

Electronic bus stop information displays go live in the Vale of Glamorgan

Following the installation of new electronic information displays at key bus stop locations throughout the Vale of Glamorgan, the Council is pleased to advise that the first batch have gone live providing bus stop specific timetable information. Twenty-three displays in total will be live by the middle of May.

The displays are currently displaying scheduled timetable information only until such time as real time information can be provided by all operators in this area. This is to avoid confusion between the two types of information. Information for the displays is taken from Traveline Cymru data supplied to them by the local bus operators.

This initial scheme has been funded by Welsh Government and the Vale of Glamorgan Council. The Council is further planning the installation of more electronic bus stop displays throughout the Vale of Glamorgan during 2021-22 using additional grant funding awarded by the Welsh Government for this purpose.

Disclaimer: The Vale of Glamorgan Council and stakeholder parties cannot accept liability for any inaccuracies displayed, especially as operators are currently revising their timetables at short notice to meet demand during the current Coronavirus pandemic.
