masterplan does not provide indicative targets for passenger growth but forecasts in line with DTI projections are provided.</p>  | <p>The implications of the CIA Masterplan should be considered as part of the Plans wider economic, social and environmental objectives for the Vale of Glamorgan.</p>   | <p>The CIA Masterplan addresses a range of issues relevant to the SA. The SA framework should ensure that all relevant issues have been considered.</p> |
| <b>The Vale of Glamorgan Contaminated Land Inspection Strategy 2005</b>   |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>This Contaminated Land Strategy has been prepared by the Vale of Glamorgan Council to fulfil its legal obligations under Part II A of the Environmental Protection Act 1990. It details the arrangements and procedures that the council will use to inspect land within the Vale of Glamorgan for contamination.</p>  | <p>The overall aim of the strategy and of the Vale of Glamorgan Council is to protect public health, prevent harm to its environment and to ensure that land contamination within its area is dealt with satisfactorily.</p> | <p>The LDP should seek to remediate any contaminated sites and if feasible bring them back into beneficial use.</p>  | <p>Contaminated land issues should be considered as part of the SA.</p>   |
| <b>Local Development Strategy for Rural Communities of the Vale of Glamorgan (March 2007)</b>   |  |  |   |
| <b>Key objectives relevant to Plan and SA</b>   | <b>Key targets and indicators relevant to Plan and SA</b>  | <b>Implications for Plan</b>   | <b>Implications for SA</b>  |
| <p>The Local Development Strategy (LDS) identifies the wards in the Vale of Glamorgan that are eligible for funding from Axis 3 and Axis 4 of the Rural Development Plan for Wales 2007 to 2011 (the RDP). It introduces the wards that are eligible for support and the challenges that they face and outlines the strategy that has been put in place to meet those challenges. The document demonstrates how the strategy has been developed and how it complements other relevant development activities and strategies within the region as well as describing how the delivery arrangements that have been put in place meet the requirements of European Commission and Welsh Assembly Government Guidelines.</p>  | <p>None specific – the Local Development Strategy includes aims and objectives to support the development and support of rural communities.</p>  | <p>The development of the LDP will have major implications for the rural communities. The allocation of housing and employment sites, the provision of improved transport facilities can all play a major role in promoting rural communities.</p> | <p>The impact of development upon rural communities should be an issue that is considered as part of the SA.</p>  |

| <b>Bridgend County Borough Council Unitary Development Plan (12<sup>th</sup> May 2006)</b>  |   |   |   |
|---|---|---|---|
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| The Bridgend Unitary Development Plan contains policies and proposals for the development and use of land in the County Borough of Bridgend up to 2016. In particular the plan includes land use policies and proposals for:-<br>Housing; Conservation and improvement of the natural and built environment, Economy, Land use / transportation Mineral working; Waste management and disposal, Tourism; Energy conservation and generation.  | A range of aims and objectives are detailed for each topic area.  | Development policies within adjoining local authority areas could have implications for development within the Vale of Glamorgan.   | Development within adjacent LAs that might impact upon the Vale should form a consideration within the SA.  |
| <b>St Athan Development Brief 9 July 2006)</b>  |   |   |   |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| The St.Athan Development Brief outlines the proposals behind the Defence Training Review bid for new military training facilities that have been submitted by Metrix to the MOD. The brief confirms the relationship of the Training Academy and Aerospace Wales proposals on the St.Athan site and provides a basis for the consideration of any future planning application(s) for the St.Athan site.   | None specific.  | The development of RAF St.Athan will have major implications by way of employment, housing and transportation needs. Indirectly, the development will also place pressure to varying degrees on other services and facilities and this should be a consideration in the development of the LDP. | The St Athan Development Brief addresses a range of issues relevant to the SA. The SA framework should ensure that all relevant issues have been considered |
| <b>The Environment Agency Catchment Abstraction Management Strategies - Taff &amp; Ely (June 2006), Thaw &amp; Cadoxton (July 2006) Neath, Afan &amp; Ogmore (October 2005).</b>  |   |   |   |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| Catchment Abstraction Management Strategies (CAMS) are six-year plans detailing how the Environment Agency will manage water resources in abstraction areas. CAMS will <ul style="list-style-type: none"> <li>• Inform the public on water resources and licensing practise;</li> <li>• Provide a consistent approach to local water resource management;</li> <li>• Help to balance the needs of water users and the environment; and</li> <li>• Involve the public in managing the water resources in their area.</li> </ul>  | The CAMS provide an indication of the level of water abstraction that might be available for each water abstraction area and provides a "targets status" for each area based on a sustainability appraisal process. | The location of water resources and the impact of water abstraction upon the natural environment is a major consideration in the location of development.   | The objectives of the CAMS should form a key aspect of the SA.  |
| <b>The Ogmore (2002) and The Taff &amp; Ely (Dec 2003) Salmon Action Plans</b>  |   |   |   |
| Key objectives relevant to Plan and SA  | Key targets and indicators relevant to Plan and SA  | Implications for Plan   | Implications for SA   |
| Local Salmon Action Plans have been developed to deliver the objectives of the National Salmon Strategy, launched by the National Rivers Authority in February 1996 and inherited by the Environment Agency (NRA, 1996). This sets out four objectives for the management of Salmon fisheries in England and Wales: <ul style="list-style-type: none"> <li>• Optimise the number of salmon returning to home water fisheries.</li> <li>• Maintain and improve fitness and diversity of salmon stocks.</li> <li>• Optimise the total economic value of surplus stocks.</li> <li>• Ensure beneficiaries meet necessary costs.</li> </ul> The objectives are designed to preserve fish stocks for the future whilst protecting sustainable exploitation and recognising the economic value of the fisheries. | A range of actions designed to either investigate or overcome issues that prevent the increase in the Salmon stock of the rivers identified.  | None directly, however Salmon population of rivers is a good indication of the quality of the river environment that could be affected by development proposals.  | The improving salmon population is a good indicator of the water quality improvements in polluted rivers.   |

|                                     | <p>Municipal waste arisings for the years 1994/95 to 2003/04, which confirms a total of just less than 66,300 tonnes for 2003/04. For 2005-06 this rose to 77,200 tonnes (Vale of Glamorgan Waste Data Flow 2006). The figures indicate some interesting variations in the totals over this period, although it is unclear whether this is a true reflection of actual arisings or due to evolving and changing methodology for recording municipal waste tonnages. These figures indicate an average growth rate of 2.84% over the period.</p> |             |        |                                 |             |   |   |        |        |        |        |        |        |

| Note: Assumes that no trade waste is recycled   |   |   |          |             |   |  |   |                         |      |      |       |                   |                                    |  |     |
| For the years 1994/95 to 2003/04 and highlights the significant increase in tonnage of waste segregated for recycling and composting over the period. For 2005/06, the amount of municipal waste sent to landfill fell from 54, 076 tonnes in 2003/04 to 43,462 tonnes.   |   |   |          |             |   |  |   |                         |      |      |       |                   |                                    |  |     |

| Climate Change – Greenhouse gas emissions by sector | <p style="text-align: center;"><b>Greenhouse Gas Emissions from Wales by Sector</b></p> <p>In 2002, the main source of greenhouse gas emissions in Wales was the energy sector, followed by business. 'Transport' was estimated to be the third largest producer of greenhouse gas emissions in 2002 although 'public' and 'residential' sources also produced similar amounts. Trends show that the production of greenhouse gas has decreased between 1990 and 2002 overall although some sector's contribution has increased such as 'energy supply' and 'transport'.</p> |             |       | <p>Need to continue to assist in reducing greenhouse.</p> <p>Promote sustainable transport.</p> <p>Promote energy efficiency.</p> | 53. | <p><b>Retail</b></p> | <p>The Local Retail Hierarchy for the Vale of Glamorgan is defined by the UDP as follows:</p> <ol style="list-style-type: none"> <li>1. <b>Major Town Shopping Centre</b> (Over 15,000 m<sup>2</sup> of retail floor space) <ul style="list-style-type: none"> <li>• Barry Town Centre</li> </ul> </li> <li>2. <b>Established District Centres</b> (Over 3,500 m<sup>2</sup> but less than 15,000 m<sup>2</sup> of retail floor space) <ul style="list-style-type: none"> <li>• Penarth District Centre</li> <li>• Cowbridge District Centre</li> <li>• Llantwit Major District Centre</li> <li>• High Street/Broad Street Barry</li> <li>• Upper Holton Road</li> </ul> </li> <li>3. <b>Edge of Centre Developments</b> (within easy walking distances of a centre not more than 200-300 meters from existing town centre) <ul style="list-style-type: none"> <li>• Somerfields, Thompson Street Barry</li> </ul> </li> <li>4. <b>Local Centres</b> (with more than 10 retail outlets but of less than 3,500 m<sup>2</sup>) <ul style="list-style-type: none"> <li>• Main Street, Cadoxton Barry</li> <li>• Vere Street, Cadoxton Barry</li> <li>• Park Crescent, Barry</li> <li>• Station Approach, Penarth</li> <li>• Dinas Powys Village</li> <li>• St. Athan</li> <li>• Barry Road, near Cadoxton Barry</li> <li>• Cornerswell Road, Penarth</li> <li>• Rhoose</li> <li>• Cardiff Road, Dinas Powys</li> </ul> </li> <li>5. <b>Neighbourhood Centres</b> (between 3 and 10 units) <ul style="list-style-type: none"> <li>• Castle Court/ The Parade, Dinas Powys</li> <li>• Boverton</li> <li>• Cwm Talwg Centre, Barry</li> <li>• Gibbonsdown Centre, Barry</li> <li>• Dochdwy Road, Llandough</li> <li>• Camms Corner, Dinas Powys</li> <li>• Tennyson Road, Penarth</li> <li>• Bron-y-Mor, Barry</li> <li>• Pill Street, Penarth</li> <li>• Crawshay Drive, Llantwit Major</li> <li>• Font-y-Gary</li> </ul> </li> </ol> | <p>The vitality and viability of retail centres throughout the hierarchy are subject to different pressures.</p> <p>There is no regional centre in the Vale due to the close proximity and easy accessibility by various transport modes, to Cardiff regional shopping centre.</p> <p>Generally low levels of vacancy</p> <p>Higher levels of vacancy within Barry than Cowbridge and Penarth.</p> <p>Town centre retail function is declining.</p> <p>Out-of-town shopping is increasing, especially for food.</p> | <p>36. Vale of Glamorgan Adopted Unitary Development Plan 1996-2011</p> <p>63. VOG Retail Surveys (various)</p> |
|----------------------|--|---|---|

**Retail continued**

**6. Out of Centre Developments** (in a location separate from a town centre, but not necessarily outside the urban area)

- Morrisons, Barry Waterfront
- Waitrose, Cadoxton
- Tesco, Penarth Marina
- Tesco, Highlight Park Barry
- Kwik Save, Penarth Road

**7. Out of Town Developments** (on a greenfield site on land not clearly within the current urban boundary)

- Culverhouse Cross
- A Place for Homes, Llandow

Total retail floorspace in the town Centres of Barry, Penarth, Llantwit Major and Cowbridge has increased over time.

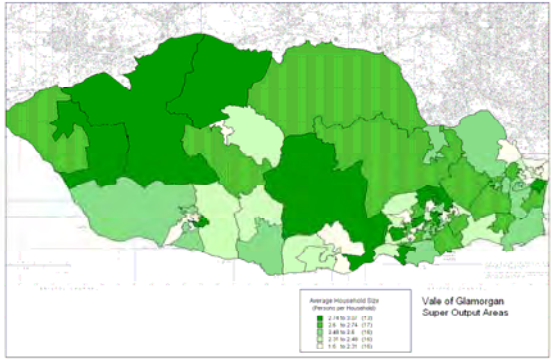

Of the £2,683,087 spent on food in the Vale of Glamorgan in 2000, 62% was spent in the main supermarkets at Culverhouse Cross, Penarth Marina, Highlight Park, Barry and Cadoxton, Barry.

In the Vale, 45% of households own their home with a mortgage, the highest figure in Wales. The average mortgage is £28,000 with a remaining term of 14 years indicating that there is a significant equity potential in the housing stock

The percentage of owner occupiers has steadily increased since 1971.

The number of Local Authority rented properties has dropped significantly, alongside other rented accommodation and since 1981 there has been a slight increase in the % of housing Association rented properties.

Fewer residents in rented accommodation than elsewhere in Wales.

Higher proportion of owned, especially 'with a mortgage', accommodation than elsewhere in Wales.

Decline in rented accommodation and growth in owner-occupied accommodation over time.

2. Office of National Statistics, Neighbourhood Statistics derived from 2001 Census - <http://neighbourhood.statistics.gov.uk/dissemination/>

4. Census 1971, 81, 91, and 2001

| <b>House type / tenure continued</b>          | The percentage of household owners is 6.48% higher than the Welsh average and the percentage of social rented tenure is 4.97% lower than the Welsh average. The other groups, private rented and living rent-free are similar to the rest of Wales.   |              |         |              |   |                       |  |       |  |       |         |       |         |            |       |  |         |  |                              |      |      |        |      |  |    |      |     |      |       |      |             |       |             |                       |      |             |       |             |                 |     |      |      |      |                      |       |              |        |              |                           |      |             |        |             |                              |     |      |      |      |         |     |      |       |      |         |      |      |        |      |       |     |      |      |      |                       |       |       |        |       |                 |  |  |  |      |      |                            |             |             |                                    |       |       |                                    |             |             |   |   |  |

|---|---|---|--|---|--|
| <p>Ports</p>                              | <p>Barry Dock is the only active commercial port in the Vale of Glamorgan.</p> <p>The Port of Barry has direct rail connections to the national rail-freight network</p> <p>Barry Port has received Port Environmental Review System (PERS) accreditation in 2006.</p>  | <p>Total arrivals have declined overall in Newport and have been increasing in Cardiff although in 2002 there was a drop in arrivals. The port at Barry has fewer arrivals than both Cardiff and Newport and the total ship arrivals at this port have been fluctuating since 1992.</p> | <p>No trend data available.</p>  | <p>The port of Barry provides employment to benefit the local economy</p> <p>It enables goods to be imported and exported to and from the region, especially supporting the growing chemicals industry in Barry.</p>  | <p>78. <a href="http://www.abports.co.uk/customer/ports/barry.htm">http://www.abports.co.uk/customer/ports/barry.htm</a></p> <p>79. Sewta RTP SEA Baseline Report 2006</p> |
| <p>Walking</p>                            | <p>Approximately 26% of all purposeful trips in Wales are made wholly by walking.</p> <p>Footpaths near major trip generators in the Vale are 'Good' or 'Average' condition, with isolated parts of footways in need of improvement.</p> <p>Gradients are a problem in the Vale that cannot easily be overcome.</p> <p>There are no discernable 'accident backspots' involving pedestrians in the Vale.</p>                   | <p>No comparison data available.</p>  | <p>There has been a 20% decrease in the average number of walking trips per person over the past 10 years.</p> | <p>Lack of comprehensive pedestrian signage in Vale, compared to motor vehicle signage.</p> <p>Poor lighting where there is a perception / fear of crime.</p> <p>Gradients cause problems especially for pushchairs, wheelchairs etc.</p> <p>Perceived problem of high vehicle speeds puts people off walking.</p> <p>Decrease in number of walking trips corresponds with increase in car use – environmental impact of car use, plus impact on health and well-being.</p> | <p>80. VOG, Draft Walking Strategy (2004)</p>  |
| <p>Parking (including Park and Share)</p> | <p>Parking supply in Penarth and Cowbridge is under pressure, Barry copes with demand but circulation is busy, whereas in Llantwit Major there is no obvious problem.</p> <p>Each town centre has adequate supply of parking but the conditions of operation need amending.</p> <p>There is a suppressed demand of potential town centre users.</p> <p>There are no formal Park and Share sites in the Vale of Glamorgan.</p> | <p>No comparison data available.</p>  | <p>Car ownership and car use is increasing, which in increases demand for car parking.</p>                     | <p>Town centre parking shared by residents, shoppers and commuters.</p> <p>Suppressed demand for town centre parking effecting vitality of town centres.</p> <p>Busy traffic circulation within town centres causes congestion.</p> <p>Lack of park and share sites to encourage car sharing.</p>   | <p>81. VOG Town Centre Parking Study (2005)</p> <p>82. Sewta Park and Share Scoping Study (2005)</p>   |

|             |  |
|-------------|--|
| <b>LDP</b>  | Local Development Plan                                 |
| <b>PPPs</b> | Policies, Plans or Programmes relevant to the LDP / SA |
| <b>SA</b>   | Sustainability Appraisal                               |
| <b>SEA</b>  | Strategic Environmental Assessment                     |
| <b>ODPM</b> | Office of the Deputy Prime Minister                    |
| <b>UDP</b>  | Unitary Development Plan                               |
| <b>WAG</b>  | Welsh Assembly Government                              |

**Appropriate Assessment** – A statutory requirement under the Habitats Directive to consider the effects of the Plan on any European designated site of nature conservation.

**Council** – The Vale of Glamorgan Council

**Delivery Agreement (DA)** – A document comprising the Council's timetable for the preparation of the LDP together with its Community Involvement Strategy [NB The DA is available on the Council's web site and at deposit locations].

**Environmental Consultation Bodies** – CADW, Environment Agency Wales and Countryside Council for Wales

**Environmental Report** – Document required by the SEA Directive which identifies, describes and appraises the likely significant effects on the environment of implementing the Plan. (Also known as the SA Report).

**Habitats Directive** - European Community Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora

**LDP Regulations** - The Town and Country Planning (Local Development Plan)(Wales) Regulations 2005

**Relevant Stakeholders** – Those persons / organisations categorised as follows on the LDP stakeholder database: Business Groups, Disabled Persons Groups, Emergency Services, General Interest Groups, Local Authorities, Professional Bodies, Racial Groups, Religious Groups, Specific Consultees, Transport Interests, Voluntary Bodies, Welsh Culture.

**SA Framework** – The SA objectives, indicators and targets, against which the LDP will be assessed for the purpose of Sustainability Appraisal.

**SA Report** - Document required by the guidance incorporating SEA within SA which identifies, describes and appraises the likely significant effects on the environment, society and economy of implementing the Plan. (Also known as the Environmental Report for the purpose of SEA).

**Scoping Report** – This document which sets the scope and context for the Local Development Plan Sustainability Appraisal, and includes the SA Framework.

**SEA Directive** – European Union Directive 2001/42/EC Strategic Environmental Assessment

**SEA Regulations** - The Environmental Assessment of Plans and Programmes (Wales) Regulations 2004

**Specialist Consultants** – Hyder Consulting, the Council's appointed experts assisting in the SA process.

# VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN

## STRATEGIC OPTIONS STAKEHOLDER WORKSHOP

### REPORT OF CONSULTATION

June 2007

## Executive Summary

---

This Consultation Report outlines the views expressed at a stakeholder workshop, which was held to discuss the Strategic Options for the Vale of Glamorgan Local Development Plan (LDP). The workshop was held on Thursday 24<sup>th</sup> May 2007, at the YMCA Hub, in Barry and involved 52 attendees representing a wide variety of interests and organisations from the Vale of Glamorgan and neighbouring authorities (see Appendix A).

The purpose of the stakeholder workshop was to engage relevant stakeholders in initial discussions on the following LDP strategy options:

- **Option 1:** Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).
- **Option 2a:** Dispersment of housing and employment opportunities based on the current population of each settlement (without a sustainability test).
- **Option 2b:** Dispersment of housing and employment opportunities based on the current population of each settlement (with a sustainability test).
- **Option 3:** Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).
- **Option 4:** A rural new settlement able to promote sustainable self – containment.
- **Option 5:** Concentrate development opportunities in Barry, Penarth / Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development.

The workshop discussions highlighted the advantages and disadvantages of these options. Through these discussions, option 5 was deemed to be the most favourable strategy by stakeholders. Option 4 was considered viable, although cost implications of such a strategy were perceived to be a major constraint to its delivery. Options 2a and 2b were determined to be inappropriate for the Vale of Glamorgan as one does not take sustainability issues into consideration and the other is not a focused approach. Option 3 was thought to result in rural areas having too much development. Although currently in place, it was considered that option 1 would not address future issues and problems facing the Vale of Glamorgan.

The stakeholders were also asked to suggest alternative strategy options, and the following were identified:

- Option 1 in conjunction with Option 4
- Option 2b in conjunction with Option 5
- Option 5 in conjunction with Option 4
- Develop a strategy with a strong focus on the tourism potential of the Vale of Glamorgan.

- Tie in proposed development in the Vale of Glamorgan with those in neighbouring authorities (e.g. Brocastle, Llantrisant and Culverhouse Cross)
- Focus development around Cardiff International Airport.
- Concentrate the majority of development in and adjoining existing major settlements but provide area-specific allocations within the surrounding areas.

The Council will seek to ensure that the preferred strategy meets the expectations of relevant stakeholders and the sustainability objectives set out in the Sustainability Appraisal (SA) Scoping Report<sup>1</sup>.

Participants gave feedback on the stakeholder workshop and 76% felt their overall experience of the day was good to excellent.

The findings from the workshop will be used by the Council to develop the draft preferred strategy for the LDP, which will be formally consulted on early next year.

---

# 1 Introduction

1.0.1 The Vale of Glamorgan Council is currently considering the strategy options for its Local Development Plan (LDP), which will govern how land within the Vale of Glamorgan is used between 2011 and 2026.

## 1.1 Background

1.1.1 To ensure that the policies in the LDP promote the principles of sustainable development, a Sustainability Appraisal (SA) of the LDP, incorporating the requirements of the Strategic Environmental Assessment (SEA) Directive, is being undertaken simultaneously. The LDP and the SA processes are being carried out in an iterative and integrated manner. Figure 1.1 below outlines these two processes.

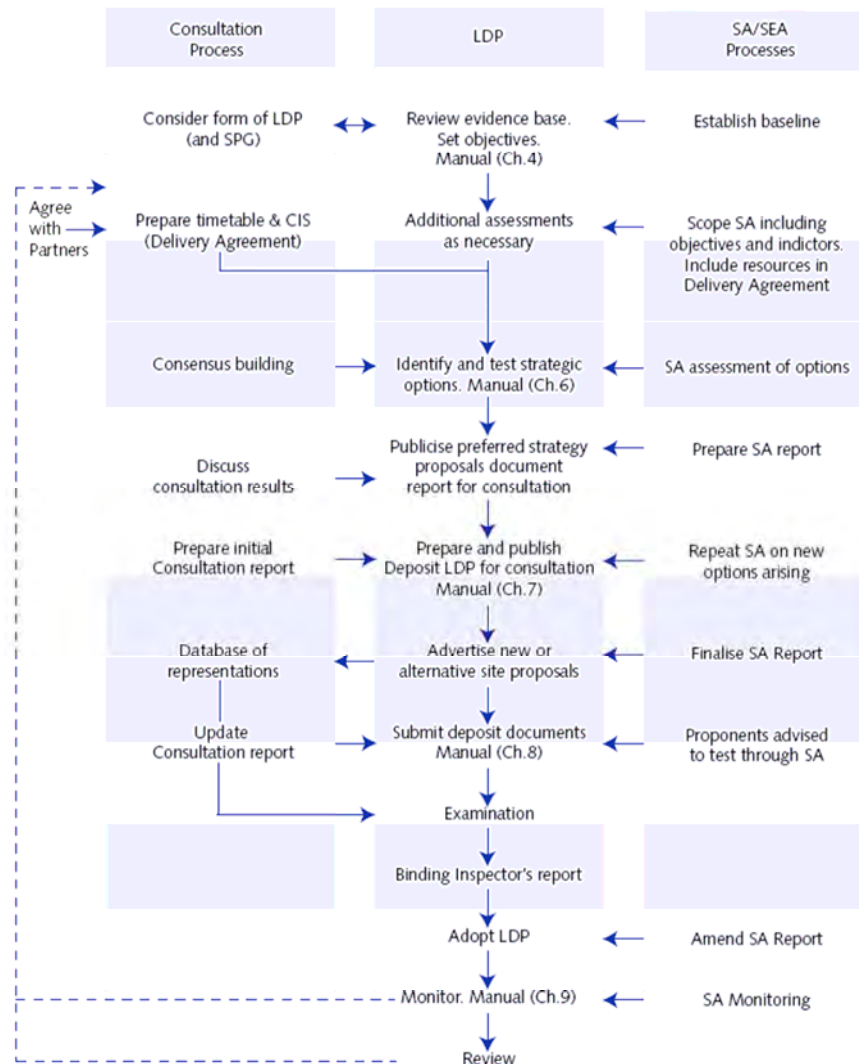

Figure 1.1: Main Stages of the LDP and SA Processes (Source: LDP Manual, June 2006)

1.1.2 The Council are currently undertaking the third stage of the LDP process, in which they are determining the preferred strategy option. The options currently under consideration are as follows:

- Option 1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhose (current UDP strategy).
- Option 2a: Dispersment of housing and employment opportunities based on the current population of each settlement (without a sustainability test).
- Option 2b: Dispersment of housing and employment opportunities based on the current population of each settlement (with a sustainability test).
- Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhose and potentially others to be identified).
- Option 4: A rural new settlement able to promote sustainable self – containment.
- Option 5: Concentrate development opportunities in Barry, Penarth / Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development.

1.1.3 To assist the Council in this process, an appraisal of the options will be carried out as a part of the SA process. This appraisal will be based on the SA objectives which have been developed using feedback from the SA stakeholder workshop held in October 2006. This workshop highlighted that the key issues for the stakeholders in the Vale of Glamorgan include (but are not limited to):

- Transport and accessibility;
- Employment related issues;
- Housing provision, especially affordable housing;
- Increasing development pressures;
- Community cohesion;
- Waste disposal and pollution; and
- Threats to cultural and natural heritage.

Details of the findings from this workshop are provided in the *Sustainability Appraisal Stakeholder Workshop - Report of Consultation* (October 2006) which is available for viewing on the Council's website ([www.valeofglamorgan.gov.uk](http://www.valeofglamorgan.gov.uk)).

On Thursday 24<sup>th</sup> May 2007 a further workshop was undertaken by the Council as part of their LDP consultation process with stakeholders, to obtain valuable feedback and opinions on the LDP strategy options currently being considered.

## 1.2 The Workshop

1.2.1 The purpose of the workshop was to:

- share information on LDP strategy options
- provide stakeholders with the opportunity to share their views on the various LDP strategy options
- provide stakeholders with the opportunity to influence the Council's preferred strategy
- address any queries and questions

1.2.2 Invitations were sent to a wide range of relevant stakeholders, including various local interest groups and organisations from the Vale and neighbouring authorities, of which 52 attended. A list of attendees is provided in **Appendix A**.

1.2.3 As an introduction to the workshop, Emma Harvey (Operational Manager, Planning and Transportation Policy, Vale of Glamorgan Council) provided an update on progress with the LDP. This was followed by a presentation by David Hourd (Hyder Consulting), who explained the role of the SA in determining the preferred strategy of the LDP. Emma Harvey gave a further presentation outlining the purpose of the workshop. It should be noted that there were also opportunities for workshop attendees to ask questions at the end of each presentation to clarify aspects of the LDP process and the workshop itself. The full agenda for the Workshop is provided in **Appendix B**.

1.2.4 The workshop was arranged so that there were six groups, and discussions focused on the advantages and disadvantages of each of the options outlined above. Attendees were also asked to provide any alternative options to those already proposed. Each group had a facilitator and scribe to ensure that discussions were focused and comments were accurately recorded.

1.2.5 A summary of the discussions for each option is given in Section 2 and the suggested alternative options are provided in Section 3. This feedback will now be used in determining the preferred strategy for the LDP. Section 4 outlines the subsequent stages of the LDP and SEA processes.

## 2 The Strategic Options

### 2.1 Option 1

#### **Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).**

- 2.1.1 This option maintains the current strategy contained within the Vale of Glamorgan Adopted Unitary Development Plan (1996-2011), which focuses development within 'the Waterfront Strip'. This encompasses the larger coastal towns and villages of Barry, Penarth, Dinas Powys, Sully and Rhoose, capitalising on their good transport links, availability of services and facilities as well as regeneration opportunities within Barry Waterfront (see Figure 2.1).

**Figure 2.1: Indicative Illustration of Option 1**

- 2.1.2 Discussions regarding this option identified a number of advantages and disadvantages which are outlined below. Stakeholders suggested that if this strategy option is taken forward it should consider how the tourism potential of the Vale of Glamorgan can be maximised and that affordable housing is adequately provided to meet the needs of the local population.

#### **Advantages**

- 2.1.3 The areas identified for growth already have sufficient infrastructure capacity (rail, road and community facilities) to accommodate further development. It was considered that the option may encourage the development of previously developed land, protecting the rest of the Vale of Glamorgan, including important areas of greenfield land, against major development. This approach protects the diversity of small communities, whilst also keeping larger towns vibrant.

- 2.1.4 It is likely that the option will make these key areas attractive for investment, increasing competition with neighbouring authorities and promoting regeneration in settlements such as Barry. It is anticipated that increased investment will also bring about growth in other smaller settlements.
- 2.1.5 Although some consultees highlighted that there has been minimal provision of affordable housing through the current UDP, others were of the opinion that option 1 may promote more affordable housing opportunities.

### **Disadvantages**

- 2.1.6 Participants felt strongly that this option does not address commuting issues for smaller communities and the suburbs of Cardiff. This is particularly due to the assumption that employment will continue to be focused on the Cardiff area. It was also highlighted that congestion problems are likely to be exacerbated as existing commuter links have already reached capacity, and public transport services are currently inadequate.
- 2.1.7 A key issue raised was that this option does not take into account the proposed development of the Defence Training Academy at St Athan (a development of major regional importance). The main concerns in this respect relate to access to and from the site, and the likelihood that Llantwit Major may become a dormitory town to St Athan. It was also felt that the option would not take into account other major development occurring in areas on the western edge of the Vale such as Brocastle. The proposed Severn Barrage was also referred to although it was pointed out that this scheme may not be implemented during the LDP period .
- 2.1.8 Although the option is expected to promote focused development, it was considered that rural areas would be further isolated. To prevent this, growth in other areas of the Vale of Glamorgan would need to be promoted. Failure to do this may cause rural settlements to “become sterile and unsustainable commuter settlements.” Furthermore, participants expressed concern that the Option places pressure on green wedge areas and encourages urban coalescence, leading to a loss of identity.

### **Summary and Conclusion**

- 2.1.9 Overall it was felt that although this strategy has been effective in the current UDP period, it would not be appropriate to plan for the next 15 years on this basis. Key disadvantages highlighted that:
- the current UDP strategy is not flexible and is irresponsible to significant change e.g. impact of new development on housing and transport infrastructure;
  - there are few opportunities for the development of rural communities;
  - provision of affordable housing has been minimal; and
  - there has been increased pressure on existing green wedges.
- 2.1.10 There were, however, some consultees who considered that a continuation of the current strategy was appropriate. Identified strengths of the current strategy included:

- Increased utilisation of brownfield sites, locating development relatively close to employment sites and protecting the rural vale; and
- Provision of employment areas in the south eastern corridor where most people live.

2.1.11 Stakeholders indicated that although the current strategy has been successful in most respects, it would not be advisable to continue with this strategy for the LDP. It was generally considered that option 1 would not effectively address the future issues likely to be faced by communities in the Vale of Glamorgan.

## 2.2 Option 2a:

### **Dispersement of housing and employment opportunities based on the current population of each settlement (without a sustainability test).**

2.2.1 This option would see the distribution of housing and employment to all settlements within the Vale of Glamorgan, proportionate to the existing population of each settlement. In this scenario the level of existing services and facilities would not be considered as part of the allocation of sites, however unlike Option 1 this option would increase development opportunities for rural areas (see Figure 2.2).

**Figure 2.2: Indicative Illustration of Option 2a**

2.2.2 This approach gave rise to much debate regarding its appropriateness as a strategy for development in the Vale of Glamorgan. Below is an outline of the advantages and disadvantages identified.

## Advantages

2.2.3 Discussions indicated that this option is likely to spread development across the Vale of Glamorgan providing benefits to rural areas through a need for improved public transport, community facilities/services and affordable housing. Furthermore, although there would be cumulative effects, the impacts of development would not be concentrated in one area. However, certain considerations that would need to be taken into account in taking this option forward include:

- Giving priority to the development of brownfield sites;
- Providing additional facilities such as leisure facilities and shops, so that settlements are self-sustaining; and
- Further development of transport infrastructure.

## Disadvantages

2.2.4 Although considered an advantage by some, other stakeholders felt that if improvements were not made, existing facilities and infrastructure in some areas may come under increased pressure as a result of this strategy. Transport infrastructure, particularly in the rural areas, is considered to be currently inadequate and is unlikely to sustain increased development. Accordingly, there is concern that transport problems may be exacerbated.

2.2.5 Furthermore, existing community facilities (e.g. health, education and policing) may also face increased pressure and consideration would need to be given to increasing the capacity of these facilities. If additional facilities are to be provided, it would be necessary to ensure that they are accessible to those that need them and that these communities can sustain them.

2.2.6 Overall, it was felt that this option is overly simplistic, lacks focus and does not take into account other planning factors and may give rise to contentious planning issues. It was considered that basing the option solely on current population would be inappropriate.

2.2.7 The discussion groups were concerned that by taking this option forward, the Council would not be meeting their legal obligation to promote sustainable development. It was emphasised that a sustainability test would be required and that, in order to enable “informed, organised growth” the following should be considered:

- The ability of communities to cope with certain levels of development due to the adequacy of existing facilities;
- Settlement demographics to ensure that appropriate housing and facilities are provided that meet the needs of local residents;
- The utilisation of existing facilities;
- That there are appropriate local employment opportunities;
- Findings of a housing needs survey;

- Potential impacts on the character, vitality and viability of individual settlements;
- Availability of land for development; and
- The tourism potential of settlements.

## Summary and Conclusion

2.2.8 In general there was very little support for this option, although some advantages in this approach were highlighted. Workshop participants stressed that a sustainability test was essential and that this strategy option would be overly simplistic and inappropriate.

2.2.9 It was made clear that Option 2a would be an inappropriate strategy for the Vale of Glamorgan and an understanding of the capacity of various settlements to accommodate development is essential in any development plan strategy.

## 2.3 Option 2b

### Dispersement of housing and employment opportunities based on the current population of each settlement (with a sustainability test)

2.3.1 As with option 2a the distribution of development would be relative to the existing population of each settlement. However an assessment of existing services and facilities as well as accessibility to nearby facilities would be undertaken (the sustainability test). In this scenario land allocated for development opportunities would only be within those settlements, which would have good levels of services, facilities and infrastructure (see Figure 2.3).

Figure 2.3: Indicative Illustration of Option 2b

2.3.2 Comments made relating to this option are similar to those made for option 2a, although option 2b is preferred because it includes consideration of sustainability issues. Below are the advantages and disadvantages identified.

### **Advantages**

2.3.3 The suggested sustainability test was generally welcomed and it was felt that it would allow for a more balanced approach, enabling more informed planning decisions to be made. Participants recommended that the sustainability test take the following into account:

- A historic settlement survey and protection of conservation areas;
- Protection of the character of the rural settlements;
- Provision of appropriate community facilities;
- Protection of important habitats;
- Capacity of local infrastructure;
- Appropriate local employment opportunities;
- Provision of affordable housing;
- Land drainage issues and flood risk in some communities; and
- Availability of land for development, ensuring that brownfield sites are used in preference to greenfield sites.

2.3.4 It was considered important that the criteria used in the sustainability test are comprehensive and clearly set out.

### **Disadvantages**

2.3.5 There were concerns relating to the implications that this option would have for transport infrastructure and the character of smaller settlements, some of which are valued for their tourism potential.

2.3.6 Some consultees felt that this approach would require improvement of facilities and infrastructure throughout the area and that it does not consider the level of funding and resources that would be necessary to achieve this. Furthermore, encouraging a number of small scale developments is unlikely to provide the economies of scale required to allow for improvement of facilities and infrastructure such as the transport network, leisure facilities, shops etc.

2.3.7 The success of this strategy is dependent upon the behaviour of residents in settlements, as most people are likely to continue to live in the rural areas and commute to urban areas for work. As such, it was felt that the availability of employment opportunities in individual settlements would be a key factor in the success of this option. The most sustainable option would be to provide employment opportunities locally to ensure that residents do not have to commute elsewhere to work.

## Summary and Conclusion

- 2.3.8 Although the majority of stakeholders preferred this option over option 2a, it was stressed that if option 2b is taken forward, the criteria used in the sustainability test would need to be comprehensive. This would ensure that development occurs in settlements that not only need it, but can sustain it. It should be noted that despite the support for this option, it was not favoured over the others under consideration.

## 2.4 Option 3

### Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified)

- 2.4.1 Unlike option 1, this option would concentrate future development within the larger rural settlements that have good levels of services, facilities and infrastructure relative to other settlements within the rural Vale (see Figure 2.4).

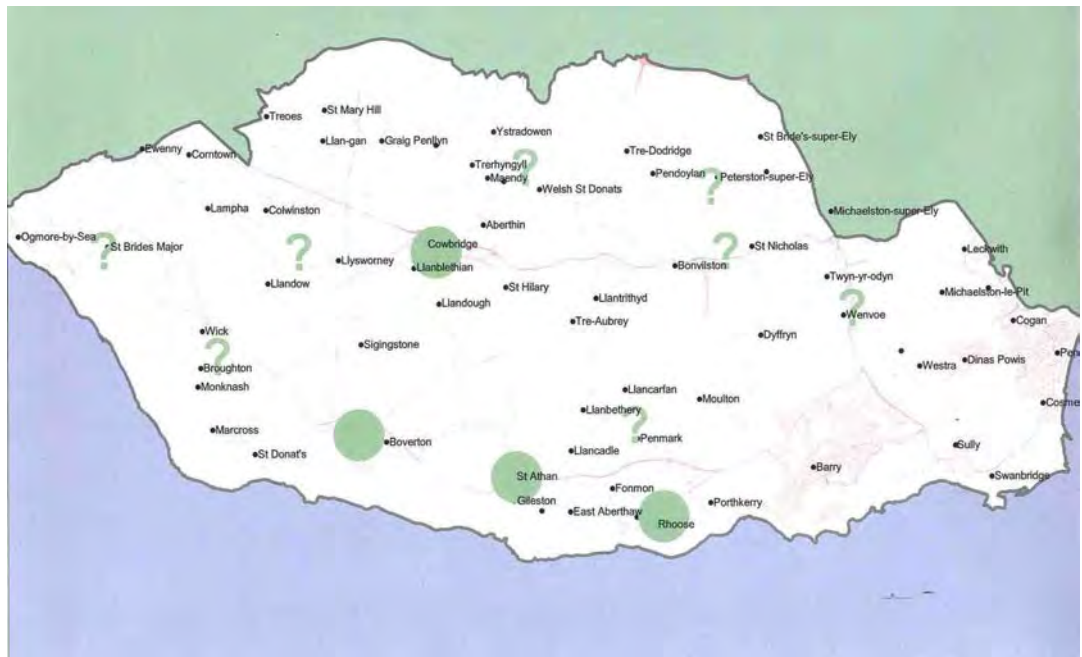

Figure 2.4: Indicative Illustration of Option 3

- 2.4.2 While this option provides a more focused approach than option 2a and 2b, the workshop discussion raised a number of advantages and disadvantages, which are outlined below.

### Advantages

- 2.4.3 This option reduces development pressure on urban areas in the south east Vale and focuses new development in larger rural villages along existing rail and road corridors. Infrastructural improvements and the provision of new employment opportunities in the areas identified would be essential for the success of this option as it would also reduce the levels of commuting into Cardiff.

- 2.4.4 Attendees highlighted that this option provides the opportunity for the provision of additional community facilities in these larger rural settlements and the improvement of existing infrastructure. However, it was emphasised that the development of housing, needs to be employment driven.

### **Disadvantages**

- 2.4.5 Some participants felt that the option excludes some settlements that have the potential for development, particularly the more significant urban areas such as Barry and others. The view was expressed that this option would lead to the creation of large urban areas in the rural Vale, while existing urban areas may stagnate and potentially decline.
- 2.4.6 There are concerns that growth of some communities such as St Athan and Llantwit Major, may result in coalescence which would lead to a loss of their individual character and identity, while others cannot sustain additional growth. It was felt that there would be increased pressure on existing facilities and infrastructure, in particular transport infrastructure, which is already considered to be inadequate. The need to improve transport links in support of this strategy was deemed important, specifically between Cardiff and Bridgend.
- 2.4.7 Participants also highlighted that there may be a danger that development will occur in the settlements identified within the option at the expense of other nearby communities.
- 2.4.8 There was much discussion on the possible effects of the development of the proposed Defence Training Academy at St Athan and potential growth of Cardiff International Airport. It was emphasised that the likely effects of such development would need to be considered. A key point was raised relating to the likely increase in the number of commuters to the training academy at St Athan from the surrounding areas or outside of the Vale of Glamorgan.

### **Summary and Conclusion**

- 2.4.9 Stakeholders recognised the benefits of developing some of the larger villages in the rural areas, such as facilitating improvements in transportation networks, facilities and services. However, there was concern that this option ignores areas that may have a clearer opportunity for expansion. Furthermore, growth of some of the villages could result in the loss of their character and identity.
- 2.4.10 It is evident from the comments outlined above that stakeholders have strong reservations about taking this strategy forward.

## 2.5 Option 4

### A rural new settlement able to promote sustainable self containment

2.5.1 This option would propose that the majority of new development would be concentrated in one area to create a new settlement. In order to ensure that the settlement would support a sustainable population, a range of services and facilities, as well as good infrastructure would form part of the new settlement (see Figure 2.5).

**Figure 2.5: Indicative Illustration of Option 4**

2.5.2 Discussions relating to this option were focused mainly on the practicalities of its delivery. In this respect, stakeholders identified a number of issues that would need to be taken into consideration if this option is to be taken forward:

- Funding for the development of the settlement;
- Management of the development;
- Phasing of the development;
- Size of the settlement;
- Location of the settlement; and
- Proximity of transport links.

Stakeholders identified a number of advantages and disadvantages of Option 4 as outlined below.

## Advantages

- 2.5.3 Some participants considered that the development of a new settlement was a viable option provided that it was appropriately located and enabled the opportunity to promote the development of sustainable communities.
- 2.5.4 It was felt that this option would protect existing rural communities as the new settlement would be self-contained. Some were of the view that it was also likely that the new facilities would serve residents in nearby settlements, although others felt that the view was over simplistic.

## Disadvantages

- 2.5.5 Although some stakeholders assumed that the new settlement would be self-contained, others felt that a self-contained settlement was not feasible and that it was likely to become a commuter settlement. As such, stakeholders stated that a definition of “self-containment” was necessary.
- 2.5.6 It was felt that the option does not take into consideration the potential for development in other parts of the Vale of Glamorgan and may lead to a loss of agricultural land and important wildlife habitats.
- 2.5.7 There was also concern that this option is likely to be unviable as the resources required for the development of a new settlement are far too high.

## Possible Locations Identified

- 2.5.8 A number of potential locations for the new settlement were identified including:
- Along the existing coastal belt, although there were concerns over coastal erosion;
  - Along the M4 corridor, as there would already be good transport links and would leave the majority of the historical/natural areas untouched;
  - On the proposed link road from the south of the Vale of Glamorgan to the M4;
  - At St Athan, to compliment existing plans to develop the training academy. (the transport infrastructure would, however, need to be improved to provide links to the nearby railway line);
  - At Llandow (including Llandow Trading estate), as there is already an employment base which requires an improved transport network (expansion to include housing development and associated services etc. would result in a sustainable community where there is already a demand for such improvements. The area also has a number of brownfield sites which could be developed, rather than utilising greenfield sites);
  - Bonvilston;
  - Along the A48 e.g. Tair Onen (a disused Forestry Commission site);

- Near existing development in adjoining authorities e.g. Culverhouse Cross, Brocastle, Llantrisant.

2.5.9 Irrespective of the location of the new settlement, stakeholders highlighted that the proposal would need to take account of large scale developments occurring within the Vale of Glamorgan and neighbouring authorities.

## Summary and Conclusion

2.5.10 Many stakeholders considered option 4 as a viable option in respect of developing a sustainable community that can be located in an optimal area to ensure maximised benefits. The disadvantages were, however, considered to outweigh the advantages, particularly as this would remove the focus from other potential development areas that require improvements in infrastructure and transportation links. Furthermore it was felt that delivery of such an option would be impractical in terms of cost.

## 2.6 Option 5

**Concentrate development opportunities in Barry, Penarth / Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development.**

2.6.1 This option draws upon elements of options 1 and 2b, which seek to locate future development within those settlements that have good levels of services and facilities, and transport links. However, this option also recognises the need to consider the potential development opportunities arising from the proposed Defence Training Academy at St. Athan (see Figure 2.6).

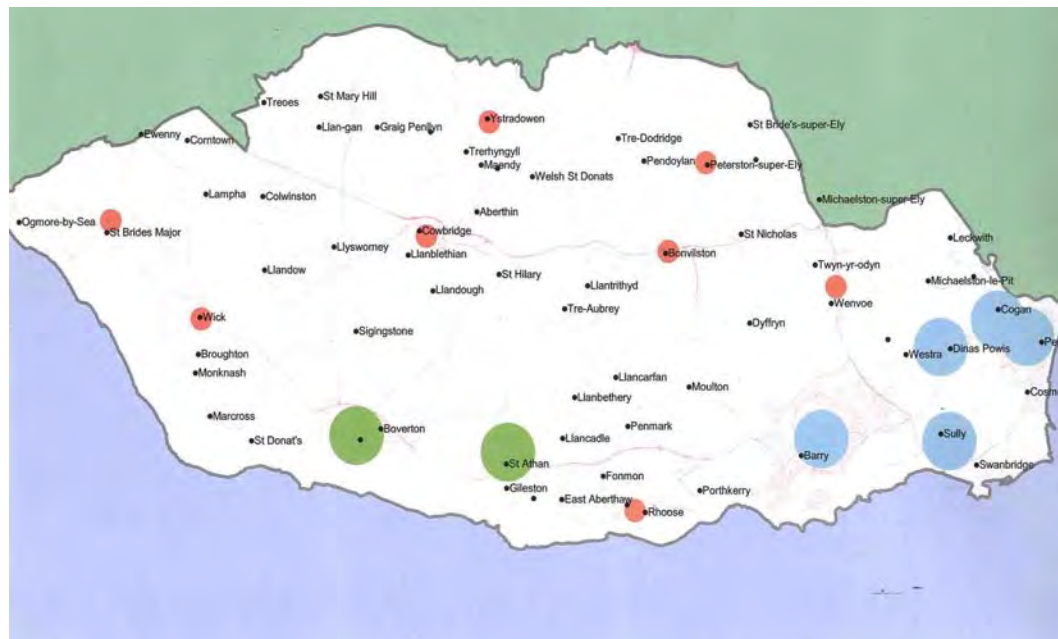

Figure 2.6: Indicative Illustration of Option 5

- 2.6.2 Discussions around this option were fairly positive, highlighting a number of advantages and some disadvantages as outlined below. Consultees drew attention to some areas of concern that would need to be addressed if the option is to be taken forward. For example, although development is necessary, it needs to be sensitive to the character of the settlements in which it occurs. In addition, thought needs to be given to the improvement of existing transport facilities such as the provision of a railway link between St Athan and Llanwit Major. It would also be necessary to ensure that appropriate facilities and infrastructure are available in the settlements ear-marked for growth.

### **Advantages**

- 2.6.3 It was considered that this option is the most sustainable and represents the most balanced compromise, allowing for growth throughout the Vale of Glamorgan while concentrating the main development within larger urban areas with good transport links to Cardiff. It is also thought that the option promotes viable sized settlements that could provide new housing and employment opportunities, community facilities and transport infrastructure, therefore reducing outward commuting from the Vale of Glamorgan.
- 2.6.4 It is expected that the option would also help to maintain current services and community facilities in major towns and villages. It would allow the continued use of brownfield sites in Barry, and elsewhere, to provide mixed use development and continue regeneration initiatives.
- 2.6.5 Consultees were of the opinion that this option takes into account the current trends in the Vale of Glamorgan, particularly in relation to transport links, availability of services, and employment opportunities, while also accommodating future growth resulting from planned development such as the Defence Training Academy at St. Athan.

### **Disadvantages**

- 2.6.6 While some consultees considered spreading development across the Vale of Glamorgan an advantage, others felt that through this option, the Council would be trying to develop in too many areas at once, thereby stretching available funding and resources.
- 2.6.7 As it stands, the option limits the settlements identified for growth, ruling out other areas with much potential at this early stage. The ability of the larger settlements to absorb significant development was questioned. For example, it is considered that Llantwit Major has already experienced a large amount of growth and that any additional development would erode its character as a historic rural town. Furthermore, that there is potential to worsen existing problems resulting from areas becoming commuter settlements (e.g. Penarth and Llandough).

### **Summary and Conclusion**

- 2.6.8 All discussion groups recognised that this option had a number of benefits and it was deemed to be the most appropriate of all the options discussed. This is particularly due to its balanced approach, focusing on primary urban areas, whilst also allowing development across other parts of the Vale of Glamorgan.

- 2.6.9 This option optimises development in areas which are able to provide a basis of facilities, infrastructure and transport networks as well as appropriate housing and employment opportunities, thereby resulting in a more sustainable solution.
- 2.6.10 The main concerns relate to whether spreading development across the Vale of Glamorgan will dilute focus, resources and funding whilst also affecting the character of smaller settlements and whether the areas at the very eastern end of the Vale (Penarth, Llandough) could accommodate significant development given the concerns on congestion, access to services and availability of sites.

### 3 Alternative Options and Approaches

---

3.0.1 A number of alternative approaches were suggested by stakeholders during the workshop. While some consultees suggested new approaches, others indicated a preference for various combinations of options.

Options in combination:

- Option 1 in conjunction with Option 4
- Option 2b in conjunction with Option 5
- Option 5 in conjunction with Option 4

3.0.2 These combinations were suggested as they optimise the advantages of each of the options as detailed above, while giving the opportunity to minimise the disadvantages.

3.0.3 Alternative approaches were suggested including the following:

- Develop a strategy with a strong focus on the tourism potential of the Vale of Glamorgan.
- Tie in proposed development in the Vale of Glamorgan with those in neighbouring authorities e.g. Brocastle, Llantrisant and Culverhouse Cross)
- Focus development around Cardiff International Airport.
- Concentrate the majority of development in and adjoining major settlements but provide area-specific allocation within the surrounding areas.

3.0.4 The advantages and disadvantages of these alternative approaches were not discussed, although they were thought to deliver stakeholders desired results while addressing issues and problems that are not sufficiently addressed by Options 1 to 5.

## 4 What Next?

---

- 4.0.1 The workshop was useful for discussing the perceived advantages and disadvantages of the strategy options proposed by the Council. These will be taken into account as the Council determines the preferred strategy for the LDP.
- 4.0.2 The Council has commissioned a number of studies e.g. Local Housing Market Assessment and Employment Needs Study, to assist in determining the preferred strategy. The Sustainability Appraisal of the strategy options will also be carried out at the same time to inform the decision making process.
- 4.0.3 The preferred LDP strategy will be set out in the Preferred Strategy Report which will be issued for formal consultation early in 2008.

## Appendix A: Workshop Attendees

| Organisation                             | Name                      |
|--|---------------------------|
| Arriva Trains Wales                      | Malcolm Howitt            |
| Barry Citizens Action Group              | Dilys Colbourne           |
| Barry College                            | Mark Roberts              |
| Barry Dock Lifeboat                      | Stuart McMillan           |
| Barry Town Council                       | Jane Comerford            |
| Bridgend County Council                  | Jonathan Lane             |
| Campaign for Protection of Rural Wales   | Robin Simpson             |
| Cardiff County Council                   | Helen Williams            |
| Cardiff County Council                   | Phil Williams             |
| Cardiff International Airport Limited    | Steve Hodgetts            |
| Countryside Council for Wales            | Karen Maddock-Jones       |
| County Land & Business Association       | Heather March             |
| Cowbridge & Llanblethian Residents Group | Dr. C A Pearce            |
| Cowbridge with Llanblethian Town Council | Cllr. Mrs. Sue Cox        |
| Cowbridge with Llanblethian Town Council | Cllr. Mrs. Linda Adams    |
| Coychurch Lower Community Council        | Cllr. John Bryce-Richards |

## Appendix B: Workshop Agenda

---

- 9.00 Registration with Tea and Coffee**
- 9.30 Welcome and Introduction**  
Councillor Christopher J. Williams – Cabinet Member for Planning & Transportation, Vale of Glamorgan Council
- 9.45 Presentation – LDP Update**  
Emma Harvey – Operational Manager, Planning and Transportation Policy
- 10.00 Question and Answer**
- 10.10 Presentation – LDP Sustainability Appraisal (SA)**  
David Hourd - Hyder Consulting (SA Consultants)
- 10.25 Question and Answer**
- 10.35 Presentation – Purpose of Workshop**  
Emma Harvey – Operational Manager, Planning and Transportation Policy
- 10.45 Break – Tea and Coffee**
- 11.00 Workshop – LDP Strategy Options**  
Stakeholders to discuss the following options (15 minutes per option):
- Option 1:**  
Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).
- Option 2a:**  
Dispersement of housing and employment opportunities based on the current population of each settlement (without a sustainability test).
- Option 2b:**  
Dispersement of housing and employment opportunities based on the current population of each settlement (with a sustainability test).
- Option 3:**  
Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).

**Option 4:**

A rural new settlement able to promote sustainable self – containment.

**Option 5:**

Concentrate development opportunities in Barry, Penarth / Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development.

**Alternative Options?****12.45 Close and Way Forward**

Rob Thomas – Head of Planning & Transportation, Vale of Glamorgan Council

**1.00 Buffet lunch**

The Vale of Glamorgan Council

VALE OF GLAMORGAN  
LOCAL DEVELOPMENT PLAN

STRATEGIC  
OPTIONS  
OFFICER  
WORKSHOP

July 2007

## Draft Strategy Options Officer Workshop Report

### Executive Summary

This report outlines the views expressed at a Local Development Plan Strategic Options Officer Workshop held to consider the Strategic Options proposed for the Vale of Glamorgan Local Development Plan (LDP).

The workshop was held on the 25<sup>th</sup> July 2007 at the Council's Civic Offices in Barry and was attended by officers of the Vale of Glamorgan Council representing a wide range of service areas.

A list of officers who attended the workshop is included as Appendix 1 to this report.

The purpose of the workshop was to engage officers from various service areas in a discussion on the advantages and disadvantages of pursuing the various strategy options proposed. The options under consideration being:

- **Option 1:** Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).
- **Option 2a:** Dispersement of housing and employment opportunities based on the current population of each settlement (without a sustainability test).
- **Option 2b:** Dispersement of housing and employment opportunities based on the current population of each settlement (with a sustainability test).
- **Option 3:** Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).
- **Option 4:** A rural new settlement able to promote sustainable self – containment.
- **Option 5:** Concentrate development opportunities in Barry, Penarth / Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development.

In addition, the following alternative options arising from the stakeholder workshop held on the 24<sup>th</sup> May 2007 were also considered:

- **Option 6:** Composite Option 1 & Option 4 – Maximising the potential of and concentrating growth in Barry, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.
- **Option 7:** Composite 2b & Option 5 – Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St.Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development based on a sustainability test.
- **Option 8:** Composite Option 5 & Option 4 – Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St.Athan to be a key development opportunity. Smaller sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

Having considered the various options presented to them and the advantages and disadvantages of each, officers were of the opinion that Option 5 represented the most realistic and sustainable approach to future development within the Vale of Glamorgan and it clearly reflects current Government thinking.

## 1. Introduction

- 1.1 The Planning and Compulsory Purchase Act 2004 and the Town and Country Planning (Local Development Plan)(Wales) Regulations 2005, place a statutory duty on all Local Authorities in Wales to prepare a Local Development Plan (LDP) for their administrative areas. The Vale of Glamorgan Council like other authorities in Wales is currently developing its LDP in accordance with guidance produced by the Welsh Assembly Government. Once adopted, the LDP will replace the Vale of Glamorgan Adopted Unitary Development Plan 1996 – 2011 (UDP) and will set out the Council's land use planning policies against which developments will be assessed in the period from 2011 to 2026.
- 1.2 The Council is currently undertaking the third stage of the LDP process that is, the consideration of a number of realistic and deliverable strategy options and the selection of a preferred strategy.
- 1.3 Six strategy options had previously been considered by stakeholders at a workshop held at the YMCA HUB in Barry on the 24<sup>th</sup> May 2007 and a detailed report of that consultation exercise can be found on the Council's web site at:
- [www.valeofglamorgan.gov.uk/living/planning/planning\\_policy](http://www.valeofglamorgan.gov.uk/living/planning/planning_policy)
- 1.4 This report reflects the views expressed by officers on the six strategy options previously considered as well as three alternative strategy options that resulted from the earlier workshop.
- 1.5 The strategies under consideration are:
- Option 1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).
  - Option 2a: Dispersement of housing and employment opportunities based on the current population of each settlement (without a sustainability test).
  - Option 2b: Dispersement of housing and employment opportunities based on the current population of each settlement (with a sustainability test).
  - Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).
  - Option 4: A rural new settlement able to promote sustainable self – containment.
  - Option 5: Concentrate development opportunities in Barry, Penarth / Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development.
- 1.6 Along with the alternative options, which arose from the earlier stakeholder workshop:
- Option 6: Composite Option 1 & Option 4 – Maximising the potential of and concentrating growth in Barry, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.
  - Option 7: Composite 2b & Option 5 – Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St.Athan to be

a key development opportunity. Smaller sustainable settlements to accommodate further housing and associated development based on a sustainability test.

- Option 8: Composite Option 5 & Option 4 – Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St.Athan to be a key development opportunity. Smaller sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

1.7 To assist the Council in this process, an independent appraisal of the options will be carried out as a part of the Sustainability Appraisal (SA) process. This appraisal will be based on the SA framework objectives, which have been developed using feedback from the SA stakeholder workshop held in October 2006. This workshop highlighted that the key issues for the stakeholders in the Vale of Glamorgan include (but are not limited to):

- Transport and accessibility
- Employment related issues
- Housing provision, especially affordable housing
- Increasing development pressures
- Community cohesion
- Waste disposal and pollution; and
- Threats to cultural and natural heritage.

1.8 Details of the findings from this workshop are provided in the *Sustainability Appraisal Stakeholder Workshop - Report of Consultation* (October 2006) which is also available on the Council's website at:

[www.valeofglamorgan.gov.uk/living/planning/planning\\_policy](http://www.valeofglamorgan.gov.uk/living/planning/planning_policy)

## **2. Purpose and Format of Workshop**

2.1 The workshop was held to:

- Update officers on the progress of the Local Development Plan.
- Enable officers from a wide range of service areas to engage in the LDP process and to give their views on the various strategy options under consideration.
- Provide officers with the opportunity to influence the development of the LDP Preferred Strategy.

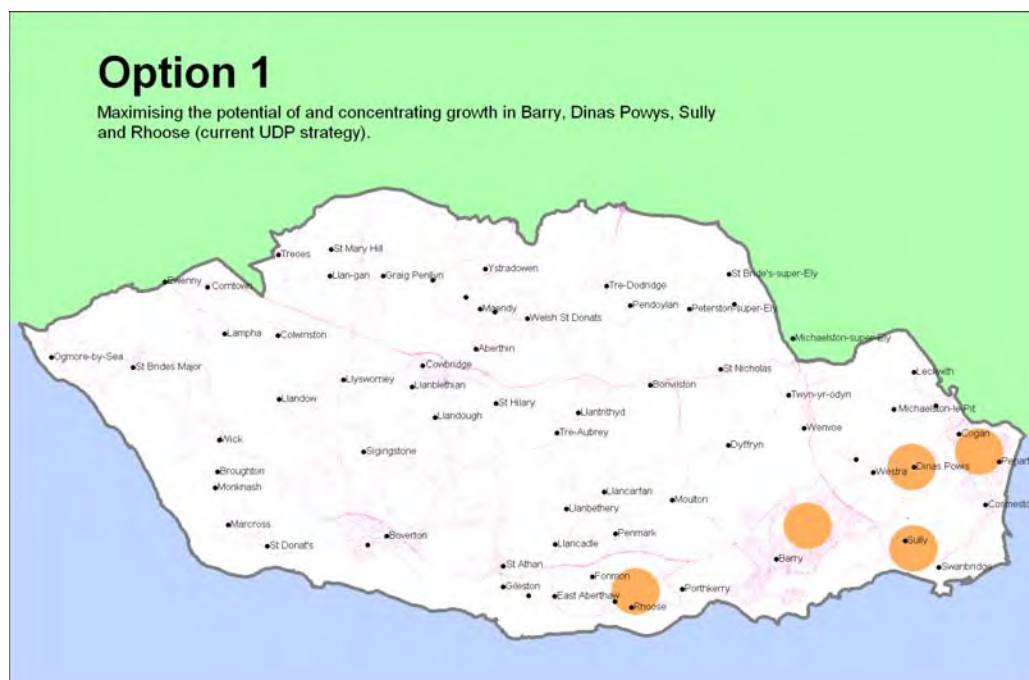

2.2 The officer workshop followed a similar format to the stakeholder workshop with Emma Harvey the Operational Manager for Planning and Transportation Policy; Vale of Glamorgan Council, providing a progress report on the LDP and outlining the contents of the approved Delivery Agreement, the development and consultation on the SA Scoping report and the consultation workshops on the Strategy Options. Officers were advised on the aims of the workshop before being split into two groups to consider the various strategy options.

2.4 The agenda for the workshops is shown at Appendix 2.

### 3. The Strategy Options

#### 3.1 Option 1

Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).

- 3.1.1 This option maintains the current strategy contained within the Vale of Glamorgan Adopted Unitary Development Plan (1996-2011), which focuses development within 'the Waterfront Strip'. This encompasses the larger coastal towns and villages of Barry, Penarth, Dinas Powys, Sully and Rhoose, capitalising on their good transport links, the availability of services and facilities as well as regeneration opportunities within Barry.

#### Advantages

- 3.1.2 It was acknowledged that the current UDP strategy has generally worked well to date in that it has maximised brownfield development and largely protected the rural villages from inappropriate development. The strategy has delivered regeneration in Barry and the wider Vale and has enabled good transport links into the main development areas. It is also evident that urban areas can offer more affordable housing opportunities.
- 3.1.3 Officers were of the view that it would be more sustainable to concentrate development in the existing urban settlements as community benefits derived through planning gain could be maximised through economies of scale. Spreading development around a large number of smaller settlements could devalue any benefits secured.
- 3.1.4 Furthermore, this option maintained a high level of countryside protection by limiting development to the larger rural settlements identified. Such an option was considered to be preferable for waste management purposes as it enabled resources to be effectively targeted in a small number of locations.

#### Disadvantages

- 3.1.5 It was recognised that there is now limited brownfield land available to continue the implementation of this strategy and it would therefore be difficult to sustain. It was questionable as to whether there would be enough sites in these areas to satisfy the

allocations that would be required by the Council and in this regard concern was also expressed over the coalescence of the settlements identified for growth.

- 3.1.6 Progressing this option was also considered to significantly disadvantage the western communities, which were effectively excluded from any benefits that might be secured from development proposals.
- 3.1.7 Additionally, this option failed to consider the future implications of the St.Athan Defence Training Academy (DTA) proposal or major developments that have been promoted on the border of the Vale of Glamorgan within adjacent local authorities e.g. J33 & J34, Dragon Studios at Llanillyd.
- 3.1.8 Congestion was also thought to be a significant problem especially in the eastern Vale, with over 40% of the Vale population commuting into Cardiff. Resolving the congestion problem was thought to be difficult due to the limited land available in the locality of the problem(s).
- 3.1.9 Uncertainties about the proposed developments at Junctions 33 and 34, the Airport Access Road and the expansion of the Airport were discussed with regards the future impact of such schemes should they proceed.

### **Summary and conclusion**

- 3.1.10 Although this option was thought to provide a number of advantages e.g. protection of the wider countryside and larger benefits derived from economies of scale, utilising existing transport infrastructure, it was generally agreed that these were outweighed by the disadvantages. Of particular concern were the lack of benefits that would be derived from this option for the rural villages and communities within the western vale. Concern was also expressed about whether this option could realistically be delivered in terms of land provision around the settlements identified. This option failed to take account of large-scale developments currently being proposed or developed both within the Vale of Glamorgan e.g. St.Athan Defence Training Academy or within adjoining local authorities.
- 3.1.11 Supplemental to the discussion on this option was the likelihood that the Severn Barrage would become an issue during the lifetime of the LDP. Overall however it was considered that while circumstances in respect of energy production might change significantly in the future; it was unlikely that the barrage would be built during the plan period.
- 3.1.12 There was general agreement that while the current UDP strategy had been relatively successful in delivering its objectives, and had generated significant benefits, it was not appropriate to continue with such a strategy for the extended period of the LDP. Indeed, there were considered to be disadvantages associated with the continued reliance on such a strategy.

### 3.2 Option2a

Dispersement of housing and employment opportunities based on the current population of each settlement (without a sustainability test).

- 3.2.1 This option would involve the distribution of housing and employment in all settlements within the Vale of Glamorgan, proportionate to the existing population of each settlement. In this scenario the level of existing services and facilities would not be considered as part of the allocation of sites. However unlike option 1 this option would increase development opportunities for rural areas.

#### Advantages

- 3.2.2 The dispersion of development equally amongst existing settlements regardless of their size was considered to offer some benefits as it would relieve the pressure to some extent on the larger settlements within the Vale. As services would be dispersed and concentrated in a large number of locations this option to a certain degree would reduce the need to travel and could therefore be favourable for some sectors of the community.
- 3.2.3 The group concluded that advantages from progressing this option were limited and were outweighed its disadvantages. It was thought that option 2b utilising a sustainability test might be preferable.

#### Disadvantages

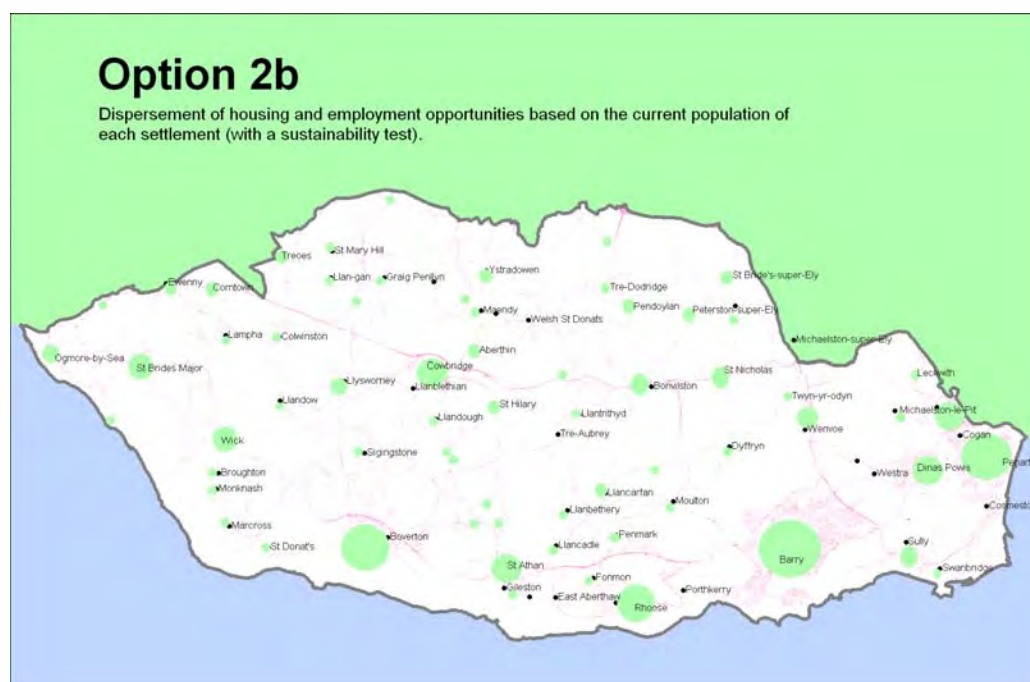

- 3.2.4 The lack of a sustainability test was considered to be a major problem with this option. No account has been taken of the level of services or utilities, the transport infrastructure or the land availability in the settlements identified. Further, this option took no account of the St.Athan DTA proposal or other major development proposals in adjacent LPAs, this was felt to be a major disadvantage.
- 3.2.5 It was also generally agreed that this option would be difficult to sustain, as a considerable amount of development would be small scale and this would limit opportunities for securing improvements to existing infrastructure and services. There would also be no critical mass and commuting would therefore be inevitable. It would not be sustainable or deliverable in terms of employment land.

## Summary and conclusion

3.2.6 This was generally considered to be the easy option; equally dispersing any development around the communities of the Vale the level of development allocated being proportionate to the size of the community. However, adoption of this strategy was felt to be too simplistic, unrealistic and ultimately undeliverable.

### 3.3 Option 2b

Dispersement of housing and employment opportunities based on the current population of each settlement (with a sustainability test).

3.3.1 As with option 2a the distribution of development would be relative to the existing population of each settlement, however an assessment of existing services and facilities as well as accessibility to nearby facilities would be undertaken (the sustainability test). In this scenario land allocated for development opportunities would only be within those settlements, which would satisfy the sustainability test. Higher levels of development would take place within the settlements identified than would be the case in Option 2b.

### Advantages

3.3.2 It was considered that this option could assist in maintaining some facilities in the smaller settlements identified and could contribute to improving the level of affordable housing throughout the Vale.

3.3.3

### Disadvantages

3.3.3 It was considered that this option would still limit opportunities for mixed-use development and the delivery of infrastructure/services secured through new developments on any large scale would be problematic. The character of rural areas that would accommodate development is not considered and the option was felt to be undeliverable in terms of employment land, infrastructure and services. Due to critical mass issues, this option does not assist in creating live/work settlements and it is not market realistic.

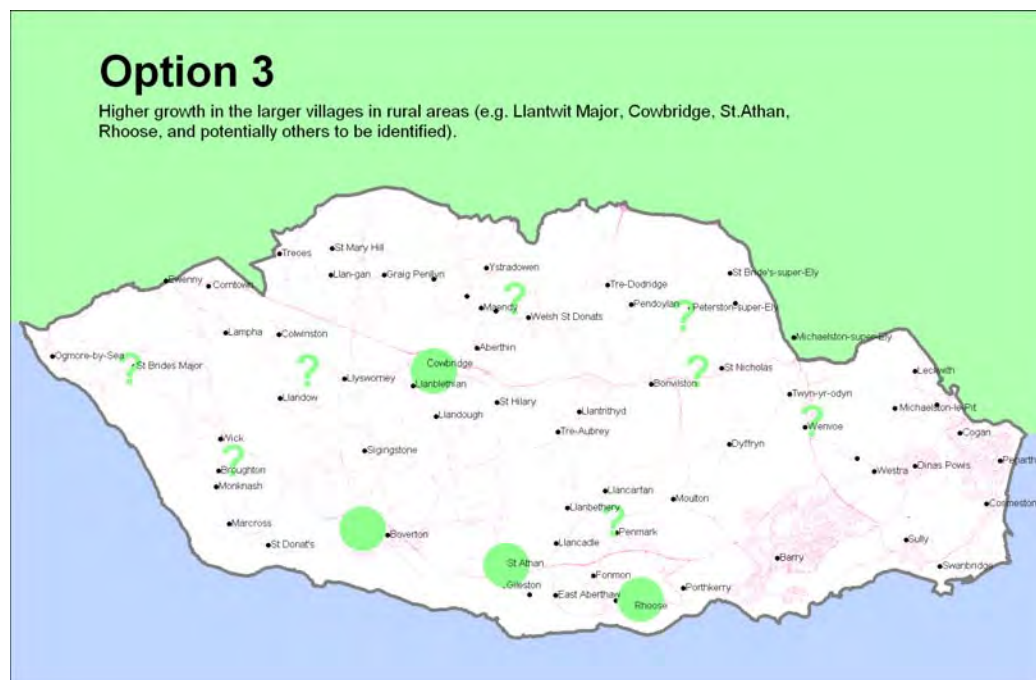

- 3.3.4 Some concern was expressed over whether this option could generate affordable housing to the level that would be required, especially within the smaller settlements. It was thought that this option was effectively growth dispersion based on the existing situation rather than looking forward and identifying future demands. No account is taken of the St.Athan DTA proposal or other major development proposals in adjacent LPAs, which was considered to be a major disadvantage.
- 3.3.5 The comment was made that the sustainability test is simplistic and should not be wholly relied on.

### Summary and conclusion

- 3.3.6 Even with the addition of the sustainability test, there was a similar view expressed to this option as to option 2a i.e. that this was simplistic and not really deliverable. While such dispersion could assist in maintaining the services within smaller settlements and to some degree assist in delivering affordable housing across the vale, it was again considered to be an inappropriate strategy upon which to develop a long-term plan.
- 3.4 **Option 3**

Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St.Athan, Rhoose and potentially others to be identified).

- 3.4.1 Unlike option 1, this option would concentrate future development within the larger rural settlements that have good levels of services, facilities and transport links relative to other settlements within the rural Vale.

### Advantages

- 3.4.2 It was felt that in the longer term, progressing this option might, once services etc. had reached an appropriate level, provide more balance. However, it was felt that progressing this option could be costly. Depending on the scale and distribution of development in these settlements, this option could support mixed-use development that would benefit the wider communities.
- 3.4.3 In leisure terms, it was considered that this option would work as facilities could be provided and maintained in locations that serve the primary areas of population.

## Disadvantages

- 3.4.4 The groups felt that this option generally ignored the level of infrastructure that exists in the towns or villages identified and would be costly to progress. Services would need to be provided of a level to cater for the increased demand. Some Vale residents already access Bridgend for health and other services. Services would generally be concentrated in a small number of locations and would result in people travelling greater distances to access them. Currently the Vale has below average travel time to access health services, adopting this option would increase this. Some concern was expressed that this option mirrored previous decentralisation strategies that had been tried and failed due to the excessive cost of maintaining localised facilities.
- 3.4.5 This option is likely to result in further increases to traffic along the A48 and add to congestion at existing pinch points within the eastern Vale on the major roads into Cardiff. Progressing this option was also considered to have a negative impact on the landscape, as most development would be concentrated in areas of the Vale more rural in character.
- 3.4.6 It was also questioned whether the areas identified in the strategy were the areas where people would want to live, particularly when commuting into Cardiff. Lack of infrastructure including capacities at schools could also be an issue. Existing urban areas would lose development opportunities and suffer from a loss of additional investment.
- 3.4.7 It was considered that as land values in these areas is generally high this option would ultimately limit who could afford to live in any homes that were built. Further, it was felt that developers would be unlikely to invest due to the additional cost of improving facilities that might be required under planning gain.
- 3.4.8 It was considered that in progressing this option a sustainability test would be essential and that a range of housing types including affordable housing would be needed.

## Summary and conclusion

- 3.4.9 Overall the disadvantages associated with this option were considered to far outweigh the advantages. While some benefits could be derived in the larger rural villages and towns, there were concerns that this strategy would lead to a diminution of service provision within existing main settlements and that it would be difficult to sustain the level of service provision suggested for the rural settlements identified.

3.5 **Option 4**

A rural new settlement able to promote sustainable self-containment

- 3.5.1 This option proposes the majority of development would be concentrated in one place to create a new settlement within the Vale of Glamorgan. In order to ensure that the settlement would support a sustainable population, service and facilities as well as good transport links would form part of the development.

### Advantages

- 3.5.2 This option was considered to offer the advantage of easy planning, with the local planning authority being able to control layout, access, waste provision etc. It was also felt that to concentrate any planning gain that might be derived from the development in one location could provide significant benefits.
- 3.5.3 There was a view expressed that such a development option could be popular in some quarters, as it would remove pressure for development from other locations especially within the rural vale. It was suggested that if a new settlement was considered appropriate and a suitable strategy for the LDP then it should be located adjacent to the M4 motorway where access was not an issue.

### Disadvantages

- 3.5.4 It was generally accepted that for a new settlement to achieve self-containment as suggested was unlikely as there would be no way of ensuring that residents of a new settlement worked or used the services offered within it. Concern was raised that a new settlement would take the focus away from Barry where regeneration is still needed. It was considered that such a new settlement strategy was high risk as the LDP would be reliant upon the provision of the plan's major allocations being in one location. The groups perceived the current Llandow Newydd proposal as the potential location for a new settlement and this was seen as being closely linked to the delivery of the DTA proposal at St.Athan. However there was concern expressed that the DTA proposal could not support a settlement of the size that would be required to make it self-sustainable. Further it was highlighted that if this were to be included within the plan, planning permission would not be granted until after the plan was adopted in 2011 at the earliest by which time the DTA proposal would have been substantially completed. In

this respect, officers felt that the current plan could accommodate any foreseen housing need through its outstanding undeveloped land allocations.

3.5.5 This option was considered to offer limited development opportunities for the remainder of the Vale of Glamorgan and did not take into consideration the deficiencies and needs of the wider Vale. While there was to a degree an acceptance that planning gain could be maximised in just one location, it was also felt that such a development proposal would have significant requirements of its own e.g. new school etc. and that as such, any section 106 money secured would not stretch very far as such facilities were highly expensive. Further any section 106 money secured would be limited to the immediate locality and would not provide any benefits for the wider Vale. It was also considered that if this option were ever progressed, there would be a need for strong planning obligations to ensure that benefits or service provisions agreed would be actually delivered.

3.5.6 It was questioned whether the sustainable transport elements of a new settlement were actually deliverable e.g. was there rail line capacity.

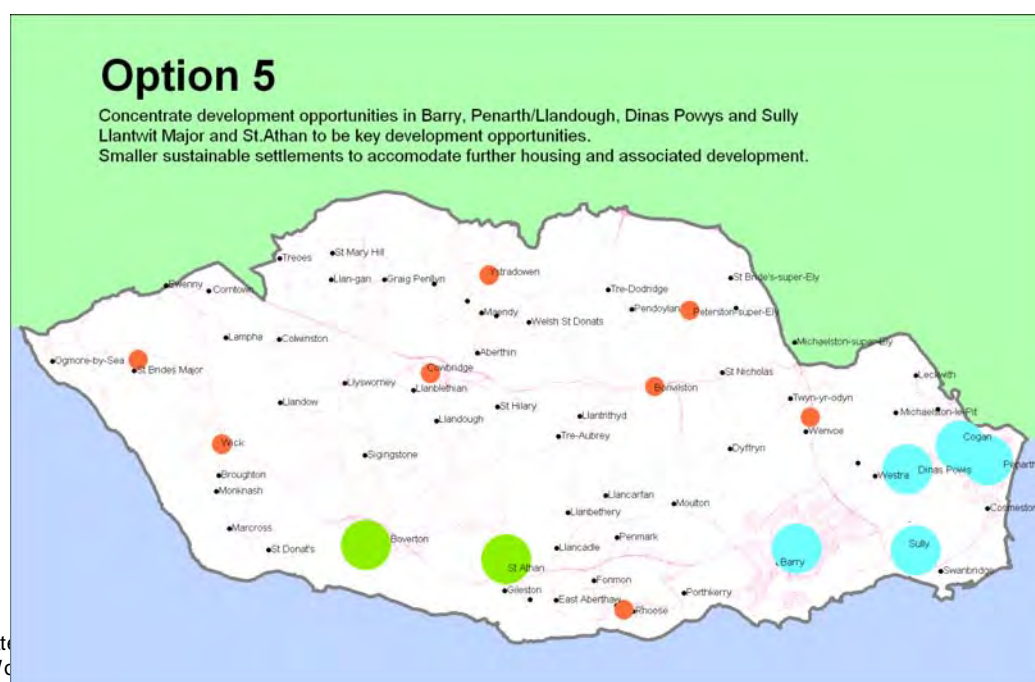

**Summary and conclusion**

3.5.7 There was a general acceptance that the DTA development at St.Athan would have a major impact on the Vale of Glamorgan. Therefore, to a degree there was a feeling that the time could be right for a major change in attitude as to where and how new development requirements are met. However in accepting this, officers were aware that such a development strategy would not address the other issues prevalent within the Vale of Glamorgan.

3.5.8 In considering the adoption of such a strategy, officers felt that although certain locations were currently being promoted for a new settlement if such a strategy were to be adopted for the LDP it was essential that other possible locations were considered particularly around the M4 motorway to the north of the Vale e.g. Junction 33/34.

**3.6 Option 5**

Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St.Athan to be key development opportunities. Smaller sustainable settlements to accommodate further housing and associated development.

- 3.6.1 This option draws upon elements of options 1, 2b and 3, which seek to locate future development within those settlements that have good levels of services and facilities, and transport links. However, this option also recognises the need to consider the potential development opportunities arising from the development of RAF St Athan and identifies Llantwit Major and St Athan as key drivers for development.

### **Advantages**

- 3.6.2 This was generally considered to be a realistic and pragmatic option that largely addressed the issues that had been identified within the Vale of Glamorgan.
- 3.6.3 Progressing this option has the advantage of offering regeneration opportunities within existing urban areas that help sustain the existing infrastructure, services e.g. waste facilities. Such development would also assist in sustaining local communities. This option offers flexibility to consider small-scale growth in the smaller sustainable villages and addresses the needs of affordability. It was felt that this option also reduced the risk of non-deliverability.
- 3.6.4 This option was also felt to take on board and address the significant impacts that would result from the DTA development at St.Athan.

### **Disadvantages**

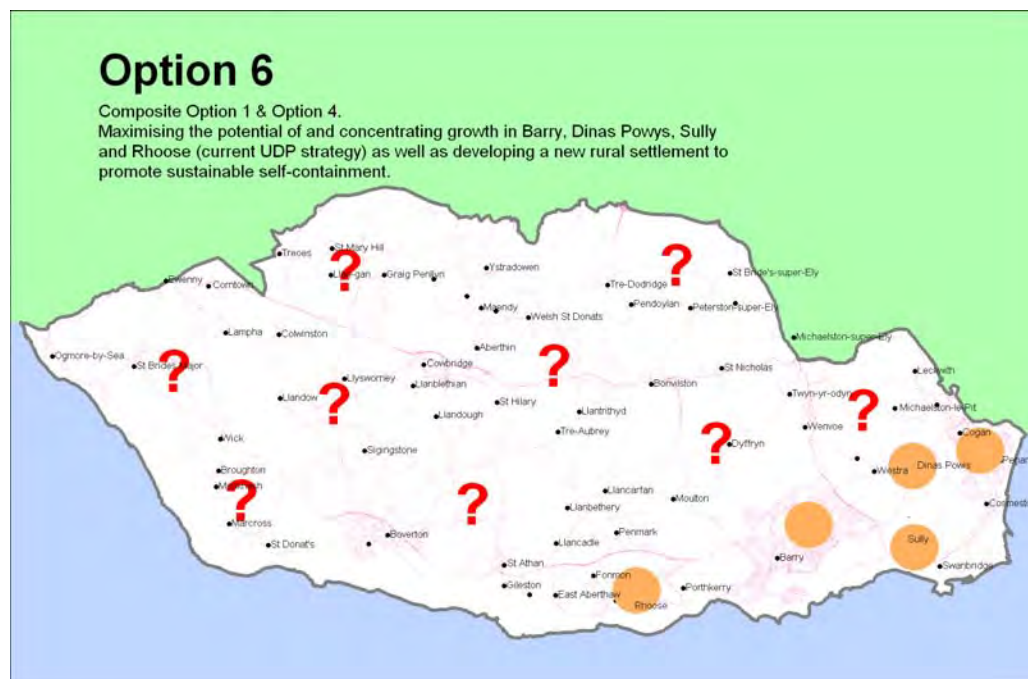

- 3.6.5 Similar disadvantages were expressed to this option as to those of option 1 as there would still be significant pressure for development in the eastern Vale however the dispersal of development around the larger villages would offset some of the concerns associated with option 1. There was some concern over whether enough suitable development sites could be found to facilitate this strategy as it was again biased towards the existing main settlements. It was also felt that this option would result in a significant impact upon the landscape in that large development sites could be dispersed around the Vale. However this concern was tempered allayed somewhat by the acceptance that most development would be within or adjacent to existing settlements and larger villages and their impact would therefore be reduced.
- 3.6.6 The provision of affordable housing was again raised as a concern.

### **Summary and conclusion**

- 3.6.7 Overall this option was seen as offering a reasonable balance between meeting the needs of the wider vale and maintaining the level of existing service provision within the main settlements. Maintaining growth in the larger settlements was seen as a practical way of securing benefits associated with development.

3.7 **Option 6****Composite Option 1 & Option 4**

Maximising the potential of and concentrating growth in Barry, Dinas Powys, Sully and Rhose (current UDP strategy) as well as developing a rural new settlement to promote sustainable self-containment.

- 3.7.1 This option would seek to combine the current strategy contained within the Vale of Glamorgan Adopted Unitary Development Plan (1996-2011) with a proposal to create a new settlement within the Vale.

**Advantages**

- 3.7.2 To some extent, this option was considered to relieve the development pressure of the south eastern Vale while providing major growth points elsewhere in the rural Vale. It was felt that this could still preserve the character of the rural Vale and overall could be a good solution. This option was considered to offer more flexibility than options 1 and 4 alone.
- 3.7.3 It was felt that this option could be deliverable as there would be both public and private sector interest progressing development in the locations identified. Overall the advantages were felt to mirror those of the individual options i.e. 1 and 4.

**Disadvantages**

- 3.7.4 This option would not provide any growth in the rural villages of the Vale but in many instances and for many people, this is not desired in any case (see above). There was concern expressed that younger people within the rural Vale would be isolated and would need to travel significant distances to reach facilities. Concern was again expressed about whether large enough sites could be identified to accommodate the level of development required in the eastern Vale.
- 3.7.5 The option did not take into consideration the impact that the DTA development at St.Athan would have on existing facilities/services and particular concern was expressed over education. The timing of planning for a new settlement – 2012 at the earliest – was again considered an issue, as it would be too late to capitalise on the DTA. Concern

was again expressed as to whether a new settlement as proposed could deliver self-sufficiency.

- 3.7.6 Again the disadvantages associated with the individual options were raised.

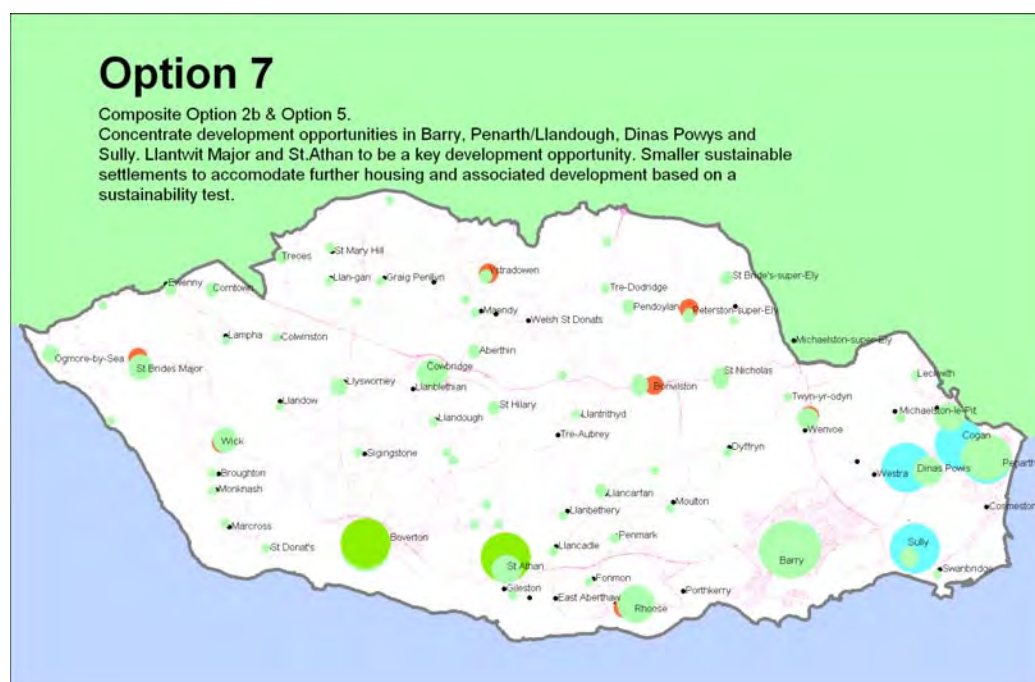

## Summary and conclusion

- 3.7.7 Initial conversations centred on the role of the settlements within the Vale and how many were not really communities but commuter villages. The advantages and disadvantages were generally considered to reflect those of the individual options i.e. options 1 & 4.

## 3.8 Option 7

Composite Option 2b & Option 5.

Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St.Athan to be key development opportunities. Smaller sustainable settlements to accommodate further housing and associated development based on a sustainability test.

- 3.8.1 This option draws upon elements of options 1, 2b and 3, which seek to locate future development within those settlements that have good levels of services and facilities, and transport links. However, this option also recognises the need to consider the potential development opportunities arising from the development of RAF St Athan and identifies Llantwit Major and St Athan as key drivers for development. In this option however additional emphasis would be placed on the smaller sustainable settlements within the Vale to accommodate some level of development.

## Advantages

- 3.8.2 It was generally agreed that the advantages associated with this composite option would be similar to the advantages that would be derived from progressing the individual options i.e. 2b & 5.

## Disadvantages

- 3.8.3 Should this option be progressed it was felt that more rural villages would be affected and that the opportunities for securing planning gain would be diluted. Concern was

also expressed over the deliverability of affordable housing under this option and if progressed then the threshold for affordable housing should be significantly reduced. Similarly, the opportunities to promote mixed-use developments and to address employment needs would be reduced.

- 3.8.4 It was suggested that relaxing rounding off policy with option 5 would be more appropriate. The groups felt that there were too many uncertainties associated with this option and that the strategy would need to be more robust.

### Summary and conclusion

- 3.8.5 Overall it was considered that this option incorporated too many uncertainties and that option 5 in isolation was a more appropriate strategy option. There was a general view expressed when discussing this option that there would be a level of resistance to new development proposals wherever they may be located.

### 3.9 Option 8

Composite Option 5 & Option 4

Concentrate development opportunities in Barry, Penarth/Llandough, Dinas Powys and Sully. Llantwit Major and St. Athan to be key development opportunities. Smaller sustainable settlements (including a rural new settlement) to accommodate further housing and associated development.

- 3.9.1 This option draws upon elements of options 1, 2b and 3, which seek to locate future development within those settlements that have good levels of services and facilities, and transport links. However, this option also considers the development of a new settlement within the Vale of Glamorgan to accommodate a proportion of the development that would otherwise be dispersed amongst the existing larger and more sustainable settlements. The option also considers the potential development opportunities arising from the development of RAF St Athan and identifies Llantwit Major and St Athan as key drivers for development.

## **Advantages**

- 3.9.2 It was generally felt by the groups that the advantages associated with this composite option would reflect the benefits that would be derived through progressing the individual options i.e. 5 & 4.

## **Disadvantages**

- 3.9.3 In considering the advantages of this option as described above, the view was expressed that the benefits for rural settlements would be diluted due to the scale of development that would be required to make a new settlement within a rural location sustainable. It was also discussed whether a new settlement was required in the Vale. If such a proposal were to be developed it was again questioned whether it would be too late to address the needs of DTA. It was suggested that a new settlement would not meet with government policy and that we should be promoting regeneration. A new settlement was considered to be the last resort in national planning policy guidance.

## **Summary and conclusion**

- 3.9.4 Concern was expressed that while there would be likely benefits associated with progressing this hybrid option the overall impact of them would be reduced largely due to the scale of a new settlement that would be required to enable self sufficiency.

## **4. General Comments**

- 4.1 All strategy options should take account of what is happening within adjacent Local planning authority areas as these proposals could have significant implications and impacts upon future development within the Vale of Glamorgan e.g. junction 33 and 34 and the development that is likely to be allocated within RCT at Llantrisant.
- 4.2 When assessing strategy options, the M4 is a major factor that should be considered and in particular, any likely proposals for a link from the M4 motorway to the airport through the Vale.
- 4.3 Having considered the various options presented to them and the advantages and disadvantages of each, officers were of the opinion that of all the options, Option 5 had the most benefits and represented the most realistic and sustainable approach to future development across the wider Vale.

**Attendees**

|                  |  |
|------------------|--|
| Rob Quick        | Director, Environmental and Economic Regeneration  |
| Chris Fray       | Head of Economic Development & Leisure.  |
| Chris Williams   | Operational Manager, Property Services.  |
| Alison walker    | Operational Manager, Strategic Planning and Performance Management, Community Services.  |
| Simon Salter     | Operational Manager, Commissioning and Resources, Social Services.                       |
| Dave Knevitt     | Operational Manager, Leisure & Tourism, Environmental & Economic Regeneration.           |
| John Dent        | Major Projects Manager, Environmental & Economic Regeneration.                           |
| Phil Beaman      | Operational Manager, Parks & Grounds Maintenance, Environmental & Economic Regeneration. |
| Helen Moses      | Policy Officer, Corporate Policy & Communications.                                       |
| Nicola Williams  | Waste Development Management, Waste Management & Cleansing.                              |
| Dorrett Thompson | Lawyer, Contract & Property, Legal Services.   |
| Jane Crofts      | Principal Planning Officer, Development Control.   |
| Steve Ball       | Principal Planning Officer, Development Control.   |
| Andrew Wallace   | Senior Planning Officer, Planning & Transportation Policy.                               |
| John Raine       | Student Planner, Planning & Transportation Policy.                                       |
| Emma Harvey      | Facilitator – Operational Manager, Planning & Transportation Policy.                     |
| Lucy Turner      | Facilitator – Principal Planning Officer, Planning & Transportation Policy.              |
| Clare Cameron    | Scribe – Senior Planning Officer, Planning & Transportation Policy.                      |
| John Marks       | Scribe – Senior Planning Officer, Planning & Transportation Policy.                      |

# 1 Introduction

---

The Vale of Glamorgan Council is currently considering the strategy options for its Local Development Plan (LDP), which will govern how land within the Vale of Glamorgan is used between 2011 and 2026.

The Council are currently undertaking the third stage of the LDP process, in which they are determining the preferred strategy option. The options currently under consideration are as follows:

- Option 1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).
- Option 2a: Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).
- Option 2b: Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).
- Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).
- Option 4: A rural new settlement able to promote sustainable self – containment.
- Option 5: Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development.

A stakeholder workshop was held in May 2007 as part of the LDP consultation process. Additional options were suggested at this workshop as follows.

- Option 6 (Combination of Options 1 and 4): Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment
- Option 7 (Combination of Options 2b and 5): Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test.
- Option 8 (Combination of Options 5 and 4): Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

Details of this workshop are provided in *Strategic Options Stakeholder Workshop: Report of Consultation (June 2007)*<sup>1</sup>.

<sup>1</sup> Available from the Council's website

[http://www.valeofglamorgan.gov.uk/living\\_menu/planning\\_policy/development\\_plan.aspx](http://www.valeofglamorgan.gov.uk/living_menu/planning_policy/development_plan.aspx)

To ensure that the policies in the LDP promote the principles of sustainable development, a Sustainability Appraisal (SA) of the LDP, incorporating the requirements of the Strategic Environmental Assessment (SEA) Directive, is being undertaken. The LDP and the SA processes are being carried out in an iterative and integrated manner. Figure 1.1 below outlines these two processes.

Figure 1.1: Main Stages of the LDP and SA Processes (Source: LDP Manual, June 2006)

The SA of the LDP is being carried out based on current guidance and best practice including:

- *Local Development Plan Manual*, Welsh Assembly Government, June 2006
- *A practical Guide to the SEA Directive*, ODPM, the Scottish Executive, the Welsh Assembly Government and the Northern Ireland Department of the Environment, September 2005
- *Sustainability Appraisal of Regional Spatial Strategies and Local Development Frameworks*, ODPM, November 2005

The ODPM SA guidance sets out the SA stages as follows:

- Stage A: Setting the context and objectives, establishing the baseline and deciding on the scope
- Stage B: Developing and refining options and assessing effects
- Stage C: Preparing the Sustainability Appraisal Report
- Stage D: Consulting on the draft RSS revision and the SA Report
- Stage E: Monitoring the significant effects of implementing the RSS revision

To assist the Council in determining the LDP strategy, an appraisal of the options has been carried out as part of the SA process (Task B3 of Stage B). This appraisal has been based on the SA objectives developed at the scoping stage<sup>2</sup>. The SA objectives were developed using baseline information and feedback from the SA stakeholder workshop held in October 2006.

This workshop highlighted that the key issues for the stakeholders in the Vale of Glamorgan include (but are not limited to):

- Transport and accessibility;
- Employment related issues;
- Housing provision, especially affordable housing;
- Increasing development pressures;
- Community cohesion;
- Waste disposal and pollution; and
- Threats to cultural and natural heritage.

Details of the findings from this workshop are provided in the *Sustainability Appraisal Stakeholder Workshop - Report of Consultation (October 2006)*<sup>3</sup>.

In carrying out the appraisal, consideration was given to comments made by consultees at the workshop held in May 2007 and baseline information collected at the scoping stage.

This report outlines the findings of the appraisal of the 9 options set out above and provides recommendations for the LDP strategy.

## 2 Appraisal Methodology

---

This section outlines how the SA Framework was used to appraise the options, the assumptions made in carrying out the appraisal as well as the limitations identified in the process.

### 2.1 Sustainability Appraisal Framework

The SA Framework is the fundamental component of the appraisal methodology. The SA objectives form the basis of this methodology and have been used as methodological yardsticks against which the strategy options have been appraised. The SA objectives are supported by aims which guide the appraisal of the options against the SA objectives.

The methodology used in the derivation of the SA objectives and development of the aims was developed from that outlined in the ODPM's SEA guidance. The SA objectives and aims, detailed in the *LDP SA Scoping Report* were informed by the sustainability objectives of other relevant plans and programmes that may influence, or be influenced by, the plan; as well as the key issues identified through baseline data collection and consultation. The SA objectives (in bold font) and aims used in this appraisal are as follows (these have been numbered for ease of reference and are not in any order of priority):

**1. To provide the opportunity for people to meet their housing needs.**

- Provide a mix of dwelling types and tenure
- Build in sustainable locations, with good access to local facilities
- Provide affordable housing
- Preference for previously developed land in sustainable locations

**2. To maintain, promote and enhance the range of local facilities.**

- Meet the needs of existing communities throughout the Vale of Glamorgan
- Provide appropriate facilities within new developments to meet the needs of future users
- Ensure local facilities are suitable for purpose and easily accessible
- Prevent the loss of existing well-used and valued local facilities

**3. To maintain and improve access for all.**

- Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community
- Improve public perception of access
- Benefit health and well being through social inclusion within the physical environment
- Promote 'life-time' homes

**4. Reduce the causes of deprivation.**

- Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.
- Prevent the isolation of deprived communities.

**5. To maintain, protect and enhance community spirit.**

- Reduce the fear of crime
- Provide community facilities
- Encourage local distinctiveness (e.g. promote public art)
- Encourage community ownership of the environment (e.g. promote shared spaces)

**6. To minimise the causes and manage the effects of climate change.**

- Reduce air pollution (e.g. transport / industry emissions)
- Reduce energy consumption (e.g. promote energy efficient building)
- Promote renewable energy generation
- Promote green sinks to absorb carbon emissions (e.g. plant trees)
- Avoid development within flood plains unless mitigation can prevent harm
- Protect biodiversity, flora and fauna from the effects of climate change

**7. To minimise waste.**

- Promote the use of secondary resources (e.g. convert existing buildings)
- Provide and promote recycling facilities.
- Avoid landfill of waste

**8. To use land effectively and efficiently.**

- Retain undeveloped land
- Bring previously developed land in sustainable locations back into use
- Promote good quality high density developments where appropriate
- Protect the countryside from inappropriate development, especially good quality agricultural land and areas of high landscape value

**9. To protect and enhance the built and natural environment.**

- Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil, water resources.
- Protect or enhance the built environment including historic buildings and conservation areas.
- Protect cultural heritage and archaeology.
- Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.

**10. To provide a high quality environment within all new developments.**

- Ensure development meets the needs of current and future users.
- Promote a sense of community pride (e.g. shared spaces, public art, local materials)
- Promote sustainable design and construction solutions.
- Enhance access for cyclists and pedestrians.
- Provide adequate green spaces.
- Provide adequate vehicular parking and manoeuvring space.

**11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.**

- Protect and enhance existing cultural heritage and historic environments
- Promote new opportunities for culture in the Vale of Glamorgan

**12. To reduce the need to travel and enable the use of more sustainable modes of transport.**

- Ensure new development is located in accessible locations from a range of travel modes
- Promote technologies to reduce need to travel (e.g. homeworking)
- Enable the movement of people and freight by sustainable means
- Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways)

**13. To provide for a diverse range of local job opportunities.**

- Protect existing and potential employment sites for employment uses
- Support a culture of entrepreneurship
- Ensure employment sites are promoted in accessible locations
- Support the enhancement of skills to meet employment needs
- Promote and enable sustainable rural diversification

**14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.**

- Ensure retail centres are accessible by a range of modes of transport
- Ensure a range of uses within retail centres
- Avoid out-of-town retail development
- Enhance the public realm within existing centres and facilitate regeneration programmes
- Promote the evening economy in the Vale of Glamorgan's town centres

**15. To promote appropriate tourism.**

- Promote local economic growth through tourism
- Enable tourism uses to be accessed by sustainable travel modes
- Manage tourism to protect the Vale of Glamorgan’s natural and built assets
- Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)
- Enable specialist tourism (e.g. sustainable, sports, cultural etc).

The appraisal of the options against the SA objectives was carried out using a matrix-based approach as shown in Appendix A. The matrix was developed based on ODPM guidance<sup>4</sup> and has been set out to enable the comparison of the options. The matrix also ensures that spatial nature of effects is taken into consideration together with the significance of the identified effects.

The performance (direction and severity) of the options against the SA objectives is recorded in the matrix using the symbols shown below:

|     |  |
|-----|--|
| ++  | The proposed option strongly contributes to the achievement of the SA objective  |
| +   | The proposed option contributes to the achievement of the SA objective   |
| 0   | There is no clear relationship between the achievement of the option and the SA objective or the relationship is negligible                            |
| -   | The proposed option detracts from the achievement of the SA objective  |
| --  | The proposed option strongly detracts from the achievement of the SA objective   |
| +/- | The proposed option both contributes and detracts from the achievement of the SA objective   |
| ?   | The relationship is dependant on the way in which the aspect is managed. Sufficient information may be unavailable to enable an assessment to be made. |

The commentary provided under each SA objective in the matrix sets out the reasoning behind the determined performance of the options and highlights any key issues associated with the option. Also provided in the matrix, is an indication of the levels of certainty with which the likely effects of the options have been determined. Below are the symbols used in describing certainty:

|   |  |
|---|--|
| L | Certainty regarding the indicated performance of the option against the SA objective is low and further information may be needed to increase certainty.       |
| M | Performance of the option against the SA objective has been determined with some certainty although further information would assist the appraisal.            |
| H | The performance of the option against the SA objective has been determined with high certainty as sufficient information is available to assist the appraisal. |

A description is provided below of the approach to this appraisal using the matrix.

---

<sup>4</sup> Annex 10 of the *Sustainability Appraisal of Regional Spatial Strategies and Local Development Frameworks*, ODPM, November 2005

## 2.2 Approach to Appraisal

Although the options have not been appraised against each individual aim, the aims have been taken into consideration in determining the performance of the options against the overall objectives and have been used to guide the appraisal. The various aspects considered while carrying out the appraisal are as follows:

- **Direction of impact:** Whether the effects are positive, negative or neutral
- **Significance:** Whether the effects would be slightly or greatly significant
- **Spatial Scale:** The locality of the effects in the Vale of Glamorgan i.e. whether they would affect the rural and/or urban areas. Any transboundary effects outside the study area were also considered.
- **Level of certainty:** The level of certainty in predicting the effects based on the information available to carry out the appraisal.

The temporal and cumulative nature of the predicted effects was explored where possible and details provided in the commentary. More detailed determination of the temporal and cumulative aspects as well as consideration of mitigation measures will be undertaken at the next stage of the SA/SEA in which more specific policies would be appraised.

This approach should therefore allow the impact to relate to the value of sustainability baseline in a particular area through assessing every option on its own merit and relating it to the baseline and issues/opportunities.

## 2.3 Assumptions and Limitations

In carrying out the assessment, a number of assumptions were made in relation to the strategy options. Furthermore, in some cases, there were limitations to the level of certainty with which the appraisal could be completed.

### 2.3.1 Assumptions

The following are the assumptions made in this assessment:

- Growth will mainly include the development of housing while local facilities will be provided through planning conditions and S106 agreements.
- Housing will meet all needs in terms of tenure, type and affordability.
- Growth can help tackle causes of deprivation (as seen in housing lead growth successes through pathfinder/housing market renewal schemes) through the provision of new decent homes and other benefits through planning gains.
- Planning policy would set minimum design standards to ensure that buildings are designed to be accessible to all.
- Planning policy would provide siting guidance to minimise effects of development on natural and historic environments.
- New developments would be designed to enhance community spirit through local distinctiveness and a reduction in the fear of crime.

- Local community and leisure facilities will be provided together with new housing and employment.

The rationale behind the determination of the performance of the options against the SA objectives, sought to relate direction of impact to the value of baseline in the Vale of Glamorgan. In adopting this approach, every option is considered on its own merit against the SA objectives and is related to the sustainability baseline as well as the key issues and opportunities.

## 2.3.2 Limitations

At this stage, the appraisal provides an overall indication of the potential effects of the options against the SA objectives. The level of detail that could be provided in the appraisal is limited due to the strategic nature of the options, which does not allow for assessment at a settlement level. However, the level of detail is considered sufficient for the purposes of developing the Preferred Strategy which will be appraised in greater depth and detail.

It should be noted that the appraisal of the strategy options is based on expert judgement and therefore has an element of subjectivity. However, the limitations of expert judgement have been reduced through the use of quantitative thresholds and legislative targets where possible within the assessment process.

### 3 SA Findings

This section summarises the findings of the appraisal of each option taking into consideration the key issues identified at the scoping stage. The key strengths and weaknesses of each option are highlighted below under the relevant headings. As Options 6 to 8 are combinations of other options, their predicted effects relate closely to their component options and therefore reference needs to be made to related options for details.

#### 3.1 Option 1

Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).

This option maintains the current strategy contained within the Vale of Glamorgan Adopted Unitary Development Plan (1996-2011), which focuses development within ‘the Waterfront Strip’. This encompasses the larger coastal towns and villages of Barry, Penarth, Dinas Powys, Sully and Rhoose, capitalising on their good transport links, availability of services and facilities as well as regeneration opportunities within Barry Waterfront (see Figure 3.1). This option represents the ‘business as usual’ scenario.

Figure 3.1: Indicative Illustration of Option 1

## Key Strengths

The key strengths of this option lie in that it would assist in the achievement of the majority of the SA objectives in the urban south east of the Vale of Glamorgan. Specifically, it would be expected that this option will deliver an appropriate mix of housing in urban areas of the south east. This would assist the Vale of Glamorgan population in meeting their housing needs.

With the concentration of growth in existing urban centres, existing local facilities and the vitality and viability of these centres would be maintained and enhanced, while the causes of deprivation are reduced. Multiple deprivation is a key issue in part of the urban south east, particularly in Barry, whereas rural parts of the Vale of Glamorgan are ranked as having low levels of multiple deprivation.

A further advantage of this option would be that most development is located in areas easily accessible by existing national public transport links, particularly via the Vale of Glamorgan Railway Line. The urban south east is also well served by bus services.

Maximising potential for growth in urban centres would make use of previously developed land and vacant buildings although the availability of such land may be limited outside Barry. There are opportunities to deliver regeneration while using land effectively and efficiently.

There are increased opportunities to provide a diverse range of employment opportunities in urban areas, where there are pockets of economic inactivity. Furthermore, there is a decline in employment opportunities in some industries (e.g. construction, manufacturing and public administration) and this option presents the opportunity to address this trend in urban areas.

## Key Weaknesses

It is envisaged that through this strategy, issues faced by residents in the rural parts of the Vale of Glamorgan (e.g. lack of appropriate housing, employment and local facilities, as well as issues relating to transport and accessibility) would not be sufficiently addressed. In most cases the option does not have a bearing on the delivery of SA objectives in rural parts of the Vale of Glamorgan.

## 3.2 Option 2a:

Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).

This option would see the distribution of housing and employment to all settlements within the Vale of Glamorgan, proportionate to the existing population of each settlement. In this scenario the level of existing services and facilities would not be considered as part of the allocation of sites, however unlike Option 1 this option would increase development opportunities for rural areas (see Figure 3.2).

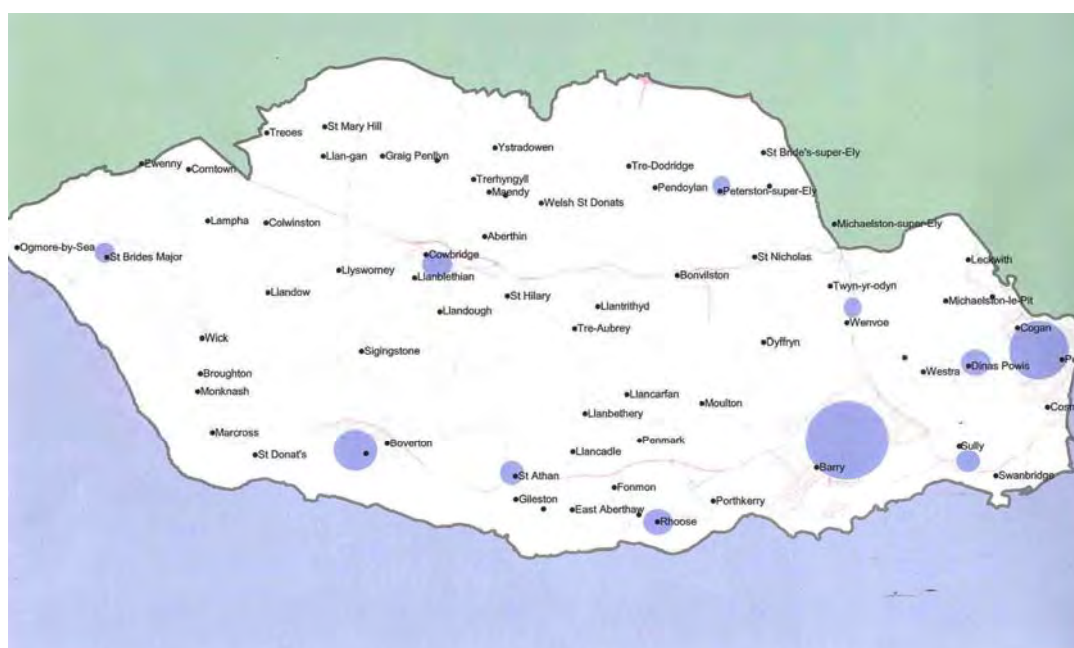

Figure 3.2: Indicative Illustration of Option 2a

### Key Strengths

This option offers the opportunity to deliver benefits to both urban and rural areas. This is particularly in relation to the provision of housing and employment opportunities. It is anticipated that multiple deprivation issues, particularly in urban areas, would be addressed through this strategy.

There are opportunities to make town centres attractive to local residents that currently use out-of-town retail developments. Centres can also be made attractive to businesses therefore reducing the number of vacant units (e.g. Barry). Both these factors would assist in maintaining and enhancing the vitality and viability.

### Key Weaknesses

The key issue identified with this option relates to its dependence on current population of each settlement. It should be noted that current population may not

be an appropriate indicator of the future needs of communities in these settlements. Through this approach, development may be provided where it is not necessary, cannot be sustained or supported. As a result, the specific needs of some communities may not be addressed.

It is not proposed that a sustainability test will be carried out in adopting this option. Consequently, it is likely that development would be placed in settlements that do not have sufficient facilities and services to support the new development. Furthermore, due to the dispersed nature of proposed growth, resources to ensure benefits are sufficiently delivered may be stretched, while negative effects may be spread out across the Vale of Glamorgan.

In rural areas, where brownfield land is not as readily available, there may be some loss of greenfield land and effects on the local landscape, biodiversity, soil function, water resource use and cultural heritage. It would be necessary to limit growth to within settlement boundaries to ensure protection of the surrounding countryside.

### 3.3 Option 2b

#### Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test)

As with option 2a the distribution of development would be relative to the existing population of each settlement. However an assessment of existing services and facilities as well as accessibility to nearby facilities would be undertaken (the sustainability test). In this scenario land allocated for development opportunities would only be within those settlements, which would have good levels of services, facilities and infrastructure (see Figure 3.3).

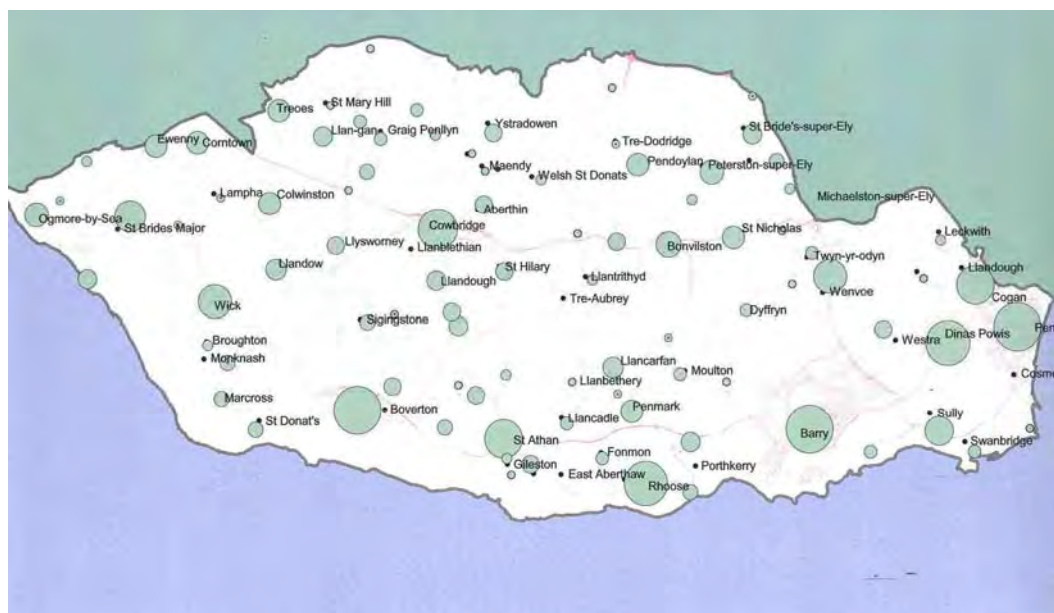

Figure 3.3: Indicative Illustration of Option 2b

#### Key Strengths

As with Option 2a, this strategy would spread development throughout the Vale of Glamorgan, although growth would be focused in those settlements that have sufficient provision of facilities to support development. This would be ensured through the undertaking of a sustainability test.

The approach proposed in this option is likely to ensure that facilities and services are not under-utilised where they are provided.

#### Key Weaknesses

It is unlikely that this option will deliver significant benefits in any of the settlements in the Vale of Glamorgan, as it is unlikely that development in any one location will be of a large enough scale to enable planning gain. The key concern with this option is that those rural centres which do not have appropriate facilities would not benefit from growth and are likely to continue to experience a lack of appropriate facilities.

### 3.4 Option 3

Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified)

Unlike Option 1, this option would concentrate future development within the larger rural settlements that have good levels of services, facilities and infrastructure relative to other settlements within the rural Vale (see Figure 3.4).

Figure 3.4: Indicative Illustration of Option 3

#### Key Strengths

Delivery of housing in the identified rural settlements will present an opportunity to increase provision of affordable housing in the rural part of the Vale of Glamorgan. Furthermore, the option would ensure that facilities such as schools, doctors' surgeries and retailing in these settlements remain viable and are maintained and enhanced.

The option presents an opportunity to make these town centres attractive to local residents that currently use retail facilities in larger settlements. It is assumed that local community and leisure facilities will be provided together with new housing through planning conditions.

An increase in population and jobs and overall investment in these four settlements, and potentially others, should contribute positively to their vitality and viability. Additionally, there may be an opportunity to improve bus services in these, and other rural settlements, in which bus service provision is considered to be poor (e.g. Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst others).

## Key Weaknesses

High levels of multiple deprivation are observed mainly in settlements in the urban south east (e.g. Barry). Therefore, focusing growth in these rural centres is unlikely to address deprivation issues in urban centres. In rural parts of the Vale of Glamorgan, isolation and inaccessibility are key issues and it is unlikely that this strategy would address these problems. Additionally, this strategy will focus development in those settlements that are not well served by public transport and where there is limited opportunity to improve public transport provision. Rhoose and Llantwit Major are the only settlements with rail services on the Vale of Glamorgan Railway Line.

A key sustainability objective is to ensure that land is used effectively and efficiently, particularly in relation to the use of previously developed land. The availability of previously developed land is low in the identified centres and therefore, it is likely that most of the new development will be located on greenfield land outside settlement boundaries.

The environment surrounding these rural settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage outside of settlement boundaries. Furthermore, a number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development.

As well as affecting the natural environment, it is likely that there will be implications on the cultural heritage environment. There are a large number of historic buildings, designations and protected monuments in the rural Vale that may be affected by development in these settlements. In particular there are significant numbers of listed buildings in Llantwit Major and Cowbridge. However, planning policy can ensure that new development enhances and promotes the quality of the cultural/historic environment.

### 3.5 Option 4

#### A rural new settlement able to promote sustainable self containment

This option would propose that the majority of new development would be concentrated in one area to create a new settlement. In order to ensure that the settlement would support a sustainable population, a range of services and facilities, as well as good infrastructure would form part of the new settlement (see Figure 3.5).

Figure 3.5: Indicative Illustration of Option 4

#### Key Strengths

The development of a new rural settlement, is likely to deliver overall benefit (e.g. in the provision of housing, local facilities and services) to part of the rural areas of the Vale of Glamorgan. This will depend on its location and any benefit will be realised by those settlements located nearby.

#### Key Weaknesses

Overall, if the development of a new rural settlement is the focus of the LDP strategy, it is unlikely that other issues that need to be addressed throughout the Vale of Glamorgan would be sufficiently addressed.

The option would be expected to have significant negative environmental effects, although the extent of these would be dependent upon the location of the new settlement. Development is likely to adversely affect biodiversity, landscape, soil function, water resource use and heritage in the location of the new settlement,

although the extent of these effects can be determined and mitigated through an environmental assessment.

### 3.6 Option 5

Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development.

This option draws upon elements of Options 1 and 2b, which seek to locate future development within those settlements that have good levels of services and facilities, and transport links. However, this option also recognises the need to consider the potential development opportunities arising from the proposed Defence Training Academy at St. Athan (see Figure 3.6).

Figure 3.6: Indicative Illustration of Option 5

### Key Strengths

The key advantage of this strategy would be in its delivery of benefits to both urban and rural parts of the Vale of Glamorgan.

With this approach, housing allocation would not be spread too thinly across the Vale of Glamorgan. Delivery of 5000 housing units (excluding units to be delivered through windfall applications) would be focused on the identified settlements. Furthermore, local community facilities would be maintained and enhanced. New facilities may also be provided through planning conditions.

As development would be mainly focused in existing urban areas, there is high potential for previously developed land to be utilised, where it is available. It

should be noted that in the rural settlements development in greenfield land may occur depending upon the availability of land for development within settlement boundaries. It is expected that major development (both housing and employment) at St Athan would use largely previously developed land.

The option presents the opportunity to encourage good quality high-density developments in both urban and rural areas. There is also an opportunity to bring about regeneration particularly in the urban centres, including the enhancement and protection of historic buildings..

## Key Weaknesses

The natural environment in and around the settlements identified in this option is likely to be adversely affected, as development may affect biodiversity, landscape, soil function, water resource use and heritage. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development.

Furthermore, Rhoose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. Dinas Powys and Rhoose are surrounded by green wedge. Development may need to occur in this area of greenfield land as there is no significant availability of brownfield land in Dinas Powys. Potential effects on these environmental designations can be mitigated through policy that protects these areas.

## 3.7 Option 6

Combination of Option 1 and Option 4: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.

### Key Strengths

The delivery of housing in urban centres will ensure that development occurs where appropriate facilities are available. Barry and Penarth already have well established local facilities, with additional services being developed as part of the regeneration effort. However, mixed effects would be realised in rural areas, with benefits for the new settlement and the surrounding area, although existing rural access to facilities issues would not be addressed elsewhere.

Positive effects on tackling the causes of deprivation are expected to be realised in the urban centres to the south east and Rhoose in which multiple deprivation is a key issue. Multiple deprivation is not a key issue for the rural parts of the Vale of Glamorgan, although isolation and access to services are areas of concern.

## Key Weaknesses

The key weakness in this option relates to its limited delivery of benefits to urban parts of the Vale of Glamorgan. Although it would be expected that the new settlement would assist the achievement of some of the sustainability objectives in rural parts of the Vale of Glamorgan, this would be limited to those settlements in proximity to the location of the new settlement.

### 3.8 Option 7

Combination of Option 2b and Option 5: Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test.

#### Key Strengths

This option has the potential to deliver benefits to both rural and urban parts of the Vale of Glamorgan, in settlements with the capacity to accommodate new development. The use of a sustainability test in identifying smaller settlements in which to focus development will ensure that the community facilities (e.g. health care, retail and leisure facilities) remain viable and are not under-utilised.

#### Key Weaknesses

Potential adverse effects identified relate particularly to impacts of development on nature conservation and landscape designations. However these designations can be protected by policies developed under this option.

### 3.9 Option 8

Combination of Option 5 and Option 4: Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

#### Key Strengths

This option identifies both rural and urban settlements in which development opportunities would be concentrated. With this approach, issues facing both rural settlements (e.g. lack of local facilities) and urban areas (e.g. elevated levels of multiple deprivation) are likely to be addressed.

## Key Weaknesses

A key concern with this option is that the number of housing units delivered outside Barry would be reduced, as a significant proportion would be developed in the new settlement. As a result the overall benefits that may be delivered in the identified settlements would be limited.

### 3.10 Issues relating to all options

In carrying out the appraisal of the nine options, issues were identified that apply to all proposed strategies as highlighted below. It will be essential that the Preferred Strategy takes these matters into account.

- Considering the scale of proposed development, it is unlikely that any of the options would significantly affect community spirit in existing communities.
- Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings.
- Parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan, amongst others, are at risk of fluvial flooding. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw and Barry. It would be necessary to develop policy that ensures that development is located in areas that are not at risk of flooding.
- The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The levels of waste going to landfill are governed by the South East Wales Regional Waste Plan and the Landfill Directive limits. New development would need to have consideration of location of waste facilities.
- Delivery of employment opportunities is likely to be limited by the availability of employment land, based on the *Employment Land and Premises Study*.

## 4 Summary and Recommendations

---

It is essential that the option decided upon is one that addresses the key issues identified at the scoping stage. This section summarises the findings of the appraisal and provides an indication of the option/s that best address the key issues.

Overall, the appraisal highlighted that the options would have similar effects in terms of the environmental impacts as demonstrated by the matrix. The main differences relate to the delivery of socio-economic benefits throughout the Vale of Glamorgan and the areas in which effects will occur.

Option 1 would deliver benefits (including housing, local facilities and job opportunities) in urban areas alone, while Options 3 and 4 would deliver similar benefits only to rural settlements. All the other options would deliver some benefit throughout the Vale of Glamorgan. However, Options 2a and 2b would lead to growth that is highly dispersed and not focused, therefore putting a strain on resources. Furthermore, although Option 6 would deliver benefits to both rural and urban parts of the Vale of Glamorgan, benefits in the rural parts would be limited to the new rural settlement.

It is essential that the Preferred Strategy delivers benefits where they are most needed in both urban and rural settlements. The options that are likely to do so are Options 5, 7 and 8. It should be noted, however, that the benefits of Option 8 would be limited, as the majority of development may be focused on the new settlement.

The key strengths of Options 5, 7 and 8 include the following:

- delivery of benefits in both urban and rural areas;
- potential for use of previously developed land, where it is available, in urban areas;
- a balanced spread of growth contributing to tackling the causes of deprivation proportionally to settlement size;
- provision of development in key settlements thereby reducing the need to travel for local services; and
- maintaining and enhancing vitality and viability of key urban and rural settlements

It will be essential, however, that the following are taken into consideration in developing any of the three options to ensure that any potential negative effects are mitigated:

- new development would need to be limited to within settlement boundaries wherever possible (with the exception of the new rural settlement);
- there is a potential that new land uses may conflict with agricultural uses in rural areas;

- design guidance would be necessary to ensure that the cultural heritage and the built environment are protected and enhanced; and
- housing delivery would need to be accompanied by the provision of appropriate facilities.

## 5 What Next

---

The appraisal of the strategy options has highlighted a number of sustainability issues relating to the proposed options. The findings and recommendations of this appraisal will be taken into consideration by the Council in determining the preferred strategy.

The Council has commissioned a number of studies e.g. Local Housing Market Assessment and Employment Needs Study, to assist in determining the preferred strategy. These studies will be used by the Council together with the findings of the appraisal in developing the LDP strategy.

The preferred LDP strategy will be set out in the Preferred Strategy Report which will be issued for formal consultation early in 2008.

| <b>H</b>            | The performance of the Option against the SA Objective has been determined with high certainty as sufficient information is available to assist the appraisal |

Vale of Glamorgan LDP Strategy Options - Appraisal Matrix (Options 1 to 5)

| LDP Strategy Options   | Option1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).  |            |   | Option 2a: Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).   |                |                    | Option 2b: Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).   |                |                    | Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).  |                |                    | Option 4: A rural new settlement able to promote sustainable self – containment.   |                |                    | Option 5: Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development.   |                |                    |   |   |    |   |   |   |

| <b>1. To provide the opportunity for people to meet their housing needs.</b> |   |            |   |  |                |                    |   |                |                    |   |                |                    |  |                |                    |   |                |                    |   |   |    |   |   |   |
| Performance  | ++  | -          | 0 | M  | +              | ?                  | 0   | L              | ++                 | ++  | 0              | L                  | 0  | +              | 0                  | M   | -              | +                  | 0 | M | ++ | + | 0 | M |
| Commentary   | This option has potential to address housing requirements, including that of affordable housing, in urban areas but not the rural Vale. It builds on the existing strategy that has brought about delivery of housing along the Barry Waterfront, in Penarth Haven and Rhoose Point. Although not strategically identified for growth, rural settlements such as Cowbridge and Llantwit Major would still benefit from development delivered through windfall applications. It is assumed that an appropriate mix of housing will be provided as growth continues. It should be noted that with the current UDP strategy, there has been a decline in the availability of affordable housing throughout the Vale of Glamorgan as evidenced in the baseline data obtained. It is expected that by focusing growth in areas such as Barry, housing will be provided that is within easy access of facilities and use will be made of available previously developed land. |            |   | Although the option is likely to address housing issues throughout the Vale of Glamorgan, it is unlikely that development of housing will be directed to the areas in which it is required. Current settlement population alone does not give an accurate indication of future housing need. Without a sustainability test, housing may be provided in settlements that do not have sufficient facilities available to support the new development. The housing allocation for the Vale of Glamorgan is 7500 units. It is envisaged that Barry and St. Athan will be key settlements. It is uncertain whether the level of housing provision will address the lack of affordable housing particularly in rural settlements.  |                |                    | It is likely that this option will promote the delivery of appropriate housing in settlements that have the appropriate facilities to support the increase in population. Some settlements, particularly those in the rural part of the Vale of Glamorgan, in need of housing, but without sufficient facilities to support additional housing may be excluded when settlements are identified for development. As with option 2a, it is uncertain whether the level of housing provision would address the lack of affordable housing particularly in rural settlements. |                |                    | It is assumed that growth will include housing development. This option would address the lack of affordable and appropriate housing in the rural settlements identified. However, it is not likely that housing issues in urban areas (other than Barry) would be addressed.   |                |                    | Although housing would be provided in the new settlement, the option would not address the needs in other rural or urban areas. It is unlikely that there will be many opportunities to develop brownfield land. It is unlikely that the new settlement would provide all required housing. However this Option has potential to help meet the housing need around the Vale through windfall development, depending on the distribution of the sites across the Vale.  |                |                    | It is assumed that development would provide for housing needs in centres across the whole Vale, in both existing urban centres and for rural needs. With this approach, housing allocation would not be spread too thinly across the Vale of Glamorgan.  |                |                    |   |   |    |   |   |   |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>    |   |            |   |  |                |                    |   |                |                    |   |                |                    |  |                |                    |   |                |                    |   |   |    |   |   |   |
| Performance  | +   | -          | 0 | M  | ?              | ?                  | 0   | L              | ?                  | ?   | 0              | L                  | 0  | +              | 0                  | M   | 0              | +                  | 0 | M | +  | + | 0 | M |
| Commentary   | It is assumed that growth will include the development of local facilities where there is a need. This option will lead to increased provision of facilities in urban areas where local communities are likely to use them. Furthermore, the delivery of housing in urban centres will ensure that development occurs where appropriate facilities are available. As part of the Barry Waterfront regeneration scheme Barry and Penarth already have well established local facilities, with additional services being developed as part of the regeneration effort. However, rural areas will not benefit through this option. There is also a significant need for increased provision of facilities in the rural Vale. The WIMD (Geographical access to services) indicates that services are less accessible in rural parts of the Vale of Glamorgan than in urban areas.   |            |   | This option will deliver housing without consideration of availability of supporting facilities. It is, therefore, likely that development will occur in settlements that do not have the facilities to meet the needs of the local population. There would however, be scope for the Vale of Glamorgan Council to set policies outlining planning obligations for new housing developments to enhance facilities in these areas. The use of current population figures rather than population forecasts do not give the best indication for future housing need. In those settlements that have a good range of local facilities (e.g. Barry and Penarth), new development may ensure that these are maintained and well-used. However, it may be considered that due to the dispersed nature of development under this strategy, pressure on existing facilities may not increase significantly in small, rural settlements. |                |                    | The option will ensure that the range of facilities in those settlements, in which development occurs, will be maintained, enhanced and promoted. However, as the delivery of this strategy will be determined by the sustainability test, it is likely that settlements with a lack of facilities (particularly in rural part of the Vale of Glamorgan) may be excluded and may continue to experience a shortage of facilities.   |                |                    | This option would ensure that facilities in the four villages identified remain viable, for example schools, doctors surgeries shopping facilities, thereby reducing the need to travel to nearby settlements for such facilities. It is assumed that growth will include delivery of appropriate, additional local facilities in these settlements. Although additional facilities are less likely to be developed in other rural settlements, they would benefit from those provided in the identified settlements. However, settlements outside the 'catchment area' of these four towns (e.g. Ogmoredy-Sea to the far west, St Bride's-super-Ely to the north) would not benefit significantly. |                |                    | The option will only affect areas close to the chosen location and will not address issues of wider access to facilities throughout the Vale of Glamorgan. It is assumed that the facilities in the new development would be accessible and fit-for-purpose for their catchment. The option may result in the under use of similar facilities in surrounding areas. Alternatively if facilities within the new development are insufficient other centres in close proximity to the new development could experience pressure on their existing facilities e.g. St. Athan. |                |                    | It is assumed that development will include the provision of local facilities. This will proportionally benefit Barry, St Athan and settlements in the South East and help to address issues of poor access to facilities in rural areas. It will be essential to ensure that there is sufficient service capacity to cope with increases in populations, for example in St Athan and Llantwit Major.   |                |                    |   |   |    |   |   |   |
| <b>3. To maintain and improve access for all.</b>                            |   |            |   |  |                |                    |   |                |                    |   |                |                    |  |                |                    |   |                |                    |   |   |    |   |   |   |
| Performance  | ?   | -          | ? | L  | ?              | ?                  | 0   | L              | ?                  | ?   | 0              | L                  | 0  | ?              | 0                  | L   | 0              | +                  | 0 | L | +  | + | 0 | M |
| Commentary   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. However under this option, these benefits may not be realised in rural areas. Positive effects would be realised in the urban centres to the south east and Rhoose in terms of access to the built environment.   |            |   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.  |                |                    | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Growth in settlements across the Vale of Glamorgan in both urban and rural areas will ensure that a greater proportion of the population have improved access to facilities and specific buildings. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.   |                |                    | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.   |                |                    | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. It is expected that the option will only affect access to the built and natural environment for the population in the new settlement and will not address access issues elsewhere in the Vale of Glamorgan, in particular rural areas. However access in the new settlement will be high.   |                |                    | The increased spread of population around the Vale of Glamorgan should help to improve access to facilities, decrease isolation and ensure that a greater proportion of the population have access improved to facilities and specific buildings. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. |                |                    |   |   |    |   |   |   |

| LDP Strategy Options   | Option1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).  |            |   | Option 2a: Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).  |                |                    | Option 2b: Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).   |                |                    | Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).  |                |                    | Option 4: A rural new settlement able to promote sustainable self – containment.   |                |                    | Option 5: Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development.  |                |                    |   |   |   |   |   |   |

| Commentary   | High levels of multiple deprivation are observed mainly in and around Barry as detailed in the Welsh Index of Multiple Deprivation. The option therefore presents an opportunity to address deprivation through regeneration in Barry and other settlements. Multiple deprivation is not a key issue for the rural Vale, although isolation and access to services are areas of concern.  |            |   | Areas with relatively high levels of multiple deprivation are mainly concentrated in and around Barry. Provision of housing and employment opportunities will be focused on larger urban settlements including Barry, presenting the opportunity to reduce the causes of deprivation. The introduction of new housing offers the opportunity to enhance facilities through planning conditions and S106 agreements.   |                |                    | The sustainability test will identify those settlements with sufficient, appropriate facilities including health services, leisure facilities, schools etc. to support development. The option may therefore result in the exclusion of those settlements (particularly rural ones) in which access to services (a WIMD domain) is an issue. However, some of those settlements with high levels of multiple deprivation may be identified for development and, therefore, it would be expected that these deprivation issues would be addressed. The level to which deprivation is addressed in these areas is dependent upon the type and level of development allocated to the various locations.  |                |                    | High levels of multiple deprivation are observed mainly in and around Barry, while this is not a key issue for the rural Vale. However, isolation and access to services are areas of some concern. Therefore, focusing growth in the rural centres is unlikely to address the issue in Barry and other urban centres.  |                |                    | A single new settlement will not address deprivation and isolation issues throughout much of the Vale of Glamorgan, especially in urban areas where problems exist.  |                |                    | A balanced spread of growth should increase the number of homes thereby, contributing to tackling the causes of deprivation proportionally to settlement size.   |                |                    |   |   |   |   |   |   |
| <b>5. To maintain, protect and enhance community spirit.</b>               |   |            |   |   |                |                    |   |                |                    |   |                |                    |  |                |                    |  |                |                    |   |   |   |   |   |   |
| Performance  | +   | 0          | 0 | L   | +              | +                  | 0   | L              | +                  | +   | 0              | L                  | 0  | -              | 0                  | M  | 0              | +                  | 0 | M | + | + | 0 | L |
| Commentary   | Development presents an opportunity to promote distinctiveness, reduce the fear of crime and provide community facilities to enhance community spirit. As this option focuses development in urban settlements, benefits will be realised mainly in urban areas and not in rural communities.   |            |   | It would be expected that new developments would be designed to enhance community spirit through local distinctiveness and a reduction in the fear of crime.  |                |                    | It would be expected that new developments would be designed to enhance community spirit through local distinctiveness and a reduction in the fear of crime.  |                |                    | Growth in these settlements may contribute to community spirit through an increase in development of facilities and good design. The option offers the opportunity to enhance local distinctiveness and reduce the fear of crime in these rural settlements.  |                |                    | A new settlement has the potential to be well designed in order to reduce crime, provide facilities and encourage local distinctiveness and community ownership. However, this would only apply to the local area and have no benefits to other areas.   |                |                    | Growth in these intervention areas may contribute to community spirit through an increase in development of facilities, good design and a reduction in the fear of crime where this is an issue.   |                |                    |   |   |   |   |   |   |
| <b>6. | Performance  | +   | 0          | 0 | L   | +              | -                  | 0   | M              | +                  | +   | 0              | M                  | 0  | +              | 0                  | M  | 0              | -                  | 0 | M | + | + | 0 | M |
| Commentary   | Provision of housing and employment in urban centres across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport. The option offers some protection of green sinks. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Depending on exact location and design of development, flood plains may or may not be affected. Development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth. Furthermore, parts of Sully, Dinas Powys and Barry, are at risk of fluvial flooding. |            |   | Provision of housing and employment across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Issues relating to development in floodplains and effects on green sinks will be dependent upon specific location of development. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth. Parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan amongst others are also at risk of fluvial flooding. |                |                    | Provision of housing and employment across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Issues relating to development in floodplains and effects on green sinks will be dependent upon specific location of development although it should be noted that parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan amongst others, are at risk of fluvial flooding. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth. |                |                    | Provision of housing and employment in these rural towns may reduce the need to travel and hence reduce greenhouse gas emissions from transport. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Issues relating to development in floodplains and effects on green sinks will be dependent upon specific location of development. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, and Aberthaw. |                |                    | The option would increase greenhouse gas emissions and energy use as well as reduce green sink coverage in a rural location. It would also increase car use to and from the new settlement and energy use in the development. The impact upon floodplains would depend upon the exact location of development. Additionally, if located in coastal areas, particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth, the new settlement may be affected by future sea level rise. |                |                    | The option promotes more development in the urban areas already served by public transport. Nonetheless, other issues such as increased energy use as a result of increased development, destruction of green sinks, building on floodplains etc. can negatively affect this objective. Parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan amongst others are at risk of fluvial flooding. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth. |                |                    |   |   |   |   |   |   |
| <b>7. To minimise waste.</b>   |   |            |   |   |                |                    |   |                |                    |   |                |                    |  |                |                    |  |                |                    |   |   |   |   |   |   |

| Commentary   | The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The South East Wales Regional Waste Plan and the Landfill Directive limits govern the levels of waste going to landfill. Development could result in the reuse of disused buildings in these urban areas, reducing waste construction material. New development would need to have consideration of location of waste facilities.  |            |   |   |                |                    |   |                |                    |   |                |                    |  |                |                    |  |                |                    |   |   |   |   |   |   |

| LDP Strategy Options  | Option1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).   |            |   |   | Option 2a: Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).   |                |                    | Option 2b: Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).   |                |                    | Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).  |                |                    | Option 4: A rural new settlement able to promote sustainable self – containment.   |                |                    | Option 5: Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development.  |                |                    |   |   |   |   |   |

| Commentary  | The option presents an opportunity to develop good quality high-density developments. This option offers some protection of the countryside from inappropriate development by focussing development in urban settlements that have brownfield sites and vacant buildings available. Barry in particular has significant amounts of brownfield land that can be re-developed. There is the potential however, that development may occur on edge of town, greenfield land as the availability of brownfield reduces.  |            |   |   | There is the opportunity to redevelop brownfield sites in urban areas, particularly Barry. Development in rural settlements would need to be within existing built up areas wherever possible to ensure that the countryside is protected from inappropriate development. However, this will depend upon the availability of land for development within settlement boundaries. The option presents the opportunity to encourage good quality high-density developments in both urban and rural areas.   |                |                    | There is the opportunity to redevelop brownfield sites in urban areas, particularly Barry. Development in rural settlements would need to be within existing built up areas wherever possible to ensure that the countryside is protected from inappropriate development. However, this will depend upon the availability of land for development within settlement boundaries. The option also presents the opportunity to encourage good quality high-density developments in both urban and rural areas.   |                |                    | There may not be large areas of previously developed land available in some of these rural settlements (with the exception of St Athan). As a result, it is likely that most of the new development will be located on greenfield land outside settlement boundaries. Efficient use of land can be achieved through good quality high-density development.  |                |                    | A new rural settlement is likely to be on largely greenfield land and would have an adverse effect on the countryside and landscape. There is the opportunity for the development to be good quality and high density.   |                |                    | As development is mainly focused in existing urban areas, there is high potential for previously developed land to be used, particularly in Barry. In the rural settlements development in greenfield land may occur depending upon the availability of land for development within settlement boundaries. It is expected that major development (both housing and employment) at St Athan and Barry would use largely previously developed land. Development in rural settlements would need to be within existing built up areas wherever possible, to ensure that the countryside is protected from inappropriate development. The option also presents the opportunity to encourage good quality high-density developments in both urban and rural areas.  |                |                    |   |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>           |  |            |   |   |  |                |                    |   |                |                    |   |                |                    |  |                |                    |  |                |                    |   |   |   |   |   |

| Commentary  | In urban areas, development may either positively or negatively affect the built environment; this is dependent upon design at project levels. It is assumed that planning policy would set out minimum design standards. The option would limit development in rural areas therefore providing some protection to the countryside from inappropriate development. It is increasingly becoming evident that some brownfield sites are significant habitats for important species <sup>1</sup> . These habitats may be affected by development in urban areas, particularly in Barry. Furthermore, Rhoose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. |            |   |   | Protection of the natural environment is dependant on ensuring that development is focussed within settlement boundaries. Development/growth offers the opportunity to improve or enhance the quality of the built environment through regeneration and the integration of development within surrounding uses. It is assumed that planning policy would set out minimum design standards. The natural environment in and around settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. Furthermore, Rhoose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. |                |                    | Protection of the natural environment is dependant on ensuring that development is focussed within settlement boundaries. | Commentary  | <p>There are a large number of historic buildings, designations and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote.</p> <p>Growth will provide the opportunities in urban areas to improve the quality of cultural and historic environments, particularly with regards to historic buildings. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets.</p> <p>In the rural Vale, where it is not expected that much growth will take place, it is assumed that the existing cultural and historic environment will be protected from the negative effects of development. The setting of any monuments will also be protected.</p> |   |   | <p>There are a large number of historic buildings, designations and protected monuments in the Vale of Glamorgan. | Commentary  | <p>Focusing growth in the urban south east will ensure that development is located in areas with easy access to services as well as to neighbouring areas. Most urban settlements in the south east are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service.</p> <p>However, in the rural Vale isolation of settlements may continue to be an issue, as there would continue to be limited provision of facilities and employment in rural communities. Bus service provision is considered to be poor in Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst other rural settlements (as detailed in the LDP Sustainability Appraisal Draft Scoping Report, February 2007).</p> |   |   | <p>Development in the main urban centres such as Barry and Penarth may reduce the need to travel by car and result in the use of more sustainable forms of transport. Most urban settlements are accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service.</p> <p>It would be anticipated that the provision of housing and employment in rural settlements would attract local investment and therefore encourage residents to work locally. However, there is the potential for the majority of residents to work away as the jobs they require are unlikely to be provided within the local area (as detailed in the LDP Sustainability Appraisal Draft Scoping Report, February 2007).</p> <p>In larger centres, however, it may be possible to provide appropriate employment and thereby reduce commuting.</p> |   |   | <p>Development in the main urban centres such as Barry and Penarth may reduce the need to travel and result in the use of more sustainable forms of transport. Most urban settlements are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service.</p> <p>It would be anticipated that the provision of housing and employment in rural settlements would attract local investment and therefore encourage residents to work locally. However, there is the potential for the majority of residents to work away as the jobs they require are unlikely to be provided within the local area.</p> <p>In larger centres, however, it may be possible to provide appropriate employment and reduce commuting.</p> <p>Through the sustainability test, residents of rural communities that lack appropriate facilities may have to continue travelling long distances to use facilities in other settlements.</p> |   |   | <p>It is assumed that growth in these locations will include development of local facilities and employment opportunities. If this is the case, it would be expected that the need to travel to larger urban centres would be reduced. The level to which this option achieves this sustainability objective is dependent upon the policies governing delivery.</p> <p>Residents in smaller rural settlements would need to continue travelling to the larger settlement for use of some facilities.</p> <p>Furthermore, Rhoose and Llantwit Major are the only settlements with rail services on the Vale of Glamorgan Railway Line. There is no rail transport available in other rural settlements. There may be an opportunity to improve bus services in these settlements and other rural towns in which bus service provision is considered to be poor (e.g. Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst others).</p> |   |   | <p>Whilst the settlement may be self contained in the short-term, it is likely that over time it will generate wider traffic congestion through in and out-commuting. Much depends upon the exact location with respect to existing and proposed public transport links. However, considering other new settlements in the UK, it is unlikely that this would address issues relating to the dependence on private cars in rural areas, nor is it likely to reduce the need to travel to existing major urban centres for higher value services.</p> |  |   | <p>Development in urban areas should enable people to work locally, therefore reducing the need to travel to work and commute to Cardiff. Most urban settlements are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service.</p> <p>Increased development of homes and facilities around existing rural centres could also reduce travel distances. If St Athan and Llantwit Major are truly self-contained, this would also result in reduced travel distances, but they may also encourage more trips from surrounding areas.</p> |   |   |   |   |    |   |   |   |

**13. To provide for a diverse range of local job opportunities.**

|             |  |    |  |  |   |   |   |   |   |   |   |   |  |   |   |  |   |  |   |   |    |   |   |   |

| Commentary   | This option offers a significant opportunity to enhance vitality and viability through new development in urban areas through the integration of new development with existing facilities. However, rural centres may not benefit. There is an opportunity to make urban centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |            |   | This option offers a significant opportunity to enhance vitality and viability through new development in both urban and rural areas. | Commentary   | Growth may lead to mixed-use developments therefore increasing opportunities for tourism businesses. At present most development has been predominantly residential. Tourism development in these settlements will depend upon the businesses that start up as growth continues. As development would be focused in urban centres, it is assumed that there would be no major tourism development in the rural Vale.   |            |   | Due to the dispersed nature of development under this strategy, it is unlikely that specific tourism development will occur purely as a result of the strategy. Development in the various settlements may enhance or negatively affect any tourism assets in those areas, although it would be expected that planning policy design standards, would seek limit negative effects.   |                |                    | Due to the dispersed nature of development under this strategy, it is unlikely that specific tourism development will occur purely as a result of the strategy. | Commentary   | The housing allocation for the Vale of Glamorgan is 7500 units. It is envisaged that Barry and St. Athan will be key settlements with the remainder distributed appropriately in Penarth, Dinas Powys, Sully, Rhosee and the new settlement. The current UDP Strategy has brought about delivery of housing in Penarth Haven and Rhosee Point and therefore, more units may be delivered elsewhere. This Option has potential to meet the housing need around the Vale through the windfall development, depending on the distribution of sites across the Vale.   |            |                |                    | It is assumed that development would provide for housing needs in centres across the whole Vale, in both existing urban centres and for rural needs. With this approach, housing allocation would not be spread too thinly across the Vale of Glamorgan. The sustainability test would ensure that housing is delivered in those settlements with the capacity to accommodate new development, particularly in rural parts of the Vale of Glamorgan.  |            |                |                    | The housing allocation for the Vale of Glamorgan is 7500 units. It is envisaged that Barry and St. Athan will be key settlements. This option would provide housing in the new settlement and in urban areas but would not fully address the needs in rural areas. This Option has potential to meet the housing need around the Vale through the windfall development, depending on the distribution of sites across the Vale.   |            |                |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>    |  |            |                |                    |   |            |                |                    |   |            |                |                    |
| Performance  | +  | +          | 0              | M                  | +   | +          | 0              | M                  | +   | ++         | 0              | M                  |
| Commentary   | The delivery of housing in urban centres will ensure that development occurs where appropriate facilities are available. Barry and Penarth already have well established local facilities, with additional services being developed as part of the Barry and Penarth regeneration effort. Mixed effects would be realised in rural areas, with benefits for the new settlement and the surrounding area, although existing rural access to facilities issues would not be addressed elsewhere.   |            |                |                    | This option will promote and enhance sustainable facilities in both rural and urban areas ensuring that existing facilities remain viable. It will be essential to ensure that there is sufficient service capacity to cope with significant new populations. There would be scope for the Vale of Glamorgan Council to set policies outlining planning obligations for new housing developments to enhance facilities in these areas.  |            |                |                    | Positive benefits in terms of facilities provision would be realised in the urban centres to the south east and also across rural areas. Positive effects would be realised in the area of the new settlement in particular which would create combined major positive affects in rural areas. There would be scope for the Vale of Glamorgan Council to set policies outlining planning obligations for new housing developments to enhance facilities in these areas  |            |                |                    |
| <b>3. To maintain and improve access for all.</b>                            |  |            |                |                    |   |            |                |                    |   |            |                |                    |
| Performance  | +  | +          | 0              | M                  | +   | +          | 0              | M                  | +   | +          | 0              | M                  |
| Commentary   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Positive effects would be realised in the urban centres to the south east and Rhosee in terms of access to the built environment. Mixed effects would be realised in rural areas, with benefits for the new settlement, and associated with windfall development, but existing rural access issues may not be addressed elsewhere. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. |            |                |                    | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Growth in settlements across the Vale of Glamorgan in both urban and rural areas will ensure that a greater proportion of the population will have access improved access to facilities and specific buildings. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. |            |                |                    | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. The increased spread of population around the Vale of Glamorgan should help to improve access to facilities and decrease isolation. New development across the Vale of Glamorgan has potential to include good design measures to improve local access. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. |            |                |                    |

| <b>4. Reduce the causes of deprivation.</b>                                |  |            |                |                    |   |            |                |                    |  |            |                |                    |
| Performance  | +  | -          | 0              | M                  | +   | +          | 0              | M                  | +  | ++         | 0              | M                  |
| Commentary   | Positive effects on tackling the causes of deprivation would be realised in the urban centres to the south east where multiple deprivation is a key issue. Multiple deprivation is not a key issue for the rural Vale, although isolation and access to services are areas of concern. Reduction in deprivation may be achieved as a cascade effect from the new rural settlement and through windfall development, although this may be limited in extent.  |            |                |                    | Multiple deprivation is mainly within the urban south east part of the Vale of Glamorgan. A balanced spread of growth should increase the number of decent homes and business development, contributing to tackling the causes of deprivation (e.g. Barry). Large growth centres would contribute significantly to employment and residential growth in rural parts of the Vale. However, this would not necessarily reduce deprivation associated with limited access to facilities experienced in more remote areas.  |            |                |                    | Positive benefits on tackling the causes of deprivation would be realised in the urban centres to the south east and also across rural areas. A reduction in deprivation may also be achieved as a cascade effect from the new rural settlement through windfall development.  |            |                |                    |
| <b>5. To maintain, protect and enhance community spirit.</b>               |  |            |                |                    |   |            |                |                    |  |            |                |                    |
| Performance  | +  | 0          | 0              | L                  | +   | +          | 0              | M                  | +  | +          | 0              | M                  |
| Commentary   | Development presents an opportunity to promote distinctiveness, reduce the fear of crime and provide community facilities to enhance community spirit. As this option focuses development in urban settlements and new rural settlements, benefits will be focussed on these areas.  |            |                |                    | The effect of growth on community spirit is likely to be positive. Growth in these areas may contribute to community spirit through an increase in development of facilities and good design.   |            |                |                    | Growth in these settlements may contribute to community spirit through an increase in development of facilities and good design.   |            |                |                    |
| <b>6. To minimise the causes and manage the effects of climate change.</b> |  |            |                |                    |   |            |                |                    |  |            |                |                    |
| Performance  | +/   | 0          | 0              | L                  | +/  | +/         | 0              | M                  | +  | +/         | 0              | M                  |
| Commentary   | Provision of housing and employment in urban centres across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Depending on exact location and design of development, flood plains may or may not be affected. Development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmore-by-Sea, Aberthaw, Barry and Penarth. Furthermore, parts of Sully, Dinas Powys and Barry, are at risk of fluvial flooding. |            |                |                    | A diverse spread of development has the potential to limit travel distances and hence vehicular greenhouse gas emissions. The option also promotes more development in the urban areas already served by public transport. Location of development in smaller settlements will be determined through a sustainability test thereby ensuring that growth occurs where there are sufficient facilities to sustain it. Nonetheless, other issues such as increased energy use as a result of increased development, destruction of green sinks, building on floodplains etc. can negatively affect this objective. A large area of floodplain exists to the south east of Barry. |            |                |                    | The option could contribute to a reduction in commuting as there would be more accessible opportunities for public transport and the increased spreads of homes, jobs and services would lead to fewer/shorter trips being made and hence fewer vehicular greenhouse gas emissions. However, more development overall and particularly a new rural settlement will lead to increased energy use, increased flooding potential, destruction of green sinks, more rapid run-off rates etc. |            |                |                    |
| <b>7. To minimise waste.</b>   |  |            |                |                    |   |            |                |                    |  |            |                |                    |
| Performance  | 0  | 0          | 0              | M                  | 0   | 0          | 0              | M                  | 0  | 0          | 0              | M                  |
| Commentary   | The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The South East Wales Regional Waste Plan and the Landfill Directive limits govern the levels of waste going to landfill. Development could result in the reuse of disused buildings in these urban areas, reducing waste construction material. New development would need to have consideration of location of waste facilities.   |            |                |                    |   |            |                |                    |  |            |                |                    |

| Performance   | ++   | --         | 0              | M                  | +   | M          | 0              | M                  | ++  | M          | 0              | M                  |
| Commentary  | Major positive effects would be realised in the urban centres to the south east and Rhoose where there are more areas of previously developed land to use. Areas such as Barry and Penarth have significant amounts of brownfield land that can be re-developed. There is the potential however, that development may occur on edge of town, greenfield land as the availability of brownfield reduces. Negative effects would be realised in rural areas, as a single new settlement is likely to use a significant tract of greenfield land, although preference can be given to the selection of sites that contain brown field land within the rural Vale.   |            |                |                    | There is the opportunity to redevelop brownfield sites in urban areas. Development in rural settlements would need to be focused within existing built up areas to ensure that the countryside is protected from inappropriate development. However, this will depend upon the availability of land for development within existing built up areas. The option also presents the opportunity to encourage good quality high-density developments in both urban and rural areas.   |            |                |                    | As development is mainly focused in existing urban areas, there is high potential for previously developed land to be used. In the rural settlements development in greenfield land may occur depending upon the availability of land for development within existing built up areas. It is expected that major development (both housing and employment) at St Athan and Barry would use largely previously developed land. A new rural settlement is likely to be on largely greenfield land and would have an adverse effect on the countryside and landscape, although preference can be given to the selection of sites that contain brown field land within the rural Vale. |            |                |                    |
| <b>9. To protect and enhance the built and natural environment.</b>           |  |            |                |                    |   |            |                |                    |   |            |                |                    |
| Performance   | +  | M          | 0              | M                  | +   | -          | 0              | M                  | +   | -          | 0              | M                  |
| Commentary  | Positive effects would be realised in the urban centres to the south east and Rhoose through enhancement and regeneration. Mixed effects would be realised in rural areas, as a new settlement would be damaging to the existing, higher value environment, while deflecting potentially damaging development from other rural areas. In urban settlements, it is increasingly becoming evident that some brownfield sites are significant habitats for important species <sup>2</sup> . These habitats may be affected by development in urban areas. Furthermore, Rhoose, Barry and Sully are located in close proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline. |            |                |                    | The option would focus development on existing settlement and therefore encourage brownfield development rather than use of greenfield sites. Development may result in the regeneration of built areas (Barry for example) as new development acts as a catalyst for general environmental improvements. In rural areas, this would be negative due to the value of the existing environment that will potentially be adversely affected. The environment surrounding rural settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage outside of settlement boundaries. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. |            |                |                    | Positive benefits would be realised in the urban centres to the south east through enhancement and regeneration. In rural areas, this would be negative due to the value of the existing environment that will potentially be adversely affected. Negative effects would be realised in more sensitive rural areas, and more so due to the potentially adverse impacts of the new rural settlement. Although this could be reduced through the preferential selection of brown field sites within the rural Vale for the location of this settlement.   |            |                |                    |
| <b>10. To provide a high quality environment within all new developments.</b> |  |            |                |                    |   |            |                |                    |   |            |                |                    |
| Performance   | ++   | ++         | 0              | M                  | +   | +          | 0              | M                  | +   | ++         | 0              | M                  |
| Commentary  | Positive effects would be realised in the urban centres to the south east and Rhoose where new development can provide high quality design. Major positive effects would be realised in rural areas, as a single new settlement would have the opportunity to be designed to a very high quality standard.   |            |                |                    | New developments have the opportunity to be well-designed from the outset in order to include high quality, sustainable materials, use of open space, access etc and can promote a positive community spirit. This will apply to Barry, St Athan and other identified settlements in the urban south east.  |            |                |                    | The new developments have the opportunity to be well-designed from the outset in order to include high quality, sustainable materials, use of open space, access etc and can promote a positive community spirit. | Performance | ++   | - | 0 | M   | + | + | 0   | M | + | + | 0 | M |
| Commentary  | <p>Focusing growth in the urban south east will ensure that development is located in areas with easy access to services as well as to neighbouring areas. Most urban settlements in the south east are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service.</p> <p>However, in the rural Vale isolation of settlements may continue to be an issue, as there would continue to be limited provision of facilities and employment in rural communities. Bus service provision is considered to be poor in Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst other rural settlements (as detailed in the LDP Sustainability Appraisal Draft Scoping Report, February 2007). Development of a new rural settlement would not alleviate these problems.</p> <p>It is likely that the Vale will continue to be an attractive commuter zone due to its proximity to Cardiff and the M4.</p> |   |   | <p>Development in urban areas should enable people to work locally, therefore reducing the need to travel to work and commute to Cardiff. Most urban settlements are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service.</p> <p>Increased development of homes and facilities around existing rural centres could also improve access to sustainable transport modes as a cascade effect.</p> <p>Through the sustainability test, residents of rural communities that lack appropriate facilities may have to continue travelling long distances to use facilities in other settlements.</p> <p>It is likely that the Vale will continue to be an attractive commuter zone due to its proximity to Cardiff and the M4.</p> |   |   | <p>Focusing development in urban areas where there is already a higher population and better access to public transport should have a positive effect on local sustainable transport use. Increased development of homes and facilities around existing rural centres could also improve access to sustainable transport modes as a cascade effect.</p> <p>It is likely that the Vale will continue to be an attractive commuter zone due to its proximity to Cardiff and the M4.</p> |   |   |   |   |   |

| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |            |                |  |          |    |   |                    |         |          |                |                    |
| Performance   | +   |            | +              | M  | +        | +  | 0   | M                  | +       | +        | 0              | M                  |
| Commentary  | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. Although unemployment is not a key issue in rural settlements, most residents are employed outside their settlement and some outside the Vale of Glamorgan. There are limited local employment opportunities in rural settlements. Through this strategy, rural areas would continue to be affected by the lack of local employment opportunities. If the new rural settlement is sustainable and self-contained, it is assumed that it would provide local employment opportunities in the area of development and its surroundings. However, this would not alleviate the employment issues in much of the rest of the Vale of Glamorgan (e.g. in Barry and Penarth). |            |                | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. It may be difficult to attract some large employers due to inappropriately sized employment sites to smaller settlements therefore limiting the range of job opportunities that can be provided in rural settlements. Development in St Athan is expected to create many local jobs. Overall, although job opportunities are likely to increase, the range of jobs available may remain limited due to the dispersed nature of development.                                  |          |    | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. | <b>14. To maintain and enhance the vitality and viability of the Vale's town, district and local centres.</b> |   |            |                |  |          |    |   |                    |         |          |                |                    |
| Performance   | ++  |            | 0              | M  | ++       | ++ | 0   | M                  | ++      | +        | 0              | M                  |
| Commentary  | Positive effects would be realised in the urban centres to the south east and Rhosee through regeneration and investment. There is an opportunity to make urban centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. Mixed effects would be realised in rural areas, as a new settlement has potential to be well-designed to ensure its own vitality. However, this largely depends upon the exact design of the development. It will not address vitality problems that exist in some of the rest of the Vale's rural settlements.   |            |                | This option offers a significant opportunity to enhance vitality and viability through new development in both urban and rural areas. There is an opportunity to make town centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |          |    | This option offers a significant opportunity to enhance vitality and viability through new development in both urban and rural areas. There is an opportunity to make town centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). | <b>15. To promote appropriate tourism.</b>  |   |            |                |  |          |    |   |                    |         |          |                |                    |
| Performance   | ?   | 0          | 0              | M  | ?        | ?  | 0   | L                  | ?       | ?        | 0              | M                  |
| Commentary  | The option is unlikely to significantly affect the development of tourism in the Vale, although increased development and improvement of associated infrastructure in urban areas could contribute to a tourist infrastructure.   |            |                | Increased development and infrastructure could contribute to tourist provision across the Vale, although this would be uncertain at this scale.  |          |    | As with Option 5, increased development and infrastructure could contribute to a tourist infrastructure across the intervention areas, although this would be uncertain at this scale.  |                    |         |          |                |                    |

# LOCAL DEVELOPMENT PLAN

# INITIAL SUSTAINABILITY APPRAISAL REPORT

December 2007

## Non Technical Summary

### 1. Introduction.

- 1.1 This document is the initial Sustainability Appraisal (SA) Report of the Vale of Glamorgan Local Development Plan (2011-2026) Draft Preferred Strategy. It explains how the appraisal has been undertaken and also how the process has assisted in the development of the Council's Draft Preferred Strategy.

### 2. The Local Development Plan.

- 2.1 Part 6 of the Planning and Compulsory Purchase Act 2004 (The Act) requires each local authority in Wales to prepare a Local Development Plan (LDP). The Vale of Glamorgan Council formally began work on its LDP in January 2007 which will set out the Council's land use strategy for the period 2011-2026. The purpose of the LDP is to identify the anticipated level of future development, the types of development that may occur and where such development may take place during the life of the Plan.
- 2.2 When adopted the LDP will constitute the development plan for the Vale of Glamorgan and will supersede the Council's Adopted Unitary Development Plan (UDP) 1996-2011. The Adopted LDP will be the primary document for use in the determination of planning applications and appeals. In producing the LDP the Council will also need to take account of other strategies and plans that it produces, such as the Community Strategy. It must also complement national and regional plans and strategies such as the Wales Spatial Plan and South East Wales Regional Waste Plan<sup>1</sup>.

### 3. SA & Strategic Environmental Assessment (SEA)

- 3.1 As part of the LDP process, the Council is required<sup>2</sup> to undertake a SA of the Plan, which incorporates the requirements of the SEA Directive<sup>3</sup>, as transposed by the Welsh SEA Regulations<sup>4</sup>.
- 3.2 The reason for undertaking an SA of the emerging LDP is to assist the Council in identifying any likely significant economic, environmental and social effects of the LDP. In doing so, this allows the Council to ensure that the LDP includes suitable mitigation measures to minimise any negative effects and also maximises positive effects.

### 4. The Stages of the SA.

- 4.1 The Welsh Assembly Government's LDP Manual defines the five main stages in conducting a SA as:

<sup>1</sup> Section 62(5), The Planning and Compulsory Purchase Act (2004)

<sup>2</sup> Planning and Compulsory Purchase Act, 2004

<sup>3</sup> Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment, June 2001

<sup>4</sup> Environmental Assessment of Plans and Programmes (Wales) Regulations 2004

- **STAGE A:** Setting the context and objectives, establishing the baseline and deciding on the scope;
- **STAGE B:** Developing and refining options and assessing effects;
- **STAGE C:** Preparing the SA Report;
- **STAGE D:** Consulting on the preferred option of the development plan and SA report; and
- **STAGE E:** Monitoring significant effects of implementing the development plan.

Stages A, B and C for the Draft Preferred Strategy were undertaken between October 2006 and November 2007.

## 5. SA Framework.

5.1 During 2006, the Council began work on its SA Scoping Report, which would provide the framework within which the emerging LDP would be assessed. As part of this work, the Council collected a range of key economic, social and environmental data, and undertook an assessment of key policies, plans and programmes, produced at international, national, regional and local level. The purpose of this was to identify key sustainability issues relating to the Vale of Glamorgan, as well as key sustainability objectives contained within other documents that would also need to be considered within the SA framework.

5.2 From this, the following 15 key sustainability objectives were developed which form the basis of the SA appraisal:

- To provide the opportunity for people to meet their housing needs.
- To maintain, promote and enhance the range of local facilities.
- To maintain and improve access for all.
- Reduce the causes of deprivation.
- To maintain, protect and enhance community spirit.
- To minimise the causes and manage the effects of climate change.
- To minimise waste.
- To use land effectively and efficiently.
- To protect and enhance the built and natural environment.
- To provide a high quality environment within all new developments.
- To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.
- To reduce the need to travel and enable the use of more sustainable modes of transport.
- To provide for a diverse range of local job opportunities.
- To maintain and enhance the vitality and viability of the Vale's town, district and local centres.
- To promote appropriate tourism.

5.3 A fuller account of the sustainability issues, baseline information and key sustainability objectives that have informed the SA framework is contained within the Vale of Glamorgan Local Development Approved Sustainability Scoping Report (July 2007), and can be viewed on the Council's website at:

[http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/LDP\\_SA\\_Scoping\\_Report.pdf](http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/LDP_SA_Scoping_Report.pdf)

## 6. Appraisal methodology.

- 6.1 In order to appraise each element of the Draft Preferred Strategy, a matrix was developed based on guidance provided by the Office of the Deputy Prime Minister (ODPM)<sup>5</sup>. The performance of the options against the SA objectives was recorded in the matrix as shown below:

|     |  |
|-----|--|
| ++  | The proposed option strongly contributes to the achievement of the SA objective  |
| +   | The proposed option contributes to the achievement of the SA objective   |
| 0   | There is no clear relationship between the achievement of the option and the SA objective or the relationship is negligible                                    |
| -   | The proposed option detracts from the achievement of the SA objective  |
| --  | The proposed option strongly detracts from the achievement of the SA objective   |
| +/- | The proposed option both contributes and detracts from the achievement of the SA objective   |
| ?   | The relationship is dependent on the way in which the aspect is managed.<br>Sufficient information may be unavailable to enable an assessment to be made.      |
| L   | Certainty regarding the indicated performance of the option against the SA objective is low and further information may be needed to increase certainty.       |
| M   | Performance of the option against the SA objective has been determined with some certainty although further information would assist the appraisal.            |
| H   | The performance of the option against the SA objective has been determined with high certainty as sufficient information is available to assist the appraisal. |

## 7. What has been assessed so far?

- 7.1 At this stage of the LDP process, a SA has been undertaken of the vision, strategic objectives, spatial options, and core strategic policies that form the Draft Preferred Strategy. The appraisal of these components has assisted in the development of a series of strategic objectives, spatial options and core strategic policies that are consistent with the sustainability objectives set out in the SA Scoping Report.

## 8. Appraisal of the LDP Vision & Objectives.

- 8.1 The vision and strategic objectives set out the scope and aspirations for the LDP. As the Vision is an overarching succinct statement, containing social, economic and environmental elements, it was not considered necessary to undertake a detailed appraisal of the Vision against the SA objectives. Rather, a strategic overview of the sustainability implications of the draft Vision was undertaken (see Appendix 1).
- 8.2.2 The SA highlights that the Visions' aspiration for people to be able to enjoy a high quality of life in a safe environment, providing opportunities to improve health, prosperity and well being for individuals and the wider community is strongly compatible with the key sustainability objectives for reducing the causes of deprivation and encouraging social inclusion (e.g. housing, local job opportunities and improving access). Similarly, the SA indicated a direct relationship between the SA objectives for maintaining, protecting and enhancing community spirit.

<sup>5</sup> Annex 10 of the *Sustainability Appraisal of Regional Spatial Strategies and Local Development Frameworks*, ODPM, November 2005

- 8.2 The appraisal identified a number of uncertain outcomes relating to the SA objectives for climate change and waste minimisation. This is considered inevitable given that the economic aspect of the vision would require new development to take place, thus involving increased use of natural resources and energy. Therefore, the SA suggested that further consideration of these issues should be considered in the development of the LDP strategic objectives and policies.

## 9. Appraisal of the Strategic Options.

- 9.1 Initially, the Council identified six strategic LDP options that could, in land use terms provide a framework for guiding future development within the Vale of Glamorgan. Following a key stakeholder workshop a further three hybrid options were suggested by stakeholders and nine strategic options were therefore assessed against the SA methodology. The nine strategic options considered for assessment were:

### Officer Options

**Option 1:** Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy – the business as usual scenario).

**Option 2a:** Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).

**Option 2b:** Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).

**Option 3:** Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).

**Option 4:** A rural new settlement able to promote sustainable self – containment.

**Option 5:** Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development

### Hybrid Options

**Option 6:** A hybrid of option 1 and Option 4: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.

**Option 7:** A hybrid of options 2b and 5. Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test. (Based on current populations)

**Option 8:** A hybrid of options 5 and 4. Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

- 9.2 The appraisal indicated that options 5, 7 and 8 performed best against the SA objectives. However, when assessed against national planning guidance contained within Planning Policy Wales (2002), it was concluded that option 5 would provide the most appropriate spatial option to meet the social, economic and environmental needs of the Vale.

## **10. Appraisal of the LDP Core Strategic Policies.**

- 10.1 The Council has developed 8 strategic objectives and 13 Core Strategic Policies (CSP) which seek to deliver the LDP vision and satisfy the requirements of national planning guidance.

- 10.2 Overall, the appraisal of the strategic policies was considered to be positive. However, some policies did perform less favourably against a number of the environmental SA objectives. For example, policies on housing could result in negative effects on the built environment, although this would be offset by policies that seek to protect the natural and built environment.

## **11. Likely significant effects of the Plan and how the SA has influenced the LDP Draft Preferred Strategy.**

- 11.1 The SA has found that the Draft Preferred Strategy will make a significant contribution to the progression of sustainable development objectives for the Vale of Glamorgan, within the context of the future planned housing and employment growth set out in the Draft Preferred Strategy. However, the SA has indicated that a key issue for the Council will be to minimise the negative effects of implementing the strategy through influencing how and where future development takes place.

- 11.2 In particular, the SA has highlighted the potential cumulative effects resulting from future development within the Vale, such as an increase in the use of energy and water resources, as well as increased waste generation. Increased greenhouse emissions have also been identified, the effects of which may have implications for the Vale's natural and built assets. In this regard, there is a risk that future development may have a significant effect on the character of the Vale's towns and villages, and also on the rural landscape.

- 11.3 There are also extensive opportunities to improve quality of life across the Vale - and in this regard the SA of the Preferred Option has indicated that by ensuring that future development is directed to sustainable locations with good public transport access this will assist in offsetting energy usage and will assist in creating viable, vibrant communities. In addition the SA also highlighted that the following probable positive effects may arise from the Draft Preferred Strategy:

- Ensures provision is made for economic growth and employment opportunities. This has the potential to deliver benefits to the most deprived wards in the Vale as well as encouraging rural diversification.
- Encourages the sustainable management of natural resources.
- Reduces the need to develop on greenfield sites.
- Minimises adverse effects on the built and natural environment.
- Offers a range and choice of housing sites.
- Offers development opportunities to enhance or provide new local facilities, thus contributing towards community spirit.
- Provides regeneration opportunities particularly in urban areas.
- New development has the potential to reduce the need to travel, thereby contributing towards climate change and social inclusion.
- Encourages new development which is responsive in meeting national and regional objectives for climate change.

## **12. The Next Steps.**

- 12.1 The SA process will continue throughout the preparation of the LDP. This will involve the appraisal of the more detailed criteria based policies and allocated development sites. This information will be compiled into the final Environmental Report detailing the appraisal of the full LDP. This Environmental Report will be made available for public consultation as part of the formal consultation on the Deposit Draft Plan, and will also be taken into consideration by the Planning Inspectorate during the public examination of the Deposit Draft LDP.

## **13. How to comment on the report.**

- 13.1 As part of the 6 week public consultation on the Draft Preferred Strategy, the Council is inviting comments on this initial SA report between noon on the 16<sup>th</sup> January 2008 and noon on the 27<sup>th</sup> February 2008. If you wish to make any comments or suggestions please use the relevant comment form which is available from deposit locations or can be downloaded from the Council's website at:

## **1. Introduction.**

- 1.1 This document is the Initial Sustainability Appraisal (SA) Report outlining the evaluation of the LDP Vision, Strategic Options, Objectives and Core Strategic Policies. The appraisal has informed the development of the Draft Preferred Strategy that provides the overarching land use framework for the emerging Vale of Glamorgan Local Development Plan (LDP). When finalised, the LDP will set out the principles and policy framework for planning and development in the Vale of Glamorgan between 2011 and 2026.

## **2. Statutory Requirements.**

### **2.1 The Local Development Plan.**

- 2.1.1 Part 6 of the Planning and Compulsory Purchase Act 2004 (The Act) requires each local authority in Wales to prepare a Local Development Plan (LDP). The Vale of Glamorgan Council formally began work on its LDP in January 2007 which will set the Council's land use strategy for the period 2011-2026. The purpose of the LDP is to identify the anticipated level of future development as well as the types of development that may occur and where such development may take place during the life of the Plan.

- 2.1.2 When adopted the LDP will constitute the development plan for the Vale of Glamorgan and will supersede the Council's Adopted Unitary Development Plan (UDP) 1996 -2011. The Adopted LDP will be the primary document for use in the determination of planning applications and appeals. In producing the LDP the Council will also need to take account of other strategies and plans that it produces, such as the Community Strategy. It must also complement national and regional plans and strategies such as the Wales Spatial Plan and South East Wales Regional Waste Plan<sup>6</sup>.

### **2.2 SA and Strategic Environmental Assessment (SEA)**

- 2.2.1 As part of the process of preparing the LDP, the Council is required<sup>7</sup> to undertake a SA of the Plan, which incorporates the requirements of the SEA Directive<sup>8</sup>, as transposed by the Welsh SEA Regulations<sup>9</sup>.
- 2.2.2 The SA process seeks to improve the sustainability performance of the Plan by testing its various components against sustainability objectives. The appraisal identifies areas where improvements can be made to its contribution to achieving sustainable development. It is considered to be an integral part of the LDP process and as such the Council, prior to progressing work on the LDP, developed a SA framework consisting of a series of objectives covering a range of social, economic and

<sup>6</sup> Section 62(5), The Planning and Compulsory Purchase Act (2004)

<sup>7</sup> Planning and Compulsory Purchase Act, 2004

<sup>8</sup> Directive 2001/42/EC on the assessment of the effects of certain plans and programmes on the environment, June 2001

<sup>9</sup> Environmental Assessment of Plans and Programmes (Wales) Regulations 2004

environmental topics, against which the sustainability of the emerging plan will be tested during its preparation.

- 2.2.3 A fuller account of the sustainability issues, baseline information and key sustainability objectives that have informed the SA framework is contained within the Vale of Glamorgan Local Development Plan Approved Sustainability Appraisal Scoping Report (July 2007), and can be viewed on the Council's website at:

[http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/LDP\\_SA\\_Scoping\\_Report.pdf](http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/LDP_SA_Scoping_Report.pdf)

### **3. How the SA has informed the LDP process.**

- 3.1 The systematic appraisal of the various components that make up the LDP Draft Preferred Strategy have assisted in the development of a series of strategic objectives consistent with the sustainability framework set out in the SA Scoping Report. This included the appraisal of strategic options that informed the Council in the identification of a Draft Preferred Strategy for the LDP that is best placed to address the key economic, social and environmental issues affecting the Vale of Glamorgan. At this stage, the SA has assisted in the development of the Core Strategic LDP policies and seeks to mitigate any potential adverse affects resulting from the Draft Preferred Strategy.

### **4. How to comment on the report.**

- 4.1 As part of the 6 week public consultation on the Draft Preferred Strategy, the Council is inviting comments on this initial SA report between noon on the 16<sup>th</sup> January 2008 and noon on the 27<sup>th</sup> February 2008. If you wish to make any comments or suggestions please use the relevant comment form which is available from deposit locations or can be downloaded from the Council's website at:

[http://www.valeofglamorgan.gov.uk/living\\_menu/planning/planning\\_policy/local\\_development\\_plan.aspx](http://www.valeofglamorgan.gov.uk/living_menu/planning/planning_policy/local_development_plan.aspx)

### **5. Background.**

#### **5.1 Purpose of SA**

- 5.1.1 The rationale behind the undertaking of SA is to identify any likely significant effects that the implementation of a plan or programme may have in terms of economic, environmental and social considerations. In relation to the emerging Vale of Glamorgan LDP, this report outlines the following:

- The appraisal of the Plan's vision, objectives and core strategic policies against the sustainability appraisal objectives;
- The identification of any likely significant effects of the LDP Draft Preferred Strategy (including alternatives); and
- Proposed mitigation measures against any adverse effects.

## **5.2 When was the SA undertaken?**

5.2.1 The SA was undertaken between May 2007 and November 2007, in tandem with the development of the LDP's Strategic Objectives, Core Strategic Policies and the identification of the Draft Preferred Strategy. In doing so, the Council was able to ensure that the findings of each stage would inform the next, thus reducing inconsistencies between the SA framework and the development of the Draft Preferred Strategy.

## **5.3 Independent Assessment.**

5.3.1 The SA of the LDP Vision, Strategic Options, Objectives and Draft Preferred Strategy, including Core Strategic Policies was undertaken by the Vale of Glamorgan Council, with assistance from independent consultants Hyder Consulting. The consultants also ensured that the Council satisfied the requirements of the SEA Regulations. The use of consultants also ensures that an objective and independent appraisal of the implications for sustainable development is undertaken.

## **5.4 Consultation.**

5.4.1 In accordance with the Vale of Glamorgan LDP Delivery Agreement (October 2006) , the Council has engaged with environmental consultation bodies and relevant stakeholders prior to drafting the SA Scoping Report by holding an external stakeholder workshop on 11<sup>th</sup> October 2006. Stakeholders were provided with background information on the Vale of Glamorgan to assist them in identifying the sustainability issues and a summary of key objectives from relevant policies, plans or programmes to base their discussions on. The sustainability issues and objectives derived at the workshop were used in the development of the SA framework.

5.4.2 A further Council officer workshop was held to consider the findings of the earlier stakeholder workshop and to obtain officers' views on the findings. Representatives from various service areas of the Council were represented including waste management, highways, housing, education and countryside. The officers were generally in agreement with the findings from the external stakeholder workshop and were able to offer some additional expertise to the debate. Further information on these workshops can be found on the Council's website at:

[http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/SA\\_Stakeholder\\_Report.pdf](http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/SA_Stakeholder_Report.pdf)  
[http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/SA\\_Officer\\_Report.pdf](http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/SA_Officer_Report.pdf)

5.4.3 The Draft Scoping Report was issued for formal public consultation between the 12<sup>th</sup> February 2007 and the 19<sup>th</sup> March 2007, and following amendments, the Council formally adopted the Scoping Report on the 6<sup>th</sup> June 2007.

## **5.5 Compliance with the SEA Directive and Regulations.**

5.5.1 At this pre-deposit stage of the LDP process, the Council is required to consult on the Plan's vision, strategic options, the Draft Preferred Strategy and key policies for the LDP. The Initial SA Report can therefore, only

address these issues. The deposit LDP will include further details on how any negative effects identified within the SA will be addressed. This additional detail will be reflected in the final SA Report (which also constitutes the Environment Report required by the SEA Regulations) and will include the assessment undertaken to identify development sites for inclusion within the draft deposit plan.

5.5.2 The SEA regulations and stages are explained in 'A Practical Guide to the Strategic Environmental Assessment Directive' (ODPM & WAG 2005). The requirements for reporting the SEA process are identified in the first column of the table below. Where the section of this report or the SA Scoping Report satisfies these requirements they are identified in the second column.

| Table 2: Environmental Report Requirements   |   |
|--|---|
| Contents of the SEA report as required by the SEA regulations.   | Where covered   |
| An outline of the contents, main objectives of the plan and relationship with other relevant plans.  | Section 2 of the SA Scoping Report<br>Section 8 of this report              |
| The relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan.  | Section 4.4 of SA Scoping Report<br>Section 7.3 of this report.             |
| The environmental characteristics of areas likely to be significantly affected   | Section 3 of the SA Scoping Report<br>Section 7 of this report              |
| Any existing environmental problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance   | Section 4 of the SA Scoping Report<br>Section 7 of this report.             |
| The environmental protection objectives, established at international, Community or Member State level, which are relevant to the plan or programme and the way those objectives and any environmental considerations have been taken into account during its preparation.   | Section 2 of the SA Scoping Report<br>Section 7.2 Table 3 of this report.   |
| The likely significant effects on the environment, including short, medium and long-term effects, permanent and temporary effects, positive and negative effects, and secondary, cumulative and synergistic effects, on issues including (a) biodiversity; (b) population; (c) human health; (d) fauna; (e) flora; (f) soil; (g) water; (h) air; (i) climatic factors; (j) material assets; (k) cultural heritage, including architectural and archaeological heritage; (l) landscape; and (m) the inter-relationship between the issues referred to in sub-paragraphs (a) to (l). | Section 9.1 of this report  |
| The measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme.  | Section 5.7 of the SA Scoping Report<br>Sections 8.8 and 9.2 of this report |
| An outline of the reasons for selecting the alternatives dealt with, and a description of how the assessment was undertaken including any difficulties encountered in compiling the required information.  | Section 8 of this report  |
| A description of the measures envisaged concerning monitoring in accordance with regulation 17   | Section 5.7 of SA scoping Report<br>Section 10.2 of this report.            |
| A non-technical summary of the information provided under paragraphs 1 to 9.   | Pages I-vi of this report.  |

## 6. Approach to the SA.

### 6.1 The SA Process.

6.1.1 To ensure that the policies in the LDP promote the principles of sustainable development, a SA of the LDP, incorporating the requirements of the SEA Directive, is being undertaken. The LDP and the SA processes are being carried out in an iterative and integrated manner. Figure 1.1 below outlines these two processes, and highlights which stage of the process this report relates to.

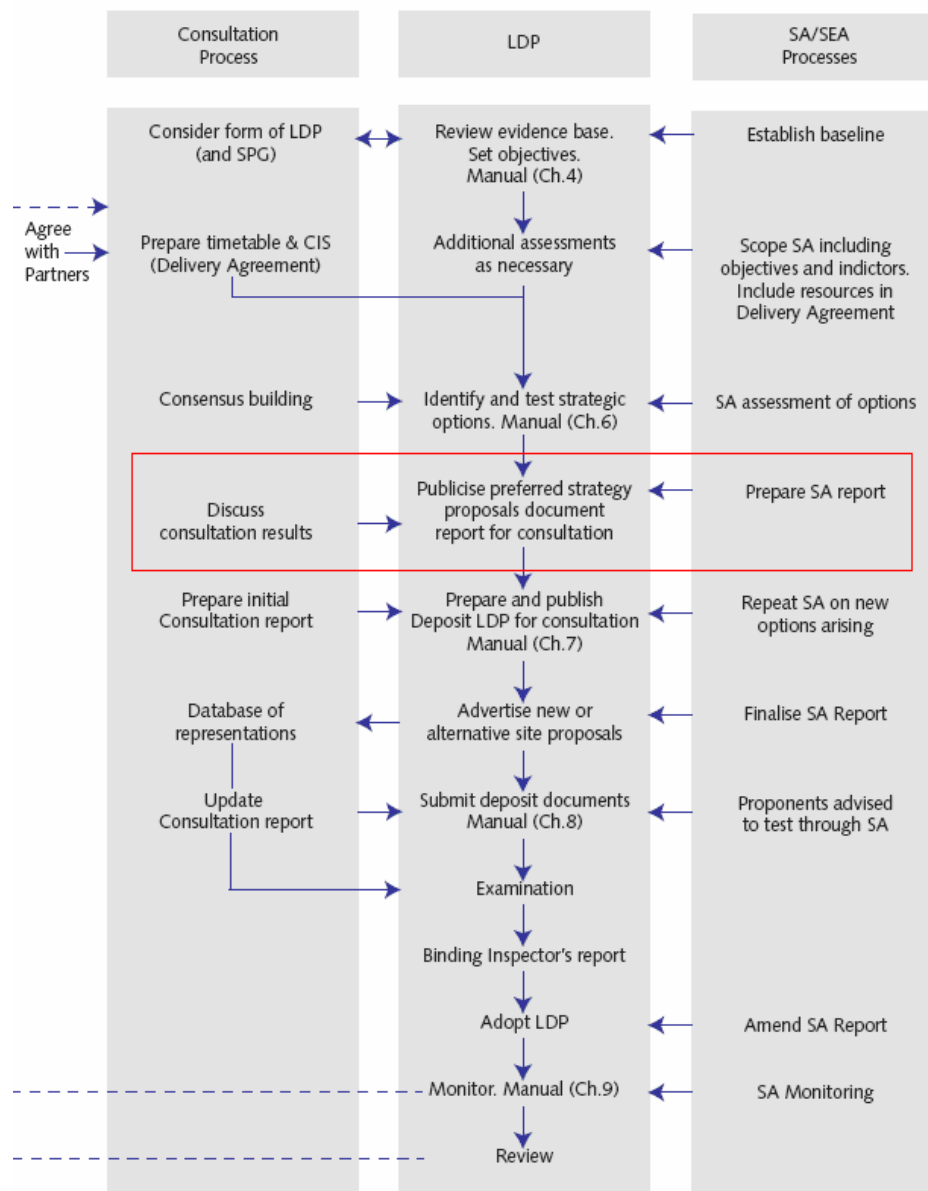

Figure 1.1: Adapted from the LDP Manual, Welsh Assembly Government (June 2006)

## 6.2 Appraisal Methodology.

6.2.1 The SA Framework, which sets out the Council's sustainability objectives, indicators and targets, has been used as the principal tool in the appraisal of the LDP at key stages of its preparation. To date these have been the Vision, Strategic Options, the Draft Objectives, the Draft Preferred Strategy and the Core Strategic Policies. In identifying the Draft Preferred Strategy, the Council has also taken into consideration the requirements of national planning guidance contained within Planning Policy Wales (2002) and the Wales Spatial Plan (2004), which are two key documents that the Council must have regard to in preparing its LDP.

6.2.2 The objectives and aims which form the basis of the appraisal methodology were developed as part of the Council's work on its LDP SA Scoping Report (July 2007). These were informed by the appraisal of other relevant plans and programmes that may either influence or be

influenced by the Plan, the collation of baseline data and consultation with key stakeholders and statutory organisations.

6.2.3 The appraisal of the vision, options and core strategic policies against the SA objectives was carried out using a matrix-based approach as shown in the Appendices. The matrix was based on ODPM guidance<sup>10</sup> and has been set out to enable the comparison of the options. The matrix also ensures that the spatial nature of effects is taken into consideration together with the significance of the identified effects. The performance (direction and severity) of the options against the SA objectives is recorded in the matrix using the symbols shown below.

|     |   |
|-----|---|
| ++  | The proposed option strongly contributes to the achievement of the SA objective   |
| +   | The proposed option contributes to the achievement of the SA objective  |
| 0   | There is no clear relationship between the achievement of the option and the SA objective or the relationship is negligible                               |
| -   | The proposed option detracts from the achievement of the SA objective   |
| --  | The proposed option strongly detracts from the achievement of the SA objective  |
| +/- | The proposed option both contributes and detracts from the achievement of the SA objective  |
| ?   | The relationship is dependent on the way in which the aspect is managed.<br>Sufficient information may be unavailable to enable an assessment to be made. |

6.2.4 The commentary provided under each SA objective in the matrix sets out the reasoning behind the determined performance of the options and highlights any key issues associated with the option. Also provided in the matrix, is an indication of the levels of certainty with which the likely effects of the options have been determined. The symbols used to describe certainty are shown below.

|   |  |
|---|--|
| L | Certainty regarding the indicated performance of the option against the SA objective is low and further information may be needed to increase certainty.       |
| M | Performance of the option against the SA objective has been determined with some certainty although further information would assist the appraisal.            |
| H | The performance of the option against the SA objective has been determined with high certainty as sufficient information is available to assist the appraisal. |

6.2.5 A description is provided below of the approach to this appraisal using the matrix.

6.2.6 Although the options have not been appraised against each individual aim, the aims have been taken into consideration in determining the performance of the options against the overall objectives and have been used to guide the appraisal. The Core Strategic Policies however, were appraised against the aims under each of the SA Objectives. The various aspects considered while carrying out the appraisal are as follows:

- **Direction of impact:** Whether the effects are positive, negative or neutral

<sup>10</sup> Annex 10 of the *Sustainability Appraisal of Regional Spatial Strategies and Local Development Frameworks*, ODPM, November 2005

- **Significance:** Whether the effects would be slightly or greatly significant
- **Spatial Scale:** The locality of the effects in the Vale of Glamorgan i.e. whether they would affect the rural and/or urban areas. Any transboundary effects outside the study area were also considered.
- **Level of certainty:** The level of certainty in predicting the effects based on the information available to carry out the appraisal.

6.2.7 The temporal and cumulative nature of the predicted effects was explored where possible and details provided in the commentary. More detailed determination of the temporal and cumulative aspects as well as consideration of mitigation measures will be undertaken at the next stage of the SA/SEA in which more specific policies and strategic sites will be appraised.

6.2.8 This approach should therefore allow the effects to relate to the value of sustainability baseline in a particular area through assessing every option on its own merit and relating it to the baseline and issues/opportunities.

### 6.3 Assumptions and Limitations.

6.3.1 In carrying out the assessment, a number of assumptions were made in relation to the strategy options. Furthermore, in some cases, there were limitations to the level of certainty with which the appraisal could be completed. The following are the assumptions made in this assessment:

- Growth will mainly include housing development while local facilities will be provided through planning conditions and S106 agreements.
- Housing will meet all needs in terms of tenure, type and affordability.
- Growth can help tackle causes of deprivation (as seen in housing led growth successes through pathfinder/housing market renewal schemes) through the provision of new decent homes and other benefits through planning gains.
- Planning policy would set minimum design standards to ensure that buildings are designed to be accessible to all.
- Planning policy would provide siting guidance to minimise effects of development on natural and historic environments.
- New developments would be designed to enhance community spirit through local distinctiveness and a reduction in the fear of crime.
- Local community and leisure facilities will be provided together with new housing and employment developments.

6.3.2 The rationale behind the determination of the performance of the options and the core strategic policies against the SA objectives, sought to relate direction of impact to the value of baseline in the Vale of Glamorgan. In adopting this approach, every option or policy is considered on its own merit against the SA objectives and is related to the sustainability baseline as well as the key issues and opportunities.

6.3.3 At this stage, the appraisal provides an overall indication of the potential effects of the options against the SA objectives. The level of detail that could be provided in the appraisal is limited due to the strategic nature of the options, which does not allow for assessment at a settlement level. However, the level of detail is considered sufficient for the purposes of developing the Draft Preferred Strategy given that further work will be carried out as the full Deposit LDP is being prepared.

6.3.4 It should be noted that the appraisal of the strategy options is based on expert judgement and therefore has an element of subjectivity. However, the limitations of expert judgement have been reduced through the use of quantitative thresholds and legislative targets where possible within the assessment process.

#### **6.4 Difficulties encountered in compiling information or carrying out the assessment.**

6.4.1 In gathering the baseline data for the SA Scoping Report, the Council encountered difficulties in obtaining information on sustainability issues that related specifically to the Vale area. This was particularly the case for climate factors and environmental data such as energy consumption and CO<sub>2</sub> emissions, where it was necessary to use regional or national data. Similarly, in some instances data gaps were identified. However, the appraisal process allows for data to be collected as and when it is made available, for example through the monitoring provisions.

### **7. Development of the SA framework.**

This section outlines the processes that the Council undertook to identify the key sustainability issues within the Vale of Glamorgan that informed the assessment framework as set out in the Scoping Report.

#### **7.1 Limitations of the information and assumptions made.**

7.1.1 Wherever possible, the Council has endeavoured to obtain up-to-date and reliable baseline information. However, where this has not been available any gaps have been highlighted in the detailed table contained at Appendix 2 of the Council's SA Scoping Report. If practicable these gaps will be filled with baseline data gathered at later stages in the LDP process.

The information recorded for each indicator includes:

- Quantified information;
- Comparators and trends; and
- Issues for the SA / LDP

#### **7.2 Links to other policies, plans and programmes and sustainability objectives and how these have been taken into account.**

7.2.1 In preparing the SA framework an appraisal of other key policies, plans and programmes, produced at international, national, regional and local level was undertaken. The aim being to identify the key sustainability

objectives contained within them that would also need to be considered within the SA framework. Table 3 below provides a summary list of the key sustainability issues emerging from the review of these policies, plans and programmes.

Table 3: Key Sustainability Objectives from other Plans, Programmes &amp; Policies

### **7.3 Description of the social, environmental and economic baseline characteristics and the business as usual future baseline.**

7.3.1 In developing the SA framework, the Council also compiled and reviewed a range of social, economic and environmental baseline data. This assisted in the identification of key sustainability issues affecting the Vale of Glamorgan that needed to be considered by the SA framework and the emerging LDP. In addition, the data also provides a basis for predicting and monitoring the effects of the Plan.

7.3.2 The detailed baseline data for the Vale of Glamorgan is contained at Appendix 2 of the Scoping Report; however a brief overview of the social, environmental and economic issues of the Vale of Glamorgan is outlined below:

#### **Social.**

7.3.3 The Vale of Glamorgan has a diverse society. It has some of the most affluent wards in Wales, such as Peterston-Super-Ely where the average annual household income is £44,839. However, parts of Barry fall within the highest 10% of most deprived areas in Wales. The Vale has an ageing population, and whilst population numbers have steadily increased over the last few decades, average household size has decreased. Geographically, the Vale is part rural and part urban, and as such it has a relatively low population density compared to the rest of the South East Wales region. There are different social issues in the rural Vale, such as poor access to services, compared to the urban Vale where issues such as poor health are more apparent. Whilst actual crime in the Vale is lower than the Welsh average, the community's perception of crime is still an issue. In respect of Welsh language, only 8.5% of the Vale's population can speak, read and write Welsh, compared to the national average of 15.8%.

#### **Environmental.**

7.3.4 The Vale of Glamorgan benefits from a wide range of environmental assets. It has a number of local and national designated sites of nature conservation value, including two designated as European sites under the Habitats Directive. The Vale also contains areas of ancient woodland, woodland trust reserves, country parks and areas of common land. Around half of the Vale's coastline falls within the designated Glamorgan Heritage Coast and a vast area of the authority has been designated as Special Landscape Area. In terms of cultural heritage, the Vale has an extensive range of listed buildings, county treasures and scheduled ancient monuments. The Vale has 38 conservation areas, including one in Penarth which is specially protected under Article 4 of the Town and Country Planning Act 1990 (as Amended). The abundance of natural and built environmental assets in the Vale creates issues in terms of protection against harmful effects; at a local level from new development and at a global level from climate change. The vast majority of the land in the Vale of Glamorgan is agricultural land, which is under ever increasing pressure from new development, particularly as the number of brownfield sites is depleted. Another issue for the Vale is the overall deficit in public open space and playing field provision. Waste levels have increased

year on year, despite an increase in the amount of recycling, and like the national trend, energy consumption has increased annually in the Vale.

### **Economic.**

- 7.3.5 The Vale's economy must be considered in the regional context due to the close proximity to Cardiff, for example, a large proportion of Vale residents work outside the authority (46%). In addition, Cardiff is a source of goods, services and leisure activities for the Vale's residents. Vacancy rates in the town centres of Barry and Llantwit Major are high, in part due to the competition from the regional shopping centre of Cardiff. However, Cowbridge is a more vibrant town centre due to its niche market / tourism appeal.
- 7.3.6 Unemployment rates in the Vale are comparable with the national trends. However, there are fairly large numbers of economically inactive people (e.g. retired persons) especially in the rural parts of the Vale, and certain parts of Barry have higher unemployment rates. The Vale has a number of large employers and has a range and choice of designated employment sites. However, a number of these have been subjected to pressure for alternative development uses e.g. housing. The rural Vale has witnessed the gradual decline in traditional agricultural industries; therefore increased emphasis has been given to farm diversification. The Vale has the opportunity to increase appropriate tourism due to its coastal setting and attractive landscape.
- 7.3.7 Transport is a major factor for the Vale, car ownership has increased and communities are becoming more dependent on the private car to access goods and services. In addition congestion is an issue at peak times on the routes in and out of Cardiff at key junctions. The Vale is home to Cardiff International Airport and the port of Barry.
- 7.3.8 Access to housing is also a significant issue. House prices have steadily increased in the Vale in respect of all house types and there is a general lack of affordable housing provision. The fall in household size has implications in terms of under occupation of the existing housing stock and the need for new housing.

### **7.4 Business as usual.**

- 7.4.1 The SEA Directive requires identification of *“the relevant aspects of the current state of the environment and the likely evolution thereof without the implementation of the plan or programme”* (Annex 1 (b)).
- 7.4.2 Therefore, the key sustainability issues identified for the Vale of Glamorgan from all sources have been analysed to assess the likely scenario if there was no LDP for 2011-2026 (see Table 4 below). This prediction is difficult as it is dependant upon a wide range of unknown factors. Therefore, this scenario is based on the likely land use implications for the Vale of Glamorgan in the absence of a framework to guide the use and development of land. It does not however take into consideration other plans, programmes and policies that may also influence the potential effects on these issues, for example Building Regulations which govern the way buildings are constructed.

Table 4 Likely significant environmental, social and economic effects under "a no plan" scenario

|               | Issue  | Potential 'No Plan' Scenario for the Vale of Glamorgan  |
|---------------|--|---|
| SOCIAL        | Housing  | <ul style="list-style-type: none"> <li>▪ Continual increase in demand for and potential shortfall of houses alongside increase in house prices</li> <li>▪ Continued fall in the provision of affordable housing</li> <li>▪ Development of housing on a windfall basis without a strategic framework – an appeal led development control system</li> </ul> |
|               | Lack of Local Facilities                                   | <ul style="list-style-type: none"> <li>▪ Continued loss of local facilities with no significant new provision</li> <li>▪ Continued movement outside Vale to access goods and services elsewhere</li> </ul>  |
|               | Access for all   | <ul style="list-style-type: none"> <li>▪ Continued minimum provision for mobility impaired</li> <li>▪ Protection provided under the Disability Discrimination Act 1995</li> </ul>   |
|               | Deprivation  | <ul style="list-style-type: none"> <li>▪ Continued isolation of deprived communities</li> </ul>   |
|               | Lack of community spirit                                   | <ul style="list-style-type: none"> <li>▪ Continued missed opportunity for community resource</li> <li>▪ Continued high perception of crime</li> </ul>   |
| ENVIRONMENTAL | Climate change   | <ul style="list-style-type: none"> <li>▪ Causes of climate change at a local level would continue to increase</li> <li>▪ Consequences of climate change at a local level would pose an increasing threat</li> </ul>   |
|               | Waste  | <ul style="list-style-type: none"> <li>▪ Continual increase in municipal waste levels and fly tipping despite increase in recycling</li> <li>▪ Continued lack of waste management facilities in the Vale</li> </ul>   |
|               | Impact of new development on built and natural environment | <ul style="list-style-type: none"> <li>▪ No strategic policy framework to control the impact of new development – an appeal led development control system</li> <li>▪ Listed Buildings, Habitats and Biodiversity are protected by other legislation (but does not encourage enhancement).</li> </ul>   |
|               | Quality of new development, particularly residential       | <ul style="list-style-type: none"> <li>▪ No improvement in the quality of design of new developments due to a lack of statutory framework – an appeal led development control system</li> </ul>   |
|               | Degradation of cultural heritage and historic environment  | <ul style="list-style-type: none"> <li>▪ Continued degradation of historic environment with no strategic framework for improvement or protection</li> <li>▪ Listed Buildings are protected by other legislation (but does not encourage enhancement).</li> <li>▪ Continued lack of cultural facilities</li> </ul>   |
| ECONOMIC      | Transport and accessibility                                | <ul style="list-style-type: none"> <li>▪ Continued reliance on the car to access goods, services and employment, and associated traffic, congestion, parking problems and negative impact on the environment.</li> <li>▪ Continued growth in freight by unsustainable means e.g. air and road.</li> </ul>   |
|               | Employment   | <ul style="list-style-type: none"> <li>▪ Continued pressure on existing and allocated employment sites for alternative uses</li> <li>▪ Continual increase in reliance on Cardiff and beyond for employment</li> <li>▪ Continual decline in the rural economy</li> </ul>   |
|               | Retail   | <ul style="list-style-type: none"> <li>▪ Continued fall in the vitality and viability of Barry Town Centre</li> <li>▪ Continued pressure for growth of out-of-town retailing</li> <li>▪ Continued increase in retail expenditure outside the Vale</li> </ul>  |
|               | Tourism  | <ul style="list-style-type: none"> <li>▪ Unfettered tourism growth in some areas could harm the Vale's natural resources e.g. landscape, biodiversity, heritage etc.</li> <li>▪ Continued missed opportunities for tourism weaken the Vale's economy</li> </ul>   |

## 7.5 Main social, environmental and economic issues and problems identified.

7.5.1 From the review of policies, plans and programmes, and the analysis of the baseline data, including the findings from the stakeholder workshop, a number of key sustainability issues were identified and used in the development of the objectives and indicators in the SA framework. Table 5 shows the sustainable issues that were identified during the SA Scoping Process and stakeholder consultations.

Table 5: Key Sustainability Issues within the Vale of Glamorgan

|               | Key Issue                       | Identifying factors  |
|---------------|---------------------------------|--|
| <b>SOCIAL</b> | <b>Housing</b>                  | <ul style="list-style-type: none"> <li>▪ Lack of affordable housing and shortage of temporary accommodation</li> <li>▪ Increased housing demand / need</li> <li>▪ Increasing house prices</li> <li>▪ Increasing need for smaller dwellings due to smaller households – under occupation of large dwellings</li> <li>▪ Lack of range and choice of property types and tenure to meet demand</li> <li>▪ Potential conflict between housing development and other land uses e.g. open countryside, biodiversity, landscape, employment, retail etc.</li> </ul>  |
|               | <b>Lack of local facilities</b> | <ul style="list-style-type: none"> <li>▪ Residents need to travel outside the Vale for some types of health care</li> <li>▪ Lack of local retailing facilities e.g. shops, pubs, restaurants, cafes etc.</li> <li>▪ Lack of public open space (formal and informal, indoor and outdoor), pressure for development of existing sites</li> <li>▪ Lack of local employment opportunities</li> <li>▪ Lack of local facilities in new residential developments (e.g. Rhoose Point, Pencoedtre, Cogan Hall Farm etc.)</li> <li>▪ High level of outward movement and expenditure especially to Cardiff, e.g. services, retail spend, employment etc.,</li> <li>▪ Lack of burial land / crematoria within the Vale</li> <li>▪ Over capacity in schools and falling need / demand for school places in some areas – potential to lead to school closures</li> </ul> |
|               | <b>Access for all</b>           | <ul style="list-style-type: none"> <li>▪ Lack of provision for special needs groups, especially mobility impaired e.g. ramps, lifts, hearing loop systems, signage etc. in public buildings, streetscape and new housing developments.</li> <li>▪ Ageing population, therefore more people affected by mobility issues</li> </ul>  |
|               | <b>Deprivation</b>              | <ul style="list-style-type: none"> <li>▪ Isolated areas of deprivation especially in Barry and Penarth: <ul style="list-style-type: none"> <li>➢ Low economic activity (e.g. unemployed)</li> <li>➢ Low educational achievement (e.g. Gibbonsdown and Court)</li> <li>➢ Poor health (Barry, Penarth, St. Athan and St. Brides)</li> <li>➢ Income inequality – Gibbonsdown and Court wards average household income approximately £22,000 less than Peterston-Super-Ely</li> </ul> </li> </ul>  |
|               | <b>Lack of community spirit</b> | <ul style="list-style-type: none"> <li>▪ Missed opportunity to work together as a community</li> <li>▪ Lack of community facilities</li> <li>▪ Lack of community ownership / responsibility</li> <li>▪ Lack of local identity, especially in new developments</li> <li>▪ Lower levels of crime than national average but high perception of crime</li> </ul>   |

Table 5: Key Sustainability Issues within the Vale of Glamorgan

|             | Key Issue   | Identifying factors  |
|-------------|---|--|
| ENVIRONMENT | Climate change  | <ul style="list-style-type: none"> <li>▪ Causes: pollution (pockets of pollution in the eastern Vale) from traffic and industry, over-reliance on energy generated from fossil fuels, loss of woodlands and countryside, etc.</li> <li>▪ Consequences: increased risk of flooding, changes to farming practices (e.g. growing different crops), impact on biodiversity, economic impact, human lifestyle impact etc.</li> </ul>  |
|             | Waste   | <ul style="list-style-type: none"> <li>▪ Increased levels of municipal waste produced year on year</li> <li>▪ Lack of waste management / recycling facilities</li> <li>▪ Fly-tipping throughout the Vale of Glamorgan</li> </ul>   |
|             | Impact of development on built and natural environment    | <ul style="list-style-type: none"> <li>▪ Visual impact on open countryside / landscape / coast</li> <li>▪ Consequences for biodiversity, flora and fauna – Vale has a large number of statutory and non-statutory designated nature conservation sites</li> <li>▪ Loss of open spaces / recreation (urban and rural)</li> <li>▪ Impact on built environment and threat to cultural heritage</li> <li>▪ The majority of housing (60%) in recent years has been built on sustainable brownfield sites, but this is a dwindling resource</li> <li>▪ Long-term demand for minerals across the South Wales Region</li> <li>▪ Impact on water quality and water resources</li> </ul> |
|             | Quality of new development particularly residential       | <ul style="list-style-type: none"> <li>▪ Poor design – visually uninspiring without local distinctiveness (e.g. public art, finishing materials etc)</li> <li>▪ Lack of local community facilities</li> <li>▪ Estates designed for motorcars - poor permeability for pedestrians and lack of facilities for cyclists</li> <li>▪ Lack of off-street car parking</li> <li>▪ Missed potential for sustainable building design, drainage and materials</li> </ul>  |
|             | Degradation of cultural heritage and historic environment | <ul style="list-style-type: none"> <li>▪ Large number of historic buildings, designations and protected monuments</li> <li>▪ Insensitive new development damaging built environment</li> <li>▪ Proliferation of highway signs and modern infrastructure in historic towns e.g. Cowbridge.</li> <li>▪ Lack of funding to protect or enhance historic environment</li> <li>▪ Some neglect of listed buildings, conservation areas, ancient monuments etc.</li> <li>▪ Ignorance and complacency</li> <li>▪ Lack of cultural facilities e.g. theatres, museums, art galleries, public art, etc.</li> </ul>   |

Table 5: Key Sustainability Issues within the Vale of Glamorgan

|         | Key Issue                   | Identifying factors  |
|---------|-----------------------------|--|
| ECONOMY | Transport and accessibility | <ul style="list-style-type: none"> <li>▪ Congestion at peak times on key routes to Cardiff</li> <li>▪ Inappropriate traffic management measures</li> <li>▪ General lack of parking (e.g. town centres, new housing developments etc)</li> <li>▪ Insufficient public transport (especially in rural Vale)</li> <li>▪ Lack of provision for cyclists and pedestrians</li> <li>▪ Lack of 'park and ride' and 'park and share' sites</li> <li>▪ Increased car ownership</li> <li>▪ Increased reliability on cars for access to goods and services</li> <li>▪ Increasing commuter distances to work</li> <li>▪ Environmental impact of vehicular traffic e.g. noise, emissions etc</li> <li>▪ Continued growth of air freight and passenger transport</li> <li>▪ Increase in total freight movements, but sustained decrease in rail freight</li> <li>▪ Access to MoD St Athan and Cardiff International Airport</li> </ul> |
|         | Employment                  | <ul style="list-style-type: none"> <li>▪ Limited employment opportunities within Vale</li> <li>▪ Pressure for development for alternative uses on employment sites e.g. retail, car parking, residential etc.</li> <li>▪ Reliance on travel to work by car</li> <li>▪ Existing industrial sites with insufficient infrastructure for HGVs and poor public transport links e.g. Llandow</li> <li>▪ Reliance on Cardiff / Bridgend for employment</li> <li>▪ Decline in traditional agricultural industry</li> <li>▪ Potential for increased home working</li> <li>▪ Rural diversification</li> </ul>  |
|         | Retail                      | <ul style="list-style-type: none"> <li>▪ Higher proportion of vacant units in Barry town centre than Cowbridge</li> <li>▪ Congestion, traffic and perceived lack of parking</li> <li>▪ Missed potential for an evening economy – potential for local jobs</li> <li>▪ Growth of out-of-town retail developments especially for food goods e.g. Culverhouse Cross, and in adjoining authorities - Cardiff Bay, Talbot Green.</li> <li>▪ Lack of suitable sites for bulky goods retailers within town centres</li> <li>▪ Infrequent public transport to Cowbridge town centre</li> </ul>  |
|         | Tourism                     | <ul style="list-style-type: none"> <li>▪ Predominance of residential development at Barry Waterfront, Penarth Marina and promenade - not enough mixed use development to encourage tourism</li> <li>▪ Lack of evening economy in Barry, especially Barry Island</li> <li>▪ Growth in tourism has potential to conflict with other land uses e.g. farming, biodiversity, landscape, coast etc.</li> <li>▪ Growth in farm diversification</li> <li>▪ Tourism uses generally accessed by car</li> </ul>   |

## **7.6 The SA framework, including objectives, targets and indicators.**

- 7.6.1 The SA framework is presented in Table 6. This is the set of objectives, targets and indicators that has been developed in order to assess the elements of the LDP. The aim has been to identify a set of objectives that can be used to assess how well the Plan meets the goals of sustainable development both at a global and local scale. The framework has been developed by considering, the key sustainability issues identified for the Vale of Glamorgan (section 4.3), the objectives identified in the PPP review (section 4.1) and consultation with key stakeholders and statutory consultees.

**Table 6: Sustainability Appraisal Framework- objectives, targets and outline indicators.**

| 1. Housing                               |  |   |  |  |
|--|--|---|--|--|
|  | Objective  | Indicator   | Source   | Target   |
| Social<br>I<br>Environmental<br>Economic | <b>To provide the opportunity for people to meet their housing needs.</b><br><b>Aims:</b> <ul style="list-style-type: none"> <li>▪ Provide a mix of dwelling types and tenure</li> <li>▪ Build in sustainable locations, with good access to local facilities</li> <li>▪ Provide affordable housing</li> <li>▪ Preference for previously developed land in sustainable locations</li> </ul>  | Annual affordable housing provision as a % of all house builds  | JHLA Studies                                   | Increase the level of affordable housing to meet the identified need.                                  |
|  |  | Average house price compared to average incomes   | VOG Housing Strategy                           | Bring average house prices closer to average incomes   |
|  |  | Proportion of households unable to purchase a property  | VOG Housing Strategy                           | Decrease the proportion of households unable to purchase a property                                    |
|  |  | Population / household structure  | Census   | Match dwelling type to population needs  |
|  |  | Dwelling type / tenure  | VOG Housing Strategy                           | Increase the range and choice of dwelling types and tenures to meet demand                             |
|  |  | % of new housing built on previously developed land   | JHLA Studies                                   | Increase the % of new housing built on previously developed land                                       |
|  |  | House build rates   | JHLA Studies                                   | Match house build rates with population needs.   |
| 2. Local Facilities                      |  |   |  |  |
|  | Objective  | Indicator   | Source   | Target   |
| Social<br>Economic                       | <b>To maintain, promote and enhance the range of local facilities.</b><br><b>Aims:</b> <ul style="list-style-type: none"> <li>▪ Meet the needs of existing communities throughout the Vale of Glamorgan</li> <li>▪ Provide appropriate facilities within new developments to meet the needs of future users</li> <li>▪ Ensure local facilities are suitable for purpose and easily accessible</li> <li>▪ Prevent the loss of existing well-used and valued local facilities</li> </ul> | Number of new facilities (e.g. shops, restaurants, pubs, community centres, libraries, medical centres, recreational facilities, places of worship etc.) as a ratio of new house builds and / or population | Planning application database<br><br>Census    | Increase in the number of new local facilities as a proportion of new house builds and / or population |
|  |  | Numbers of 'change of use' developments resulting in a loss of a community facility   | Planning application database                  | Reduce the loss of community facilities where appropriate.   |
|  |  | Number of people who consider services / facilities are difficult to access   | VOG Opinion Surveys                            | Reduce the number of people who consider services / facilities are difficult to access                 |
|  |  | Number of people who travel outside the Vale to access goods, services or employment  | Census<br>Sewta surveys<br>VOG Opinion Surveys | Reduce the number of people who travel outside the Vale to access goods, services or employment        |

**3. Access for all**

|                      | Objective  | Indicator   | Source                               | Target   |
|----------------------|--|---|--------------------------------------|--|
| Social Environmental | <b>To maintain and improve access for all.</b><br><br><b>Aims:</b> <ul style="list-style-type: none"> <li>Ensure the built and natural environment is easily accessible to all the Vale's community</li> <li>Improve public perception of access</li> <li>Benefit health and well being through social inclusion within the physical environment</li> <li>Promote 'life-time' homes</li> </ul> | Number of alterations to public buildings and spaces to provide for disabled persons access | Planning / building control database | Increase the number of alterations to public buildings and spaces to provide for disabled access |
|                      |  | Public perception of ease of access within the built environment                            | VOG Opinion Surveys                  | Improve public perception of ease of access within the built environment                         |

## 8. The Appraisal.

8.1 In line with the guidance provided within the LDP Manual, the following elements of the LDP have been appraised so far:

- The LDP Vision
- The eight Strategic Objectives (through a process of compatibility assessment with the SA objectives).
- The alternative options for the Draft Preferred Strategy, i.e the spatial ones and
- The core strategic policies

The results of the appraisal are provided below.

### 8.2 The LDP Vision.

8.2.1 The Council has agreed to adopt the existing Vision contained in the Vale of Glamorgan Community Strategy (2003-2013), as the vision for the LDP<sup>11</sup>, thus ensuring that the LDP seeks to contribute towards the aspirations of the Community Strategy. The Vision reads as follows:

8.2.2 *“Our Vision for the Vale is a place that is safe, clean and attractive, where individuals and communities have opportunities to improve their health, prosperity and well-being, and where there is a strong sense of community in which local groups and individuals have the capacity and incentive to make an effective contribution to the future of the area”*

8.2.3 Since the Vision is an over arching and succinct statement, containing social, economic and environmental elements, it was not considered necessary to undertake a detailed appraisal of the Vision against the SA objectives. Rather, a strategic overview of the sustainability implications of the draft Vision was undertaken (see Appendix 1), and is presented below.

8.2.4 The SA highlights that the Visions’ aspiration for people to be able to enjoy a high quality of life in a safe environment, providing opportunities to improve health, prosperity and well being for individuals and the wider community is strongly compatible with the key sustainability objectives for reducing the causes of deprivation and encouraging social inclusion (e.g. housing, local job opportunities and improving access). Similarly, the SA indicated a direct relationship between the SA objectives for maintaining, protecting and enhancing community spirit.

8.2.5 The appraisal identified a number of uncertain outcomes relating to the SA objectives for climate change and waste minimisation. This is considered inevitable given that the economic aspect of the vision would require new development to take place, thus involving increased use of natural resources and energy. Therefore, the SA suggested that further consideration of these issues should be undertaken in the development of the LDP strategic objectives and policies.

---

<sup>11</sup> Vale of Glamorgan Cabinet Meeting 27<sup>th</sup> February 2007, Minute C2911

### 8.3 Strategic LDP Objectives.

8.3.1 The LDP includes the following eight strategic objectives that set out the guiding principles of the Plan:

**Objective 1:** To ensure that development within the Vale of Glamorgan uses land both effectively and efficiently; and to promote the sustainable use and management of natural resources.

**Objective 2:** To ensure that development within the Vale of Glamorgan makes a positive contribution towards reducing the impact of, and mitigating against the adverse effects of climate change.

**Objective 3:** To provide the opportunity for people in the Vale of Glamorgan to meet their housing needs.

**Objective 4:** To maintain, enhance and promote community facilities and services in the Vale of Glamorgan.

**Objective 5:** To foster the development of a diverse and sustainable local economy that meets the needs of the Vale of Glamorgan and that of wider South East Wales Region.

**Objective 6:** To reduce the need for Vale residents to travel to meet their daily needs and enabling them greater access to sustainable forms of transport.

**Objective 7:** To protect and enhance the Vale of Glamorgan's historic, built, and natural environment.

**Objective 8:** To sustain and further the development of sustainable communities within the Vale of Glamorgan, providing opportunities for living, learning, working and socialising for all.

### 8.4 Key findings of the SA of the Strategic LDP Objectives.

8.4.1 The appraisal of the LDP objectives sought to test their compatibility against the SA objectives, thereby identifying any potential conflict or omission between both sets of objectives. The appraisal matrices (see table 7 below) revealed that the objectives are broadly consistent with the sustainability objectives. In some instance, however, the appraisal indicated a level of uncertainty in relation to outcomes, as these were dependent on the nature and scale of development. Given the strategic nature of the policies it is considered acceptable for such uncertainties to be revealed at this stage of the SA appraisal, but it is anticipated that the level of uncertainty will be reduced as the LDP develops, for example in the identification of site specific allocations.

- 8.4.2 In some instances, the appraisal did reveal areas of potential conflict between the LDP objectives and the SA objectives. For example, the LDP objectives for housing and employment (3 and 5) conflicted with SA objectives for climate change and waste minimisation. However, elsewhere the appraisal indicated that other LDP objectives would offset these potential conflicts, such as LDP objectives 1 and 2 (climate change and waste management). Consequently, when taken cumulatively, the SA appraisal of the LDP objectives indicate that they are generally compatible, with potential conflicts between certain objectives being offset by others.
- 8.4.3 In addition to testing the compatibility of the LDP objectives and SA objectives, the appraisal also provides a valuable insight into the type and scope of policies within the LDP that would further support the cumulative benefits that the LDP objectives seek to provide. Policies that were identified included those that sought to reduce the potential effects relating to climate change, waste generation and protection of natural and built assets.

Table 7: Compatibility of Key LDP Objectives with the SA Framework Objectives

| Key   |                       |     |  | SA OBJECTIVE | 1. To provide the opportunity for people to meet their housing needs | 2. To maintain, promote and enhance the range of local facilities | 3. To maintain and improve access for all | 4. Reduce the causes of deprivation | 5. To maintain, protect and enhance community spirit | 6. To minimise the causes and manage the effects of climate change | 7. To minimise waste | 8. To use land effectively and efficiently | 9. To protect and enhance the built and natural environment | 10. To provide a high quality environment within all new developments | 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage | 12. To reduce the need to travel and enable the use of more sustainable modes of transport | 13. To provide for a diverse range of local job opportunities | 14. To maintain and enhance the vitality and viability of the Vale's town, district and local centres. | 15. To promote appropriate tourism |  |

## 8.5 Strategic Options.

8.5.1 On May 24<sup>th</sup> 2007, the Council held a workshop with relevant stakeholders to discuss the suitability of six Strategic LDP Options developed by the Council that could, in land use terms provide a framework for guiding future development within the Vale of Glamorgan. As part of this workshop, stakeholders were asked to consider the merits and drawbacks of each option and to identify which would best address the economic, social and environmental issues previously identified. As a result of this workshop a further three hybrid options were suggested by stakeholders and as such nine strategic options were assessed against the SA methodology.

Details of these workshops can be found on the Council's website at:

[http://www.valeofglamorgan.gov.uk/living/planning/planning\\_policy/local\\_development\\_plan.aspx](http://www.valeofglamorgan.gov.uk/living/planning/planning_policy/local_development_plan.aspx)

8.5.2 The nine strategic options considered for assessment were:

### Officer Options

**Option 1:** Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy – the business as usual scenario).

**Option 2a:** Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).

**Option 2b:** Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).

**Option 3:** Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified).

**Option 4:** A rural new settlement able to promote sustainable self-containment.

**Option 5:** Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development

### Hybrid Options

**Option 6:** A Hybrid of Option 1 and Option 4: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.

**Option 7:** A Hybrid of Options 2b and 5. Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test. (Based on current populations)

**Option 8:** A Hybrid of Options 5 and 4. Concentrate development opportunities in Barry and the South East Zone. The St. Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.

8.5.3 The SA of the nine options sought to provide an indication of the options that would best assist spatially, in land use terms, the achievement of the sustainability objectives set out in the SA framework. The appraisal also identifies the likely significant environmental effects that may arise from each option, thus helping the Council to choose the preferred option and allowing policies to be developed that seek to mitigate against such effects. For example, the inclusion of policies that encourage travelling by sustainable transport modes may assist in off-setting any negative effects associated with car use on air pollution and climate change.

## 8.6 Key findings of the SA appraisal of the Strategic Options.

8.6.1 Overall, the appraisal highlighted that the options would have similar effects in terms of the environmental effects as demonstrated by the matrix at Appendix 2. The main differences relate to the where the likely social, economic and environmental benefits/disbenefits would occur. This is differentiated in broad geographical terms within the matrix by dividing the Vale between the Urban South East and the Rural Vale. This distinction was deemed most useful in describing how the likely effects of the options differ, depending upon whether they applied i.e. in rural or urban areas.

8.6.2 The key findings of the SA of the nine options are provided below, which can be viewed on the Council's website at [http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/SA\\_Officer\\_Report.pdf](http://www.valeofglamorgan.gov.uk/files/Living/Planning/Policy/LDP/SA_Officer_Report.pdf)

Option 1 would deliver benefits (including housing, local facilities and job opportunities) in urban areas alone.

Options 2a and 2b would lead to growth that is highly dispersed and not focused, therefore putting a strain on resources.

Option 3 would deliver benefits but only to rural settlements.

Option 4 would deliver benefits to the new settlement and its immediate surroundings.

Option 6 would deliver benefits to both rural and urban parts of the Vale of Glamorgan, although benefits in the rural parts would be limited to the new rural settlement.

Options 5, 7 and 8 would deliver certain benefits in both urban and rural settlements.

8.6.3 However, of the three options that were considered to deliver the most benefits across the Vale of Glamorgan, the appraisal indicated that the benefits of Option 8 would be more limited, as the majority of development may be focused on the new settlement. Notwithstanding this, it was considered that options 5, 7

and 8 demonstrated the best overall performance against the SA objectives and should be given further consideration.

## 8.7 Consideration of other Plans, Policies and Programmes in determining the Preferred Option.

8.7.1 In selecting the overall Draft Preferred Strategy the Council also assessed strategy options 5, 7 and 8 to ensure compatibility with national planning guidance contained within Planning Policy Wales (PPW) (2002), the Wales Spatial Plan and the Vale of Glamorgan Community Strategy (2003-2013). Accordingly, in selecting the preferred option consideration was given to the merits of each option against these documents. This approach is also commensurate with the SEA requirement for the SA framework to consider the influence that other plans, policies and programmes may have on the Plan, and vice versa.

8.7.2 In this regard, it is considered that **Option 8** would concentrate development amongst settlements in the South East Zone of the Vale, other larger settlements including a new rural settlement and as a consequence would be contrary to advice contained within PPW, which states that:

*“New settlements on greenfield sites are unlikely to be appropriate in Wales, and should only be proposed where such development would offer significant environmental, social and economic advantages over the further expansion or regeneration of existing settlements.” (Planning Policy Wales, paragraph 9.2.3 refers)*

8.7.3 Similarly, a new settlement within the rural vale could potentially detract or limit opportunities for regeneration in areas such as Barry, and the potential to maximise opportunities to reuse existing brownfield sites within existing settlements that are served by a range of transport modes and contain services and facilities. This assumption is supported by recent research that highlights that for a new settlement to be sustainable it would need to consist of a minimum of four to five thousand dwellings<sup>12</sup>. Given that the LDP housing requirement over the Plan period is 7500 new dwellings, the development of a settlement of this size would result in reducing the Plan’s ability to address economic and social issues elsewhere, for example the securing of affordable housing and delivery of improvements to existing community facilities. Consequently, this was considered by officers as being contrary to the Council’s Community Strategy, which aims to capitalise on regeneration opportunities within Barry and potential investment and improvement within the Vale’s other towns (page 7 refers).

8.7.4 The remaining 2 options delivered comparable sustainability benefits within both urban and rural areas of the Vale and were also considered to generally satisfy national planning guidance. However, **Option 7** was discounted as it was considered that the distribution of future development on the basis of

<sup>12</sup> Best Practice in Urban Extensions and New Settlements, Town & Country Planning Association (March 2007) paragraph 8.4.5. See also the Communities and Local Government Eco-Towns Prospectus (July 2007) which states that an essential requirement for future Eco-towns will be for them to consist of a minimum 5-10,000 dwellings (page 12 refers)  
<http://www.communities.gov.uk/documents/housing/pdf/eco-towns>

existing levels of population within settlements was too simplistic in planning future development. For instance, it ignores factors such as the role and function of existing settlements and their ability to accommodate growth. Furthermore, it was considered that distributing growth in this manner would limit the flexibility of the Plan to respond to potential unplanned circumstances, which could undermine the overarching strategy.

8.7.5 Subsequently, Option 5 was considered to be the most suitable strategy in land use planning terms and for assisting in addressing the objectives set out in the SA framework. The potential positive and negative effects of this option are set out below:

#### 8.7.6 Potential Positive Effects

- Delivery of benefits to both urban and rural parts of the Vale of Glamorgan as development would not be spread too thinly.
- Delivery of housing would be focused on the identified settlements.
- Local community facilities would be maintained and enhanced.
- New facilities may also be provided through planning conditions.
- High potential for previously developed land to be utilised, where it is available.
- Presents the opportunity to encourage good quality high-density developments in both urban and rural areas.
- Provides opportunities to bring about regeneration particularly in the urban centres, including the enhancement and protection of historic buildings.

#### 8.7.7 Potential Negative Effects

- New development has the potential to cause negative effects on the natural environment in and around the settlements identified.
- A number of rural settlements are located in existing special landscape areas, the character of which may be negatively affected by development.
- A number of settlements, namely, Rhoose, Barry and Sully are located in close proximity to the coastline, where growth and development may affect the coastal environment.
- There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC.

8.7.8 In identifying these potential negative effects the SA indicated that the potential effects can be mitigated through policy that protects these areas. Further consideration of this is detailed in the following section.

### **8.8 Proposed Mitigation Measures.**

8.8.1 Through the appraisal of the nine strategic options, the SA identified a number of common issues which the Council sought to address as part of the drafting of the Core Strategic Policies (CSPs) (Appendix 3). The CSPs in the Draft Preferred Strategy have also been subject to SA and Section 5.6 that follows provides more detail on this element of the SA. Table 8 provides a summary of the likely effects of the options considered and those strategic policies that have been developed to address the issues raised.

| Table 8: Key Potential Effects for all Options and Mitigation Measures contained with the Draft Preferred Strategy  |  |
|---|--|
| Likely effects associated with all Options  | Relevant Strategic Policies  |
| Considering the scale of proposed development, it is unlikely that any of the options would significantly affect community spirit in existing communities   | CSP1: Sustainable Development<br>CSP6: Planning Obligations<br>CSP5: Affordable Housing<br>CSP7: Retailing<br>CSP10: Built & Natural Environment |
| Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings.  | CSP1: Sustainable Development<br>CSP2: Climate Change<br>CSP3: Renewable Energy<br>CSP9: Minerals<br>CSP12: Sustainable Waste Management         |
| Parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan, amongst others, are at risk of fluvial flooding. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw and Barry. It would be necessary to develop policy that ensures that development is located in areas that are not at risk of flooding. | CSP1: Sustainable Development<br>CSP2: Climate Change<br>CSP3: Renewable Energy  |
| The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The levels of waste going to landfill are governed by the South East Wales Regional Waste Plan and the Landfill Directive limits. New development would however need to have consideration of location of waste facilities.  | CSP1: Sustainable Development<br>CSP12: Sustainable Waste Management   |
| Delivery of employment opportunities is likely to be limited by the availability of employment land, based on the <i>Employment Land and Premises Study</i> .   | CSP1: Sustainable Development<br>CSP8: Employment  |
| New development would need to be limited to within settlement boundaries wherever possible (with the exception of the new rural settlement).  | CSP1: Sustainable Development  |
| There is a potential that new land uses may conflict with agricultural uses in rural areas.   | CSP1: Sustainable Development<br>CSP10: Built & Natural Environment  |
| Design guidance would be necessary to ensure that the cultural heritage and the built environment are protected and enhanced; and   | CSP10: Built & Natural Environment   |
| Housing delivery would need to be accompanied by the provision of appropriate facilities  | CSP6: Planning Obligations   |

Source: Vale of Glamorgan LDP-Options Appraisal Report, November 2007, pages 21-23

8.8.2 As detailed above, the SA of Option 5, the Preferred Option, revealed several areas where there was potential for negative effects to arise. These were of a spatial nature, in that the strategy had the potential to positively meet the SA objective in the Urban South East, but this may not be the case within the rural Vale. For example the objective to provide for a diverse range of local jobs opportunities may be greatest achieved in urban areas where existing employment land opportunities exist. The table below highlights the relevant strategic policy, which includes mitigation measures that address the issues identified.

| <b>Table 9 : Negative Effects Associated with the Preferred Option and Mitigation</b>                             |   |   |
|---|---|---|
| <b>SA Objective</b>   | <b>Appraisal Summary</b>  | <b>Relevant Strategic Policies</b>                                  |
| <b>To protect and enhance the built and natural environment.</b>  | The natural environment in and around these settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. Furthermore, Rhose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. If development is carried out inappropriately in these areas, there are SSSIs that have the potential to be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. The policies referred to aim to avoid potential effects. | CSP10: Built & Natural Environment<br>CSP1: Sustainable Development |
| <b>To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b> | There are a large number of historic buildings, designation and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote. Growth will provide the opportunities in urban areas to improve the quality of cultural and historic environments, particularly with regards to historic buildings. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets. There are heritage features of value in rural areas that may be affected by new development.          | CSP10: Built & Natural Environment                                  |
| <b>To provide for a diverse range of local job opportunities.</b>   | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. It may be difficult to attract some large employers due to inappropriately sized employment sites to smaller settlements therefore limiting the range of job opportunities that can be provided in rural settlements. Development in St Athan is expected to create many local jobs. Overall, although job opportunities are likely to increase, the range of jobs available may remain limited due to the dispersed nature of development.   | CSP1: Sustainable Development<br>CSP8: Employment                   |

## 8.9 Assessment of the LDP Strategy Core Strategic Policies.

- 8.9.1 The Draft Preferred Strategy contains 12 Core Strategic Policies (CSP 1-12), the purpose of which is to deliver the Vision and objectives, and is highlighted through the cross referencing of the Core Strategic Policies and Strategic Objectives within the Draft Preferred Strategy document. This cross-referencing also seeks to maintain consistency between the SA appraisal of the objectives and the policies.
- 8.9.2 Overall, the appraisal of the strategic policies was considered to be positive (see Appendix 3). Where potential conflicts were identified these were as a result of the process of appraising each Core Policy against each SA objective, without consideration of other policies that are designed to mitigate against the effects of certain developments. For example the assessment highlighted that Policy CSP3 Housing would not support SA objectives that seek to protect the built environment, but that this aim was supported under CSP9. This is verified through the internal compatibility check of the LDP objectives as shown in the table below.

| CORE STRATEGIC LDP POLICY            | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 | 11 | 12 |
|--------------------------------------|---|---|---|---|---|---|---|---|---|----|----|----|
| 1. Sustainable Development           |   | ✓ | ✓ | ✓ | ✓ | ✓ | 0 | ✓ | ✗ | 0  | ✓  | ✓  |
| 2. Climate Change                    |   |   | ✓ | ✓ | ✓ | ✓ | 0 | 0 | 0 | ✓  | 0  | ✓  |
| 3. Renewable Energy                  |   |   |   | 0 | 0 | 0 | 0 | 0 | 0 | ✗  | 0  | 0  |
| 4 Housing Need                       |   |   |   |   | ✓ | ✓ | 0 | 0 | 0 | ✗  | 0  | ✗  |
| 5 Affordable Housing                 |   |   |   |   |   | ✓ | 0 | 0 | 0 | 0  | 0  | 0  |
| 6 Integrated Sustainable communities |   |   |   |   |   |   | ✓ | ✓ | 0 | 0  | ✓  | 0  |
| 7 Retailing                          |   |   |   |   |   |   |   | 0 | 0 | ✓  | 0  | 0  |
| 8 Employment                         |   |   |   |   |   |   |   |   | 0 | 0  | ✓  | 0  |
| 9 Minerals                           |   |   |   |   |   |   |   |   |   | 0  | 0  | ✓  |
| 10 Built and Natural Environment     |   |   |   |   |   |   |   |   |   |    | 0  | 0  |
| 11 Strategic Transport Improvements  |   |   |   |   |   |   |   |   |   |    |    | 0  |
| 12 Sustainable Waste Management      |   |   |   |   |   |   |   |   |   |    |    |    |

|-----|---|------------|---|----------------|---|--------------|
| Key | ✓ | Compatible | 0 | No direct link | ✗ | Incompatible |
|-----|---|------------|---|----------------|---|--------------|

- 8.9.3 Consequently, the appraisal recommended no changes to the 12 policies, but highlighted areas which would require further consideration during the drafting of more detailed site or issue specific policies in the Draft Deposit Plan, namely:
- Pollution associated with heavy industry could be addressed through planning requirements and the requirements under this policy to protect the environment.
  - Mitigate against potential conflicts to the built and natural environment through the development of detailed policies and site selection process.

- The inclusion of detailed policies requiring certain standards in terms of energy efficiency, landscaping and accessibility.

## **9. Significant social, environmental and economic effects of the Draft Preferred Strategy.**

9.1.1 The SA of the Draft Preferred Strategy has established at the strategic level the potential effect it will have on the SA objectives, and potential mitigation measures required to offset these effects. Where appropriate the likely effects of other relevant plans, programmes, strategies and initiatives were considered alongside the Draft Preferred Strategy. This enabled probable cumulative effects to be considered.

9.1.2 The main probable positive effects arising from the Draft Preferred Strategy are as follows:

- The Strategy will ensure that provision is made for economic growth and employment opportunities. This has the potential to assist in improving the most deprived wards in the Vale and also encourages rural diversification.
- Encourages the sustainable management of natural resources.
- Reduces the need to develop on Greenfield sites.
- The built and natural environment would be protected.
- The location of new housing would not be spread too thinly, thereby allowing for a range and choice of housing types to be provided.
- Development will provide opportunities to enhance or provide new local facilities, thus contributing towards community spirit.
- The strategy will provide regeneration opportunities particularly in urban areas.
- New development has the potential to reduce the need to travel, thereby contributing towards climate change and social inclusion.
- The strategy encourages new development to contribute towards meeting national and regional objectives for climate change.

9.1.3 In relation to negative effects, the appraisal highlighted a number of potential negative effects that are reliant on the type, size and location of future development and are as follows:

- New development has the potential to cause negative effects on the natural environment in and around the settlements identified.
- A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development.
- A number of settlements, namely, Rhose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment.
- There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC.

9.1.4 However, the increase in population that will occur during the Plan period will have a significant effect on the use of energy and natural resources, as will the development required to ensure that adequate housing and employment opportunities are provided for a larger resident population. Accordingly, in terms of the LDP itself, the likely significant effects will be:

- The use of natural resources, including energy during the construction stages.
- The increased demand for energy as a result of future planned development over the Plan period, for example 7500 new dwellings.
- Increased car ownership and use.
- Increased waste arisings.

9.1.5 However, the SA of the Preferred Option has indicated that the approach of ensuring that future development is directed to sustainable locations with good public transport access will assist in offsetting energy usage as well as assisting in creating viable, vibrant communities.

## **9.2 Proposed mitigation measures.**

9.2.1 In addition to the strategic policies set out in the Draft Preferred Strategy, the full deposit version of the LDP will need to include policies that ensure that future development proposals mitigate against any potential negative effects identified. These will include for example policies that ensure that the design of new buildings do not have an adverse effect on their surroundings; that provision of suitable ranges and types of dwellings are provided to meet local needs, or policies that ensure that development does not lead to, or increase flooding. As with the Draft Preferred Strategy, these policies shall be subject to SA appraisal to ensure consistency between the full deposit plan and the SA framework.

## **9.3 Uncertainties and risks.**

9.3.1 Given the strategic nature of the Draft Preferred Strategy, this stage of the appraisal process has only assessed likely general effects of the strategy, which could be further influenced by changes to other plans, policies and programmes, prior to and following the adoption of the LDP. For instance, future changes to building regulations may ensure that the performance of new buildings in terms of improved energy efficiency and reduce carbon dioxide (CO<sup>2</sup>) emissions, therefore contributing towards the SA objective for climate change. Similarly, aspirations for the implementation of strategic highway improvements may be affected by decisions taken at a regional or even national level.

## **10. Implementation.**

### **10.1 Links to other tiers of plans and programmes and the project level**

10.1.1 The Draft Preferred Strategy identifies a number of key plans, programmes and strategies that have been taken into consideration, namely:

- People, Places, Futures: The Wales Spatial Plan
- Planning Policy Wales
- South East Wales Regional Transport Plan
- South East Wales Regional Waste Plan
- South Wales Regional Technical Statement for Aggregates
- The Vale of Glamorgan Community Strategy 2008-2013

10.1.2 In addition, in developing the SA framework the Sustainability Appraisal Scoping Report identified other key themes of other plans, programmes and strategies and these have influenced the Council's SA objectives (See Table 3 above).

## 10.2 Proposals for monitoring.

10.2.1 Both the Planning and Compulsory Purchase Act (UK Government 2004) and the SEA Regulations (National Assembly for Wales 2004) require a monitoring strategy to be prepared for publication to monitor the effects of the LDP once it has been implemented. Table 6 of this report provides an indication of the potential indicators that the Council will use to monitor the sustainability performance of the LDP once adopted.

10.2.2 The final monitoring framework will be developed to ensure that it reflects the scope of the adopted Plan and its policies. However, the appraisal of the Draft Preferred Strategy has highlighted a number of significant effects that will need to be monitored. The below table provides an indication of how these effects could be monitored.

| Likely Significant Effect  | Proposed Monitoring Indicators  |
|--|---|
| The use of natural resources, including energy during the construction stages                  | <ul style="list-style-type: none"> <li>Percentage of secondary aggregates used in construction</li> </ul>   |
| The increased demand for energy as a result of future planned development over the plan period | <ul style="list-style-type: none"> <li>Number of dwellings constructed to Eco homes standard of good or above</li> <li>Number of residential developments that incorporate on site renewable energy generation</li> <li>Number of business units constructed to a minimum BREEAM good standard</li> </ul> |
| Increased car ownership and use  | <ul style="list-style-type: none"> <li>Percentage of residents commuting to work by car</li> <li>Average commuting distance</li> <li>Average shopping distance per resident</li> </ul>  |
| Increased waste arisings   | <ul style="list-style-type: none"> <li>Average household recycling rate as a percentage of overall waste generated</li> <li>Annual waste arising for the Vale.</li> </ul>   |

## 11. Next Steps

11.1 The SA process shall continue through the preparation of the full Deposit Draft Plan and its final adoption. This will involve the appraisal of the more detailed criteria based policies and potential development sites. This information will be compiled into the final Environmental Report detailing the appraisal of the full LDP. This Environmental Report will be made available for consultation as part of the formal consultation on the Deposit Draft Plan, and will also be taken into consideration by the Planning Inspectorate during the public examination of the Deposit Draft LDP.

## APPENDICES

Appendix 1- SA Matrices of the Vale of Glamorgan Local Development Plan Vision

Appendix 2- SA Matrices of the nine Local Development Plan Alternative Strategy Options

Appendix 3- SA Matrices of the Local Development Plan Strategic Policies

## APPENDIX 1: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN VISION

**Notation**

|             |  |
|-------------|--|
| Performance |  |
| ++          | The Vision is highly likely to assist the Sustainability Objective             |
| +           | The Vision is likely to assist the Sustainability Objective                    |
| 0           | The Vision is likely to have no effect on the Sustainability Objective         |
| -           | The Vision is likely to conflict with the Sustainability Objective             |
| --          | The Vision is highly likely to conflict with the Sustainability Objective      |
| +/-         | The Vision is likely to assist and conflict with the Sustainability Objectives |
| ?           | The effect of the Vision on the Sustainability Objective is unclear            |

## APPENDIX 1: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN VISION

| Vision   |                        |
|--|------------------------|
| Our Vision for the Vale is a place that is safe, clean and attractive, where individuals and communities have opportunities to improve their health, prosperity and well-being, and where there is a strong sense of community in which local groups and individuals have the capacity and incentive to make an effective contribution to the future of the area.  |                        |
| SA Objectives  | Compatibility Analysis |
| To provide the opportunity for people to meet their housing needs.   | +                      |
| To maintain, promote and enhance the range of local facilities.  | +                      |
| To maintain and improve access for all.  | ++                     |
| Reduce the causes of deprivation   | ++                     |
| To maintain, protect and enhance community spirit.   | ++                     |
| To minimise the causes and manage the effects of climate change.   | +/-                    |
| To minimise waste.   | +/-                    |
| To use land effectively and efficiently.   | ?                      |
| To protect and enhance the built and natural environment.  | +                      |
| To provide a high quality environment within all new developments.   | +                      |
| To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.   | ++                     |
| To reduce the need to travel and enable the use of more sustainable modes of transport.  | +                      |
| To provide for a diverse range of local job opportunities.   | +                      |
| To maintain and enhance the vitality and viability of the Vale's town, district and local centres.   | +                      |
| To promote appropriate tourism.  | +                      |
| Summary  |                        |
| The LDP vision is broadly compatible with the sustainability objectives. There are no aspects of the vision which are assessed as being incompatible with the objectives set out in the SA Framework. The vision's emphasis on making the Vale a clean and attractive place is considered to be strongly compatible with the sustainability objectives which seek to protect or enhance the natural and built environment.   |                        |
| The aspiration for people to be able to enjoy a high quality of life in a safe environment and to provide opportunities for improvement in health, prosperity and well being for individuals and the wider community is also strongly compatible with the key sustainability objectives for reducing the causes of deprivation and encouraging social inclusion (e.g. housing, local job opportunities and improving access). Similarly, there is a direct relationship between the SA objective for maintaining, protecting and enhancing community spirit. |                        |
| The appraisal has also indicated that in delivering the vision, there is potential for either negative or positive effects to arise in relation to the SA objectives for climate change and waste minimisation, and as such further consideration of these issues should be considered in the development of the LDP objectives.   |                        |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

**Notation**

|                     |   |
|---------------------|---|
| Performance         |   |
| ++                  | Option is highly likely to assist the Sustainability Objective  |
| +                   | Option is likely to assist the Sustainability Objective   |
| 0                   | Option is likely to have no effect on the Sustainability Objective  |
| -                   | Option is likely to conflict with the Sustainability Objective  |
| --                  | Option is highly likely to conflict with the Sustainability Objective   |
| +/-                 | Option is likely to assist and conflict with the Sustainability Objectives  |
| ?                   | The effect of the Option on the Sustainability Objective is unclear   |
| Levels of Certainty |   |
| L                   | Certainty regarding the indicated performance of the Option against the SA Objective is low and further information may be needed to increase certainty..     |
| M                   | Performance has been determined with some certainty although further information would assist the appraisal   |
| H                   | The performance of the Option against the SA Objective has been determined with high certainty as sufficient information is available to assist the appraisal |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| LDP STRATEGY OPTION  | Option1: Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy).   |            |                |                    | Option 2a: Dispersal of housing and employment opportunities based on the current population of each settlement (without a sustainability test).  |            |                |                    | Option 2b: Dispersal of housing and employment opportunities based on the current population of each settlement (with a sustainability test).   |            |                |                    |
|--|--|------------|----------------|--------------------|---|------------|----------------|--------------------|---|------------|----------------|--------------------|
|  | Spatial  |            | Trans-boundary | Level of Certainty | Spatial   |            | Trans-boundary | Level of Certainty | Spatial   |            | Trans-boundary | Level of Certainty |
| SA OBJECTIVES  | Urban SE   | Rural Vale |                |                    | Urban SE  | Rural Vale |                |                    | Urban SE  | Rural Vale |                |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b> |  |            |                |                    |   |            |                |                    |   |            |                |                    |
| Performance  | ++   | -          | 0              | M                  | +   | ?          | 0              | L                  | ++  | ++         | 0              | L                  |
| Commentary   | <p>This option has potential to address housing requirements, including that of affordable housing, in urban areas but not the rural Vale. It builds on the existing strategy that has brought about delivery of housing along the Barry Waterfront, in Penarth Haven and Rhoose Point. Although not strategically identified for growth, rural settlements such as Cowbridge and Llantwit Major would still benefit from development delivered through windfall applications. It is assumed that an appropriate mix of housing will be provided as growth continues. It should be noted that with the current UDP strategy, there has been a decline in the availability of affordable housing throughout the Vale of Glamorgan as evidenced in the baseline data obtained. It is expected that by focusing growth in areas such as Barry, housing will be provided that is within easy access of facilities and use will be made of available previously developed land.</p> |            |                |                    | <p>Although the option is likely to address housing issues throughout the Vale of Glamorgan, it is unlikely that development of housing will be directed to the areas in which it is required. Current settlement population alone does not give an accurate indication of future housing need. Without a sustainability test, housing may be provided in settlements that do not have sufficient facilities available to support the new development.</p> <p>The housing allocation for the Vale of Glamorgan is 7500 units. It is envisaged that Barry and St. Athan will be key settlements. It is uncertain whether the level of housing provision will address the lack of affordable housing particularly in rural settlements.</p> |            |                |                    | <p>It is likely that this option will promote the delivery of appropriate housing in settlements that have the appropriate facilities to support the increase in population. Some settlements, particularly those in the rural part of the Vale of Glamorgan, in need of housing, but without sufficient facilities to support additional housing may be excluded when settlements are identified for development.</p> <p>As with option 2a, it is uncertain whether the level of housing provision would address the lack of affordable housing particularly in rural settlements.</p> |            |                |                    |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 2. To maintain, promote and enhance the range of local facilities. |   |   |   |   |  |   |   |   |  |   |   |   |
|--|---|---|---|---|--|---|---|---|--|---|---|---|
| Performance  | +   | - | 0 | M | ?  | ? | 0 | L | ?  | ? | 0 | L |
| Commentary   | <p>It is assumed that growth will include the development of local facilities where there is a need. This option will lead to increased provision of facilities in urban areas where local communities are likely to use them. Furthermore, the delivery of housing in urban centres will ensure that development occurs where appropriate facilities are available. As part of the Barry Waterfront regeneration scheme Barry and Penarth already have well established local facilities, with additional services being developed as part of the regeneration effort.</p> <p>However, rural areas will not benefit through this option. There is also a significant need for increased provision of facilities in the rural Vale. The WIMD (Geographical access to services) indicates that services are less accessible in rural parts of the Vale of Glamorgan than in urban areas.</p> |   |   |   | <p>This option will deliver housing without consideration of availability of supporting facilities. It is, therefore, likely that development will occur in settlements that do not have the facilities to meet the needs of the local population. There would however, be scope for the Vale of Glamorgan Council to set policies outlining planning obligations for new housing developments to enhance facilities in these areas.</p> <p>The use of current population figures rather than population forecasts do not give the best indication for future housing need. In those settlements that have a good range of local facilities (e.g. Barry and Penarth), new development may ensure that these are maintained and well-used. However, it may be considered that due to the dispersed nature of development under this strategy, pressure on existing facilities may not increase significantly in small, rural settlements.</p> |   |   |   | <p>The option will ensure that the range of facilities in those settlements, in which development occurs, will be maintained, enhanced and promoted. However, as the delivery of this strategy will be determined by the sustainability test, it is likely that settlements with a lack of facilities (particularly in rural part of the Vale of Glamorgan) may be excluded and may continue to experience a shortage of facilities.</p>   |   |   |   |
| 3. To maintain and improve access for all.                         |   |   |   |   |  |   |   |   |  |   |   |   |
| Performance  | ?   | - | ? | L | ?  | ? | 0 | L | ?  | ? | 0 | L |
| Commentary   | <p>Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. However under this option, these benefits may not be realised in rural areas. Positive effects would be realised in the urban centres to the south east and Rhose in terms of access to the built environment.</p>   |   |   |   | <p>Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.</p>   |   |   |   | <p>Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Growth in settlements across the Vale of Glamorgan in both urban and rural areas will ensure that a greater proportion of the population have improved access to facilities and specific buildings. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.</p> |   |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 4. Reduce the causes of deprivation.                  |  |   |   |   |   |   |   |   |  |   |   |   |  |
|---|--|---|---|---|---|---|---|---|--|---|---|---|--|
| Performance   | +  | 0 | 0 | M | +   | + | 0 | M | +  | - | 0 | L |  |
| Commentary  | High levels of multiple deprivation are observed mainly in and around Barry as detailed in the Welsh Index of Multiple Deprivation. The option therefore presents an opportunity to address deprivation through regeneration in Barry and other settlements. Multiple deprivation is not a key issue for the rural Vale, although isolation and access to services are areas of concern. |   |   |   | Areas with relatively high levels of multiple deprivation are mainly concentrated in and around Barry. Provision of housing and employment opportunities will be focused on larger urban settlements including Barry, presenting the opportunity to reduce the causes of deprivation. The introduction of new housing offers the opportunity to enhance facilities through planning conditions and S106 agreements. |   |   |   | The sustainability test will identify those settlements with sufficient, appropriate facilities including health services, leisure facilities, schools etc. to support development. The option may therefore result in the exclusion of those settlements (particularly rural ones) in which access to services (a WIMD domain) is an issue. However, some of those settlements with high levels of multiple deprivation may be identified for development and, therefore, it would be expected that these deprivation issues would be addressed. The level to which deprivation is addressed in these areas is dependent upon the type and level of development allocated to the various locations. |   |   |   |  |
| 5. To maintain, protect and enhance community spirit. |  |   |   |   |   |   |   |   |  |   |   |   |  |
| Performance   | +  | 0 | 0 | L | +   | + | 0 | L | +  | + | 0 | L |  |
| Commentary  | Development presents an opportunity to promote distinctiveness, reduce the fear of crime and provide community facilities to enhance community spirit. As this option focuses development in urban settlements, benefits will be realised mainly in urban areas and not in rural communities.  |   |   |   | It would be expected that new developments would be designed to enhance community spirit through local distinctiveness and a reduction in the fear of crime.  |   |   |   | It would be expected that new developments would be designed to enhance community spirit through local distinctiveness and a reduction in the fear of crime.   |   |   |   |  |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 6. To minimise the causes and manage the effects of climate change. |  |   |   |   |  |   |   |   |  |     |   |   |
|---|--|---|---|---|--|---|---|---|--|-----|---|---|
| Performance   | +  | 0 | 0 | L | +  | - | 0 | M | +/-  | 0/- | 0 | M |
| Commentary  | <p>Provision of housing and employment in urban centres across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport. The option offers some protection of green sinks.</p> <p>Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings.</p> <p>Depending on exact location and design of development, flood plains may or may not be affected. Development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth. Furthermore, parts of Sully, Dinas Powys and Barry, are at risk of fluvial flooding.</p> |   |   |   | <p>Provision of housing and employment across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport.</p> <p>Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings.</p> <p>Issues relating to development in floodplains and effects on green sinks will be dependent upon specific location of development. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth. Parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan amongst others are also at risk of fluvial flooding.</p> |   |   |   | <p>Provision of housing and employment across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport.</p> <p>Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings.</p> <p>Issues relating to development in floodplains and effects on green sinks will be dependent upon specific location of development although it should be noted that parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan amongst others, are at risk of fluvial flooding. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth.</p> |     |   |   |
| 7. To minimise waste.   |  |   |   |   |  |   |   |   |  |     |   |   |
| Performance   | 0  | 0 | 0 | M | 0  | 0 | ? | M | 0  | 0   | ? | M |
| Commentary  | <p>The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The South East Wales Regional Waste Plan and the Landfill Directive limits govern the levels of waste going to landfill. Development could result in the reuse of disused buildings in these urban areas, reducing waste construction material. New development would need to have consideration of location of waste facilities.</p>  |   |   |   |  |   |   |   |  |     |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 8. To use land effectively and efficiently.                  |   |   |   |   |   |     |   |   |  |     |   |   |
|--|---|---|---|---|---|-----|---|---|--|-----|---|---|
| Performance  | +   | + | 0 | M | +   | ?   | 0 | M | +  | ?   | 0 | M |
| Commentary   | The option presents an opportunity to develop good quality high-density developments. This option offers some protection of the countryside from inappropriate development by focussing development in urban settlements that have brownfield sites and vacant buildings available. Barry in particular has significant amounts of brownfield land that can be re-developed. There is the potential however, that development may occur on edge of town, greenfield land as the availability of brownfield reduces.   |   |   |   | There is the opportunity to redevelop brownfield sites in urban areas, particularly Barry. Development in rural settlements would need to be within existing built up areas wherever possible to ensure that the countryside is protected from inappropriate development. However, this will depend upon the availability of land for development within settlement boundaries. The option presents the opportunity to encourage good quality high-density developments in both urban and rural areas.  |     |   |   | There is the opportunity to redevelop brownfield sites in urban areas, particularly Barry. Development in rural settlements would need to be within existing built up areas wherever possible to ensure that the countryside is protected from inappropriate development. However, this will depend upon the availability of land for development within settlement boundaries. The option also presents the opportunity to encourage good quality high-density developments in both urban and rural areas.  |     |   |   |
| 9. To protect and enhance the built and natural environment. |   |   |   |   |   |     |   |   |  |     |   |   |
| Performance  | +   | + | 0 | L | +   | +/- | 0 | M | +  | +/- | 0 | M |
| Commentary   | In urban areas, development may either positively or negatively affect the built environment; this is dependent upon design at project levels. It is assumed that planning policy would set out minimum design standards. The option would limit development in rural areas therefore providing some protection to the countryside from inappropriate development. It is increasingly becoming evident that some brownfield sites are significant habitats for important species [1]. These habitats may be affected by development in urban areas, particularly in Barry. Furthermore, Rhose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. |   |   |   | Protection of the natural environment is dependant on ensuring that the development is focussed within settlement boundaries. Development/growth offers the opportunity to improve or enhance the quality of the built environment through regeneration and the integration of development within surrounding uses. It is assumed that planning policy would set out minimum design standards. The natural environment in and around settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. Furthermore, Rhose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. |     |   |   | Protection of the natural environment is dependant on ensuring that development is focussed within settlement boundaries. ## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 10. To provide a high quality environment within all new developments.   |   |   |   |   |  |   |   |   |  |   |   |   |
|--|---|---|---|---|--|---|---|---|--|---|---|---|
| Performance  | +   | 0 | 0 | L | +  | + | 0 | M | ++   | + | 0 | M |
| Commentary   | The extent to which this strategy will achieve this objective is dependent upon how development is carried out at project level. It is assumed that planning policy would set out minimum design standards. Development may result in the regeneration of areas such as Barry and the integration of new development may act as a catalyst for overall environmental improvements.  |   |   |   | The extent to which this strategy will achieve this objective is dependent upon how development is carried out at project level. It is assumed that planning policy would set out minimum design standards. Development may result in the regeneration of areas such as Barry and the integration of new development may act as a catalyst for overall environmental improvements.   |   |   |   | The extent to which this strategy will achieve this objective is dependent upon how development is carried out at project level. It is assumed that planning policy would set out minimum design standards. Development may result in the regeneration of areas such as Barry and the improvement of the existing built environment throughout the Vale of Glamorgan   |   |   |   |
| 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage. |   |   |   |   |  |   |   |   |  |   |   |   |
| Performance  | +/-   | + | 0 | M | +/-  | - | 0 | M | +/-  | - | 0 | M |
| Commentary   | There are a large number of historic buildings, designations and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote.<br><br>Growth will provide the opportunities in urban areas to improve the quality of cultural and historic environments, particularly with regards to historic buildings. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets.<br><br>In the rural Vale, where it is not expected that much growth will take place, it is assumed that the existing cultural and historic environment will be protected from the negative effects of development. The setting of any monuments will also be protected. |   |   |   | There are a large number of historic buildings, designation and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote. There are heritage features of value in rural areas that may be affected by new development. |   |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 12. To reduce the need to travel and enable the use of more sustainable modes of transport. |  |    |     |   |   |   |   |   |   |   |   |   |
|---|--|----|-----|---|---|---|---|---|---|---|---|---|
| Performance   | +  | -  | ?   | M | +   | - | 0 | M | +   | - | 0 | M |
| Commentary  | Focusing growth in the urban south east will ensure that development is located in areas with easy access to services as well as to neighbouring areas. Most urban settlements in the south east are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service. However, in the rural Vale isolation of settlements may continue to be an issue, as there would continue to be limited provision of facilities and employment in rural communities. Bus service provision is considered to be poor in Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst other rural settlements (as detailed in the LDP Sustainability Appraisal Draft Scoping Report, February 2007). |    |     |   | Development in the main urban centres such as Barry and Penarth may reduce the need to travel by car and result in the use of more sustainable forms of transport. Most urban settlements are accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service. It would be anticipated that the provision of housing and employment in rural settlements would attract local investment and therefore encourage residents to work locally. However, there is the potential for the majority of residents to work away as the jobs they require are unlikely to be provided within the local area (as detailed in the LDP Sustainability Appraisal Draft Scoping Report, February 2007). In larger centres, however, it may be possible to provide appropriate employment and thereby reduce commuting. |   |   |   | Development in the main urban centres such as Barry and Penarth may reduce the need to travel and result in the use of more sustainable forms of transport. Most urban settlements are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service. It would be anticipated that the provision of housing and employment in rural settlements would attract local investment and therefore encourage residents to work locally. However, the majority of residents work away and are likely to continue to do so, as the jobs they have are unlikely to be provided within the local area. In larger centres, however, it may be possible to provide appropriate employment and reduce commuting. Through the sustainability test, residents of rural communities that lack appropriate facilities may have to continue travelling long distances to use facilities in other settlements. |   |   |   |
| 13. To provide for a diverse range of local job opportunities.                              |  |    |     |   |   |   |   |   |   |   |   |   |
| Performance   | ++   | -- | +/- | M | +   | - | 0 | M | +   | - | 0 | M |
| Commentary  | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. Although unemployment is not a key issue in rural settlements, most residents are employed outside their settlement and some outside the Vale of Glamorgan. There are limited local employment opportunities in rural settlements. Through this strategy, rural areas would continue to be affected by the lack of local employment opportunities.   |    |     |   | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. It may be difficult to attract some large employers to smaller settlements due to there not being appropriate areas for large scale industrial developments. This therefore limits the range of job opportunities that can be provided in rural settlements. Overall, although job opportunities may be increased, though not significantly, the range of jobs available will be limited due to the dispersed nature of development.  |   |   |   | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. However, the extent to which employment opportunities can be increased may be limited by the availability of employment land. It may be difficult to attract some large employers to smaller settlements due to there not being appropriate areas for large scale industrial developments. This therefore limits the range of job opportunities that can be provided in rural settlements. Overall, although job opportunities will be increased, though not significantly, the range of jobs available will be limited due to the dispersed nature of development.   |   |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres. |  |   |   |   |  |    |   |   |  |    |   |   |
|---|--|---|---|---|--|----|---|---|--|----|---|---|
| Performance   | +  | - | ? | M | ++   | ++ | 0 | M | ++   | ++ | 0 | M |
| Commentary  | This option offers a significant opportunity to enhance vitality and viability through new development in urban areas through the integration of new development with existing facilities. However, rural centres may not benefit. There is an opportunity to make urban centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |   |   |   | This option offers a significant opportunity to enhance vitality and viability through new development in both urban and rural areas. There is an opportunity to make town centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |    |   |   | This option offers a significant opportunity to enhance vitality and viability through new development in both urban and rural areas. There is an opportunity to make town centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |    |   |   |
| 15. To promote appropriate tourism.   |  |   |   |   |  |    |   |   |  |    |   |   |
| Performance   | ?  | 0 | 0 | L | ?  | ?  | 0 | L | ?  | ?  | 0 | L |
| Commentary  | Growth may lead to mixed-use developments therefore increasing opportunities for tourism businesses. At present most development has been predominantly residential. Tourism development in these settlements will depend upon the businesses that start up as growth continues. As development would be focused in urban centres, it is assumed that there would be no major tourism development in the rural Vale.   |   |   |   | Due to the dispersed nature of development under this strategy, it is unlikely that specific tourism development will occur purely as a result of the strategy. Development in the various settlements may enhance or negatively affect any tourism assets in those areas, although it would be expected that planning policy design standards, would seek limit negative effects.   |    |   |   | Due to the dispersed nature of development under this strategy, it is unlikely that specific tourism development will occur purely as a result of the strategy. Development in the various settlements may enhance or negatively affect any tourism assets in those areas, although it would be expected that planning policy design standards, would seek limit negative effects.   |    |   |   |

[\[1\] Guideline for the Selection of Wildlife Sites in South Wales, August 2004, South Wales Local Authorities and Wildlife Trusts.](#)

|                       |  |  |   |
|-----------------------|--|--|---|
| LDP Strategic Options | Option 3: Higher growth in the larger villages in rural areas (e.g. Llantwit Major, Cowbridge, St. Athan, Rhoose and potentially others to be identified). | Option 4: A rural new settlement able to promote sustainable self – containment. | Option 5: Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development. |
|-----------------------|--|--|---|

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| SA OBJECTIVES  | Spatial   |            | Trans-boundary | Level of Certainty   | Spatial  |            | Trans-boundary  | Level of Certainty | Spatial  |            | Trans-boundary | Level of Certainty |
|--|---|------------|----------------|--|----------|------------|---|--------------------|----------|------------|----------------|--------------------|
|  | Urban SE  | Rural Vale |                |  | Urban SE | Rural Vale |   |                    | Urban SE | Rural Vale |                |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b> |   |            |                |  |          |            |   |                    |          |            |                |                    |
| Performance  | 0   | +          | 0              | M  | -        | +          | 0   | M                  | ++       | +          | 0              | M                  |
| Commentary   | It is assumed that growth will include housing development. This option would address the lack of affordable and appropriate housing in the rural settlements identified. However, it is not likely that housing issues in urban areas (other than Barry) would be addressed.   |            |                | Although housing would be provided in the new settlement, the option would not address the needs in other rural or urban areas. It is unlikely that there will be many opportunities to develop brownfield land. It is unlikely that the new settlement would provide all required housing. However this Option has potential to help meet the housing need around the Vale through windfall development, depending on the distribution of the sites across the Vale.  |          |            | It is assumed that development would provide for housing needs in centres across the whole Vale, in both existing urban centres and for rural needs. With this approach, housing allocation would not be spread too thinly across the Vale of Glamorgan.  |                    |          |            |                |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>    |   |            |                |  |          |            |   |                    |          |            |                |                    |
| Performance  | 0   | +          | 0              | M  | 0        | +/-        | 0   | M                  | +        | +          | 0              | M                  |
| Commentary   | This option would ensure that facilities in the four villages identified remain viable, for example schools, doctors surgeries shopping facilities, thereby reducing the need to travel to nearby settlements for such facilities. It is assumed that growth will include delivery of appropriate, additional local facilities in these settlements. Although additional facilities are less likely to be developed in other rural settlements, they would benefit from those provided in the identified settlements. However, settlements outside the 'catchment area' of these four towns (e.g. Ogmores-by-Sea to the far west, St Bride's-super-Ely to the north) would not benefit significantly. |            |                | The option will only affect areas close to the chosen location and will not address issues of wider access to facilities throughout the Vale of Glamorgan. It is assumed that the facilities in the new development would be accessible and fit-for-purpose for their catchment. The option may result in the under use of similar facilities in surrounding areas. Alternatively if facilities within the new development are insufficient other centres in close proximity to the new development could experience pressure on their existing facilities e.g. St. Athan. |          |            | It is assumed that development will include the provision of local facilities. This will proportionally benefit Barry, St Athan and settlements in the South East and help to address issues of poor access to facilities in rural areas. It will be essential to ensure that there is sufficient service capacity to cope with increases in populations, for example in St Athan and Llantwit Major. |                    |          |            |                |                    |

APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

|  |  |   |   |   |  |     |   |   |   |   |   |   |  |
|--|--|---|---|---|--|-----|---|---|---|---|---|---|--|
| <b>3. To maintain and improve access for all.</b>            |  |   |   |   |  |     |   |   |   |   |   |   |  |
| <b>Performance</b>   | 0  | ? | 0 | L | 0  | +/- | 0 | L | +   | + | 0 | M |  |
| <b>Commentary</b>  | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.                              |   |   |   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. It is expected that the option will only affect access to the built and natural environment for the population in the new settlement and will not address access issues elsewhere in the Vale of Glamorgan, in particular rural areas. However access in the new settlement will be high. |     |   |   | The increased spread of population around the Vale of Glamorgan should help to improve access to facilities, decrease isolation and ensure that a greater proportion of the population have access improved to facilities and specific buildings. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. |   |   |   |  |
| <b>4. Reduce the causes of deprivation.</b>                  |  |   |   |   |  |     |   |   |   |   |   |   |  |
| <b>Performance</b>   | -  | 0 | 0 | M | -  | 0   | 0 | M | +   | + | 0 | M |  |
| <b>Commentary</b>  | High levels of multiple deprivation are observed mainly in and around Barry, while this is not a key issue for the rural Vale. However, isolation and access to services are areas of some concern. Therefore, focusing growth in the rural centres is unlikely to address the issue in Barry and other urban centres. |   |   |   | A single new settlement will not address deprivation and isolation issues throughout much of the Vale of Glamorgan, especially in urban areas where problems exist.  |     |   |   | A balanced spread of growth should increase the number of homes thereby, contributing to tackling the causes of deprivation proportionally to settlement size.  |   |   |   |  |
| <b>5. To maintain, protect and enhance community spirit.</b> |  |   |   |   |  |     |   |   |   |   |   |   |  |
| <b>Performance</b>   | 0  | - | 0 | M | 0  | +/- | 0 | M | +   | + | 0 | L |  |
| <b>Commentary</b>  | Growth in these settlements may contribute to community spirit through an increase in development of facilities and good design. The option offers the opportunity to enhance local distinctiveness and reduce the fear of crime in these rural settlements.   |   |   |   | A new settlement has the potential to be well designed in order to reduce crime, provide facilities and encourage local distinctiveness and community ownership. However, this would only apply to the local area and have no benefits to other areas.   |     |   |   | Growth in these intervention areas may contribute to community spirit through an increase in development of facilities, good design and a reduction in the fear of crime where this is an issue.  |   |   |   |  |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 6. To minimise the causes and manage the effects of climate change. |   |     |   |   |  |    |   |   |   |     |   |   |
|---|---|-----|---|---|--|----|---|---|---|-----|---|---|
| Performance   | 0   | +/- | 0 | M | 0  | -  | 0 | M | +/-   | +/- | 0 | M |
| Commentary  | Provision of housing and employment in these rural towns may reduce the need to travel and hence reduce greenhouse gas emissions from transport. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Issues relating to development in floodplains and effects on green sinks will be dependent upon specific location of development. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, and Aberthaw. |     |   |   | The option would increase greenhouse gas emissions and energy use as well as reduce green sink coverage in a rural location. It would also increase car use to and from the new settlement and energy use in the development. The impact upon floodplains would depend upon the exact location of development. Additionally, if located in coastal areas, particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth, the new settlement may be affected by future sea level rise. |    |   |   | The option promotes more development in the urban areas already served by public transport. Nonetheless, other issues such as increased energy use as a result of increased development, destruction of green sinks, building on floodplains etc. can negatively affect this objective. Parts of Sully, Dinas Powys, Barry, Llandow and Pendoylan amongst others are at risk of fluvial flooding. Additionally development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmores-by-Sea, Aberthaw, Barry and Penarth.  |     |   |   |
| 7. To minimise waste.   |   |     |   |   |  |    |   |   |   |     |   |   |
| Performance   | 0   | 0   | ? | M | 0  | 0  | ? | M | 0   | 0   | ? | M |
| Commentary  | The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The South East Wales Regional Waste Plan and the Landfill Directive limits govern the levels of waste going to landfill. Development could result in the reuse of disused buildings in these urban areas, reducing waste construction material. New development would need to have consideration of location of waste facilities.  |     |   |   |  |    |   |   |   |     |   |   |
| 8. To use land effectively and efficiently.                         |   |     |   |   |  |    |   |   |   |     |   |   |
| Performance   | -   | -   | 0 | M | -  | -- | 0 | M | +   | +/- | 0 | M |
| Commentary  | There may not be large areas of previously developed land available in some of these rural settlements (with the exception of St Athan). As a result, it is likely that most of the new development will be located on greenfield land outside settlement boundaries. Efficient use of land can be achieved through good quality high-density development.  |     |   |   | A new rural settlement is likely to be on largely greenfield land and would have an adverse effect on the countryside and landscape. There is the opportunity for the development to be good quality and high density.   |    |   |   | As development is mainly focused in existing urban areas, there is high potential for previously developed land to be used, particularly in Barry. In the rural settlements development in greenfield land may occur depending upon the availability of land for development within settlement boundaries. It is expected that major development (both housing and employment) at St Athan and Barry would use largely previously developed land. Development in rural settlements would need to be within existing built up areas wherever possible, to ensure that the countryside is protected from inappropriate development. The option also presents the opportunity to encourage good quality high-density developments in both urban and rural areas. |     |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 9. To protect and enhance the built and natural environment.           |   |     |   |   |  |     |   |   |  |   |   |   |
|--|---|-----|---|---|--|-----|---|---|--|---|---|---|
| Performance  | 0   | +/- | 0 | M | 0  | +/- | 0 | M | +  | - | 0 | M |
| Commentary   | The environment surrounding these rural settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. In general growth through sensitive development would be expected to enhance the quality of the built environment in these settlements. |     |   |   | The development is likely to adversely affect biodiversity, landscape, soil function, water resource use and heritage in the location of the new settlement. The level of impact would depend on the location of the new settlement.   |     |   |   | The option is likely to have positive effects, particularly in urban areas, as development can bring physical regeneration to areas in need of improvement as long as it is properly integrated. The natural environment in and around these settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. Furthermore, Rhoose, Barry and Sully are located in proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline as well as the candidate Severn Estuary SAC. |   |   |   |
| 10. To provide a high quality environment within all new developments. |   |     |   |   |  |     |   |   |  |   |   |   |
| Performance  | 0   | +   | 0 | M | 0  | +   | 0 | M | +  | + | 0 | M |
| Commentary   | The extent to which this strategy will achieve this objective is dependent upon how development is carried out at project level. It is assumed that planning policy would set out minimum design standards. Development may result in the improvement of the existing built environment in these rural settlements and the integration of new development may act as a catalyst for overall environmental improvements.   |     |   |   | Development of the new settlement may be well-designed from the outset in order to include high quality, sustainable materials, use of open space, access etc. and can promote a positive community spirit. The development of the new settlement in this manner could set precedence for development elsewhere in the Vale of Glamorgan, particularly through windfall planning applications. |     |   |   | There is the opportunity to ensure that new development is well-designed from the outset in order to include high quality, sustainable materials, use of open space, access etc and can promote a positive community spirit. This will apply to all intervention areas spread across the Vale of Glamorgan.  |   |   |   |

**APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS**

| 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan’s culture and heritage. |  |     |   |   |  |     |   |   |   |   |   |   |
|--|--|-----|---|---|--|-----|---|---|---|---|---|---|
| Performance  | 0  | -   | 0 | M | 0  | +/- | 0 | M | +/-   | - | 0 | M |
| Commentary   | <p>There are a large number of historic buildings, designations and protected monuments in the rural Vale that may be affected by development in these settlements. In particular there are significant numbers of listed buildings in Llantwit Major and Cowbridge. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets. There are heritage features of value in rural areas that may be affected by new development.</p>   |     |   |   | <p>The development is likely to adversely affect landscape and heritage value in its immediate area. However, it would deflect development from, and therefore offer some protection to, remaining rural areas from development pressure.</p>  |     |   |   | <p>There are a large number of historic buildings, designation and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote. Growth will provide the opportunities in urban areas to improve the quality of cultural and historic environments, particularly with regards to historic buildings. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets. There are heritage features of value in rural areas that may be affected by new development.</p> |   |   |   |
| 12. To reduce the need to travel and enable the use of more sustainable modes of transport.                    |  |     |   |   |  |     |   |   |   |   |   |   |
| Performance  | 0  | +/- | 0 | L | 0  | -   | ? | L | ++  | 0 | ? | M |
| Commentary   | <p>It is assumed that growth in these locations will include development of local facilities and employment opportunities. If this is the case, it would be expected that the need to travel to larger urban centres would be reduced. The level to which this option achieves this sustainability objective is dependent upon the policies governing delivery. Residents in smaller rural settlements would need to continue travelling to the larger settlement for use of some facilities. Furthermore, Rhoose and Llantwit Major are the only settlements with rail services on the Vale of Glamorgan Railway Line. There is no rail transport available in other rural settlements. There may be an opportunity to improve bus services in these settlements and other rural towns in which bus service provision is considered to be poor (e.g. Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst others).</p> |     |   |   | <p>Whilst the settlement may be self contained in the short-term, it is likely that over time it will generate wider traffic congestion through in and out-commuting. Much depends upon the exact location with respect to existing and proposed public transport links. However, considering other new settlements in the UK, it is unlikely that this would address issues relating to the dependence on private cars in rural areas, nor is it likely to reduce the need to travel to existing major urban centres for higher value services.</p> |     |   |   | <p>Development in urban areas should enable people to work locally, therefore reducing the need to travel to work and commute to Cardiff. Most urban settlements are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service. Increased development of homes and facilities around existing rural centres could also reduce travel distances. If St Athan and Llantwit Major are truly self-contained, this would also result in reduced travel distances, but they may also encourage more trips from surrounding areas.</p>   |   |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 13. To provide for a diverse range of local job opportunities.  |  |   |   |   |  |     |   |   |  |    |   |   |
|---|--|---|---|---|--|-----|---|---|--|----|---|---|
| Performance   | -  | - | 0 | M | -  | +/- | 0 | M | ++   | -  | 0 | M |
| Commentary  | Although unemployment is not a key issue in rural settlements, most residents are employed outside their settlement and some outside the Vale of Glamorgan. There are limited local employment opportunities in rural settlements. In urban areas such as Penarth, where unemployment is an issue, the creation of job opportunities would be limited by this option.  |   |   |   | If the settlement is sustainable and self-contained, it is assumed that it would provide local employment opportunities in the area of development and its surroundings, i.e. not develop into a commuter settlement. However, this would not assist in providing a diverse range of employment opportunities locally in other settlements.  |     |   |   | Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. It may be difficult to attract some large employers due to inappropriately sized employment sites to smaller settlements therefore limiting the range of job opportunities that can be provided in rural settlements. Development in St Athan is expected to create many local jobs. Overall, although job opportunities are likely to increase, the range of jobs available may remain limited due to the dispersed nature of development.                                  |    |   |   |
| 14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres. |  |   |   |   |  |     |   |   |  |    |   |   |
| Performance   | 0  | + | 0 | M | --   | +/- | 0 | M | ++   | ++ | 0 | M |
| Commentary  | This option would maintain the vitality and viability of these four villages. However, other town, district and local centres in the Vale of Glamorgan in need of regeneration, would not benefit through this option. There is an opportunity to make these town centres attractive to local residents that currently use retail facilities in larger settlements. It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |   |   |   | The new settlement has potential to be well-designed to ensure its own vitality. However, this largely depends upon the exact design of the development. It will not address vitality problems that exist in some of the other centres in the Vale of Glamorgan, notably in the urban south east. This may result in nearby settlements losing vitality as residents use these newer facilities. |     |   |   | This option offers a significant opportunity to enhance vitality and viability through new development in both urban and rural areas. There is an opportunity to make town centres attractive to local residents that currently use out-of-town retail developments (e.g. Culverhouse Cross). It is assumed that local community and leisure facilities will be provided together with new housing and employment. An increase in population and jobs and overall investment in a number of local centres should contribute positively to vitality and viability of the centres, particularly for rural settlements. |    |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 15. To promote appropriate tourism. |  |   |   |   |  |     |   |   |   |   |   |   |
|-------------------------------------|--|---|---|---|--|-----|---|---|---|---|---|---|
| Performance                         | 0  | ? | 0 | M | 0  | 0/- | 0 | M | ?   | ? | 0 | L |
| Commentary                          | Tourism development in these settlements will depend upon the businesses that start up as growth continues. Development in the various settlements may enhance or negatively affect any tourism assets in those areas, although it would be expected that planning policy design standards, would seek limit negative effects. |   |   |   | The development of a new settlement is unlikely to significantly affect tourism in the Vale of Glamorgan as a whole. |     |   |   | Increased development and infrastructure could contribute to a tourist infrastructure across the intervention areas, although this would be uncertain at this scale. Tourism development in these settlements will depend upon the businesses that start up as growth continues |   |   |   |

| LDP STRATEGIC OPTIONS   | Option 6 (Option 1 and Option 4): Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhoose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment.   |            |                |                    | Option 7 (Option 2b and Option 5): Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test.  |            |                |                    | Option 8 (Option 5 and Option 4): Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development.  |            |                |                    |
|---|--|------------|----------------|--------------------|--|------------|----------------|--------------------|---|------------|----------------|--------------------|
|   | Spatial  |            | Trans-boundary | Level of Certainty | Spatial  |            | Trans-boundary | Level of Certainty | Spatial   |            | Trans-boundary | Level of Certainty |
| SA OBJECTIVES   | Urban SE   | Rural Vale |                |                    | Urban SE   | Rural Vale |                |                    | Urban SE  | Rural Vale |                |                    |
| 1. To provide the opportunity for people to meet their housing needs. |  |            |                |                    |  |            |                |                    |   |            |                |                    |
| Performance   | ++   | +          | 0              | L                  | ++   | ++         | 0              | M                  | ++  | +          | 0              | M                  |
| Commentary  | The housing allocation for the Vale of Glamorgan is 7500 units. It is envisaged that Barry and St. Athan will be key settlements with the remainder distributed appropriately in Penarth, Dinas Powys, Sully, Rhoose and the new settlement. The current UDP Strategy has brought about delivery of housing in Penarth Haven and Rhoose Point and therefore, more units may be delivered elsewhere. This Option has potential to meet the housing need around the Vale through the windfall development, depending on the distribution of sites across the Vale. |            |                |                    | It is assumed that development would provide for housing needs in centres across the whole Vale, in both existing urban centres and for rural needs. With this approach, housing allocation would not be spread too thinly across the Vale of Glamorgan. The sustainability test would ensure that housing is delivered in those settlements with the capacity to accommodate new development, particularly in rural parts of the Vale of Glamorgan. |            |                |                    | The housing allocation for the Vale of Glamorgan is 7500 units. It is envisaged that Barry and St. Athan will be key settlements. This option would provide housing in the new settlement and in urban areas but would not fully address the needs in rural areas. This Option has potential to meet the housing need around the Vale through the windfall development, depending on the distribution of sites across the Vale. |            |                |                    |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 2. To maintain, promote and enhance the range of local facilities. |   |     |   |   |  |   |   |   |   |    |   |   |
|--|---|-----|---|---|--|---|---|---|---|----|---|---|
| Performance  | +   | +/- | 0 | M | +  | + | 0 | M | +   | ++ | 0 | M |
| Commentary   | The delivery of housing in urban centres will ensure that development occurs where appropriate facilities are available. Barry and Penarth already have well established local facilities, with additional services being developed as part of the Barry and Penarth regeneration effort. Mixed effects would be realised in rural areas, with benefits for the new settlement and the surrounding area, although existing rural access to facilities issues would not be addressed elsewhere.  |     |   |   | This option will promote and enhance sustainable facilities in both rural and urban areas ensuring that existing facilities remain viable. It will be essential to ensure that there is sufficient service capacity to cope with significant new populations. There would be scope for the Vale of Glamorgan Council to set policies outlining planning obligations for new housing developments to enhance facilities in these areas.   |   |   |   | Positive benefits in terms of facilities provision would be realised in the urban centres to the south east and also across rural areas. Positive effects would be realised in the area of the new settlement in particular which would create combined major positive affects in rural areas. There would be scope for the Vale of Glamorgan Council to set policies outlining planning obligations for new housing developments to enhance facilities in these areas  |    |   |   |
| 3. To maintain and improve access for all.                         |   |     |   |   |  |   |   |   |   |    |   |   |
| Performance  | +   | +   | 0 | M | +  | + | 0 | M | +   | +  | 0 | M |
| Commentary   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Positive effects would be realised in the urban centres to the south east and Rhose in terms of access to the built environment. Mixed effects would be realised in rural areas, with benefits for the new settlement, and associated with windfall development, but existing rural access issues may not be addressed elsewhere. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. |     |   |   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. Growth in settlements across the Vale of Glamorgan in both urban and rural areas will ensure that a greater proportion of the population will have access improved access to facilities and specific buildings. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations.              |   |   |   | Planning policy and building regulations would set minimum design standards to ensure that buildings are designed to be accessible to all. The increased spread of population around the Vale of Glamorgan should help to improve access to facilities and decrease isolation. New development across the Vale of Glamorgan has potential to include good design measures to improve local access. Increased development presents an opportunity for sensitive locational design to ensure that developments are located in accessible locations. |    |   |   |
| 4. Reduce the causes of deprivation.                               |   |     |   |   |  |   |   |   |   |    |   |   |
| Performance  | +   | -   | 0 | M | +  | + | 0 | M | +   | ++ | 0 | M |
| Commentary   | Positive effects on tackling the causes of deprivation would be realised in the urban centres to the south east where multiple deprivation is a key issue. Multiple deprivation is not a key issue for the rural Vale, although isolation and access to services are areas of concern. Reduction in deprivation may be achieved as a cascade effect from the new rural settlement and through windfall development, although this may be limited in extent.   |     |   |   | Multiple deprivation is mainly within the urban south east part of the Vale of Glamorgan. A balanced spread of growth should increase the number of decent homes and business development, contributing to tackling the causes of deprivation (e.g. Barry). Large growth centres would contribute significantly to employment and residential growth in rural parts of the Vale. However, this would not necessarily reduce deprivation associated with limited access to facilities experienced in more remote areas. |   |   |   | Positive benefits on tackling the causes of deprivation would be realised in the urban centres to the south east and also across rural areas. A reduction in deprivation may also be achieved as a cascade effect from the new rural settlement through windfall development.   |    |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 5. To maintain, protect and enhance community spirit.               |  |   |   |   |   |     |   |   |  |     |   |   |
|---|--|---|---|---|---|-----|---|---|--|-----|---|---|
| Performance   | +  | 0 | 0 | L | +   | +   | 0 | M | +  | +   | 0 | M |
| Commentary  | Development presents an opportunity to promote distinctiveness, reduce the fear of crime and provide community facilities to enhance community spirit. As this option focuses development in urban settlements and new rural settlements, benefits will be focussed on these areas.  |   |   |   | The effect of growth on community spirit is likely to be positive. Growth in these areas may contribute to community spirit through an increase in development of facilities and good design.   |     |   |   | Growth in these settlements may contribute to community spirit through an increase in development of facilities and good design.   |     |   |   |
| 6. To minimise the causes and manage the effects of climate change. |  |   |   |   |   |     |   |   |  |     |   |   |
| Performance   | +/-  | 0 | 0 | L | +/-   | +/- | 0 | M | +  | +/- | 0 | M |
| Commentary  | Provision of housing and employment in urban centres across the Vale of Glamorgan may reduce the need to travel and hence reduce greenhouse gas emissions from transport. Development will initially result in increased energy use during construction. The development of energy efficient buildings can help reduce operational energy requirements of new buildings. Depending on exact location and design of development, flood plains may or may not be affected. Development in coastal areas may be affected by future sea level rise particularly in the low lying estuarine areas around Ogmore-by-Sea, Aberthaw, Barry and Penarth. Furthermore, parts of Sully, Dinas Powys and Barry, are at risk of fluvial flooding. |   |   |   | A diverse spread of development has the potential to limit travel distances and hence vehicular greenhouse gas emissions. The option also promotes more development in the urban areas already served by public transport. Location of development in smaller settlements will be determined through a sustainability test thereby ensuring that growth occurs where there are sufficient facilities to sustain it. Nonetheless, other issues such as increased energy use as a result of increased development, destruction of green sinks, building on floodplains etc. can negatively affect this objective. A large area of floodplain exists to the south east of Barry. |     |   |   | The option could contribute to a reduction in commuting as there would be more accessible opportunities for public transport and the increased spreads of homes, jobs and services would lead to fewer/shorter trips being made and hence fewer vehicular greenhouse gas emissions. However, more development overall and particularly a new rural settlement will lead to increased energy use, increased flooding potential, destruction of green sinks, more rapid run-off rates etc. |     |   |   |
| 7. To minimise waste.   |  |   |   |   |   |     |   |   |  |     |   |   |
| Performance   | 0  | 0 | 0 | M | 0   | 0   | 0 | M | 0  | 0   | 0 | M |
| Commentary  | The amount of proposed development is the same for all options and therefore the increase in the levels of waste generated will be the same. The South East Wales Regional Waste Plan and the Landfill Directive limits govern the levels of waste going to landfill. Development could result in the reuse of disused buildings in these urban areas, reducing waste construction material. New development would need to have consideration of location of waste facilities.   |   |   |   |   |     |   |   |  |     |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 8. To use land effectively and efficiently.                  |  |  |  |  |   |   |  |   |   |    |  |  |  |     |   |  |   |  |
|--|--|--|--|--|---|---|--|---|---|----|--|--|--|-----|---|--|---|--|
| Performance  | ++   |  |  |  | --  | 0 |  | M |   | ++ |  |  |  | +/- | 0 |  | M |  |
| Commentary   | Major positive effects would be realised in the urban centres to the south east and Rhose where there are more areas of previously developed land to use. Areas such as Barry and Penarth have significant amounts of brownfield land that can be re-developed. There is the potential however, that development may occur on edge of town, greenfield land as the availability of brownfield reduces. Negative effects would be realised in rural areas, as a single new settlement is likely to use a significant tract of greenfield land, although preference can be given to the selection of sites that contain brown field land within the rural Vale.  |  |  |  | There is the opportunity to redevelop brownfield sites in urban areas. Development in rural settlements would need to be focused within existing built up areas to ensure that the countryside is protected from inappropriate development. However, this will depend upon the availability of land for development within existing built up areas. The option also presents the opportunity to encourage good quality high-density developments in both urban and rural areas.   |   |  |   | As development is mainly focused in existing urban areas, there is high potential for previously developed land to be used. In the rural settlements development in greenfield land may occur depending upon the availability of land for development within existing built up areas. It is expected that major development (both housing and employment) at St Athan and Barry would use largely previously developed land. A new rural settlement is likely to be on largely greenfield land and would have an adverse effect on the countryside and landscape, although preference can be given to the selection of sites that contain brown field land within the rural Vale. |    |  |  |  |     |   |  |   |  |
| 9. To protect and enhance the built and natural environment. |  |  |  |  |   |   |  |   |   |    |  |  |  |     |   |  |   |  |
| Performance  | +  |  |  |  | +/-   | 0 |  | M |   | +  |  |  |  | -   | 0 |  | M |  |
| Commentary   | Positive effects would be realised in the urban centres to the south east and Rhose through enhancement and regeneration. Mixed effects would be realised in rural areas, as a new settlement would be damaging to the existing, higher value environment, while deflecting potentially damaging development from other rural areas. In urban settlements, it is increasingly becoming evident that some brownfield sites are significant habitats for important species [1]. These habitats may be affected by development in urban areas. Furthermore, Rhose, Barry and Sully are located in close proximity to the coastline, where growth and development may affect the coastal environment. There are SSSIs that may be affected along the Barry stretch of coastline. |  |  |  | The option would focus development on existing settlement and therefore encourage brownfield development rather than use of greenfield sites. Development may result in the regeneration of built areas (Barry for example) as new development acts as a catalyst for general environmental improvements. In rural areas, this would be negative due to the value of the existing environment that will potentially be adversely affected. The environment surrounding rural settlements is likely to be adversely affected as development may affect biodiversity, landscape, soil function, water resource use and heritage outside of settlement boundaries. A number of rural settlements are located in special landscape areas, the character of which may be negatively affected by development. |   |  |   | Positive benefits would be realised in the urban centres to the south east through enhancement and regeneration. In rural areas, this would be negative due to the value of the existing environment that will potentially be adversely affected. Negative effects would be realised in more sensitive rural areas, and more so due to the potentially adverse impacts of the new rural settlement. Although this could be reduced through the preferential selection of brown field sites within the rural Vale for the location of this settlement.   |    |  |  |  |     |   |  |   |  |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 10. To provide a high quality environment within all new developments.   |   |  |     |   |  |   |  |   |  |   |   |  |    |   |   |
|--|---|--|-----|---|--|---|--|---|--|---|---|--|----|---|---|
| Performance  | ++  |  | ++  | 0 | M  | + |  | + | 0  | M | + |  | ++ | 0 | M |
| Commentary   | Positive effects would be realised in the urban centres to the south east and Rhose where new development can provide high quality design. Major positive effects would be realised in rural areas, as a single new settlement would have the opportunity to be designed to a very high quality standard.   |  |     |   | New developments have the opportunity to be well-designed from the outset in order to include high quality, sustainable materials, use of open space, access etc and can promote a positive community spirit. This will apply to Barry, St Athan and other identified settlements in the urban south east.   |   |  |   | The new developments have the opportunity to be well-designed from the outset in order to include high quality, sustainable materials, use of open space, access etc and can promote a positive community spirit. This will apply to Barry, St Athan and other identified settlements in the urban south east.   |   |   |  |    |   |   |
| 11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage. |   |  |     |   |  |   |  |   |  |   |   |  |    |   |   |
| Performance  | +   |  | +/- | 0 | M  | + |  | - | 0  | M | + |  | -  | 0 | M |
| Commentary   | There are a large number of historic buildings, designations and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote. Growth will provide the opportunities in urban areas to improve the quality of cultural and historic environments, particularly with regards to historic buildings. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets.<br><br>In the rural Vale, where it is not expected that much growth will take place, it is assumed that the existing cultural and historic environment will be protected from the negative effects of development. The setting of any monuments will also be protected. The notable exception would be the new rural settlement which would be potentially damaging to the existing, high value historic and cultural environment. |  |     |   | There are a large number of historic buildings, designations and protected monuments in the Vale of Glamorgan. In urban centres, there are a number of listed buildings, conservation areas and ancient monuments, which sensitive development could enhance and promote.<br><br>Growth will provide the opportunities in urban areas to improve the quality of cultural and historic environments, particularly with regards to historic buildings. Although new development may offer the opportunity to enhance and promote the quality of the cultural/historic environment, there is the risk that development may be insensitive to these assets. There are heritage features of value in rural areas that may be affected by new development. |   |  |   | There are a large number of historic buildings, designations and protected monuments in the Vale of Glamorgan. Development of the new settlement is likely to adversely affect landscape and heritage value in its immediate area. |   |   |  |    |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 12. To reduce the need to travel and enable the use of more sustainable modes of transport. |  |   |   |   |  |     |   |   |   |   |   |   |
|---|--|---|---|---|--|-----|---|---|---|---|---|---|
| Performance   | ++   | - | 0 | M | +  | +/- | 0 | M | +   | + | 0 | M |
| Commentary  | <p>Focusing growth in the urban south east will ensure that development is located in areas with easy access to services as well as to neighbouring areas. Most urban settlements in the south east are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service. However, in the rural Vale isolation of settlements may continue to be an issue, as there would continue to be limited provision of facilities and employment in rural communities. Bus service provision is considered to be poor in Aberthaw (West), Cog, Penmark, Colwinston and Penllyn amongst other rural settlements (as detailed in the LDP Sustainability Appraisal Draft Scoping Report, February 2007). Development of a new rural settlement would not alleviate these problems. It is likely that the Vale will continue to be an attractive commuter zone due to its proximity to Cardiff and the M4.</p> |   |   |   | <p>Development in urban areas should enable people to work locally, therefore reducing the need to travel to work and commute to Cardiff. Most urban settlements are also accessible by existing national public transport links, particularly via the Cardiff-Bridgend rail service. Increased development of homes and facilities around existing rural centres could also improve access to sustainable transport modes as a cascade effect. Through the sustainability test, residents of rural communities that lack appropriate facilities may have to continue travelling long distances to use facilities in other settlements. It is likely that the Vale will continue to be an attractive commuter zone due to its proximity to Cardiff and the M4.</p> |     |   |   | <p>Focusing development in urban areas where there is already a higher population and better access to public transport should have a positive effect on local sustainable transport use. Increased development of homes and facilitates around existing rural centres could also improve access to sustainable transport modes as a cascade effect. . It is likely that the Vale will continue to be an attractive commuter zone due to its proximity to Cardiff and the M4.</p> |   |   |   |

## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC OPTIONS

| 13. To provide for a diverse range of local job opportunities. |  |     |   |   |  |   |   |   |   |   |   |   |
|--|--|-----|---|---|--|---|---|---|---|---|---|---|
| Performance  | +  | +/- | + | M | +  | + | 0 | M | +   | + | 0 | M |
| Commentary   | <p>Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. However, the extent to which employment opportunities can be increased may be limited by the availability of employment land. The majority of employment land is likely to be provided in Barry. Although unemployment is not a key issue in rural settlements, most residents are employed outside their settlement and some outside the Vale of Glamorgan. There are limited local employment opportunities in rural settlements. Through this strategy, rural areas would continue to be affected by the lack of local employment opportunities.</p> <p>If the new rural settlement is sustainable and self-contained, it is assumed that it would provide local employment opportunities in the area of development and its surroundings. However, this would not alleviate the employment issues in much of the rest of the Vale of Glamorgan (e.g. in Barry and Penarth).</p> |     |   |   | <p>Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. The majority of employment land is likely to be provided in Barry, therefore limiting the extent to which this objective can be achieved. It may be difficult to attract some large employers due to inappropriately sized employment sites to smaller settlements therefore limiting the range of job opportunities that can be provided in rural settlements. Development in St Athan is expected to create many local jobs. Overall, although job opportunities are likely to increase, the range of jobs available may remain limited due to the dispersed nature of development.</p> |   |   |   | <p>Development is likely to provide opportunities for employment in urban areas such as Barry and Penarth, where unemployment is an issue. ## APPENDIX 2: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGY SUMMARY TABLE

| LDP STRATEGIC OPTIONS | Option 6 (Option 1 and Option 4): Maximising the potential of and concentrating growth in Barry, Penarth, Dinas Powys, Sully and Rhose (current UDP strategy) as well as developing a new rural settlement to promote sustainable self-containment. |            |                |                    | Option 7 (Option 2b and Option 5): Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements to accommodate further housing and associated development based on a sustainability test. |            |                |                    | Option 8 (Option 5 and Option 4): Concentrate development opportunities in Barry and the South East Zone. The St.Athan area to be a key development opportunity. Other sustainable settlements (including a new rural settlement) to accommodate further housing and associated development. |            |                |                    |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|                     |  |
|---------------------|--|
| Performance         |  |
| ++                  | Policy is highly likely to assist the Sustainability Objective / Aim   |
| +                   | Policy is likely to assist the Sustainability Objective / Aim  |
| 0                   | Policy is likely to have no effect on the Sustainability Objective / Aim   |
| -                   | Policy is likely to conflict with the Sustainability Objective / Aim   |
| --                  | Policy is highly likely to conflict with the Sustainability Objective / Aim  |
| ?                   | The effect of the Policy on the Sustainability Objective / Aim is unclear  |
| +/-                 | The effect of the Policy on the Sustainability Objective / Aim will be mixed   |
| Levels of Certainty |  |
| L                   | Certainty regarding the indicated performance of the policy against the SA Objective/aim is low and further information may be needed to increase certainty.       |
| M                   | Performance of the policy against the SA Objective/aim has been determined with some certainty although further information would assist the appraisal.            |
| H                   | The performance of the policy against the SA Objective/aim has been determined with high certainty as sufficient information is available to assist the appraisal. |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

| <b>CSP1: SUSTAINABLE DEVELOPMENT</b>   |                       |             |           |                    |
|--|-----------------------|-------------|-----------|--------------------|
| Future development in the Vale of Glamorgan will be guided by the principles of sustainable development. Proposals will be supported where they: <ul style="list-style-type: none"> <li>Promote the efficient use of land through the use of suitably located previously developed land or buildings, and higher density, mixed use developments</li> <li>Create safe, attractive and accessible environments,</li> <li>Protect and enhance the countryside, coast and the natural and built environment,</li> <li>Offer sustainable transport choices that reduce the need to travel by car,</li> <li>Reduce the use of natural resources, including, water, energy and waste,</li> <li>Improve the economic and social well being of the population</li> <li>Enhance existing or provide for new community facilities</li> </ul> |                       |             |           |                    |
| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | 0                     | 0           | 0         | M                  |
| Build in sustainable locations, with good access to local facilities   | +                     | +           | ++        | M                  |
| Provide affordable housing   | 0                     | 0           | 0         | M                  |
| Preference for previously developed land in sustainable locations  | +                     | ++          | ++        | H                  |
| <b>Commentary</b><br><i>Provide a mix of dwelling types and tenure</i><br>This policy is likely to allow for the consideration of social and economic influences on the location of housing i.e. located in areas with employment opportunities and transport connections. However it does not specify the nature of any housing development.  |                       |             |           |                    |
| <i>Build in sustainable locations, with good access to local facilities</i><br>This policy will encourage mixed use developments with provision of sustainable transport choices, therefore actively supporting this aim.  |                       |             |           |                    |
| <i>Provide affordable housing</i><br>The policy does not have direct bearing on the aim.   |                       |             |           |                    |
| <i>Preference for previously developed land in sustainable locations</i><br>This policy inherently promotes sustainable and accessible development on previously developed land and discourages development in greenfield land. Developments in rural settlements are less likely to be able to utilise brownfield sites and would need to be within existing settlements wherever possible, to ensure that the countryside is protected from inappropriate development. Accessibility may be an issue in more rural areas.  |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | +/-                   | +           | +         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users   | ?                     | +           | +         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible   | ?                     | +           | +         | M                  |
| Prevent the loss of existing well-used and valued local facilities   | +                     | +           | ++        | L                  |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

**Commentary***Meet the needs of existing communities throughout the Vale of Glamorgan*

This policy promotes mixed use developments, enhanced existing or new community facilities, sustainable transport and protection of the environment. It is therefore likely that new developments will provide for the needs of the existing communities as well as new residents. In rural areas in particular, increasing the population may ensure the viability of some services in the area.

*Provide appropriate facilities within new developments to meet the needs of future users,*

This policy is likely to assist this sustainability aim

*Ensure local facilities are suitable for purpose and easily accessible*

This policy is likely to assist this sustainability aim

*Prevent the loss of existing well-used and valued local facilities*

This policy is likely to assist this sustainability aim.

**3. To maintain and improve access for all.**

|  |   |   |    |   |
|--|---|---|----|---|
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community | + | + | ++ | M |
| Improve public perception of access  | 0 | 0 | 0  | M |
| Benefit health and well being through social inclusion within the physical environment                 | 0 | + | +  | L |
| Promote 'life-time' homes  | 0 | 0 | 0  | M |

**Commentary***Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community*

This policy requires the creation of safe, attractive and accessible environments, the improvement of economic and social well-being of the population and sustainable transport choices. Through these requirements this policy will help to ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community. It is assumed that planning policy will set minimum design standards to ensure accessibility to all.

*Benefit health and well being through social inclusion within the physical environment*

The development of accessible environments will take time to occur across all areas of the Vale of Glamorgan and so be accessible to all of the community. It is likely that development will benefit health and well being through social inclusion within the physical environment. The effect of this is likely to occur in the medium term and become stronger with continued development.

*Improve public perception of access*

This policy is unlikely to affect the public perception of access, whilst it provides community facilities, it does not directly provide for accessibility.

*Promote 'life-time' homes*

Although not directly promoting 'life-time' homes this policy does promote sustainable development and in turn living

**4. Reduce the causes of deprivation.**

|  |   |    |    |   |
|--|---|----|----|---|
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all. | + | ++ | ++ | M |
| Prevent the isolation of deprived communities.   | + | +  | +  | L |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

**Commentary**

*Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.*

A balanced spread of growth should increase the number of decent homes and business development, contributing to tackling the causes of deprivation proportionally to settlement size. This policy will therefore reduce deprivation, as it will result in development that is sustainable and provides for all within the community. For example mixed development will result in helping to reduce deprivation by ensuring job opportunities, a variety of housing types and appropriate facilities are available at a local level. Other parts of the policy will help to protect the environment and ensure access for all to the facilities. Most notably part of this policy is to improve the economic and social well being of the population. The benefits of the policy will become greater over time.

*Prevent the isolation of deprived communities.*

This policy is likely to encourage sustainable development in deprived areas as it encourages the use of previously developed land. Developments should help to prevent isolation i.e. mixed development, will help ensure job opportunities, a variety of housing types and appropriate facilities are developed and are available at a local level. Changes to transport could also result in other deprived areas being able to access facilities and prevent isolation. Effects are likely to remain similar across time due to the alteration of deprived area locations and the timing of development effects.

**5. To maintain, protect and enhance community spirit.**

|  |    |    |    |   |
|--|----|----|----|---|
| Reduce the fear of crime   | ?  | ?  | ?  | L |
| Provide community facilities   | ++ | ++ | ++ | H |
| Encourage local distinctiveness (e.g. development having regard to its context and public art) | 0  | 0  | 0  | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)     | +  | +  | +  | L |

**Commentary**

*Reduce the fear of crime*

Part of this policy is to create safe, attractive and accessible environments. Development, which is assumed to improve the environment i.e. though improved lighting and use of disused land, is likely to result in those in the area being less fearful of crime. However it is unlikely to result in a change in attitude elsewhere and could potentially have a negative effect elsewhere if it is perceived that unlawful activities have moved to other areas. It is therefore unclear how this policy will affect the sustainability aim of reducing fear of crime.

*Provide community facilities*

This policy requires the enhancement of existing or provision for new community facilities in development areas. It therefore will positively benefit the sustainability aim of providing community facilities.

*Encourage local distinctiveness (e.g. development having regard to its context and public art)*

This policy is unlikely to affect local distinctiveness as it does not address such issues directly. However it does address environmental protection issues, which can relate to local distinctiveness.

*Encourage community ownership of the environment (e.g. Promote shared spaces, good design)*

This policy requires the enhancement of existing or provision for new community facilities in development areas, which could include shared spaces and community facilities e.g. community centres. The policy also addresses environmental protection and management issues, which can include open spaces. It therefore will positively assist the sustainability aim of encouraging community ownership of the environment as it will help to provide the areas which the community can share.

**6. To minimise the causes and manage the effects of climate change.**

|   |   |    |    |   |
|---|---|----|----|---|
| Reduce air pollution (e.g. transport / industry emissions)                      | ? | ?  | +  | L |
| Reduce energy consumption (e.g. promote energy efficient building)              | + | ++ | ++ | H |
| Promote renewable energy generation   | 0 | 0  | 0  | M |
| Protect and promote the development of carbon sinks                             | 0 | 0  | 0  | M |
| Reduce flood risk to people, property and maintain the integrity of floodplains | 0 | 0  | 0  | M |
| Protect biodiversity, flora and fauna from the effects of climate change        | 0 | 0  | +  | L |

|  |    |    |    |   |
|--|----|----|----|---|
| <b>Commentary</b>  |    |    |    |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i>  |    |    |    |   |
| By focusing future expansion on existing settlement, it is more likely that public transport would be able to service new developments in the long term. (In the shorter term, however, use of cars may increase). The policy encourages mixed development which could result in more industrial processes occurring within a particular area. This could increase emissions overall in the short term. In the future, however, the use of improved technologies may reduce this impact. Pollution associated with heavy industry could be addressed through planning requirements and the requirements under this policy to protect the environment. Thus it is uncertain how this policy would affect the sustainability objective, particularly in the short and medium term. |    |    |    |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i>  |    |    |    |   |
| This policy requires developments to reduce the use of natural resources, including energy and therefore will positively assist in the achievement of the sustainability aim of reducing energy consumption as the policy only addresses new development the effect of the policy will increase with time.   |    |    |    |   |
| <i>Promote renewable energy generation</i>   |    |    |    |   |
| This policy seeks to reduce the energy consumption, but does not directly promote renewable energy generation.   |    |    |    |   |
| <i>Protect and Promote the development of carbon sinks</i>   |    |    |    |   |
| The policy does not have direct bearing on this aim.   |    |    |    |   |
| <i>Reduce flood risk to people, property and maintain the integrity of floodplains</i>   |    |    |    |   |
| The policy has no direct bearing on the aim.   |    |    |    |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i>  |    |    |    |   |
| The policy requires the protection and enhancement of the countryside, coast and the natural and built environment and therefore supports the aim.   |    |    |    |   |
| <b>7. To minimise waste.</b>   |    |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | +  | +  | ++ | M |
| Provide and promote recycling facilities.  | ?  | ?  | ?  | L |
| Avoid landfill of waste  | ?  | ?  | ?  | L |
| <b>Commentary</b>  |    |    |    |   |
| <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i>   |    |    |    |   |
| This policy promotes the efficient use of land through the use of suitably located previously developed land and buildings that should be available in the south east urban centres. It also promotes the reduction of the use of natural resources i.e. building materials. The reuse of materials and land benefits all, as the natural resource is not unnecessarily used. It is likely that conversion of old buildings will occur throughout and reuse of materials will increase as technologies permit.   |    |    |    |   |
| <i>Provide and promote recycling facilities and Avoid landfill of waste</i>  |    |    |    |   |
| The policy does not specifically promote the provision of recycling facilities and the reduction in waste going to landfill. It does, however, promote the reduction of waste. The provision of appropriate facilities could be required in developments as part of community facilities also required by this policy. The provision requirements on new developments are likely to be put in as planning conditions (by exercising the principles in CSP5: Integrated Sustainable Communities) and therefore it is not possible to determine whether this is likely to occur at this level.   |    |    |    |   |
| <b>8. To use land effectively and efficiently.</b>   |    |    |    |   |
| Retain greenfield land   | +  | +  | ++ | M |
| Bring previously developed land in sustainable locations back into use   | ++ | ++ | ++ | H |
| Promote good quality high density developments where appropriate and having regard to the local context  | ++ | ++ | ++ | H |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | +  | +  | ++ | M |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |    |    |    |   |
|---|----|----|----|---|
| <b>Commentary</b>   |    |    |    |   |
| This policy addresses retaining undeveloped land, bringing previously developed land in sustainable locations back into use, promoting good quality high density developments where appropriate, protecting the countryside from inappropriate development, especially good quality agricultural land and areas of high landscape value and will positively assist sustainability aims and objectives. Effects of the policy will be most noticeable in the long term when areas become more developed and pressures are increasing to develop greenfield sites, brownfield sites becoming less available and increasingly more difficult to develop. |    |    |    |   |
| <b>9. To protect and enhance the built and natural environment.</b>   |    |    |    |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.  | ++ | ++ | ++ | H |
| Improve and protect the quality and quantity of inland and coastal water resources  | +  | +  | +  | M |
| Protect or enhance the built environment including historic buildings and conservation areas.   | ++ | ++ | ++ | M |
| Protect cultural heritage and archaeology.  | ?  | ?  | ?  | L |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.  | +  | +  | +  | L |
| <b>Commentary</b>   |    |    |    |   |
| <i>Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.</i>   |    |    |    |   |
| This policy addresses the protection and enhancement of natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil, water resources and therefore positively assists this sustainability objective at a high level.   |    |    |    |   |
| <i>Improve and protect the quality and quantity of inland and coastal water resources</i>   |    |    |    |   |
| The policy seeks to protect and enhance the coast and natural environment and it is expected that this would assist the protection of the quality of water resources. Furthermore proposals will be supported through this policy which reduce the use of water resources therefore the policy will assist in protecting the quantity of water resources.   |    |    |    |   |
| <i>Protect or enhance the built environment including historic buildings and conservation areas.</i>  |    |    |    |   |
| This policy also makes provision to address the need to protect the built environment at a strategic level. This should benefit the built environment, historic buildings and conservation areas, in that it encourages the reuse and therefore protection of previously developed buildings and areas. However, appropriate conditions would be needed to avoid inappropriate renovations and development.   |    |    |    |   |
| <i>Protect cultural heritage and archaeology.</i>   |    |    |    |   |
| This policy does not directly support the aim of protecting cultural heritage and archaeology. It could benefit cultural heritage in that it encourages the reuse and therefore protection of previously developed buildings and areas, although inappropriate renovations and development could have a negative effect. It should be noted that any development has the potential to affect archaeological remains and that the likelihood of this can only be determined at a site level.   |    |    |    |   |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.  |    |    |    |   |
| Although this policy does not directly affect the public appreciation of the environment it should help with accessibility issues as it requires new developments to create safe, attractive and accessible environments and to protect and enhance the natural and built environment. Increased access along with enhanced and protected environments may help to enhance appreciation. It should be noted that although beneficial to the community, increased access can be detrimental to the natural resource.   |    |    |    |   |
| <b>10. To provide a high quality environment within all new developments.</b>   |    |    |    |   |
| Ensure development meets the needs of current and future users.   | +  | +  | +  | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)  | +  | +  | +  | L |
| Promote sustainable design and construction solutions.  | +  | +  | +  | L |
| Enhance access for cyclists and pedestrians.  | ?  | +  | +  | L |
| Provide adequate green spaces.  | ?  | +  | +  | L |
| Provide adequate vehicular parking and manoeuvring space.   | -  | -  | -  | L |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

**Commentary**

*Ensure development meets the needs of current and future users.*

By definition sustainable development should meet the needs of current and future users. The aim of this policy is to achieve sustainable development by providing mixed development in appropriate locations and protecting the natural and built environment.

*Promote a sense of community pride (e.g. shared spaces, public art, local materials)*

This policy requires the enhancement of existing or provision for new community facilities in development areas, which could include shared spaces and community facilities e.g. community centres. The policy also addresses environmental protection and management issues, which can include open spaces. It therefore will positively benefit this SA objective, as it will help to provide the areas that the community can share and take pride in.

*Enhance access for cyclists and pedestrians.*

Enhancing access for cyclists and pedestrians may be positively effected by this policies requirement to offer sustainable transport choices that reduce the need to travel by car in new developments. To fully benefit from the provision of facilities for cyclist and pedestrians the location of facilities and routes between them should be carefully thought out at the design stage. Benefits will increase over time as more facilities and routes are developed in new developments and in conjunction with them. Initially development activities could detrimentally affect access for pedestrians and cyclists.

*Promote sustainable design and construction solutions*

This aim is directly supported by the policy.

*Provide adequate green spaces*

Provision of adequate green spaces would need to be determined at a project level and be implemented through planning conditions. This element will also be in part supported by CSP5: Integrated Sustainable Communities.

*Provide adequate vehicular parking and manoeuvring space.*

The policy would not necessarily support this aim as development of sustainable transport would be encouraged. It is noted that providing car parking facilities is likely to promote the use of cars and not other sustainable forms of vehicle travel which is against this policy. Provision of adequate vehicular parking and manoeuvring space would need to be determined at a project level and be implemented through planning conditions.

**11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.**

|  |   |   |   |   |
|--|---|---|---|---|
| Protect and enhance existing cultural heritage and historic environments | + | + | + | M |
| Promote new opportunities for culture in the Vale of Glamorgan           | ? | + | + | L |

**Commentary**

This policy aims to protect and enhance the natural and built environments and enhance existing or provide new community facilities. It will therefore positively assist in protection and enhancement of existing cultural heritage and historic environments and the promotion of new opportunities for culture in the Vale of Glamorgan. There is uncertainty for the short term on the promotion of new opportunities for culture as it is likely to take time for this to develop.

**12. To reduce the need to travel and enable the use of more sustainable modes of transport.**

|  |   |    |    |   |
|--|---|----|----|---|
| Ensure new development is located in accessible locations from a range of travel modes   | + | ++ | ++ | M |
| Promote technologies to reduce need to travel (e.g. homeworking)   | 0 | 0  | 0  | L |
| Enable the movement of people and freight by sustainable means   | + | +  | +  | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way) | + | ++ | ++ | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

**Commentary**

*Ensure new development is located in accessible locations from a range of travel modes,*

This policy aims to have accessible developments that offer sustainable choices of transport to people and therefore positively assists the sustainability aim. The benefits will increase over time as development of transport infrastructure is developed. It should be noted that transportation is addressed at a regional level through the Regional Transport Plan.

*Promote technologies to reduce need to travel (e.g. homeworking)*

This policy is unlikely to have a direct effect on the promotion of technologies to reduce need to travel (e.g. homeworking).

*Enable the movement of people and freight by sustainable means*

This policy does not directly address the issue of moving freight by sustainable means, but scores positively through the promotion of alternatives to the car for people.

*Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)*

By offering alternatives to travelling by car this policy has scope to meet this aim.

**13. To provide for a diverse range of local job opportunities.**

|   |   |   |   |   |
|---|---|---|---|---|
| Protect existing and potential employment sites for employment uses                         | ? | ? | ? | L |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | M |
| Encourage a range of employment sites in locations accessible by a range of transport modes | + | + | + | M |
| Support the enhancement of skills to meet employment needs                                  | 0 | 0 | 0 | M |
| Promote and enable sustainable rural diversification  | + | + | + | L |

**Commentary**

*Protect existing and potential employment sites for employment uses*

This policy aims to improve economic and social well-being of the population. It is currently unclear whether and to what extent this would include protecting existing and potential employment sites for employment uses within this policy, however CSP7: Employment offers more detail. This policy may benefit from clarification of what is meant by social and economic well-being.

*Support a culture of entrepreneurship*

This policy has no direct bearing on this aim.

*Support the enhancement of skills to meet employment needs*

This policy has no direct bearing on supporting the enhancement of skills to meet employment needs. The policy aims to provide accessible locations.

*Encourage a range of employment sites in locations accessible by a range of transport modes* This will positively assist the aim of ensuring employment sites are promoted in accessible locations.

*Promote and enable sustainable rural diversification*

The policy aims to improve the economic and social well being of the population that will positively assist the aim of promoting and enabling sustainable rural diversification as part of this policy.

**14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.**

|   |   |   |    |   |
|---|---|---|----|---|
| Ensure retail centres are accessible by a range of modes of transport                   | + | + | ++ | M |
| Ensure a range of uses within retail centres  | + | + | +  | M |
| Avoid out-of-town retail development  | + | + | +  | L |
| Enhance the public realm within existing centres and facilitate regeneration programmes | + | + | +  | M |
| Promote the evening economy in the Vale of Glamorgan's town centres                     | + | + | +  | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| This policy is likely to positively assist this sustainability objective as it aims to create safe, attractive and accessible environments, enhance existing or provide for new community facilities, offer sustainable transport choices and improve the economic and social well being of the population. It is likely that the accessibility of retail centres by a range of transport modes will take some time to achieve but that in the longer term this will be the greatest positive effect. |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | + | + | + | L |
| Enable tourism uses to be accessed by sustainable travel modes  | + | + | + | L |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | + | + | + | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | 0 | 0 | 0 | L |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Promote local economic growth through tourism, Enable tourism uses to be accessed by sustainable travel modes and Manage tourism to protect the Vale of Glamorgan's natural and built assets</i>   |   |   |   |   |
| This policy will positively affect the first three aims of this objective as it aims to improve the economic well being of the population, offer sustainable transport choices that reduce the need to travel by car and protect and enhance the countryside, coast and natural and built environment.  |   |   |   |   |
| <i>Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)</i>   |   |   |   |   |
| The policy appears to have no direct influence on the achievement of this aim. Clarification of the meaning of "social well-being" and the provision of a specific Tourism CSP may be of benefit.   |   |   |   |   |
| <i>Enable specialist tourism (e.g. sustainable, sports, cultural etc).</i>  |   |   |   |   |
| The policy appears to have no direct influence on the achievement of this aim. Clarification of the meaning of "social well-being" and the provision of a specific Tourism CSP may be of benefit.   |   |   |   |   |
| This policy could both promote or stop the achievement of these aims depending on the area and the type of activity proposed to be undertaken there i.e. protect and enhance the countryside, coast and natural and built environment.  |   |   |   |   |

| <b>CSP2: CLIMATE CHANGE</b>  |                       |             |           |                    |
|--|-----------------------|-------------|-----------|--------------------|
| All new development will be required to demonstrate through the submission of a design statement how the proposal contributes towards reducing its impact on, and adapting to the effects of climate change. |                       |             |           |                    |
| The design statement will demonstrate the steps taken to apply the staged energy hierarchy set out below:  |                       |             |           |                    |
| Stage 1 - reduce the overall predicted energy use  |                       |             |           |                    |
| Stage 2 - use available heat   |                       |             |           |                    |
| Stage 3 - incorporation of on site renewable energy generation   |                       |             |           |                    |
| Stage 4 - supply energy efficiently (including the use of renewables)  |                       |             |           |                    |
| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | 0                     | 0           | ?         | L                  |
| Build in sustainable locations, with good access to local facilities   | 0                     | 0           | 0         | M                  |
| Provide affordable housing   | 0                     | 0           | 0         | H                  |
| Preference for previously developed land in sustainable locations  | 0                     | 0           | 0         | M                  |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| <b>Commentary</b>  |   |   |   |   |
| <i>Provide a mix of dwelling types and tenure</i>  |   |   |   |   |
| In the short and medium term this policy is unlikely to effect the provision of dwelling types and tenure. In the long term it is possible that it could affect this however it is unclear whether this would be a positive or negative effect i.e. that a mix would occur due to different solutions for reducing housings impact on climate change and its effect on them or that a single solution would be developed and limited types and tenure of housing would be developed. |   |   |   |   |
| <i>Provide affordable housing</i>  |   |   |   |   |
| This policy will have no effect on the provision of affordable housing.  |   |   |   |   |
| <i>Build in sustainable locations, with good access to local facilities</i>  |   |   |   |   |
| This policy will have no direct bearing on achieving this aim.   |   |   |   |   |
| <i>Preference for previously developed land in sustainable locations</i>   |   |   |   |   |
| This policy is unlikely to assist in the achievement of this aim.  |   |   |   |   |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |   |   |   |   |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | 0 | 0 | 0 | H |
| Provide appropriate facilities within new developments to meet the needs of future users   | 0 | 0 | 0 | H |
| Ensure local facilities are suitable for purpose and easily accessible   | 0 | 0 | 0 | M |
| Prevent the loss of existing well-used and valued local facilities   | 0 | 0 | 0 | L |
| <b>Commentary</b>  |   |   |   |   |
| The policy does not have a direct bearing on the achievement of the aims.  |   |   |   |   |
| <b>3. To maintain and improve access for all.</b>  |   |   |   |   |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community   | 0 | 0 | 0 | M |
| Improve public perception of access  | 0 | 0 | 0 | H |
| Benefit health and well being through social inclusion within the physical environment   | 0 | 0 | 0 | M |
| Promote 'life-time' homes  | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| This policy is likely to have no direct bearing on the achievement of the aims.  |   |   |   |   |
| <b>4. Reduce the causes of deprivation.</b>  |   |   |   |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.   | 0 | 0 | 0 | M |
| Prevent the isolation of deprived communities.   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| This policy is likely to have no direct bearing on the achievement of the aims.  |   |   |   |   |
| <b>5. To maintain, protect and enhance community spirit.</b>   |   |   |   |   |
| Reduce the fear of crime   | 0 | 0 | 0 | H |
| Provide community facilities   | 0 | 0 | 0 | M |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)   | 0 | 0 | 0 | H |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)   | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| This policy is unlikely to have an effect on the sustainability aims of this objective.  |   |   |   |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>   |   |   |   |   |
| Reduce air pollution (e.g. transport / industry emissions)   | + | + | + | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |    |    |    |   |
|--|----|----|----|---|
| Reduce energy consumption (e.g. promote energy efficient building)   | ++ | ++ | ++ | H |
| Promote renewable energy generation  | ++ | ++ | ++ | H |
| Protect and promote carbon sinks to absorb carbon emissions (e.g. plant trees)   | 0  | 0  | 0  | M |
| Reduce flood risk to people, property and maintain the integrity of floodplains  | 0  | 0  | 0  | M |
| Protect biodiversity, flora and fauna from the effects of climate change   | 0  | 0  | 0  | M |
| <b>Commentary</b>  |    |    |    |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i><br>Through a reduction in energy use, a reduction in greenhouse gas emissions would be expected.   |    |    |    |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i><br>The policy directly seeks to reduce energy consumption and therefore supports this aim.   |    |    |    |   |
| <i>Promote renewable energy generation</i><br>Through the use of renewable energy, including the incorporation of on site renewable energy, as encouraged by this policy, will assist this aim.                                      |    |    |    |   |
| <i>Protect and promote carbon sinks to absorb carbon emissions (e.g. plant trees)</i><br>The policy has no bearing on this aim.  |    |    |    |   |
| <i>Reduce flood risk to people, property and maintain the integrity of floodplains</i><br>The policy has no bearing on this aim.   |    |    |    |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i><br>The policy has no direct bearing on this aim.   |    |    |    |   |
| <b>7. To minimise waste.</b>   |    |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings / reuse materials)   | 0  | 0  | 0  | M |
| Provide and promote recycling facilities.  | 0  | 0  | 0  | M |
| Avoid landfill of waste  | 0  | 0  | 0  | M |
| <b>Commentary</b>  |    |    |    |   |
| <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i><br>This policy is unlikely to directly support this sustainability aim.   |    |    |    |   |
| <i>Provide and promote recycling facilities.</i><br>The policy is unlikely to encourage the development of recycling facilities. Further consideration of waste management is given in CSP11: Strategic waste management facilities. |    |    |    |   |
| <i>Avoid landfill of waste</i><br>The policy will have no direct bearing on the achievement of the aim.  |    |    |    |   |
| <b>8. To use land effectively and efficiently.</b>   |    |    |    |   |
| Retain greenfield land   | 0  | 0  | 0  | M |
| Bring previously developed land in sustainable locations back into use   | 0  | 0  | 0  | M |
| Promote good quality high density developments where appropriate and having regard to the local context  | 0  | 0  | 0  | M |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | 0  | 0  | 0  | M |

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| This policy does not directly support the achievement of these aims.  |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>   |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.  | ? | ? | ? | L |
| Improve and protect the quality and quantity of inland and coastal water resources  | 0 | 0 | 0 | M |
| Protect or enhance the built environment including historic buildings and conservation areas.   | 0 | 0 | 0 | M |
| Protect cultural heritage and archaeology.  | 0 | 0 | 0 | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil, water resources.</i><br>It is unclear to what extent this policy will assist in protecting natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape and soil against the effects of climate change.   |   |   |   |   |
| <i>Protect or enhance the built environment including historic buildings and conservation areas and Protect cultural heritage and archaeology.</i><br>It is unlikely that this policy would affect the sustainability aims of protecting and or enhancing the built environment, including historic buildings and conservation areas and protecting cultural heritage and archaeology.              |   |   |   |   |
| <i>Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.</i><br>It is unlikely that the policy will directly support the achievement of this aim.  |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>   |   |   |   |   |
| Ensure development meets the needs of current and future users.   | + | + | + | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)  | 0 | 0 | 0 | H |
| Promote sustainable design and construction solutions.  | + | + | + | H |
| Enhance access for cyclists and pedestrians.  | 0 | 0 | 0 | M |
| Provide adequate green spaces.  | 0 | 0 | 0 | M |
| Provide adequate vehicular parking and manoeuvring space.   | ? | ? | ? | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure development meets the needs of current and future users.</i><br>The design and measures incorporated into new developments in order that they are able to demonstrate how they reduce impact on and are adapting to climate change should result in new developments meeting the needs of current and future users. This policy will therefore positively assist this sustainability aim. |   |   |   |   |
| <i>Promote a sense of community pride (e.g. shared spaces, public art, local materials)</i><br>This policy is likely to have no effect on the sustainability aim of promoting a sense of community pride (e.g. shared spaces, public art, local materials).   |   |   |   |   |
| <i>Promote sustainable design and construction solutions</i><br>The design and measures incorporated into new developments in order that they are able to demonstrate how they reduce impact on and are adapting to climate change will by their nature include sustainable design and construction solutions. This will result in this policy positively assisting this sustainability aim.        |   |   |   |   |
| <i>Enhance access for cyclists and pedestrians</i><br>The policy is unlikely to have a direct effect upon achievement of this aim.  |   |   |   |   |
| <i>Provide adequate green spaces</i><br>This policy does not directly support the achievement of this aim, however the use of green space for flood storage in the adaptation to climate changes may in some cases be considered to be appropriate.   |   |   |   |   |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <i>Provide adequate vehicular parking and manoeuvring space.</i>  |   |   |   |   |
| It is unclear whether this policy will affect the aim to provide adequate vehicular parking and manoeuvring.  |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>   |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments  | 0 | 0 | 0 | M |
| Promote new opportunities for culture in the Vale of Glamorgan  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| This policy is likely to have no effect on this sustainability objective as it addresses new development and its impact on and adaptation to climate change.  |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | 0 | 0 | 0 | M |
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0 | 0 | 0 | M |
| Enable the movement of people and freight by sustainable means  | 0 | 0 | 0 | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| The policy does not specifically address climate change in relation to greenhouse gas emissions as a result of access to new developments. However design statements may detail how sustainable transport would be encouraged for access to developments. However, sustainable transport is addressed more directly under CSP1 (Sustainable Development) and CSP10 (Transport). |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |   |   |   |
| Protect existing and potential employment sites for employment uses   | 0 | 0 | 0 | L |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | H |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | H |
| Promote and enable sustainable rural diversification  | 0 | 0 | 0 | L |
| <b>Commentary</b>   |   |   |   |   |
| The policy does not have a direct bearing on the achievement of the aims.   |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | 0 | 0 | 0 | M |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | M |
| Avoid out-of-town retail development  | 0 | 0 | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | 0 | 0 | 0 | M |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| The policy is unlikely to affect the achievement of the aims.   |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | 0 | 0 | 0 | M |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | M |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | 0 | 0 | 0 | M |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| The policy does not appear to have a direct bearing on the achievement of the aims with regard to tourism within the Vale of Glamorgan.   |   |   |   |   |

APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| CSP3: RENEWABLE ENERGY  |                       |             |           |                    |
|---|-----------------------|-------------|-----------|--------------------|
| Proposals for community based renewable energy schemes such as district heating, community wind power, biomass combustion and combined heat and power will be permitted providing they satisfy the requirements of other policies within this plan. |                       |             |           |                    |
| Sustainability Objective / Aims   | Assessment of Effects |             |           | Level of Certainty |
|   | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>  |                       |             |           |                    |
| Provide a mix of dwelling types and tenure  | 0                     | 0           | 0         | H                  |
| Build in sustainable locations, with good access to local facilities  | 0                     | 0           | 0         | H                  |
| Provide affordable housing  | 0                     | 0           | 0         | H                  |
| Preference for previously developed land in sustainable locations   | 0                     | 0           | 0         | H                  |
| <b>Commentary</b>   |                       |             |           |                    |
| The policy does not have any bearing on the achievement the aims under this objective   |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>   |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan   | 0                     | 0           | 0         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users  | 0                     | 0           | 0         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible  | 0                     | 0           | 0         | M                  |
| Prevent the loss of existing well-used and valued local facilities  | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>   |                       |             |           |                    |
| The policy does not have any bearing on the achievement the aims under this objective   |                       |             |           |                    |
| <b>3. To maintain and improve access for all.</b>   |                       |             |           |                    |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community  | 0                     | 0           | 0         | H                  |
| Improve public perception of access   | 0                     | 0           | 0         | H                  |
| Benefit health and well being through social inclusion within the physical environment  | 0                     | 0           | 0         | H                  |
| Promote 'life-time' homes   | 0                     | 0           | 0         | H                  |

| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | +                     | +           | +         | M                  |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |    |    |    |   |
|---|----|----|----|---|
| <b>Commentary</b>   |    |    |    |   |
| <i>Encourage community ownership of the environment (e.g. Promote shared spaces, good design)</i>   |    |    |    |   |
| Development of community based renewable energy schemes will encourage a sense of community ownership of these schemes therefore assisting the achievement of this aim.   |    |    |    |   |
| The policy has no bearing on all the other aims under this objective.   |    |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |    |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)  | +  | +  | +  | M |
| Reduce energy consumption (e.g. promote energy efficient building)  | 0  | 0  | 0  | M |
| Promote renewable energy generation   | ++ | ++ | ++ | H |
| Protect and promote the development of carbon sinks   | 0  | 0  | 0  | H |
| Reduce flood risk to people, property and maintain the integrity of floodplains   | 0  | 0  | 0  | M |
| Protect biodiversity, flora and fauna from the effects of climate change  | 0  | 0  | 0  | M |
| <b>Commentary</b>   |    |    |    |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i>   |    |    |    |   |
| Through encouraging the development of renewable energy, the policy will assist in reducing the emission of greenhouse gases in operation.  |    |    |    |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i>   |    |    |    |   |
| The policy does not seek to reduce energy consumption, but seeks to meet demand for energy through the generation of energy from renewable sources. The need to reduce energy consumption is addressed by CSP 2 (Climate Change). |    |    |    |   |
| <i>Promote renewable energy generation</i>  |    |    |    |   |
| The policy encourages the generation of power and provision of heat from renewable sources.   |    |    |    |   |
| <i>Protect and Promote the development of carbon sinks</i>  |    |    |    |   |
| The policy has no bearing on this aim.  |    |    |    |   |
| <i>Reduce flood risk to people, property and maintain the integrity of floodplains</i>  |    |    |    |   |
| The policy has no bearing on this aim   |    |    |    |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i>   |    |    |    |   |
| The policy has no direct bearing on this aim.   |    |    |    |   |
| <b>7. To minimise waste.</b>  |    |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)   | 0  | 0  | 0  | H |
| Provide and promote recycling facilities.   | 0  | 0  | 0  | H |
| Avoid landfill of waste   | 0  | 0  | 0  | H |
| <b>Commentary</b>   |    |    |    |   |
| The policy has no bearing on the aims under this objective.   |    |    |    |   |
| <b>8. To use land effectively and efficiently.</b>  |    |    |    |   |
| Retain greenfield land  | 0  | 0  | 0  | H |
| Bring previously developed land in sustainable locations back into use  | 0  | 0  | 0  | H |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| Promote good quality high density developments where appropriate and having regard to the local context  | 0 | 0 | 0 | H |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| The policy has no bearing on the aims under this objective.  |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | 0 | 0 | 0 | L |
| Improve and protect the quality and quantity of inland and coastal water resources   | 0 | 0 | 0 | M |
| Protect or enhance the built environment including historic buildings and conservation areas.  | 0 | 0 | 0 | M |
| Protect cultural heritage and archaeology.   | 0 | 0 | 0 | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| The policy has no direct bearing on the aims under this objective. Where any renewable energy scheme is likely to have negative effects on the built and natural environments, this would be addressed through other policies in the Plan including CSP 1 (Sustainable Development) and CSP 9 (Built and Natural Environment). |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>  |   |   |   |   |
| Ensure development meets the needs of current and future users.  | 0 | 0 | 0 | M |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)   | + | + | + | H |
| Promote sustainable design and construction solutions.   | 0 | 0 | 0 | M |
| Enhance access for cyclists and pedestrians.   | 0 | 0 | 0 | M |
| Provide adequate green spaces.   | 0 | 0 | 0 | M |
| Provide adequate vehicular parking and manoeuvring space.  | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| <i>Promote a sense of community pride (e.g. shared spaces, public art, local materials)</i>  |   |   |   |   |
| The development of community renewable energy schemes will promote a sense of community pride. The policy has no bearing on the other aims under this objective.   |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>  |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments   | 0 | 0 | 0 | M |
| Promote new opportunities for culture in the Vale of Glamorgan   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| The policy has no bearing on the aims under this objective.  |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>   |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes   | 0 | 0 | 0 | M |
| Promote technologies to reduce need to travel (e.g. homeworking)   | 0 | 0 | 0 | M |
| Enable the movement of people and freight by sustainable means   | 0 | 0 | 0 | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| The policy has no direct bearing on the aims under this objective  |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>  |   |   |   |   |
| Protect existing and potential employment sites for employment uses  | 0 | 0 | 0 | M |
| Support a culture of entrepreneurship  | 0 | 0 | 0 | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | M |
| Promote and enable sustainable rural diversification  | + | + | + | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Promote and enable sustainable rural diversification</i>   |   |   |   |   |
| Encouraging generation of power and heat from renewable sources such as biomass, would promote farm diversification as by-products/waste are made available for energy generation. Although the policy does not have direct bearing on the other aims under this directive, it would be expected that through development of renewable energy schemes, the policy would assist the overall objective. |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | 0 | 0 | 0 | M |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | M |
| Avoid out-of-town retail development  | 0 | 0 | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | 0 | 0 | 0 | M |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| The policy has no bearing on the aims under this objective.   |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | 0 | 0 | 0 | M |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | M |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | 0 | 0 | 0 | M |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| The policy has no bearing on the aims under this objective.   |   |   |   |   |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

| CSP4: HOUSING NEED   |                       |             |           |                    |
|--|-----------------------|-------------|-----------|--------------------|
| Provision of land for the development of 7500 new dwellings during the period 2011-2026. To ensure a sustainable supply of housing land is maintained during the plan, housing development will be phased as follows: 2011-2016 2500 dwellings per annum, 2016-2021 2500 Dwellings Per Annum and 2021-2026 2500 dwellings per annum. This provision will be met through: <ul style="list-style-type: none"> <li>• Existing committed sites with planning permission</li> <li>• The redevelopment of suitable Brownfield sites;</li> <li>• The development of a range of strategic sites that accord with the council's strategic settlement hierarchy, and</li> <li>• The conversion of suitable dwellings and appropriate small-scale infill development.</li> </ul>  |                       |             |           |                    |
| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | ++                    | ++          | ++        | H                  |
| Build in sustainable locations, with good access to local facilities   | ++                    | ++          | ?         | H                  |
| Provide affordable housing   | +                     | +           | +         | H                  |
| Preference for previously developed land in sustainable locations  | +                     | +           | ?         | H                  |
| <b>Commentary</b>  |                       |             |           |                    |
| <p><i>Provide a mix of dwelling types and tenure and Build in sustainable locations, with good access to local facilities</i><br/>                     This policy permits development in a number of locations across the Vale of Glamorgan and so will allow for a mix of dwelling types and tenure to be provided in a variety of sustainable locations with good access to facilities. It therefore positively assists these two sustainability aims. It is unclear what the long term implications of this policy on the sustainability aim to build in sustainable locations, with good access to local facilities would be.</p> <p><i>Provide affordable housing</i><br/>                     This policy will positively address the sustainability aim to provide affordable housing, as this will form part of the new housing provided. This issue is further supported through CSP4: Affordable Housing.</p> <p><i>Preference for previously developed land in sustainable locations</i><br/>                     The sustainability aim of preferring previously developed land in sustainable locations will be positively assisted by this policy through the redevelopment of suitable brownfield sites. However, other sites are also equally acceptable within the policy. It is unclear what the long term implications of this policy on this sustainability aim would be.</p> |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | +                     | +           | +         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users   | 0                     | 0           | 0         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible   | 0                     | 0           | 0         | M                  |
| Prevent the loss of existing well-used and valued local facilities   | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>  |                       |             |           |                    |
| <p><i>Meet the needs of existing communities throughout the Vale of Glamorgan</i><br/>                     The provision of housing developments located across the Vale of Glamorgan forms part of the requirement for meeting the needs of existing communities. This policy therefore positively assists the sustainability aim of meeting the needs of existing communities throughout the Vale of Glamorgan. This policy will have limited bearing on the remaining sustainability aims.</p>  |                       |             |           |                    |
| <b>3. To maintain and improve access for all.</b>  |                       |             |           |                    |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community   | 0                     | 0           | 0         | M                  |
| Improve public perception of access  | 0                     | 0           | 0         | M                  |
| Benefit health and well being through social inclusion within the physical environment   | 0                     | 0           | 0         | M                  |
| Promote 'life-time' homes  | ?                     | ?           | ?         | L                  |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |    |    |    |   |
|---|----|----|----|---|
| <b>Commentary</b>   |    |    |    |   |
| <i>Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community</i><br>This policy is unlikely to have direct bearing on the achievement of this aim.   |    |    |    |   |
| <i>Improve public perception of access</i><br>This policy is unlikely to have direct bearing on the achievement of this aim.  |    |    |    |   |
| <i>Benefit health and well being through social inclusion within the physical environment</i><br>This policy is unlikely to have direct bearing on the achievement of this aim.   |    |    |    |   |
| <i>Promote 'life-time' homes</i><br>It is unclear whether this policy will directly affect the aim of promoting 'life-time' homes.  |    |    |    |   |
| <b>4. Reduce the causes of deprivation.</b>   |    |    |    |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.  | ++ | ++ | ++ | M |
| Prevent the isolation of deprived communities.  | ?  | ?  | ?  | L |
| <b>Commentary</b>   |    |    |    |   |
| <i>Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.</i><br>This policy will positively assist the housing element of this aim   |    |    |    |   |
| <i>Prevent the isolation of deprived communities.</i><br>It is unclear how this policy would directly influence this aim, although this may be determined by the location of affordable housing at a more detailed policy or project level.   |    |    |    |   |
| <b>5. To maintain, protect and enhance community spirit.</b>  |    |    |    |   |
| Reduce the fear of crime  | 0  | 0  | 0  | M |
| Provide community facilities  | 0  | 0  | 0  | L |
| Encourage local distinctiveness (e.g. development having regard to its context and promote public art)  | 0  | 0  | 0  | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | 0  | 0  | 0  | M |
| <b>Commentary</b>   |    |    |    |   |
| <i>Reduce the fear of crime</i><br>It is unlikely that this policy would contribute directly to reducing the fear of crime.   |    |    |    |   |
| <i>Provide community facilities</i><br>It is unlikely that this policy would contribute to the achievement of the sustainability aim to provide community facilities. However, it should be noted that planning conditions attached to developments could require community facilities to be built as part of housing developments. |    |    |    |   |
| <i>Encourage local distinctiveness (e.g. development having regard to its context and promote public art)</i><br>The policy will not have direct bearing on the achievement of this aim.  |    |    |    |   |
| <i>Encourage community ownership of the environment (e.g. promote shared spaces, good design)</i><br>The policy will not have bearing on the achievement of this aim.   |    |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |    |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)  | 0  | 0  | 0  | M |
| Reduce energy consumption (e.g. promote energy efficient building)  | 0  | 0  | 0  | M |
| Promote renewable energy generation   | 0  | 0  | 0  | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |    |    |    |   |
|--|----|----|----|---|
| Protect and promote carbon sinks   | 0  | 0  | 0  | M |
| Reduce flood risk to people property and maintain the integrity of floodplains   | 0  | 0  | 0  | M |
| Protect biodiversity, flora and fauna from the effects of climate change   | 0  | 0  | 0  | M |
| <p><b>Commentary</b><br/> <i>Reduce energy consumption (e.g. promote energy efficient building)</i><br/> This policy does not have bearing on the above aim. However, in association with CSP2: Climate Change there is scope for this to be achieved.</p> <p><i>Promote renewable energy generation</i><br/> This policy does not have bearing on the above aim.</p> <p><i>Reduce air pollution (e.g. transport / industry emissions, Protect and promote carbon sinks, Reduce flood risk to people property and maintain the integrity of floodplains and Protect biodiversity, flora and fauna from the effects of climate change)</i><br/> It is likely that this policy would not support the achievement of the other sustainability aims of this objective. These sustainability issues should be considered when the location and design of housing developments are determined at the more detailed policy and project levels. CSP9: Built and Natural Environment also addresses these issues.</p> |    |    |    |   |
| <b>7. To minimise waste.</b>   |    |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | ++ | ++ | ++ | M |
| Provide and promote recycling facilities.  | 0  | 0  | 0  | M |
| Avoid landfill of waste  | 0  | 0  | 0  | M |
| <p><b>Commentary</b><br/> <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i><br/> This policy is likely to positively assist the sustainability aim to promote the use of secondary resources (e.g. convert existing buildings) as one of its provisions is to allow the conversion of suitable dwellings in order to provide sufficient new dwellings.</p> <p><i>Provide and promote recycling facilities</i><br/> This policy does not have a direct bearing on the achievement of this aim.</p> <p><i>Avoid landfill of waste</i><br/> This policy does not have a direct bearing on the achievement of this aim. It is noted that waste issues are addressed at a regional level and through CSP7: Employment.</p>   |    |    |    |   |
| <b>8. To use land effectively and efficiently.</b>   |    |    |    |   |
| Retain greenfield land   | -  | -  | -  | M |
| Bring previously developed land in sustainable locations back into use   | ++ | ++ | ++ | M |
| Promote good quality high density developments where appropriate and having regard to local context  | 0  | 0  | 0  | M |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | 0  | 0  | 0  | M |
| <p><b>Commentary</b><br/> <i>Retain Greenfield land</i><br/> This policy does not directly support the retention of land. Whilst it is acknowledged that the emphasis is on the redevelopment of brownfield sites, the policy doesn't directly presume against "greenfield" development. It has therefore scored negatively against achieving this aim. There remains scope for mitigation of this score through the site selection and details policy stage of the LDP development.</p> <p><i>Bring previously developed land in sustainable locations back into use</i><br/> Through its provisions for the location of new housing developments on brownfield land, this policy positively assists the sustainability aim to bring previously developed land in sustainable locations back into use.</p>  |    |    |    |   |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|  |   |   |   |   |
|--|---|---|---|---|
| <i>Promote good quality high density developments where appropriate and having regard to local context</i><br>The policy does not directly support the achievement of this aim.  |   |   |   |   |
| <i>Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value</i><br>The policy does not directly support the achievement of this aim.   |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | - | - | - | M |
| Improve and protect the quality and quantity of inland and coastal water resources   | - | - | - | M |
| Protect or enhance the built environment including historic buildings and conservation areas.  | - | - | - | M |
| Protect cultural heritage and archaeology.   | - | - | - | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | - | - | - | M |
| <b>Commentary</b><br>The Policy does not support the achievement of the sustainability aims under this objective. There is nothing in the policy to suggest the protection of the natural or built environment, nor the enhancement of public access or public appreciation of the Vale of Glamorgan's environmental assets. CSP3: Housing need appears to conflict against CSP9: Built and natural environment that does more to support the protection of the environment. Mitigation of these conflicts may be possible through the development of detailed policies and site selection.  |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>  |   |   |   |   |
| Ensure development meets the needs of current and future users.  | + | + | + | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)   | 0 | 0 | 0 | L |
| Promote sustainable design and construction solutions.   | 0 | 0 | 0 | L |
| Enhance access for cyclists and pedestrians.   | 0 | 0 | 0 | L |
| Provide adequate green spaces.   | 0 | 0 | 0 | L |
| Provide adequate vehicular parking and manoeuvring space.  | 0 | 0 | 0 | L |
| <b>Commentary</b><br><i>Ensure development meets the needs of current and future users.</i><br>The provision of new housing developments located across the Vale of Glamorgan forms part of the requirement for ensuring development meets the needs of current and future users. This policy therefore positively assists the sustainability aim of meeting the needs of existing communities throughout the Vale of Glamorgan.<br><br><i>Promote a sense of community pride (e.g. shared spaces, public art, local materials), Promote sustainable design and construction solutions, Enhance access for cyclists and pedestrians, Provide adequate green spaces and Provide adequate vehicular parking and manoeuvring space.</i><br>This policy does not support the achievement of these aims, although these can potentially be supported by CSP5: Integrated sustainable communities in conjunction with this policy.       |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>  |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments   | 0 | 0 | 0 | M |
| Promote new opportunities for culture in the Vale of Glamorgan   | 0 | 0 | 0 | H |
| <b>Commentary</b><br><i>Protect and enhance existing cultural heritage and historic environments</i><br>This policy allows for the provision of dwellings through the conversion of suitable dwellings, likely to include those with cultural and historic value, which should help to ensure their continuing presence into the future. This policy has a limited potential to positively assist the sustainability aim of protecting and enhancing existing cultural heritage and historic environments provided that any such conversion are undertaken appropriately. However, the policy does not directly support the protection or enhancement of cultural heritage and historic environments.<br><i>Promote new opportunities for culture in the Vale of Glamorgan</i><br>This policy is unlikely to support the achievement of this sustainability aim to promote new opportunities for culture in the Vale of Glamorgan. |   |   |   |   |

|   |   |   |   |   |
|---|---|---|---|---|
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | 0 | 0 | 0 | M |
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0 | 0 | 0 | M |
| Enable the movement of people and freight by sustainable means  | 0 | 0 | 0 | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| Although this policy makes provisions for the location of housing developments it is unlikely to support the sustainability aims of this objective as these issues will be addressed through CSP10: Transport, other plans such as the Regional Transport Plan, more detailed policies and at the individual project level. Detailed policies and development briefs may be used to support these aims in conjunction with this Policy e.g. inclusion of suitable ICT infrastructure within housing developments to support home working. |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |   |   |   |
| Protect existing and potential employment sites for employment uses   | 0 | 0 | 0 | H |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | H |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | H |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | H |
| Promote and enable sustainable rural diversification  | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| This policy is likely to have no effect on this sustainability objective and its associated aims.   |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | 0 | 0 | 0 | H |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | H |
| Avoid out-of-town retail development  | 0 | 0 | 0 | H |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | 0 | 0 | 0 | H |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| This policy is likely to have no effect on this sustainability objective and its associated aims.   |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | 0 | 0 | 0 | H |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | H |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | H |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | 0 | 0 | 0 | H |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| This policy is likely to have no effect on this sustainability objective and its associated aims.   |   |   |   |   |

APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| CSP5: AFFORDABLE HOUSING  |                       |             |           |                    |
|---|-----------------------|-------------|-----------|--------------------|
| To meet the affordable housing needs of the community, a target of 2500 units of affordable dwellings of an appropriate mix, size and type will be required within the plan period. To reflect local need, these will be delivered through range of site specific targets and thresholds on allocated and windfall sites.   |                       |             |           |                    |
| Sustainability Objective / Aims   | Assessment of Effects |             |           | Level of Certainty |
|   | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>  |                       |             |           |                    |
| Provide a mix of dwelling types and tenure  | ++                    | ++          | ++        | H                  |
| Build in sustainable locations, with good access to local facilities  | 0                     | 0           | 0         | L                  |
| Provide affordable housing  | ++                    | ++          | ++        | H                  |
| Preference for previously developed land in sustainable locations   | 0                     | 0           | 0         | M                  |
| <p><b>Commentary</b><br/> <i>Provide a mix of dwelling types and tenure and Provide affordable housing</i><br/>                     This policy will clearly positively assist the sustainability aims of providing affordable housing and providing a mix of dwelling types and tenure through the plan period.</p> <p><i>Build in sustainable locations, with good access to local facilities and Preference for previously developed land in sustainable locations</i><br/>                     It is unlikely this policy will effect the location of developments regarding sustainability and accessibility. It should be noted that more detailed polices regarding provision of sustainable housing could influence the layout of developments at the project level.</p>                                    |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>   |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan   | +                     | +           | +         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users  | 0                     | 0           | 0         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible  | 0                     | 0           | 0         | L                  |
| Prevent the loss of existing well-used and valued local facilities  | 0                     | 0           | 0         | M                  |
| <p><b>Commentary</b><br/> <i>Meet the needs of existing communities throughout the Vale of Glamorgan</i><br/>                     The provision of affordable housing in new developments located across the Vale of Glamorgan forms part of the requirement for meeting the needs of existing communities. This policy therefore positively assists the sustainability aim of meeting the needs of existing communities throughout the Vale of Glamorgan.</p> <p><i>Provide appropriate facilities within new developments to meet the needs of future users, Ensure local facilities are suitable for purpose and easily accessible and Prevent the loss of existing well-used and valued local facilities</i><br/>                     This policy is unlikely to support the remaining sustainability aims.</p> |                       |             |           |                    |
| <b>3. To maintain and improve access for all.</b>   |                       |             |           |                    |

| Promote 'life-time' homes   | 0                     | 0           | 0         | M                  |
| <p><b>Commentary</b><br/>                     The policy does not directly support any of the sustainability aims under this Objective.</p>   |                       |             |           |                    |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |    |    |    |   |
|---|----|----|----|---|
| <b>4. Reduce the causes of deprivation.</b>   |    |    |    |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.  | ++ | ++ | ++ | M |
| Prevent the isolation of deprived communities.  | ?  | ?  | ?  | M |
| <b>Commentary</b>   |    |    |    |   |
| <i>Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.</i>   |    |    |    |   |
| This policy for affordable housing will positively assist the housing element of this aim.  |    |    |    |   |
| <i>Prevent the isolation of deprived communities.</i>   |    |    |    |   |
| It is unclear how this policy would affect this aim as this, but through increasing the availability of affordable housing, there is some scope to assist in reducing the isolation of deprived communities. The aim cannot be addressed through the provision of housing alone, and achievement will only be possible in conjunction with policies and briefs that support the specific causes of deprivation in each area.                |    |    |    |   |
| <b>5. To maintain, protect and enhance community spirit.</b>  |    |    |    |   |
| Reduce the fear of crime  | 0  | 0  | 0  | M |
| Provide community facilities  | 0  | 0  | 0  | L |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)  | 0  | 0  | 0  | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | 0  | 0  | 0  | L |
| <b>Commentary</b>   |    |    |    |   |
| The policy does not directly support the achievement of these aims.   |    |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |    |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)  | 0  | 0  | 0  | M |
| Reduce energy consumption (e.g. promote energy efficient building)  | 0  | 0  | 0  | M |
| Promote renewable energy generation   | 0  | 0  | 0  | M |
| Promote green sinks to absorb carbon emissions (e.g. plant trees)   | 0  | 0  | 0  | M |
| Reduce flood risk to people, property and maintain integrity of floodplains   | 0  | 0  | 0  | M |
| Protect biodiversity, flora and fauna from the effects of climate change  | 0  | 0  | 0  | M |
| <b>Commentary</b>   |    |    |    |   |
| The policy does not support the achievement of any of the aims under this Objective. There is scope to improve the performance of this policy through the inclusion of detailed policies requiring certain standards in terms of energy efficiency, landscaping and accessibility. This is in part supported by CSP5: Integrated sustainable communities. This inclusion of "sustainability" in the policy may also assist its performance. |    |    |    |   |
| <b>7. To minimise waste.</b>  |    |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)   | 0  | 0  | 0  | M |
| Provide and promote recycling facilities.   | 0  | 0  | 0  | M |
| Avoid landfill of waste   | 0  | 0  | 0  | M |
| <b>Commentary</b>   |    |    |    |   |
| This policy is likely to have no effect on this sustainability objective and its associated aims. It should be noted that waste issues are addressed at a regional level and through CSP11: Strategic waste management facilities.  |    |    |    |   |
| <b>8. To use land effectively and efficiently.</b>  |    |    |    |   |
| Retain greenfield land  | 0  | 0  | 0  | L |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| Bring previously developed land in sustainable locations back into use   | 0 | 0 | 0 | L |
| Promote good quality high density developments where appropriate and having regard to the local context  | ? | ? | ? | L |
| Protect the countryside from inappropriate development, the best and most versatile agricultural land and areas of high landscape value  | 0 | 0 | 0 | L |
| <b>Commentary</b>  |   |   |   |   |
| <i>Promote good quality high density developments where appropriate and having regard to the local context</i>   |   |   |   |   |
| This policy requires the provision of affordable housing of an appropriate mix, size and type. This has potential to result in high density developments, if appropriate. However, the policy does not directly support the promotion of good quality high density developments. |   |   |   |   |
| The Policy does not directly support the achievement of the remaining aims under the objective.  |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | 0 | 0 | 0 | H |
| Improve and protect the quality and quantity of inland and coastal water resources.  | 0 | 0 | 0 | H |
| Protect or enhance the built environment including historic buildings and conservation areas.  | 0 | 0 | 0 | H |
| Protect cultural heritage and archaeology.   | 0 | 0 | 0 | H |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| This policy does not support the achievement of this sustainability objective and its associated aims.   |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>  |   |   |   |   |
| Ensure development meets the needs of current and future users.  | + | + | + | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)   | 0 | 0 | 0 | M |
| Promote sustainable design and construction solutions.   | 0 | 0 | 0 | M |
| Enhance access for cyclists and pedestrians.   | 0 | 0 | 0 | H |
| Provide adequate green spaces.   | 0 | 0 | 0 | H |
| Provide adequate vehicular parking and manoeuvring space.  | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| <i>Ensure development meets the needs of current and future users.</i>   |   |   |   |   |
| The provision of affordable housing in new developments located across the Vale of Glamorgan forms part of the requirement for ensuring development meets the needs of current and future users.   |   |   |   |   |
| This policy therefore positively assists the sustainability aim of meeting the needs of existing communities throughout the Vale of Glamorgan.   |   |   |   |   |
| This policy does not support the achievement of the remaining sustainability aims.   |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>  |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments   | 0 | 0 | 0 | H |
| Promote new opportunities for culture in the Vale of Glamorgan   | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| This policy does not support the achievement of the sustainability objective and its associated aims.  |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>   |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes   | 0 | 0 | 0 | L |
| Promote technologies to reduce need to travel (e.g. homeworking)   | 0 | 0 | 0 | H |
| Enable the movement of people and freight by sustainable means   | 0 | 0 | 0 | H |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)   | 0 | 0 | 0 | L |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| This policy is likely to have no effect on this sustainability objective and its associated aims. It should be noted that the location of affordable housing in regard to a range of transport modes is likely to be a key issue for residents that take up the affordable housing. Detailed policies in support of this policy and CSP5: Integrated sustainable communities could be used to help achieve the transport and accessibility aims under this objective. |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |   |   |   |
| Protect existing and potential employment sites for employment uses   | 0 | 0 | 0 | H |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | H |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | H |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | H |
| Promote and enable sustainable rural diversification  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| This policy does not support the achievement of this sustainability objective and its associated aims. .  |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | 0 | 0 | 0 | H |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | H |
| Avoid out-of-town retail development  | 0 | 0 | 0 | H |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | 0 | 0 | 0 | H |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| This policy does not support the achievement of this sustainability objective and its associated aims.  |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | 0 | 0 | 0 | H |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | H |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | H |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | 0 | 0 | 0 | H |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| This policy does not support the achievement of this sustainability objective and its associated aims.  |   |   |   |   |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### CSP6: PLANNING OBLIGATIONS

THE COUNCIL WILL SEEK PLANNING OBLIGATIONS WHERE APPROPRIATE TO SECURE IMPROVEMENTS IN INFRASTRUCTURE, FACILITIES AND SERVICES APPROPRIATE TO THE SCALE, TYPE AND LOCATION OF THE PROPOSED DEVELOPMENT. THESE OBLIGATIONS MAY INCLUDE THE PROVISION OR IMPROVEMENT OF THE FOLLOWING:

- AFFORDABLE HOUSING;
- EDUCATIONAL FACILITIES;
- TRANSPORT INFRASTRUCTURE AND SERVICES FOR PEDESTRIANS, CYCLISTS, PUBLIC TRANSPORT AND VEHICULAR TRAFFIC;
- PUBLIC OPEN SPACE, LEISURE, SPORT AND RECREATIONAL FACILITIES;
- COMMUNITY FACILITIES;
- ENVIRONMENTAL PROTECTION AND ENHANCEMENT SUCH AS NATURE CONSERVATION, PUBLIC ART, TOWN CENTRE REGENERATION, POLLUTION MANAGEMENT OR HISTORIC RENOVATION;
- RECYCLING AND WASTE FACILITIES; AND
- EMPLOYMENT OPPORTUNITIES AND COMPLEMENTARY FACILITIES INCLUDING TRAINING.

| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|--|-----------------------|-------------|-----------|--------------------|
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | +                     | ++          | ++        | L                  |
| Build in sustainable locations, with good access to local facilities   | +                     | +           | +         | M                  |
| Provide affordable housing   | +                     | ++          | ++        | M                  |
| Preference for previously developed land in sustainable locations  | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>  |                       |             |           |                    |
| <i>Provide a mix of dwelling types and tenure</i>  |                       |             |           |                    |
| It is expected that the range of dwelling types and tenure would depend on the types of developments that are likely to come forward through the planning system. However, through this policy the council is able to influence the delivery of affordable housing.                |                       |             |           |                    |
| <i>Build in sustainable locations, with good access to local facilities</i>  |                       |             |           |                    |
| This policy is not likely to influence the location of new development. It is expected, however that through this policy, new developments will bring delivery of new local facilities or the improvement of existing facilities, particularly sports and recreational facilities. |                       |             |           |                    |
| <i>Provide affordable housing</i>  |                       |             |           |                    |
| It is assumed that where appropriate, the Council will expect developers to provide affordable housing where residential development is taking place.  |                       |             |           |                    |
| <i>Preference for previously developed land in sustainable locations</i>   |                       |             |           |                    |
| This policy has limited influence on the location of new development   |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | +                     | ++          | ++        | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users   | +                     | ++          | ++        | H                  |
| Ensure local facilities are suitable for purpose and easily accessible   | +                     | +           | +         | M                  |
| Prevent the loss of existing well-used and valued local facilities   | +                     | +           | +         | M                  |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### Commentary

##### *Meet the needs of existing communities throughout the Vale of Glamorgan*

It is likely that facilities will be used by those in neighbouring authorities in proximity to settlements in which facilities are provided.

The policy is likely to bring about the delivery of a range of local facilities with new developments. However, it should be noted that this is dependent on new development and those settlements in which development is limited may still experience a lack of local facilities. Benefits will be realised mainly in those settlements located in the south east and St Athan, although other settlements can benefit (to a lesser extent) through development on windfall sites.

##### *Provide appropriate facilities within new developments to meet the needs of future users*

This policy will ensure that local facilities are provided or enhanced to accommodate any new populations.

##### *Ensure local facilities are suitable for purpose and easily accessible*

The achievement of this aim is dependent upon the location of development and therefore this policy has no bearing on the achievement of the aim.

##### *Prevent the loss of existing well-used and valued local facilities*

This policy is likely to ensure that existing facilities are maintained and enhanced.

#### 3. To maintain and improve access for all.

|  |   |   |   |   |
|--|---|---|---|---|
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community | 0 | 0 | 0 | M |
| Improve public perception of access  | + | + | + | M |
| Benefit health and well being through social inclusion within the physical environment                 | 0 | 0 | 0 | M |
| Promote 'life-time' homes  | + | + | + | M |

#### Commentary

##### *Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community*

Building regulations and planning policy would be expected to ensure that any new build easily accessible to all including the less mobile. This policy however, does not have direct influence on the achievement of this aim.

##### *Improve public perception of access*

This policy's influence on the achievement of this aim is limited as this would be particularly dependent on the design and layout of new developments.

##### *Benefit health and well being through social inclusion within the physical environment*

The policy has no direct bearing on the achievement of this aim.

##### *Promote 'life-time' homes*

The policy can be further developed to ensure that new residential developments deliver a range of tenure and types of dwellings to include 'life-time' homes.

#### 4. Reduce the causes of deprivation.

|  |   |   |   |   |
|--|---|---|---|---|
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all. | + | + | + | H |
| Prevent the isolation of deprived communities.   | + | + | + |   |

#### Commentary

##### *Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.*

Delivery of any of the contributions identified in the policy is expected to assist in achieving this aim.

##### *Prevent the isolation of deprived communities.*

Deprivation is a key issue particularly in Barry and this policy seeks to address issues related to a number of multiple deprivation domains such as housing, access to facilities and environmental quality.

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| <b>5. To maintain, protect and enhance community spirit.</b>  |   |    |    |   |
|---|---|----|----|---|
| Reduce the fear of crime  | + | +  | +  | M |
| Provide community facilities  | + | ++ | ++ | M |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)  | + | +  | +  | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | 0 | 0  | 0  | M |
| <b>Commentary</b>   |   |    |    |   |
| <i>Reduce the fear of crime</i><br>The policy can assist in improving the quality of the built environment and green spaces therefore possibly reducing the fear of crime.  |   |    |    |   |
| <i>Provide community facilities</i><br>The policy will assist in the provision of local community facilities.   |   |    |    |   |
| <i>Encourage local distinctiveness (e.g. development having regard to its context and public art)</i><br>This policy has limited influence on the achievement of this aim.  |   |    |    |   |
| <i>Encourage community ownership of the environment (e.g. promote shared spaces, good design)</i><br>This policy may bring about improvement or provision of open spaces and is therefore likely to encourage community ownership of the environment.   |   |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |   |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)  | + | +  | +  | H |
| Reduce energy consumption (e.g. promote energy efficient building)  | 0 | 0  | 0  | M |
| Promote renewable energy generation   | 0 | 0  | 0  | L |
| Protect and promote carbon sinks  | + | +  | +  | M |
| Reduce flood risk to people, property and maintain the integrity of floodplains   | 0 | 0  | 0  | H |
| Protect biodiversity, flora and fauna from the effects of climate change  | 0 | 0  | 0  | M |
| <b>Commentary</b>   |   |    |    |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i><br>This policy is unlikely to directly lead to a reduction in greenhouse gas emissions. Achieving this aim, is very much dependent on the type of new development and the location of this development. Provision of public transport infrastructure through this policy may assist in achieving this aim |   |    |    |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i><br>Developers may be expected to ensure that buildings are energy efficient in conjunction with design requirements and Building Regulations.   |   |    |    |   |
| <i>Promote renewable energy generation</i><br>Renewable energy generation may be one of the contributions developers can be expected to make under this policy.   |   |    |    |   |
| <i>Protect and promote carbon sinks</i> Provision and improvement of open spaces as well as environmental protection and enhancement by developers may encourage tree planting.   |   |    |    |   |
| <i>Reduce flood risk to people, property and maintain the integrity of floodplains</i> The policy does not specifically address locational issues, although floodplains would be protected through the policy's requirement to contribute to environmental protection and enhancement.  |   |    |    |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i><br>This policy's influence on the achievement of this aim is limited. Developers may however, make some contribution to environmental protection and enhancement therefore assisting in achieving this aim.   |   |    |    |   |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| <b>7. To minimise waste.</b>   |   |   |   |   |
|--|---|---|---|---|
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | 0 | 0 | 0 | M |
| Provide and promote recycling facilities.  | 0 | 0 | 0 | M |
| Avoid landfill of waste  | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i><br>Design standards can be expected to promote the use of secondary resources although this policy cannot be expected to do so directly   |   |   |   |   |
| <i>Provide and promote recycling facilities.</i><br>The policy has no bearing on this aim.   |   |   |   |   |
| <i>Avoid landfill of waste</i><br>The policy has no bearing on this aim.   |   |   |   |   |
| <b>8. To use land effectively and efficiently.</b>   |   |   |   |   |
| Retain greenfield land   | 0 | 0 | 0 | H |
| Bring previously developed land in sustainable locations back into use   | 0 | 0 | 0 | H |
| Promote good quality high density developments where appropriate and having regard to the local context  | 0 | 0 | 0 | H |
| Protect the countryside from inappropriate development, the best and most versatile agricultural land and areas of high landscape value  | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| The policy does not have significant bearing on the aims under this SA objective.  |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | + | + | + | M |
| Improve and protect the quality and quantity of inland and coastal water resources.  | + | + | + | M |
| Protect or enhance the built environment including historic buildings and conservation areas.  | + | + | + | M |
| Protect cultural heritage and archaeology.   | + | + | + | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | + | + | + | M |
| <b>Commentary</b>  |   |   |   |   |
| <i>Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.</i><br>Developer contribution can be expected through this policy in the achievement of this aim. However, the extent to which this can be achieved is possibly minimal. |   |   |   |   |
| <i>Improve and protect the quality and quantity of inland and coastal water resources.</i><br>Developer contribution can be expected through this policy in the achievement of this aim. However, the extent to which this can be achieved is possibly minimal.                          |   |   |   |   |
| <i>Protect or enhance the built environment including historic buildings and conservation areas.</i><br>This policy seeks to protect and enhance the environment as well as community buildings through developer contribution. It is therefore likely to assist in achieving this aim.  |   |   |   |   |
| <i>Protect cultural heritage and archaeology.</i><br>Through protection of the environment on and off site, the policy would assist in ensuring the protection of cultural heritage and archaeology across the Vale.   |   |   |   |   |
| <i>Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.</i><br>The policy seeks to improve existing open space and protect environmental assets. The policy therefore supports this aim.   |   |   |   |   |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>10. To provide a high quality environment within all new developments.</b>   |   |   |   |   |
| Ensure development meets the needs of current and future users.   | 0 | 0 | 0 | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)  | + | + | + | M |
| Promote sustainable design and construction solutions.  | 0 | 0 | 0 | M |
| Enhance access for cyclists and pedestrians.  | 0 | 0 | 0 | L |
| Provide adequate green spaces.  | + | + | + | M |
| Provide adequate vehicular parking and manoeuvring space.   | 0 | 0 | 0 | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure development meets the needs of current and future users.</i><br>There is no direct relationship between this aim and the policy.  |   |   |   |   |
| <i>Promote a sense of community pride (e.g. shared spaces, public art, local materials)</i><br>The policy will encourage the provision of community facilities and spaces by developers therefore assisting in promoting community pride.   |   |   |   |   |
| <i>Promote sustainable design and construction solutions.</i><br>This policy has no bearing on this aim.  |   |   |   |   |
| <i>Enhance access for cyclists and pedestrians.</i><br>Through the provision of public transport infrastructure by developers, provisions can also be expected to be made for pedestrians and cyclists.   |   |   |   |   |
| <i>Provide adequate green spaces.</i><br>Developer contribution to the provision of green spaces will assist in achieving this aim.   |   |   |   |   |
| <i>Provide adequate vehicular parking and manoeuvring space.</i><br>The achievement of this aim is dependent on the design of new developments which this policy will not directly influence.   |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>   |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments  | + | + | + | M |
| Promote new opportunities for culture in the Vale of Glamorgan  | + | + | + | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect and enhance existing cultural heritage and historic environments</i><br>Developers can be expected to contribute to the protection of cultural heritage and historic environments particularly where developments directly affect historic buildings and conservation areas. |   |   |   |   |
| <i>Promote new opportunities for culture in the Vale of Glamorgan</i><br>The policy supports this aim as it seeks contributions from developers in the provision of community facilities.   |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | 0 | 0 | 0 | H |
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0 | 0 | 0 | M |
| Enable the movement of people and freight by sustainable means  | 0 | 0 | 0 | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)  | + | + | + | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure new development is located in accessible locations from a range of travel modes</i><br>The policy does not have any influence on the location of new development.   |   |   |   |   |
| <i>Promote technologies to reduce need to travel (e.g. homeworking)</i><br>The extent to which this policy can influence the achievement of this aim is limited.  |   |   |   |   |
| <i>Enable the movement of people and freight by sustainable means</i><br>The policy has no bearing on the achievement of this aim.  |   |   |   |   |
| <i>Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways)</i><br>This policy will directly influence the provision of transport infrastructure where new development occurs.  |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |   |   |   |
| Protect existing and potential employment sites for employment uses   | 0 | 0 | 0 | M |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | M |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | M |
| Promote and enable sustainable rural diversification  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| There is not direct relationship between this aim and the policy.   |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | + | + | + | L |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | M |
| Avoid out-of-town retail development  | 0 | 0 | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | + | + | + | M |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure retail centres are accessible by a range of modes of transport</i><br>Some contribution can be expected from developers through this policy. However, this would be limited to those centres in which development occurs. Considering that most development is likely to be residential, there are limitations to the level of contribution that can be made. |   |   |   |   |
| <i>Ensure a range of uses within retail centres</i><br>The policy has no bearing on the achievement of this aim.  |   |   |   |   |
| <i>Avoid out-of-town retail development</i><br>The policy does not influence the location of development and therefore does not relate to this aim.   |   |   |   |   |
| <i>Enhance the public realm within existing centres and facilitate regeneration programmes</i><br>The policy requires that developers contribute to the provision of open spaces, recreational facilities and community facilities therefore contributing to the achievement of this aim.   |   |   |   |   |
| <i>Promote the evening economy in the Vale of Glamorgan's town centres</i><br>There is no direct relationship between the policy and this aim.  |   |   |   |   |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| <b>15. To promote appropriate tourism.</b>   |   |   |   |   |
|--|---|---|---|---|
| Promote local economic growth through tourism  | 0 | 0 | 0 | H |
| Enable tourism uses to be accessed by sustainable travel modes   | 0 | 0 | 0 | M |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets   | 0 | 0 | 0 | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential) | 0 | 0 | 0 | H |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).  | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| Overall this policy does not have a bearing on the achievement of the aims under this objective.                         |   |   |   |   |

| <b>CSP7: RETAILING</b>   |                       |             |           |                    |
|--|-----------------------|-------------|-----------|--------------------|
| The vitality, viability and attractiveness of the Vale's town, district and village retail centres will be protected and enhanced, ensuring that new retail development proposals are of an appropriate scale and type consistent with the role, character and function of each centre.  |                       |             |           |                    |
| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | 0                     | 0           | 0         | M                  |
| Build in sustainable locations, with good access to local facilities   | 0                     | 0           | 0         | M                  |
| Provide affordable housing   | 0                     | 0           | 0         | M                  |
| Preference for previously developed land in sustainable locations  | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>  |                       |             |           |                    |
| There is no direct relationship between this policy and all the aims under this objective.   |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | 0                     | 0           | 0         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users   | 0                     | 0           | 0         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible   | 0                     | 0           | 0         | M                  |
| Prevent the loss of existing well-used and valued local facilities   | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>  |                       |             |           |                    |
| Generally the lack of local facilities (including retailing) is an issue in the Vale of Glamorgan particularly in the more rural parts. Although this policy relates to the development of retail facilities, it is relevant only where proposals for development have been made and does not determine levels of provision and the type of retail provided. |                       |             |           |                    |
| <b>3. To maintain and improve access for all.</b>  |                       |             |           |                    |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community   | 0                     | 0           | 0         | M                  |
| Improve public perception of access  | 0                     | 0           | 0         | M                  |
| Benefit health and well being through social inclusion within the physical environment   | 0                     | 0           | 0         | M                  |
| Promote 'life-time' homes  | 0                     | 0           | 0         | H                  |
| <b>Commentary</b>  |                       |             |           |                    |
| Generally there is an opportunity to ensure that all new retail development is appropriately developed to be easily accessible by all. Building Regulations and design standards would assist in the achievement of this aim. However, there is no direct relationship with the aims under this objective.   |                       |             |           |                    |
| <b>4. Reduce the causes of deprivation.</b>  |                       |             |           |                    |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.   | 0                     | 0           | 0         | M                  |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|  |   |   |   |   |
|--|---|---|---|---|
| Prevent the isolation of deprived communities.   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| There is no direct relationship between this policy and the aims under this SA objective.  |   |   |   |   |
| <b>5. To maintain, protect and enhance community spirit.</b>   |   |   |   |   |
| Reduce the fear of crime   | 0 | 0 | 0 | M |
| Provide community facilities   | 0 | 0 | 0 | H |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)   | + | + | + | H |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| Community spirit is linked to the vitality and viability of retail centres within settlements. Ensuring that the role, character and function as well as vitality and attractiveness of each centre are protected and enhanced would in turn maintain community spirit by encouraging local distinctiveness. The policy, however does not have a significant bearing on all the aims under this objective. |   |   |   |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>   |   |   |   |   |
| Reduce air pollution (e.g. transport / industry emissions)   | 0 | 0 | 0 | H |
| Reduce energy consumption (e.g. promote energy efficient building)   | 0 | 0 | 0 | M |
| Promote renewable energy generation  | 0 | 0 | 0 | H |
| Protect and promote carbon sinks   | 0 | 0 | 0 | M |
| Reduce flood risk to people, property and maintain the integrity of floodplains  | 0 | 0 | 0 | M |
| Protect biodiversity, flora and fauna from the effects of climate change   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| There no direct relationship between this policy and aims under this objective.  |   |   |   |   |
| <b>7. To minimise waste.</b>   |   |   |   |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | ? | ? | ? | L |
| Provide and promote recycling facilities.  | 0 | 0 | 0 | H |
| Avoid landfill of waste  | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i>   |   |   |   |   |
| There is an opportunity to promote the conversion of existing buildings, particularly within centres that have vacant units e.g. Barry   |   |   |   |   |
| <i>Provide and promote recycling facilities.</i>   |   |   |   |   |
| The policy has no direct bearing on the achievement of this aim.   |   |   |   |   |
| <i>Avoid landfill of waste</i>   |   |   |   |   |
| The policy has no direct bearing on the achievement of this aim.   |   |   |   |   |
| <b>8. To use land effectively and efficiently.</b>   |   |   |   |   |
| Retain greenfield land   | ? | ? | ? | L |
| Bring previously developed land in sustainable locations back into use   | ? | ? | ? | L |
| Promote good quality high density developments where appropriate and having regard to the local context  | 0 | 0 | 0 | M |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | 0 | 0 | 0 | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### Commentary

##### *Retain greenfield land*

Although the policy does not have locational implications, it is assumed that as it relates to retail development within built up centres, it does not encourage development outside of these centres.

##### *Bring previously developed land in sustainable locations back into use*

In those centres where there are vacant retail units, this policy supports the conversion of existing buildings although it does not directly influence the location of any new retail development.

##### *Promote good quality high density developments where appropriate and having regard to the local context*

There is no direct relationship between the policy and this aim.

##### *Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value*

The policy does not have locational implications for retail development.

#### 9. To protect and enhance the built and natural environment.

|  |   |    |    |   |
|--|---|----|----|---|
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil. | 0 | 0  | 0  | M |
| Improve and protect the quality and quantity of inland and coastal water resources.                          | 0 | 0  | 0  | M |
| Protect or enhance the built environment including historic buildings and conservation areas.                | + | ++ | ++ | H |
| Protect cultural heritage and archaeology.   | + | +  | +  | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.                   | 0 | 0  | 0  | H |

#### Commentary

##### *Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.*

The policy has not direct bearing on this aim.

##### *Improve and protect the quality and quantity of inland and coastal water resources.*

The policy has not direct bearing on this aim

##### *Protect or enhance the built environment including historic buildings and conservation areas.*

The attractiveness of retail centres is particularly dependent upon the quality of the built environment. The policy seeks to ensure that attractiveness is protected and enhanced through retail development that is consistent with the character of each centre. Reference to the conversion of existing buildings would further ensure that new developments do not alter the character of retail centres and that historic buildings are maintained and enhanced.

##### *Protect cultural heritage and archaeology.*

Through this policy, protection of cultural heritage may be ensured through the protection of historic buildings.

##### *Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.*

There is no direct relationship between the policy and this aim.

#### 10. To provide a high quality environment within all new developments.

|  |   |   |   |   |
|--|---|---|---|---|
| Ensure development meets the needs of current and future users.                      | 0 | 0 | 0 | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure development meets the needs of current and future users.</i><br>There is no clear, direct link between the policy and this aim.   |   |   |   |   |
| <i>Promote a sense of community pride (e.g. shared spaces, public art, local materials)</i><br>The attractiveness of local centres is closely linked to a sense of community pride. This policy therefore assists in achieving this aim though the protection of the character of retail centres.   |   |   |   |   |
| <i>Promote sustainable design and construction solutions.</i><br>Although the policy is expected to influence the scale and type of retail development, it would not directly influence the design of new developments. To ensure that the character of retail centres is maintained and enhanced, reference to the design of new retail developments may assist. |   |   |   |   |
| <i>Enhance access for cyclists and pedestrians.</i><br>The policy has no direct bearing on this aim.  |   |   |   |   |
| <i>Provide adequate green spaces.</i><br>It is uncertain whether the policy is likely to have any bearing on the provision of green space in and around retail centres. There is no design element within the policy and, furthermore, the provision of green space is dependent on the scale of development.   |   |   |   |   |
| <i>Provide adequate vehicular parking and manoeuvring space.</i><br>Again this aim is dependent on the scale of proposed development, relating to the design and layout of the development.   |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>   |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments  | + | + | + | M |
| Promote new opportunities for culture in the Vale of Glamorgan  | ? | ? | ? | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect and enhance existing cultural heritage and historic environments</i><br>In seeking to protect the character of retail centres through this policy, it is expected that cultural heritage (particularly historic buildings) in retail centres will be protected and enhanced.   |   |   |   |   |
| <i>Promote new opportunities for culture in the Vale of Glamorgan</i><br>The achievement of this policy is particularly dependent upon the function of retail centres in which development occurs as well as the scale of this development.   |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | 0 | 0 | 0 | M |
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0 | 0 | 0 | H |
| Enable the movement of people and freight by sustainable means  | 0 | 0 | 0 | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct link between the policy and the aims under this SA objective.  |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |   |   |   |
| Protect existing and potential employment sites for employment uses   | 0 | 0 | 0 | H |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | H |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | H |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| Promote and enable sustainable rural diversification  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective.  |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | 0 | 0 | 0 | H |
| Ensure a range of uses within retail centres  | ? | ? | ? | M |
| Avoid out-of-town retail development  | 0 | 0 | 0 | H |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | + | + | + | M |
| Promote the evening economy in the Vale of Glamorgan's town centres   | ? | ? | ? | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure retail centres are accessible by a range of modes of transport</i>  |   |   |   |   |
| The policy does not have a locational element to it and relates to retail development in existing centres. Furthermore, the policy has no influence on the provision of public transport infrastructure for example.  |   |   |   |   |
| <i>Ensure a range of uses within retail centres</i>   |   |   |   |   |
| The provision of a wide range of uses within town centres ensures that the vitality and attractiveness of the centres are maintained. However, the range of uses is also dependent on the role and function of the town centre. Some uses may not be appropriate in some centres. The policy would ensure that this is taken into consideration as it requires that development is consistent with the role and function of retail centres. It is necessary to expand the policy to include additional ways in which the Council would seek to protect and enhance the vitality, viability and attractiveness of retail centres . |   |   |   |   |
| <i>Avoid out-of-town retail development</i>   |   |   |   |   |
| The policy refers to development occurring within existing retail centres and therefore does not promote out-of-town retail development. However the policy does not directly influence the location of retail development.   |   |   |   |   |
| <i>Enhance the public realm within existing centres and facilitate regeneration programmes</i>  |   |   |   |   |
| The policy seeks to protect the attractiveness of retail centres and therefore would assist the achievement of this aim. It may be useful to expand the policy to include additional ways in which the Council would seek to protect and enhance the vitality, viability and attractiveness of retail centres   |   |   |   |   |
| <i>Promote the evening economy in the Vale of Glamorgan's town centres</i>  |   |   |   |   |
| As stated in the policy, retail development needs to be consistent with the role and function of retail centres. The achievement of this aim, therefore, is dependent on these two factors.   |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | ? | ? | ? | L |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | H |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | + | + | + | M |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | ? | ? | ? | L |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

**Commentary**  
*Promote local economic growth through tourism*  
 Although the policy does not directly relate to tourism, maintaining and enhancing the attractiveness and character of retail centres would attract tourists to these centres.

*Enable tourism uses to be accessed by sustainable travel modes*  
 There is no direct link between the policy and this aim.

*Manage tourism to protect the Vale of Glamorgan's natural and built assets*  
 Although the policy would lead to the protection of built assets, it does not have any bearing on tourism management.

*Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)*  
 The policy seeks to protect the function of retail centres and therefore those considered to play a significant role in tourism would be protected and enhanced.

*Enable specialist tourism (e.g. sustainable, sports, cultural etc).*  
 Again this would be dependent on the role and function of retail centres.

| <b>CSP8: EMPLOYMENT</b>  |                       |             |           |                    |
|--|-----------------------|-------------|-----------|--------------------|
| The employment needs of the Vale of Glamorgan shall be met through the provision of an additional 10 ha of strategic employment land at Barry and through:   |                       |             |           |                    |
| <ul style="list-style-type: none"> <li>• The enhancement and improvement of existing employment sites;</li> <li>• The safeguarding of existing employment sites from non- employment uses, and</li> <li>• Favouring farm diversification, and sustainable rural and coastal tourism initiatives</li> </ul>   |                       |             |           |                    |
| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | ?                     | ?           | ?         | L                  |
| Build in sustainable locations, with good access to local facilities   | ?                     | ?           | ?         | L                  |
| Provide affordable housing   | ?                     | ?           | ?         | L                  |
| Preference for previously developed land in sustainable locations  | ?                     | ?           | ?         | L                  |
| <b>Commentary</b>  |                       |             |           |                    |
| There may be potential conflict between the policy and the aims under this SA objective. There is a preference to develop on previously developed land, the availability of which, in some locations e.g. Barry, is limited. Where this is the case high density mixed use developments would need to be encouraged. However where affordable housing and employment are provided there would be overall benefits. Overall the effects of this policy are dependent upon siting of employment and housing. |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | +                     | +           | +         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users   | +                     | +           | +         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible   | 0                     | 0           | 0         | M                  |
| Prevent the loss of existing well-used and valued local facilities   | 0                     | 0           | 0         | M                  |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |    |    |   |
|---|---|----|----|---|
| <b>Commentary</b>   |   |    |    |   |
| <i>Meet the needs of existing communities throughout the Vale of Glamorgan</i>  |   |    |    |   |
| Through the provision of employment, existing facilities are maintained and enhanced while new ones can be provided. The policy therefore supports this aim. The policy has no direct influence on the provision of local facilities.   |   |    |    |   |
| <i>Provide appropriate facilities within new developments to meet the needs of future users</i>   |   |    |    |   |
| Through the provision of employment, existing facilities are maintained and enhanced while new ones can be provided. The policy therefore supports this aim. The policy has no direct influence on the provision of local facilities. The policy has no direct bearing on the other two aims under this SA objective. |   |    |    |   |
| <b>3. To maintain and improve access for all.</b>   |   |    |    |   |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community  | 0 | 0  | 0  | M |
| Improve public perception of access   | 0 | 0  | 0  | M |
| Benefit health and well being through social inclusion within the physical environment  | 0 | 0  | 0  | M |
| Promote 'life-time' homes   | 0 | 0  | 0  | M |
| <b>Commentary</b>   |   |    |    |   |
| The policy has no direct influence in the improvement of access in the built environment. Building regulations and design standards would ensure that new development for employment purposes is easily accessible to all.  |   |    |    |   |
| <b>4. Reduce the causes of deprivation.</b>   |   |    |    |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.  | + | ++ | ++ | M |
| Prevent the isolation of deprived communities.  | ? | ?  | ?  | M |
| <b>Commentary</b>   |   |    |    |   |
| <i>Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.</i>   |   |    |    |   |
| The policy will assist the achievement of this aim through the provision of employment opportunities, thereby increasing income levels over time as employment sites are developed. Unemployment is a key issue in isolated locations in the Vale of Glamorgan where an additional 10ha is to be provided.            |   |    |    |   |
| <i>Prevent the isolation of deprived communities.</i>   |   |    |    |   |
| Depending on the location of employment sites, the policy may support this aim..  |   |    |    |   |
| <b>5. To maintain, protect and enhance community spirit.</b>  |   |    |    |   |
| Reduce the fear of crime  | 0 | 0  | 0  | M |
| Provide community facilities  | 0 | 0  | 0  | M |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)  | 0 | 0  | 0  | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | 0 | 0  | 0  | H |
| <b>Commentary</b>   |   |    |    |   |
| There is no direct relationship between the policy and this SA objective.   |   |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |   |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)  | ? | ?  | ?  | L |
| Reduce energy consumption (e.g. promote energy efficient building)  | 0 | 0  | 0  | M |
| Promote renewable energy generation   | 0 | 0  | 0  | M |
| Protect and promote carbon sinks  | 0 | 0  | 0  | H |
| Reduce flood risk to people, property and maintain the integrity of floodplains   | 0 | 0  | 0  | L |
| Protect biodiversity, flora and fauna from the effects of climate change  | 0 | 0  | 0  | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| <b>Commentary</b>  |   |   |   |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i>  |   |   |   |   |
| Provision of employment opportunities within the Vale of Glamorgan would encourage people to work locally thereby reducing transport related carbon emissions.   |   |   |   |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i>  |   |   |   |   |
| The policy has no direct influence on the achievement of this aim.   |   |   |   |   |
| <i>Promote renewable energy generation</i>   |   |   |   |   |
| There is no direct link between the policy and this aim.   |   |   |   |   |
| <i>Protect and promote carbon sinks</i>  |   |   |   |   |
| The policy has no direct bearing on this aim.  |   |   |   |   |
| <i>Reduce flood risk to people, property and maintain the integrity of floodplains</i>   |   |   |   |   |
| The policy does not specifically refer to the location of employment in flood plains and therefore has no direct bearing on this aim.  |   |   |   |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i>  |   |   |   |   |
| The policy has no bearing on the achievement of this aim.  |   |   |   |   |
| <b>7. To minimise waste.</b>   |   |   |   |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | 0 | 0 | 0 | M |
| Provide and promote recycling facilities.  | 0 | 0 | 0 | M |
| Avoid landfill of waste  | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| The policy does not have direct bearing on the aims under this SA objective.   |   |   |   |   |
| <b>8. To use land effectively and efficiently.</b>   |   |   |   |   |
| Retain greenfield land   | ? | ? | ? | L |
| Bring previously developed land in sustainable locations back into use   | ? | ? | ? | L |
| Promote good quality high density developments where appropriate and having regard to the local context  | ? | ? | ? | L |
| Protect the countryside from inappropriate development, especially good quality agricultural land and areas of high landscape value.   | ? | ? | ? | L |
| <b>Commentary</b>  |   |   |   |   |
| <i>Retain greenfield land</i>  |   |   |   |   |
| A number of existing site allocations for employment are located on previously developed land. However, preference would need to be given to previously development land in the siting of any new sites in Barry and other locations.  |   |   |   |   |
| <i>Bring previously developed land in sustainable locations back into use</i>  |   |   |   |   |
| Again, preference would need to be given to previously developed land in the siting of new employment land. It may be necessary to set this out in the policy.   |   |   |   |   |
| <i>Promote good quality high density developments where appropriate and having regard to the local context</i>   |   |   |   |   |
| Preference for mixed-use development may assist in delivering high density developments and would also overall sustainability benefits.  |   |   |   |   |
| <i>Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value</i>  |   |   |   |   |
| It may be necessary to highlight that appropriate farm diversification would be favoured as, in some cases, diversification may conflict with this aim e.g. converting to go-karting or rallying may conflict with agricultural uses and tranquillity (that contributes to landscape value). |   |   |   |   |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
|--|---|---|---|---|
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | ? | ? | ? | L |
| Improve and protect the quality and quantity of inland and coastal water resources.  | ? | ? | ? | L |
| Protect or enhance the built environment including historic buildings and conservation areas.  | ? | ? | ? | L |
| Protect cultural heritage and archaeology.   | 0 | 0 | 0 | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| <i>Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil, water resources.</i><br>The effects of the provision of employment opportunity on natural assets are dependent on the location and siting of employment land. Sensitive siting would be necessary to ensure that natural assets are protected. Where new development is being undertaken any potential impacts on the natural environment should be addressed through environmental impact assessment or through planning conditions.  |   |   |   |   |
| <i>Improve and protect the quality and quantity of inland and coastal water resources.</i><br>The effects of the provision of employment opportunities on water resources are dependent on the siting and type of employment. Where new development will be undertaken any potential impacts on the natural environment should be addressed through environmental impact assessment or through planning conditions. Other policies in the Plan including CSP 1 (Sustainable Development) and, indirectly, CSP 9 (Built and Natural Environment) address the need to protect and improve water resources.   |   |   |   |   |
| <i>Protect or enhance the built environment including historic buildings and conservation areas.</i><br>Where employment land is to be sited in built up areas, it is essential that development is sensitive to the character of the built environment.   |   |   |   |   |
| <i>Protect cultural heritage and archaeology.</i><br>Any impacts on cultural heritage and archaeology should be addressed through environmental impact assessment where new development is proposed or other policy particularly CSP9.   |   |   |   |   |
| <i>Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.</i><br>There is no direct relationship between the policy and this aim.  |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>  |   |   |   |   |
| Ensure development meets the needs of current and future users.  | ? | ? | ? | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)   | 0 | 0 | 0 | M |
| Promote sustainable design and construction solutions.   | 0 | 0 | 0 | M |
| Enhance access for cyclists and pedestrians.   | ? | ? | ? | L |
| Provide adequate green spaces.   | ? | ? | ? | L |
| Provide adequate vehicular parking and manoeuvring space.  | ? | ? | ? | L |
| <b>Commentary</b>  |   |   |   |   |
| The effects of this policy in relation to the aims under this SA objective are dependent upon the scale, design and, to some extent, location of any new development for employment purposes. Where large-scale developments are proposed, these would need to be accessible by a variety of modes of transport, providing facilities for those cycling to the development. Provision of green space and high quality environment also needs to be encouraged in large-scale developments. The policy could make reference to the need for developments on employment sites to be of high quality in terms of design, accessibility and amenity. |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>  |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments   | ? | ? | ? | L |
| Promote new opportunities for culture in the Vale of Glamorgan   | 0 | 0 | 0 | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |    |    |    |   |
|--|----|----|----|---|
| <b>Commentary</b>  |    |    |    |   |
| <i>Protect and enhance existing cultural heritage and historic environments</i>  |    |    |    |   |
| Development for employment purposes needs to be sensitive to historic environments particularly in Conservation Areas.   |    |    |    |   |
| <i>Promote new opportunities for culture in the Vale of Glamorgan</i>  |    |    |    |   |
| The policy does not have a direct bearing on the aim.  |    |    |    |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>   |    |    |    |   |
| Ensure new development is located in accessible locations from a range of travel modes   | ?  | ?  | ?  | L |
| Promote technologies to reduce need to travel (e.g. homeworking)   | 0  | 0  | 0  | M |
| Enable the movement of people and freight by sustainable means   | 0  | 0  | 0  | M |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)   | 0  | 0  | 0  | M |
| <b>Commentary</b>  |    |    |    |   |
| <i>Ensure new development is located in accessible locations from a range of travel modes</i>  |    |    |    |   |
| The accessibility of employment land is dependent on location. Travel to new developments would be governed by CSP 5 and CSP 10  |    |    |    |   |
| <i>Promote technologies to reduce need to travel (e.g. homeworking)</i>  |    |    |    |   |
| Although the policy does not discourage the development of technologies to reduce the need to travel to work, it does not promote it. As well as providing employment opportunities within the Vale of Glamorgan in order to reduce the number of trips made to work, reference needs to be made to role of homeworking in doing so. |    |    |    |   |
| <i>Enable the movement of people and freight by sustainable means</i>  |    |    |    |   |
| The policy has no direct bearing on the achievement of this aim.   |    |    |    |   |
| <i>Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</i>  |    |    |    |   |
| There is no direct link between the policy and this aim.   |    |    |    |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>  |    |    |    |   |
| Protect existing and potential employment sites for employment uses  | ++ | ++ | ++ | H |
| Support a culture of entrepreneurship  | +  | +  | +  | M |
| Encourage a range of employment sites in locations accessible by a range of transport modes  | 0  | 0  | 0  | M |
| Support the enhancement of skills to meet employment needs   | 0  | 0  | 0  | M |
| Promote and enable sustainable rural diversification   | +  | ++ | ++ | H |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### Commentary

##### *Protect existing and potential employment sites for employment uses*

As indicated in the baseline information, in some cases sites allocated for employment have been developed for other purposes e.g. hotels and housing. The policy seeks to prevent the loss of employment land to other uses.

##### *Support a culture of entrepreneurship*

The policy supports a culture of entrepreneurship as it favours farm diversification therefore encouraging entrepreneurship in rural settlements.

Encourage a range of employment sites in locations accessible by a range of transport modes

The focus of the policy is to ensure the provision of employment land, although it makes no reference to the location of these sites, particularly the additional 10ha. It may be necessary for the policy to indicate that easily accessible sites would be preferred.

##### *Support the enhancement of skills to meet employment needs*

The policy makes no reference to the enhancement of skills of the population and therefore has no direct bearing on this aim.

##### *Promote and enable sustainable rural diversification*

Farm diversification is a key objective of this policy.

#### **14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.**

|   |   |   |   |   |
|---|---|---|---|---|
| Ensure retail centres are accessible by a range of modes of transport                   | 0 | 0 | 0 | H |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | M |
| Avoid out-of-town retail development  | 0 | 0 | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes | 0 | 0 | 0 | M |
| Promote the evening economy in the Vale of Glamorgan's town centres                     | 0 | 0 | 0 | M |

#### Commentary

The policy does not have a bearing on the aims under this SA objective.

#### **15. To promote appropriate tourism.**

|  |    |    |    |   |
|--|----|----|----|---|
| Promote local economic growth through tourism  | ++ | ++ | ++ | H |
| Enable tourism uses to be accessed by sustainable travel modes   | 0  | 0  | 0  | H |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets   | +  | +  | +  | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential) | ?  | ?  | ?  | L |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).  | +  | +  | +  | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### Commentary

##### *Promote local economic growth through tourism*

By favouring sustainable rural and coastal tourism initiatives, the Council will promote local economic growth particularly in rural locations.

##### *Enable tourism uses to be accessed by sustainable travel modes*

The policy has no bearing on this aim.

##### *Manage tourism to protect the Vale of Glamorgan's natural and built assets*

The policy promotes sustainable tourism initiatives and therefore, would assist the achievement of this aim.

##### *Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)*

The policy does not protect tourism destinations in the Vale of Glamorgan against inappropriate development. Depending on the location of employment sites for use classes B1, B2 and B8, there may be potential conflict where there is tourism interest.

##### *Enable specialist tourism (e.g. sustainable, sports, cultural etc).*

Farm diversification may assist in the achievement of this aim and also coastal tourism (e.g. water based activities).

#### CSP9: MINERALS

To meet local and regional needs for the provision of minerals, a minimum 10 year supply of reserves throughout the plan period will be maintained. In doing so the Council:

- Safeguard existing reserves from development that would prejudice their future extraction, and
- Favour proposals which promote the sustainable use of minerals including the use of secondary sources

| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|--|-----------------------|-------------|-----------|--------------------|
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>                           |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | 0                     | 0           | 0         | M                  |
| Build in sustainable locations, with good access to local facilities                                   | 0                     | 0           | 0         | M                  |
| Provide affordable housing   | 0                     | 0           | 0         | M                  |
| Preference for previously developed land in sustainable locations                                      | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>  |                       |             |           |                    |
| There is no direct relationship between the policy and this SA objective.                              |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>                              |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan                                | 0                     | 0           | 0         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users               | 0                     | 0           | 0         | M                  |
| Ensure local facilities are suitable for purpose and easily accessible                                 | 0                     | 0           | 0         | M                  |
| Prevent the loss of existing well-used and valued local facilities                                     | 0                     | 0           | 0         | M                  |
| <b>Commentary</b>  |                       |             |           |                    |
| There is no direct relationship between the policy and this SA objective.                              |                       |             |           |                    |
| <b>3. To maintain and improve access for all.</b>  |                       |             |           |                    |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community | 0                     | 0           | 0         | H                  |
| Improve public perception of access  | 0                     | 0           | 0         | H                  |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |   |    |    |   |
|---|---|----|----|---|
| Benefit health and well being through social inclusion within the physical environment  | 0 | 0  | 0  | M |
| Promote 'life-time' homes   | 0 | 0  | 0  | H |
| <b>Commentary</b>   |   |    |    |   |
| The policy has no bearing on any of the aims under this SA objective.   |   |    |    |   |
| <b>4. Reduce the causes of deprivation.</b>   |   |    |    |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.  | 0 | 0  | 0  | M |
| Prevent the isolation of deprived communities.  | 0 | 0  | 0  | H |
| <b>Commentary</b>   |   |    |    |   |
| There is no direct relationship between the policy and the reduction of the causes of deprivation.  |   |    |    |   |
| <b>5. To maintain, protect and enhance community spirit.</b>  |   |    |    |   |
| Reduce the fear of crime  | 0 | 0  | 0  | H |
| Provide community facilities  | 0 | 0  | 0  | M |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)  | 0 | 0  | 0  | H |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | 0 | 0  | 0  | H |
| <b>Commentary</b>   |   |    |    |   |
| The policy has no bearing on the aims under this SA objective.  |   |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |   |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)  | ? | ?  | ?  | L |
| Reduce energy consumption (e.g. promote energy efficient building)  | ? | ?  | ?  | L |
| Promote renewable energy generation   | 0 | 0  | 0  | H |
| Protect and promote carbon sinks  | 0 | 0  | 0  | M |
| Reduce flood risk to people, property and maintain the integrity of floodplains   | 0 | 0  | 0  | M |
| Protect biodiversity, flora and fauna from the effects of climate change  | 0 | 0  | 0  | H |
| <b>Commentary</b>   |   |    |    |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i>   |   |    |    |   |
| The transportation of extracted minerals has implications for the emission of greenhouse gases. Mineral extraction also generates dust. Efforts would need to be made to minimise these effects. Consideration can be given to the location of processing plants in proximity to existing reserves. |   |    |    |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i>   |   |    |    |   |
| The extraction of minerals is highly energy consuming and therefore emphasis need to be given to promoting the use of secondary materials, including the sustainable use of minerals. The policy has no bearing on all other remaining aims.  |   |    |    |   |
| <b>7. To minimise waste.</b>  |   |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)   | + | ++ | ++ | H |
| Provide and promote recycling facilities.   | + | +  | +  | M |
| Avoid landfill of waste   | + | ++ | ++ | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| <b>Commentary</b>  |   |   |   |   |
| <i>Promote the use of secondary resources (e.g. convert existing buildings/reuse materials)</i>  |   |   |   |   |
| The policy indicates the Council will favour those proposals promoting the use of secondary resources and thereby supports this aim, increasingly so throughout the plan period as applications are submitted. |   |   |   |   |
| <i>Provide and promote recycling facilities.</i>   |   |   |   |   |
| The policy is likely to promote the use of recycling facilities.   |   |   |   |   |
| <i>Avoid landfill of waste</i>   |   |   |   |   |
| By encouraging the sustainable use of minerals including the use of secondary sources, the policy will lead to a reduction the levels of land filled construction waste.                                       |   |   |   |   |
| <b>8. To use land effectively and efficiently.</b>   |   |   |   |   |
| Retain greenfield land   | 0 | 0 | 0 | L |
| Bring previously developed land in sustainable locations back into use   | 0 | 0 | ? | M |
| Promote good quality high density developments where appropriate and having regard to the local context  | 0 | 0 | 0 | H |
| Protect the countryside from inappropriate development, the best and most versatile quality agricultural land and areas of high landscape value  | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| <i>Retain greenfield land</i>  |   |   |   |   |
| The policy does not directly influence this aim.   |   |   |   |   |
| <i>Bring previously developed land in sustainable locations back into use</i>  |   |   |   |   |
| There is an opportunity to develop land used for mineral extraction once it has become disused in the long term.   |   |   |   |   |
| <i>Promote good quality high density developments where appropriate and having regard to the local context</i>   |   |   |   |   |
| The policy has no bearing on this aim.   |   |   |   |   |
| <i>Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value</i>  |   |   |   |   |
| All reserves that will be safeguarded by this policy are extensions of existing quarries and will be subject to EIA at project level.  |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil  | - | - | - | H |
| Improve and protect the quality and quantity of inland and coastal water resources.  | 0 | 0 | 0 | M |
| Protect or enhance the built environment including historic buildings and conservation areas.  | 0 | 0 | 0 | M |
| Protect cultural heritage and archaeology.   | ? | ? | ? | L |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | 0 | 0 | 0 | H |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.</i>   |   |   |   |   |
| Mineral extraction can have significant adverse effects on the natural environment and it is essential that effects on biodiversity, wildlife habitats, landscape, soil and water resources are taken into consideration and mitigated at site level. Although other policies (e.g. CSP1 and CSP9) seek to ensure that the natural environment is protected, it may be necessary to emphasise this in CSP8. |   |   |   |   |
| <i>Improve and protect the quality and quantity of inland and coastal water resources.</i>  |   |   |   |   |
| The policy has no direct bearing on this aim.   |   |   |   |   |
| <i>Protect or enhance the built environment including historic buildings and conservation areas.</i>  |   |   |   |   |
| All reserves that will be safeguarded by this policy are extensions of existing quarries and will be subject to EIA at project level.   |   |   |   |   |
| <i>Protect cultural heritage and archaeology.</i>   |   |   |   |   |
| Mineral extraction can be detrimental to buried archaeology. Consideration would need to be given to the potential presence of archaeology at site level. This should be addressed through environmental impact assessment.   |   |   |   |   |
| <i>Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.</i>   |   |   |   |   |
| The policy has no bearing on this aim.  |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>   |   |   |   |   |
| Ensure development meets the needs of current and future users.   | 0 | 0 | 0 | H |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)  | 0 | 0 | 0 | H |
| Promote sustainable design and construction solutions.  | + | + | + | M |
| Enhance access for cyclists and pedestrians.  | 0 | 0 | 0 | H |
| Provide adequate green spaces.  | 0 | 0 | 0 | M |
| Provide adequate vehicular parking and manoeuvring space.   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| <i>Promote sustainable design and construction solutions.</i>   |   |   |   |   |
| The policy supports the promotion of sustainable design and construction solutions through favouring proposals which promote the sustainable use of minerals including the use of secondary materials. The policy does not have a bearing on the achievement of all other aims under this objective.  |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>   |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments  | ? | ? | ? | L |
| Promote new opportunities for culture in the Vale of Glamorgan  | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect and enhance existing cultural heritage and historic environments</i>   |   |   |   |   |
| Any potential impacts of mineral extraction on the cultural heritage and historic environments should be addressed through EIA and other policies such as CSP9 Built and Natural Environment and CSP1 Sustainable Development   |   |   |   |   |
| <i>Promote new opportunities for culture in the Vale of Glamorgan</i>   |   |   |   |   |
| There is no direct relationship between the policy and this aim.  |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | ? | ? | ? | L |
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0 | 0 | 0 | H |
| Enable the movement of people and freight by sustainable means  | ? | ? | ? | L |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)   | 0 | 0 | 0 | M |
| <p><b>Commentary</b><br/> <i>Ensure new development is located in accessible locations from a range of travel modes</i><br/> All reserves that will be safeguarded by this policy are extensions of existing quarries and therefore no new infrastructure will be required.</p> <p><i>Promote technologies to reduce need to travel (e.g. homeworking)</i><br/> The policy does not have direct bearing on this aim.</p> <p><i>Enable the movement of people and freight by sustainable means</i><br/> As above, wherever possible, a range of transport modes need to be explored for the movement of people and minerals to and from sites.</p> <p><i>Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</i><br/> Although the policy does not directly influence this aim, where infrastructure is provided in relation to a particular site, it may be available for use by the whole community.</p>   |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>  |   |   |   |   |
| Protect existing and potential employment sites for employment uses  | + | + | + | M |
| Support a culture of entrepreneurship  | 0 | 0 | 0 | H |
| Encourage a range of employment sites in locations accessible by a range of transport modes  | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs   | 0 | 0 | 0 | M |
| Promote and enable sustainable rural diversification   | 0 | 0 | 0 | M |
| <p><b>Commentary</b><br/> <i>Protect existing and potential employment sites for employment uses</i><br/> Mineral extraction offers employment opportunities and therefore safeguarding reserves, safeguards potential employment opportunities.</p> <p><i>Support a culture of entrepreneurship</i><br/> The policy has no bearing on the aim.</p> <p><i>Encourage a range of employment sites in locations accessible by a range of transport modes</i><br/> The location of mineral reserves is determined by the geology of the Vale of Glamorgan, however those reserves that are easily accessible can be prioritised for extraction. Furthermore all reserves that will be safeguarded by this policy are extensions of existing quarries and will be using existing workforce.</p> <p><i>Support the enhancement of skills to meet employment needs</i><br/> The policy has no direct bearing on the achievement of this aim.</p> <p><i>Promote and enable sustainable rural diversification</i><br/> There is no direct relationship between the policy and this aim.</p> |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>   |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport  | 0 | 0 | 0 | H |
| Ensure a range of uses within retail centres   | 0 | 0 | 0 | M |
| Avoid out-of-town retail development   | 0 | 0 | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes  | 0 | 0 | 0 | H |
| Promote the evening economy in the Vale of Glamorgan's town centres  | 0 | 0 | 0 | H |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and this SA objective.   |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | 0 | 0 | 0 | H |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | H |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)        | 0 | 0 | 0 | L |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | ? | ? | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Promote local economic growth through tourism</i>  |   |   |   |   |
| There is no direct relationship between the policy and this aim.  |   |   |   |   |
| <i>Enable tourism uses to be accessed by sustainable travel modes</i>   |   |   |   |   |
| The policy has not bearing on this aim.   |   |   |   |   |
| <i>Manage tourism to protect the Vale of Glamorgan's natural and built assets</i>   |   |   |   |   |
| There is no direct relationship between the policy and this aim..   |   |   |   |   |
| <i>Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)</i> |   |   |   |   |
| There is no direct relationship between the policy and this aim.  |   |   |   |   |
| <i>Enable specialist tourism (e.g. sustainable, sports, cultural etc).</i>  |   |   |   |   |
| The policy does not refer to the closure of sites and therefore does not directly influence this aim.                           |   |   |   |   |

## CSP10: BUILT AND NATURAL ENVIRONMENT

The Vale of Glamorgan's natural and built environment assets will be protected and enhanced through:

- The promotion of high quality design that reinforces the local character of settlements, enhances landscape settings, and respects the cultural and historic qualities of individual buildings or Conservation Areas,
- Favours opportunities for the creation, conservation or restoration of designated sites of national and local nature conservation interest

| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|--|-----------------------|-------------|-----------|--------------------|
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b> |                       |             |           |                    |
| Provide a mix of dwelling types and tenure                                   | 0                     | 0           | 0         | M                  |
| Build in sustainable locations, with good access to local facilities         | 0                     | 0           | 0         | M                  |
| Provide affordable housing   | 0                     | 0           | 0         | M                  |
| Preference for previously developed land in sustainable locations            | 0                     | 0           | 0         | M                  |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |    |   |
|--|---|---|----|---|
| <b>Commentary</b>  |   |   |    |   |
| <i>Provide a mix of dwelling types and tenure</i><br>Although the policy would promote high quality design in new housing development it does not directly support the provision of a mix of dwelling types and tenure. This aim is supported by CSP3.   |   |   |    |   |
| <i>Build in sustainable locations, with good access to local facilities</i><br>There is no direct relationship between the policy and this aim.  |   |   |    |   |
| <i>Provide affordable housing</i><br>Although the policy would promote high quality design in new housing development, it does not directly support the provision of affordable housing.   |   |   |    |   |
| <i>Preference for previously developed land in sustainable locations</i><br>The policy does not specifically refer to a preference for development on previously developed land but supports CSP1: Sustainable Development and CSP3: Housing Need that do.   |   |   |    |   |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |   |   |    |   |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | 0 | 0 | 0  | M |
| Provide appropriate facilities within new developments to meet the needs of future users   | 0 | 0 | 0  | M |
| Ensure local facilities are suitable for purpose and easily accessible   | 0 | 0 | 0  | M |
| Prevent the loss of existing well-used and valued local facilities   | 0 | 0 | 0  | M |
| <b>Commentary</b>  |   |   |    |   |
| There is no direct relationship between the policy and the aims under this objective.  |   |   |    |   |
| <b>3. To maintain and improve access for all.</b>  |   |   |    |   |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community   | 0 | 0 | 0  | M |
| Improve public perception of access  | 0 | 0 | 0  | M |
| Benefit health and well being through social inclusion within the physical environment   | + | + | ++ | M |
| Promote 'life-time' homes  | 0 | 0 | 0  | M |
| <b>Commentary</b>  |   |   |    |   |
| <i>Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community</i><br>This policy has no direct bearing on access within the Vale of Glamorgan.   |   |   |    |   |
| <i>Improve public perception of access</i><br>The policy does not directly influence the public's perception of access.  |   |   |    |   |
| <i>Benefit health and well being through social inclusion within the physical environment</i><br>A built environment of high quality attracts visitors, both from local residents and those from the surrounding area. Promoting high quality design in the built environment therefore assists the achievement of this aim. |   |   |    |   |
| <i>Promote 'life-time' homes</i><br>Although the policy would promote high quality design in new housing development it does not directly promote the development of life-time homes.  |   |   |    |   |
| <b>4. Reduce the causes of deprivation.</b>  |   |   |    |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.   | + | + | +  | M |
| Prevent the isolation of deprived communities.   | + | + | +  | L |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |    |    |   |
|--|---|----|----|---|
| <b>Commentary</b>  |   |    |    |   |
| <i>Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.</i>  |   |    |    |   |
| The policy promotes high quality design that will improve the quality of the built environment thereby reducing deprivation in terms of the environmental quality and access domains of the Welsh Index of Multiple Deprivation. However, this level of improvement will depend upon where new development takes place. The policy supports this aim in conjunction with CSP1: Sustainable Development and CSP5: Integrated Sustainable Communities. |   |    |    |   |
| <i>Prevent the isolation of deprived communities.</i>  |   |    |    |   |
| The policy supports this aim if development takes place within deprived communities. Deprived communities would be less isolated where access within the built environment is improved through high quality design. Furthermore the policy can promote inclusion through the promotion of "community pride" by improving local areas.  |   |    |    |   |
| <b>5. To maintain, protect and enhance community spirit.</b>   |   |    |    |   |
| Reduce the fear of crime   | + | +  | ++ | H |
| Provide community facilities   | 0 | 0  | 0  | M |
| Encourage local distinctiveness (e.g. development having regard to its context and promote public art)   | + | ++ | ++ | H |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design )  | + | +  | ++ | H |
| <b>Commentary</b>  |   |    |    |   |
| <i>Reduce the fear of crime</i>  |   |    |    |   |
| Improved quality in the built environment reduces the fear of crime. The policy therefore supports this aim.   |   |    |    |   |
| <i>Provide community facilities</i>  |   |    |    |   |
| The policy has no bearing on this aim.   |   |    |    |   |
| <i>Encourage local distinctiveness (e.g. development having regard to its context and public art)</i>  |   |    |    |   |
| The policy promotes design that reinforces the local character of settlements thereby encouraging, promoting and maintaining local distinctiveness.  |   |    |    |   |
| <i>Encourage community ownership of the environment (e.g. promote shared spaces, good design)</i>  |   |    |    |   |
| Enhancing landscape settings through the provision of public open spaces encourages community ownership of the built environment. This is particularly the case where these spaces are easily accessible. Emphasis on accessibility of the built and natural environments may be necessary within the policy.  |   |    |    |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>   |   |    |    |   |
| Reduce air pollution (e.g. transport / industry emissions)   | 0 | 0  | 0  | M |
| Reduce energy consumption (e.g. promote energy efficient building)   | 0 | 0  | 0  | M |
| Promote renewable energy generation  | 0 | 0  | 0  | H |
| Protect and promote carbon sinks   | 0 | 0  | 0  | H |
| Reduce flood risk to people, property and maintain the integrity of floodplains  | 0 | 0  | 0  | H |
| Protect biodiversity, flora and fauna from the effects of climate change   | + | +  | +  | M |
| <b>Commentary</b>  |   |    |    |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i>  |   |    |    |   |
| Protection of the natural environment through the creation, conservation and restoration of designated sites will assist in protecting biodiversity from the effects of climate change. There is no direct relationship between the policy and the other aims under this SA objective. These aims are supported by CSP2: Climate Change.   |   |    |    |   |
| <b>7. To minimise waste.</b>   |   |    |    |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | + | +  | +  | M |
| Provide and promote recycling facilities.  | 0 | 0  | 0  | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |    |    |    |   |
|--|----|----|----|---|
| Avoid landfill of waste  | 0  | 0  | 0  | M |
| <p><b>Commentary</b><br/> <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i><br/> The policy would encourage the reuse of existing buildings in an effort to maintain and reinforce local character.</p> <p><i>Provide and promote recycling facilities.</i><br/> The policy does not directly influence this aim.</p> <p><i>Avoid landfill of waste</i><br/> The policy has no bearing on this aim.</p>   |    |    |    |   |
| <b>8. To use land effectively and efficiently.</b>   |    |    |    |   |
| Retain greenfield land   | +  | +  | +  | M |
| Bring previously developed land in sustainable locations back into use   | ?  | ?  | ?  | L |
| Promote good quality high density developments where appropriate and having regard to the local context  | ++ | ++ | ++ | M |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | ++ | ++ | ++ | H |
| <p><b>Commentary</b><br/> <i>Retain greenfield land</i><br/> The protection of the natural environment and creation of designated sites will assist in efforts to retain undeveloped land.</p> <p><i>Bring previously developed land in sustainable locations back into use</i><br/> The policy does not specifically refer to the reuse of previously developed land although it is addressed through CSP1. However, this can be an integral element to reinforcing local character</p> <p><i>Promote good quality high density developments where appropriate and having regard to the local context</i><br/> In promoting high quality design the policy supports this aim.</p> <p><i>Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value</i><br/> The policy protects the natural environment through creation, protection and enhancement of designated sites and therefore protects the countryside from inappropriate development.</p> |    |    |    |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |    |    |    |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | +  | +  | +  | M |
| Improve and protect the quality and quantity of inland and coastal water resources.  | +  | +  | +  | M |
| Protect or enhance the built environment including historic buildings and conservation areas.  | +  | ++ | ++ | H |
| Protect cultural heritage and archaeology.   | +  | +  | +  | H |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | -  | -  | -  | M |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### Commentary

*Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.*

The policy seeks to protect and enhance the natural environment through favouring opportunities for the creation, conservation or restoration of designated sites. However, there is also a need to protect and enhance the natural environment outside of designated sites. Although CSP1: Sustainable Development makes reference to the protection of the natural environment, there is a need to specify the elements of the natural environment that are to be protected.

*Improve and protect the quality and quantity of inland and coastal water resources.*

The policy favours opportunities for the creation, conservation or restoration of designated sites of national and local nature conservation interest and is expected that the quality of water resources would be protected as a result. However, this would be limited to some extent to designated water bodies.

*Protect or enhance the built environment including historic buildings and conservation areas.*

The policy supports this aim as it seeks to protect and enhance the built environment respecting the cultural and historic qualities of individual buildings and Conservation Areas.

*Protect cultural heritage and archaeology.*

The policy seeks to protect the cultural and historic qualities of individual buildings and Conservation Areas. However, no specific reference is made to the protections of archaeology and other cultural assets outside of built up areas.

*Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.*

Although it would be expected that improved quality of the built environment would ensure improved accessibility, the policy does not specifically refer to accessibility in the built and natural environment.

#### **10. To provide a high quality environment within all new developments.**

|  |   |    |    |   |
|--|---|----|----|---|
| Ensure development meets the needs of current and future users.                      | ? | ?  | ?  | L |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials) | + | ++ | ++ | M |
| Promote sustainable design and construction solutions.                               | ? | ?  | ?  | L |
| Enhance access for cyclists and pedestrians.   | ? | ?  | ?  | L |
| Provide adequate green spaces.   | + | ++ | ++ | M |
| Provide adequate vehicular parking and manoeuvring space.                            | ? | ?  | ?  | L |

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

#### Commentary

*Ensure development meets the needs of current and future users.*

High quality design is considered to enable ease of access to and movement within the built environment by all users including pedestrians and cyclists. The policy does not make specific reference to accessibility within the built environment.

*Promote a sense of community pride (e.g. shared spaces, public art, local materials)*

The enhancement of landscape settings and high quality design within the built environment promotes a sense of community pride.

*Promote sustainable design and construction solutions.*

Reference may need to be made to the promotion of high quality sustainable design to align the policy to this aim. This is possibly implied in the policy, however emphasis is necessary.

*Enhance access for cyclists and pedestrians.*

High quality design is considered to enable ease of access to and movement within the built environment by all users including pedestrians and cyclists. The policy does not make specific reference to accessibility within the built environment.

*Provide adequate green spaces.*

By promoting high quality design that enhances landscape settings, the policy supports this aim.

*Provide adequate vehicular parking and manoeuvring space.*

Again no specific reference is made in the policy to ease of access to and movement within the built environment.

#### **11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.**

|  |    |    |    |   |
|--|----|----|----|---|
| Protect and enhance existing cultural heritage and historic environments | ++ | ++ | ++ | H |
|--|----|----|----|---|

|  |   |   |   |   |
|--|---|---|---|---|
| Promote new opportunities for culture in the Vale of Glamorgan | + | + | + | H |
|--|---|---|---|---|

#### Commentary

*Protect and enhance existing cultural heritage and historic environments*

The policy promotes high quality design that respects the cultural and historic qualities of individual buildings or Conservation Areas and therefore supports this aim.

*Promote new opportunities for culture in the Vale of Glamorgan*

High quality design in the built environment would be expected to provide high quality public space which can be used for public art and exhibitions.

#### **12. To reduce the need to travel and enable the use of more sustainable modes of transport.**

|  |   |   |   |   |
|--|---|---|---|---|
| Ensure new development is located in accessible locations from a range of travel modes | 0 | 0 | 0 | H |
|--|---|---|---|---|

|  |   |   |   |   |
|--|---|---|---|---|
| Promote technologies to reduce need to travel (e.g. homeworking) | ? | ? | ? | L |
|--|---|---|---|---|

|  |   |   |   |   |
|--|---|---|---|---|
| Enable the movement of people and freight by sustainable means | 0 | 0 | 0 | M |
|--|---|---|---|---|

|  |   |   |   |   |
|--|---|---|---|---|
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way) | ? | ? | ? | L |
|--|---|---|---|---|

### APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| <b>Commentary</b>  |   |   |   |   |
| <i>Ensure new development is located in accessible locations from a range of travel modes</i><br>The policy does not influence the location of development and therefore has no bearing on this aim.   |   |   |   |   |
| <i>Promote technologies to reduce need to travel (e.g. homeworking)</i><br>Although not specifically, the policy may assist this aim though ensuring that the design of new housing takes homeworking into consideration and makes provision for this where possible.  |   |   |   |   |
| <i>Enable the movement of people and freight by sustainable means</i><br>The policy has no bearing on this aim.  |   |   |   |   |
| <i>Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</i><br>The influence of this policy on this aim is limited although there is an opportunity to ensure ease of access to and within the built by all users. |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>  |   |   |   |   |
| Protect existing and potential employment sites for employment uses  | 0 | 0 | 0 | M |
| Support a culture of entrepreneurship  | 0 | 0 | 0 | M |
| Encourage a range of employment sites in locations accessible by a range of transport modes  | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs   | 0 | 0 | 0 | M |
| Promote and enable sustainable rural diversification   | 0 | 0 | 0 | M |
| <b>Commentary</b>  |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective.   |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>   |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport  | ? | ? | ? | L |
| Ensure a range of uses within retail centres   | 0 | 0 | 0 | M |
| Avoid out-of-town retail development   | 0 | 0 | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes  | + | + | + | M |
| Promote the evening economy in the Vale of Glamorgan's town centres  | + | + | + | M |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

**Commentary**  
*Ensure retail centres are accessible by a range of modes of transport*  
 It is considered that high quality design in the built environment need to take into consideration accessibility by all users. The policy does not specify this; specific reference to ease of access would be necessary.

*Ensure a range of uses within retail centres*  
 The policy does not influence uses within built environments, although it seeks to promote design that reinforces local character.

*Avoid out-of-town retail development*  
 The policy does not influence the location of development.

*Enhance the public realm within existing centres and facilitate regeneration programmes*  
 In promoting high quality design that enhances landscape settings, the policy would assist in efforts to enhance the public realm in the built environment.

*Promote the evening economy in the Vale of Glamorgan's town centres*  
 Evening economy in town centres is dependent on the uses and the environments within them. High quality design would encourage the public to use centres on the evenings where the facilities and relevant uses are provided.

|  |   |   |    |   |
|--|---|---|----|---|
| <b>15. To promote appropriate tourism.</b>   |   |   |    |   |
| Promote local economic growth through tourism  | + | + | ++ | M |
| Enable tourism uses to be accessed by sustainable travel modes   | + | + | +  | M |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets   | + | + | +  | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential) | 0 | 0 | 0  | M |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).  | 0 | 0 | 0  | M |

**Commentary**  
*Promote local economic growth through tourism*  
 Where the character, landscape settings and cultural/historic qualities of tourist centres are protected and enhanced, income from tourism would be retained and possibly enhanced.

*Enable tourism uses to be accessed by sustainable travel modes*  
 The policy does not have direct influence on the provision of transport infrastructure although the promotion of ease of access within the built environment though high quality design, would assist this aim.

*Manage tourism to protect the Vale of Glamorgan's natural and built assets*  
 Although not relating to management of tourism, the policy supports this aim as it seeks to protect and enhance the built and natural environment.

*Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)*  
 The policy does not directly protect tourism destinations.

*Enable specialist tourism (e.g. sustainable, sports, cultural etc).*  
 The policy does not directly enable specialist tourism. None of the other strategic policies promote specialist tourism specifically.

APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

| CSP11: Transport   |                       |             |           |                    |
|--|-----------------------|-------------|-----------|--------------------|
| Transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan and the objectives of the South East Wales regional Transport Plan will be supported. Particular emphasis will be given to additional transport infrastructure improvements where they will improve accessibility by public transport, cycling and walking.  |                       |             |           |                    |
| Sustainability Objective / Aims  | Assessment of Effects |             |           | Level of Certainty |
|  | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>   |                       |             |           |                    |
| Provide a mix of dwelling types and tenure   | 0                     | 0           | 0         | H                  |
| Build in sustainable locations, with good access to local facilities   | 0                     | 0           | 0         | H                  |
| Provide affordable housing   | 0                     | 0           | 0         | H                  |
| Preference for previously developed land in sustainable locations  | 0                     | 0           | 0         | H                  |
| <b>Commentary</b>  |                       |             |           |                    |
| This policy is likely to have no effect on this sustainability objective and its associated aims. These are addressed through CSP 3: Housing need, CSP4: affordable housing and CSP9: Built and Natural Environment.   |                       |             |           |                    |
| <b>2. To maintain, promote and enhance the range of local facilities.</b>  |                       |             |           |                    |
| Meet the needs of existing communities throughout the Vale of Glamorgan  | +                     | +           | +         | M                  |
| Provide appropriate facilities within new developments to meet the needs of future users   | ?                     | ?           | ?         | L                  |
| Ensure local facilities are suitable for purpose and easily accessible   | +                     | +           | +         | M                  |
| Prevent the loss of existing well-used and valued local facilities   | ?                     | ?           | ?         | L                  |
| <b>Commentary</b>  |                       |             |           |                    |
| <i>Meet the needs of existing communities throughout the Vale of Glamorgan</i>   |                       |             |           |                    |
| The provision of transportation forms part of the requirement for meeting the needs of existing communities. This policy therefore positively assists the sustainability aim of meeting the needs of existing communities throughout the Vale of Glamorgan.  |                       |             |           |                    |
| <i>Ensure local facilities are suitable for purpose and easily accessible</i>  |                       |             |           |                    |
| This policy will allow transport schemes that serve the social and economic needs of the Vale of Glamorgan and in particular where they will improve accessibility by public transport, cycling and walking. This policy will therefore positively assist the sustainability aim of ensuring local facilities are suitable for purpose and easily accessible. This is supported by CSP5: Integrated sustainable communities. |                       |             |           |                    |
| <i>Provide appropriate facilities within new developments to meet the needs of future users and Prevent the loss of existing well-used and valued local facilities</i>   |                       |             |           |                    |
| It is unclear how this policy will affect the aims of providing appropriate facilities within new developments to meet the needs of future users and preventing the loss of existing well-used and valued local facilities. This will be determined at a more detailed policy and project level.   |                       |             |           |                    |
| It should be noted that South East Wales Regional Transport Plan objectives were not available at the time of review and this CSP will need to be assessed with regard to these.   |                       |             |           |                    |
| <b>3. To maintain and improve access for all.</b>  |                       |             |           |                    |
| Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community   | +                     | +           | +         | M                  |
| Improve public perception of access  | +                     | +           | 0         | M                  |
| Benefit health and well being through social inclusion within the physical environment   | +                     | +           | +         | L                  |
| Promote 'life-time' homes  | 0                     | 0           | 0         | M                  |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

**Commentary***Ensure the built and natural environment is easily accessible to all the Vale of Glamorgan's community*

This policy is likely to positively assist the sustainability aim of ensuring the built and natural environment is easily accessible to all the Vale of Glamorgan's community as it will permit transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking.

*Improve public perception of access*

This policy will also positively assist the sustainability aim to improve public perception of access as most new schemes raise awareness of available transport and therefore access routes. This effect however will only occur during construction and immediately after the opening of a scheme.

*Benefit health and well being through social inclusion within the physical environment*

This policy will potentially help to achieve the sustainability aim of benefiting health and well being through social inclusion within the physical environment through the promotion of cycling and walking as modes of transport.

*Promote 'life-time' homes*

The policy does not promote "life-time homes". This is addressed through CSP3: Housing need, CSP4: Affordable housing and CSP5: Integrated sustainable communities.

**4. Reduce the causes of deprivation.**

|   |   |   |   |   |
|---|---|---|---|---|
| Promote improvements to: employment, income, health and well being, education, housing, environment and access for all. | + | + | + | M |
| Prevent the isolation of deprived communities.  | + | + | + | M |

**Commentary**

This policy is likely to positively assist this sustainability objective and its associated aims. This is because it will permit transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking. These schemes are therefore likely to include public transport schemes, which will promote accessibility to deprived areas and prevent isolation.

**5. To maintain, protect and enhance community spirit.**

|  |   |   |   |   |
|--|---|---|---|---|
| Reduce the fear of crime   | ? | ? | ? | M |
| Provide community facilities   | ? | ? | ? | L |
| Encourage local distinctiveness (e.g. development having regard to its context and public art) | 0 | 0 | 0 | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)     | 0 | 0 | 0 | M |

**Commentary***Reduce the fear of crime and Provide community facilities*

It is unclear how this policy will affect the sustainability aims of reducing the fear of crime and provide community facilities as this will be determined by the design at an individual project level.

*Encourage local distinctiveness (e.g. development having regard to its context and public art) and Encourage community ownership of the environment (e.g. promote shared spaces, good design)*

This policy is likely to have no effect on the remaining sustainability aims.

It should be noted that the location of large infrastructure schemes could have major implications on community spirit that can only be determined at an individual project level.

**6. To minimise the causes and manage the effects of climate change.**

|   |     |       |       |   |
|---|-----|-------|-------|---|
| Reduce air pollution (e.g. transport / industry emissions)                      | +/- | ++/-- | ++/-- | M |
| Reduce energy consumption (e.g. promote energy efficient building)              | +/- | ++/-- | ++/-- | M |
| Promote renewable energy generation   | 0   | 0     | 0     | H |
| Protect and promote carbon sinks  | 0   | 0     | 0     | H |
| Reduce flood risk to people, property and maintain the integrity of floodplains | 0   | 0     | 0     | M |
| Protect biodiversity, flora and fauna from the effects of climate change        | 0   | 0     | 0     | M |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|  |   |   |   |   |
|--|---|---|---|---|
| <b>Commentary</b>  |   |   |   |   |
| <i>Reduce air pollution (e.g. transport / industry emissions) and Reduce energy consumption (e.g. promote energy efficient building)</i>   |   |   |   |   |
| This policy will clearly have a significant effect on the sustainability aims of reducing air pollution and reducing energy consumption. However it is unclear what this effect will be as this will be determined at the more detailed policy and individual project stage although it is felt projects are likely to have a positive effect on these sustainability aims.  |   |   |   |   |
| <i>Promote renewable energy generation, Protect and promote carbon sinks, Reduce flood risk to people, property and maintain the integrity of floodplains and Protect biodiversity, flora and fauna from the effects of climate change</i>   |   |   |   |   |
| This policy is likely to have no effect on the sustainability aims of promoting renewable energy generation and avoiding development within flood plains unless mitigation can prevent harm, protect biodiversity, flora and fauna from the effects of climate change and promoting green sinks to absorb carbon emissions (e.g. plant trees). It should be noted that climate change is addressed for new developments by CSP2: Climate change. |   |   |   |   |
| <b>7. To minimise waste.</b>   |   |   |   |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)  | 0 | 0 | 0 | H |
| Provide and promote recycling facilities.  | 0 | 0 | 0 | H |
| Avoid landfill of waste  | 0 | 0 | 0 | H |
| <b>Commentary</b>  |   |   |   |   |
| This policy is likely to have no effect on this sustainability objective and its associated aims. These are addressed through CSP1: Sustainable development and CSP11: Strategic waste management facilities.  |   |   |   |   |
| <b>8. To use land effectively and efficiently.</b>   |   |   |   |   |
| Retain greenfield land   | 0 | 0 | 0 | L |
| Bring previously developed land in sustainable locations back into use   | 0 | 0 | 0 | L |
| Promote good quality high density developments where appropriate and having regard to the local context  | 0 | 0 | 0 | M |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value   | ? | ? | ? | L |
| <b>Commentary</b>  |   |   |   |   |
| <i>Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value</i>  |   |   |   |   |
| It is unclear what the effect of this policy will be on the sustainability aim of and protecting the countryside from inappropriate development, especially good quality agricultural land and areas of high landscape value. The effect of this policy on these sustainability aims will be determined at the more detailed policy and individual project stage.  |   |   |   |   |
| <i>Retain greenfield land, Bring previously developed land in sustainable locations back into use and Promote good quality high density developments where appropriate and having regard to the local context</i>  |   |   |   |   |
| This policy is likely to have no effect on these sustainability aims. This is addressed through CSP3: Housing need and CSP9: Built and natural environment.  |   |   |   |   |
| <b>9. To protect and enhance the built and natural environment.</b>  |   |   |   |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.   | ? | ? | ? | L |
| Improve and protect the quality and quantity of inland and coastal water resources.  | ? | ? | ? | L |
| Protect or enhance the built environment including historic buildings and conservation areas.  | ? | ? | ? | L |
| Protect cultural heritage and archaeology.   | ? | ? | ? | L |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.   | + | + | + | M |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil; Improve and protect the quality and quantity of inland and coastal water resources; Protect or enhance the built environment including historic buildings and conservation areas and Protect cultural heritage and archaeology.</i>   |   |   |   |   |
| It is unclear what the effect of this policy will be on the achievement of these sustainability aims. The effect of this policy on these sustainability aims will be determined at the more detailed policy and individual project stage.   |   |   |   |   |
| <i>Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.</i>   |   |   |   |   |
| This policy will positively assist the sustainability aim of enhancing public access to and appreciation of the Vale of Glamorgan's environmental assets. This is because it will permit transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking and therefore schemes are likely to enhance public access to the Vale of Glamorgan's environmental assets. |   |   |   |   |
| <b>10. To provide a high quality environment within all new developments.</b>   |   |   |   |   |
| Ensure development meets the needs of current and future users.   | + | + | + | M |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)  | 0 | 0 | 0 | M |
| Promote sustainable design and construction solutions.  | ? | ? | ? | L |
| Enhance access for cyclists and pedestrians.  | + | + | + | M |
| Provide adequate green spaces.  | ? | ? | ? | L |
| Provide adequate vehicular parking and manoeuvring space.   | ? | ? | ? | L |
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure development meets the needs of current and future users.</i>  |   |   |   |   |
| The provision of transportation forms part of the requirement for meeting the needs of current and future users. This policy therefore positively assists the sustainability aim of ensuring development meets the needs of current and future users.   |   |   |   |   |
| <i>Enhance access for cyclists and pedestrians.</i>   |   |   |   |   |
| This policy permits transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking and therefore schemes are likely to enhance access for cyclists and pedestrians. This policy will therefore positively assist the sustainability aim of enhancing access for cyclists and pedestrians.  |   |   |   |   |
| <i>Promote sustainable design and construction solutions, Provide adequate green spaces and Provide adequate vehicular parking and manoeuvring space.</i>   |   |   |   |   |
| It is unclear what this effect of this policy will be on these sustainability aims. The effect of this policy on these sustainability aims will be determined at the more detailed policy and individual project stage.   |   |   |   |   |
| <i>Promote a sense of community pride (e.g. shared spaces, public art, local materials)</i>   |   |   |   |   |
| This policy is likely to have no effect on this sustainability aim of promoting a sense of community pride. This is addressed through CSP5: Integrated sustainable communities.   |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>   |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments  | ? | ? | ? | L |
| Promote new opportunities for culture in the Vale of Glamorgan  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect and enhance existing cultural heritage and historic environments</i>   |   |   |   |   |
| It is unclear what this effect of this policy will be on the sustainability aim of protecting and enhancing existing cultural heritage and historic environments. The effect of this policy on this sustainability aim will be determined at the more detailed policy and individual project stage.   |   |   |   |   |
| <i>Promote new opportunities for culture in the Vale of Glamorgan</i>   |   |   |   |   |
| This policy is likely to have no effect on the sustainability aim of promoting new opportunities for culture in the Vale of Glamorgan. This is addressed through CSP5: Integrated sustainable communities.  |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | 0 | 0 | 0 | L |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |    |    |   |   |
|---|----|----|---|---|
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0  | 0  | 0 | M |
| Enable the movement of people and freight by sustainable means  | +  | +  | + | L |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)  | ++ | ++ | ? | H |
| <b>Commentary</b>   |    |    |   |   |
| <i>Enable the movement of people and freight by sustainable means</i><br>This policy will positively assist this sustainability aim as it promotes transport infrastructure improvements where they will improve accessibility by public transport, cycling and walking.  |    |    |   |   |
| <i>Ensure new development is located in accessible locations from a range of travel modes and Promote technologies to reduce need to travel (e.g. home working)</i><br>This policy is likely to have no effect on these sustainability aims.  |    |    |   |   |
| <i>Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</i><br>This policy permits transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking. This policy will therefore positively assist this sustainability aim. It is unclear what the effect of the policy would be in the long term however it is likely that the policy will positively effect this sustainability aim post the plan period. |    |    |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |    |    |   |   |
| Protect existing and potential employment sites for employment uses   | 0  | 0  | 0 | M |
| Support a culture of entrepreneurship   | 0  | 0  | 0 | M |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0  | 0  | 0 | M |
| Support the enhancement of skills to meet employment needs  | 0  | 0  | 0 | M |
| Promote and enable sustainable rural diversification  | 0  | 0  | 0 | M |
| <b>Commentary</b>   |    |    |   |   |
| This policy is likely to have no effect on the sustainability aims of this objective. These sustainability aims are addressed through CSP 7: Employment.  |    |    |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |    |    |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | +  | +  | + | M |
| Ensure a range of uses within retail centres  | 0  | 0  | 0 | M |
| Avoid out-of-town retail development  | 0  | 0  | 0 | M |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | 0  | 0  | 0 | M |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0  | 0  | 0 | M |
| <b>Commentary</b>   |    |    |   |   |
| <i>Ensure retail centres are accessible by a range of modes of transport</i><br>This policy permits transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking. This policy will therefore positively assist this sustainability aim.  |    |    |   |   |
| <i>Ensure a range of uses within retail centres, Avoid out-of-town retail development, Enhance the public realm within existing centres and facilitate regeneration programmes and Promote the evening economy in the Vale of Glamorgan's town centres</i><br>This policy is likely to have no effect on the remaining sustainability aims of this objective. These sustainability aims are addressed through CSP6: Retail.   |    |    |   |   |
| <b>15. To promote appropriate tourism.</b>  |    |    |   |   |
| Promote local economic growth through tourism   | 0  | 0  | 0 | M |
| Enable tourism uses to be accessed by sustainable travel modes  | +  | +  | + | M |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0  | 0  | 0 | M |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | 0  | 0  | 0 | L |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | M |
| <p><b>Commentary</b><br/> <i>Enable tourism uses to be accessed by sustainable travel modes</i><br/> This policy permits transport schemes that will serve the economic, social and environmental needs of the Vale of Glamorgan particularly where they will improve accessibility by public transport, cycling and walking. This policy will therefore positively assist the sustainability aim of enabling tourism uses to be accessed by sustainable travel modes as it will permit sustainable schemes that will beneficially improve accessibility for tourists within the Vale of Glamorgan.</p> <p><i>Promote local economic growth through tourism, Manage tourism to protect the Vale of Glamorgan's natural and built assets, Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential) and Enable specialist tourism (e.g. sustainable, sports, cultural etc).</i><br/> This policy is likely to have no effect on the remaining sustainability aims of this objective. These sustainability aims are partly addressed through CSP7: Employment.</p> |   |   |   |   |

| <b>CSP12: STRATEGIC WASTE MANAGEMENT FACILITIES</b>   |                       |             |           |                    |
|---|-----------------------|-------------|-----------|--------------------|
| Proposals for the management and treatment of waste that accord with the South East Wales Regional Waste Plan and the Council's Local Waste Management Strategy will be favoured. The following locations have been identified as being suitable for regional waste management facilities:                    |                       |             |           |                    |
| <ul style="list-style-type: none"> <li>Atlantic Trading Estate</li> <li>The operational Port of Barry Docks</li> </ul>  |                       |             |           |                    |
| Proposals for additional waste management facilities will be favoured where they are located either:  |                       |             |           |                    |
| <ul style="list-style-type: none"> <li>Existing waste sites;</li> <li>Existing B2 and B8 employment sites or buildings;</li> <li>Within operational mineral working sites; or</li> <li>In the case of green waste composting and management, on land within or adjacent to farm building complexes</li> </ul> |                       |             |           |                    |
| Sustainability Objective / Aims   | Assessment of Effects |             |           | Level of Certainty |
|   | Short Term            | Medium Term | Long Term |                    |
| <b>1. To provide the opportunity for people to meet their housing needs.</b>  |                       |             |           |                    |
| Provide a mix of dwelling types and tenure  | 0                     | 0           | 0         | H                  |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| Benefit health and well being through social inclusion within the physical environment  | 0 | 0 | 0 | H |
| Promote 'life-time' homes   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective   |   |   |   |   |
| <b>4. Reduce the causes of deprivation.</b>   |   |   |   |   |
| Promote improvements to: employment, income, health and well being, education, housing, environment and access, for all.  | 0 | 0 | 0 | H |
| Prevent the isolation of deprived communities.  | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective   |   |   |   |   |
| <b>5. To maintain, protect and enhance community spirit.</b>  |   |   |   |   |
| Reduce the fear of crime  | 0 | 0 | 0 | M |
| Provide community facilities  | 0 | 0 | 0 | M |
| Encourage local distinctiveness (e.g. development having regard to its context and public art)  | 0 | 0 | 0 | M |
| Encourage community ownership of the environment (e.g. promote shared spaces, good design)  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective   |   |   |   |   |
| <b>6. To minimise the causes and manage the effects of climate change.</b>  |   |   |   |   |
| Reduce air pollution (e.g. transport / industry emissions)  | 0 | 0 | 0 | H |
| Reduce energy consumption (e.g. promote energy efficient building)  | 0 | 0 | 0 | M |
| Promote renewable energy generation   | ? | ? | ? | L |
| Protect and promote carbon sinks  | 0 | 0 | 0 | M |
| Reduce flood risk to people, property and maintain the integrity of floodplains   | 0 | 0 | 0 | M |
| Protect biodiversity, flora and fauna from the effects of climate change  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Reduce air pollution (e.g. transport / industry emissions)</i>   |   |   |   |   |
| The policy supports the proposals of the South East Wales Regional Waste Plan that include the reduction of amount of waste going to landfill. As such it will help reduce the amount of landfill gas produced. |   |   |   |   |
| <i>Reduce energy consumption (e.g. promote energy efficient building)</i>   |   |   |   |   |
| There is no direct relationship between the policy and this aim..   |   |   |   |   |
| <i>Promote renewable energy generation</i>  |   |   |   |   |
| There are opportunities to encourage the generation of energy from waste. The policy does not make direct reference to this potential, although if appropriate the policy needs to acknowledge this potential.  |   |   |   |   |
| <i>Protect and promote carbon sinks</i> There is no direct relationship between the policy and this aim.  |   |   |   |   |
| <i>Reduce flood risk to people, property and maintain the integrity of floodplains</i>  |   |   |   |   |
| The policy does not make reference to the location of waste facilities in flood plains.   |   |   |   |   |
| <i>Protect biodiversity, flora and fauna from the effects of climate change</i>   |   |   |   |   |
| There is no direct relationship between the policy and this aim.  |   |   |   |   |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |     |     |     |   |
|---|-----|-----|-----|---|
| <b>7. To minimise waste.</b>  |     |     |     |   |
| Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)   | +   | +   | +   | M |
| Provide and promote recycling facilities.   | +   | +   | ++  | M |
| Avoid landfill of waste   | +   | +   | ++  | M |
| <b>Commentary</b>   |     |     |     |   |
| <i>Promote the use of secondary resources (e.g. convert existing buildings/ reuse materials)</i><br>The policy has some scope to promote the use of secondary resources through the reuse of existing sites and buildings.  |     |     |     |   |
| <i>Provide and promote recycling facilities.</i><br>The South East Wales Regional Waste Plan seeks to increase rates of recycling and therefore the waste management facilities referred to in the policy should include recycling facilities. As such the policy will support this aim.  |     |     |     |   |
| <i>Avoid landfill of waste</i><br>One of the objectives of the Regional Waste Strategy is to reduce the amount of waste going to landfill. As such the policy supports this aim.  |     |     |     |   |
| <b>8. To use land effectively and efficiently.</b>  |     |     |     |   |
| Retain greenfield land  | +   | +   | +   | M |
| Bring previously developed land in sustainable locations back into use  | 0   | 0   | 0   | M |
| Promote good quality high density developments where appropriate and having regard to the local context   | 0   | 0   | 0   | M |
| Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value  | +/- | +/- | +/- | M |
| <b>Commentary</b>   |     |     |     |   |
| <i>Retain greenfield land</i><br>The policy seeks to favour the location of additional waste facilities on existing sites or land that is already developed. The policy therefore assists in retaining undeveloped land.  |     |     |     |   |
| <i>Bring previously developed land in sustainable locations back into use</i><br>The policy has no direct bearing on the aim.   |     |     |     |   |
| <i>Promote good quality high density developments where appropriate and having regard to the local context</i><br>There is no relationship between the policy and this aim.   |     |     |     |   |
| <i>Protect the countryside from inappropriate development, especially the best and most versatile agricultural land and areas of high landscape value</i><br>The policy supports the location of waste management facilities on land already developed and therefore protects the countryside. However, composting and management of green waste on farms may conflict with this aim. |     |     |     |   |
| <b>9. To protect and enhance the built and natural environment.</b>   |     |     |     |   |
| Protect or enhance natural assets such as biodiversity, flora and fauna, wildlife habitats, landscape, soil.  | 0   | 0   | 0   | M |
| Improve and protect the quality and quantity of inland and coastal water resources.   | 0   | 0   | 0   | M |
| Protect or enhance the built environment including historic buildings and conservation areas.   | 0   | 0   | 0   | M |
| Protect cultural heritage and archaeology.  | 0   | 0   | 0   | M |
| Enhance public access to and appreciation of the Vale of Glamorgan's environmental assets.  | 0   | 0   | 0   | H |
| <b>Commentary</b>   |     |     |     |   |
| The policy does not have significant bearing on the aims under this SA objective.   |     |     |     |   |
| <b>10. To provide a high quality environment within all new developments.</b>   |     |     |     |   |

## APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES

|   |   |   |   |   |
|---|---|---|---|---|
| Ensure development meets the needs of current and future users.   | 0 | 0 | 0 | M |
| Promote a sense of community pride (e.g. shared spaces, public art, local materials)  | 0 | 0 | 0 | H |
| Promote sustainable design and construction solutions.  | 0 | 0 | 0 | L |
| Enhance access for cyclists and pedestrians.  | 0 | 0 | 0 | M |
| Provide adequate green spaces.  | 0 | 0 | 0 | H |
| Provide adequate vehicular parking and manoeuvring space.   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aim under this SA objective.   |   |   |   |   |
| <b>11. To protect, enhance and promote the quality and character of the Vale of Glamorgan's culture and heritage.</b>   |   |   |   |   |
| Protect and enhance existing cultural heritage and historic environments  | 0 | 0 | 0 | M |
| Promote new opportunities for culture in the Vale of Glamorgan  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective.  |   |   |   |   |
| <b>12. To reduce the need to travel and enable the use of more sustainable modes of transport.</b>  |   |   |   |   |
| Ensure new development is located in accessible locations from a range of travel modes  | 0 | 0 | 0 | L |
| Promote technologies to reduce need to travel (e.g. homeworking)  | 0 | 0 | 0 | H |
| Enable the movement of people and freight by sustainable means  | 0 | 0 | 0 | L |
| Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)  | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Ensure new development is located in accessible locations from a range of travel modes</i>   |   |   |   |   |
| Although the policy favours the location of waste facilities on land already developed, it does not specifically reference the need for any new facilities to be easily accessible by a range of transport modes. |   |   |   |   |
| <i>Promote technologies to reduce need to travel (e.g. homeworking)</i>   |   |   |   |   |
| The policy does not have significant bearing on the aim..   |   |   |   |   |
| <i>Enable the movement of people and freight by sustainable means</i>   |   |   |   |   |
| Although the policy favours the location of waste facilities on land already developed, it does not specifically reference the need for any new facilities to be easily accessible by a range of transport modes. |   |   |   |   |
| <i>Provide effective transport infrastructure to meet the needs of the community (e.g. highways, cycleways, pedestrian provision, public rights of way)</i>   |   |   |   |   |
| This policy does not have significant bearing on this aim.  |   |   |   |   |
| <b>13. To provide for a diverse range of local job opportunities.</b>   |   |   |   |   |
| Protect existing and potential employment sites for employment uses   | + | + | + | M |
| Support a culture of entrepreneurship   | 0 | 0 | 0 | M |
| Encourage a range of employment sites in locations accessible by a range of transport modes   | 0 | 0 | 0 | M |
| Support the enhancement of skills to meet employment needs  | 0 | 0 | 0 | M |
| Promote and enable sustainable rural diversification  | + | + | + | M |

**APPENDIX 3: SA MATRICES OF THE VALE OF GLAMORGAN LOCAL DEVELOPMENT PLAN STRATEGIC POLICIES**

|   |   |   |   |   |
|---|---|---|---|---|
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect existing and potential employment sites for employment uses</i>  |   |   |   |   |
| Waste facilities are considered B2 or B8 use classes and therefore by favouring their location on employment land, the policy supports this aim.  |   |   |   |   |
| <i>Support a culture of entrepreneurship</i>  |   |   |   |   |
| The policy has no significant bearing on the aim  |   |   |   |   |
| <i>Ensure employment sites are promoted in accessible locations</i>   |   |   |   |   |
| Although the policy favours the location of waste facilities on land already developed, it does not specifically reference the need for any new facilities to be easily accessible to by a range of transport modes.  |   |   |   |   |
| <i>Support the enhancement of skills to meet employment needs</i>   |   |   |   |   |
| There is no direct relationship between the policy and this aim.  |   |   |   |   |
| <i>Promote and enable sustainable rural diversification</i>   |   |   |   |   |
| Through reference to the development of green waste composting and management facilities on land in proximity to farm building complexes, the policy supports sustainable rural diversification.  |   |   |   |   |
| <b>14. To maintain and enhance the vitality and viability of the Vale of Glamorgan's town, district and local centres.</b>  |   |   |   |   |
| Ensure retail centres are accessible by a range of modes of transport   | 0 | 0 | 0 | H |
| Ensure a range of uses within retail centres  | 0 | 0 | 0 | H |
| Avoid out-of-town retail development  | 0 | 0 | 0 | H |
| Enhance the public realm within existing centres and facilitate regeneration programmes   | 0 | 0 | 0 | H |
| Promote the evening economy in the Vale of Glamorgan's town centres   | 0 | 0 | 0 | H |
| <b>Commentary</b>   |   |   |   |   |
| There is no direct relationship between the policy and the aims under this SA objective.  |   |   |   |   |
| <b>15. To promote appropriate tourism.</b>  |   |   |   |   |
| Promote local economic growth through tourism   | 0 | 0 | 0 | H |
| Enable tourism uses to be accessed by sustainable travel modes  | 0 | 0 | 0 | H |
| Manage tourism to protect the Vale of Glamorgan's natural and built assets  | 0 | 0 | 0 | H |
| Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)  | ? | ? | ? | L |
| Enable specialist tourism (e.g. sustainable, sports, cultural etc).   | 0 | 0 | 0 | M |
| <b>Commentary</b>   |   |   |   |   |
| <i>Protect potential tourism destinations against inappropriate non-tourism development (e.g. proliferation of residential)</i>   |   |   |   |   |
| The policy does not make reference to potential conflicts of use between waste management facilities and other uses such as tourism. This is particularly relevant in rural areas as the location of green waste composting and management may not be appropriate as it may detract from tourism. This is dependent on tourism priorities which should be defined within a specific policy. |   |   |   |   |
| There is no direct relationship between the policy and all the other aims under this SA objective.  |   |   |   |   |
