	<p>spent on improving public transport or the NHS.</p> <p>My further personal comments are: Given that Port Road, '5 mile lane' and Culverhouse Cross have all been recently upgraded, the likely change in working and therefore commuting habits since Coronavirus, the already shaken business case does not persuade me of the need for this new road. Especially given the consequential devastation of the beautiful landscape and surrounding villages.</p> <p>Please add my objections to your feedback process. Kind Regards</p>
930	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 ., Your new proposals intend to block off country lanes that will divide communities.</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process. Kind Regards</p>
931	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases.</p> <p>My further personal comments are: I don't see the need for this road, the airport is already failing. In the view of climate change in the environment a park and ride at the Llantrisant turn off with 30 minute railway shuttle to the airport is better for the environment.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

983	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are:</p>

	<p>The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: I have lived for 10 years in one of the houses that will be affected and could write reams. I was forced to moved as a result of a marriage break up, otherwise would still be there. It is a bilingual corner of Wales that is unique and very very special from an environmental aspect as well as being a hidden gem for families to live in and for a community to strive. This proposal is immortal, unjust and unthinkable. I have very special friends that will be affected beyond belief by this and I'm so upset for so many reasons. I will leave the practical reasons why not to carry on with these proposals, to others. However, from a humanistic point of view, these people who their homes, dreams and families are established there, will be uprooted on so many levels. These are families who have values and are proud of where they live and who have chosen to bring up their children in a bilingual, beautiful and unique corner of Wales-THEIR corner and no one else's. Step back. Take in. Consider the situation the world is in 2020 and then reconsider, reevaluate and resolve this issue without destroying what this world is crying out for - the sense of belonging and recognising what is naturally there for us. Protect it, cherish it, so that the next generation can be proud of Wales and continue to nurture and celebrate Wales's rural communities at their best. Let's re- evaluate our appreciation of Wales and of the right of our people. Cymuned? Cymru a'r ei gorau. Community? Wales at it's best.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

Building a road is not the solution to reducing car dependency, air pollution and green house gases., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: I have lived for 10 years in one of the houses that will be affected and could write reams. I was forced to moved as a result of a marriage break up, otherwise would still be there. It is a bilingual corner of Wales</p>

	<p>that is unique and very very special from an environmental aspect as well as being a hidden gem for families to live in and for a community to strive. This proposal is immortal, unjust and unthinkable. I have very special friends that will be affected beyond belief by this and I'm so upset for so many reasons. I will leave the practical reasons why not to carry on with these proposals, to others. However, from a humanistic point of view, these people who their homes, dreams and families are established there, will be uprooted on so many levels. These are families who have values and are proud of where they live and who have chosen to bring up their children in a bilingual, beautiful and unique corner of Wales-THEIR corner and no one else's. Step back. Take in. Consider the situation the world is in 2020 and then reconsider, reevaluate and resolve this issue without destroying what this world is crying out for - the sense of belonging and recognising what is naturally there for us. Protect it, cherish it, so that the next generation can be proud of Wales and continue to nurture and celebrate Wales's rural communities at their best. Let's re-evaluate our appreciation of Wales and of the right of our people. Cymuned? Cymru a'r ei gorau. Community? Wales at it's best.</p> <p>Please add my objections to your feedback process. Kind Regards</p>
985	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Wales has declared a CLIMATE EMERGENCY. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 ., Your new proposals intend to block off country lanes that will divide communities.</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process. Kind Regards</p>

	<p>vehicles per hour to the junction will create greater congestion and CO2 emissions., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: This proposal makes no sense. The A4232 already provides access to the A48 and the airport. This should be improved and a train link be considered for the airport. The Ely Valley is home to lots of wildlife and has brought pleasure to 1000's of people during lockdown. The lanes are buzzing with cyclists and people walking enjoying the fresh air, scenery and wildlife. This road threatens all of this. The rationale is outdated and is not what people want. The proposals are even more contradictory at a time when Welsh Government and many local authorities in wales have declared a climate emergency. End the uncertainty now and kick this flawed plan in to touch.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

Access to the airport is largely irrelevant and should not be the primary reason for cutting up beautiful and protected countryside with another road that would only increase carbon emissions with very little benefit. Money would be better spent on improvements to existing traffic bottlenecks, cycling routes and bus and rail infrastructure. This should NOT be a priority project in my view.</p> <p>Please add my objections to your feedback process.</p> <p>Kind Regards</p>

1120	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: [Not asked]</p> <p>My further personal comments are: This is one flawed proposal. We have chosen to live in this beautiful part of Wales to evade such developments. We pay inflated council tax and stretch ourselves to the limit so we can enjoy the peace and slower pace of life rural areas such as ours can offer. We feel strongly about our environment and the natural world and are more than aware of the damage carbon emissions can cause. In these times of change, surely a major environmental upheaval which will threaten habitats and uproot valuable members of society is NOT a priority. Please re-think!</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1121	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions.</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1122	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway</p>

	<p>Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1123	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1124	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. 1147	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing.</p>

	<p>This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: If the road infrastructure is to be improved it should be for the benefit of cycling and other self powered means, we cannot build our way out of the Climate Change Emergency. All short distance travel should be made by means other than car, to do this road travel by cycling should be made easier. To rectify the imbalance of spending favouring cars over bicycle for the previous decades, all infrastructure spend should be on cycle, bus and rail networks and not roads for cars, when it becomes quicker to travel on foot or by bicycle as in many European cities, people will cycle walk or take the train as in London. As cars change to electric the source of tax revenue that is the taxes on diesel and petrol will dry up. The government needs to tax all air travel. The vested interest that is Cardiff airport should be removed from the decision makers behind this scheme.</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1148	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored.</p> <p>My further personal comments are: I have lived here for ***** years and according to the plans for the road whichever the way taken my home will be demolished I am over **** of age love the place I live and do not want the environment to be destroyed. Once a road is built it will never be inbuilt the damage is permanent. Increased speed increases climate damage at a time when we are needing to reduce the damage to the environment. The road will increase the speed of the road allowing the road user to arrive x number of minutes earlier . It would appear to be a very expensive and destructive way to save a bit of time. How many people involved in the decision have spent any time in pendoylan and the area and really understand the destruction they are planning. A small village and the locality does not have the same power as the large road builders who are wanting the job. Once the damage is done it cannot be undone . If a grass field is ploughed up it can in the future be put back to grass but if a field has a road built on it it's gone forever. For the sake of the climate and the future damage to the environment please reconsider the real need and balance the slight need to the permanent damage to the environment and the climate.</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1174	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway</p>

	<p>Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., Wales has declared a CLIMATE EMERGENCY. 1178	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases.,</p>

	<p>The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process. Kind Regards</p>

Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS.</p> <p>My further personal comments are: This is a disgraceful proposition that goes against all of the Climate Change and Future generation of Wales Act principles. The business case is outdated based on businesses that no longer plan to be in that area. Following Brexit it is highly likely that even more businesses will choose to remove themselves and so there would be even less traffic. The money should be spent on improving public transport from deprived areas where they are unlikely to even own a car. This will help people travel for work in a sustainable and ecological way.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

1201	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing.</p>

	<p>This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 ., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS.</p> <p>My further personal comments are: Huge implications for local communities and wildlife in this area. More and more road building is not the way forward with the climate emergency we are facing. The proposed road would affect me personally as the ground I rent is below the road. The runoff of water would affect the SSSI and increase the flooding which is already an issue. It would also block off the access for walkers and horse riders to the off road riding in Henson forestry.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 ., The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting.</p>

	<p>My further personal comments are: This whole project has been so badly handled by VOG officers and is a shameful waste of money. . 1.The WelTAG process has been manipulated -eg groups considered stakeholders and invited to comment on the proposal by the council predominantly include transport groups with little inclusion of residents, environmental, leisure or health groups. A clear attempt at skewing consultation results. 2. Out of date data eg 2006 flood maps, have been used to influence the choice of routes proposed 3.Deliberate exclusion of any expert environmental assessment on the proposal to influence the decision makers. 4.Bulldozing through limited shambolic public communication which has been really badly mismanaged to exclude anyone unable to use a computer eg many elderly and disabled. 5. Refusal to extend consultation during a lockdown when the public response council phone line is unanswered. An investigation should be launched into the management of this project.</p> <p>Please add my objections to your feedback process. Kind Regards</p>
1206	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. 1207	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 ., The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., Your new proposals intend to block off country lanes that</p>

	<p>will divide communities.</p> <p>My further personal comments are: The original reasons for building the road have not been revisited since the Covid pandemic hit. Far fewer people will now travel by air, and the alleged need for this road to ease access to Rhosneigr airport no longer applies to the same extent. Fewer car journeys will be made in the future. The route will destroy areas of outstanding beauty and biodiversity - we owe it to our children to protect these precious resources. Please reconsider your plans in the light of the significant change in circumstances since this proposal was first conceived.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

1226	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI.</p> <p>My further personal comments are: An improved road to Barry or the airport is not necessary. The link road from the M4 to Culverhouse Cross was built for access to the airport. There is too much traffic using these lanes as a short cut if</p>

	<p>there is an incident on the motorway or link road, which happens frequently. Sadly the people who use this road as a short cut do not have reverse gears installed in their vehicles and cannot drive near a hedge and have never been taught to wait in a passing space. There will be more incidents if a new road is built which will affect the emergency services. A new road built on stilts will be totally unnecessary and cause a total blot on the landscape that is currently beautiful. Any areas under a road on stilts will be filled with litter and fly tipping. Widen the road in some areas if necessary, but no need to build a new road. And I am not a homeowner concerned about the value of my home, I just want to enjoy the wonderful natural countryside I have grown up in.</p> <p>Please add my objections to your feedback process. Kind Regards</p>

1254	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process.</p> <p>Kind Regards</p>

The Well Being of Future Generations Act Wales 2015 is being ignored., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS.</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process.</p> <p>Kind Regards</p>
1281	<p>Transport Study M4 Junction 34 to A48 @</p> <p>Dear Vale of Glamorgan Council,</p> <p>I Strongly Disagree and Object to the building of a Highway Route East of Pendoylan, or a Highway Route West of Pendoylan, or the Online Enhancements you are proposing. This transport study should be stopped and scrapped immediately.</p> <p>My objections are: The consultation is flawed. The correct WelTAG process has not been followed. The Well Being of Future Generations Act Wales 2015 is being ignored., Wales has declared a CLIMATE EMERGENCY. Building a road is not the solution to reducing car dependency, air pollution and green house gases., The strategic argument for a 'Case for Change' is outdated, has not been revisited and uses inaccurate forecasting., The road would destroy Ancient Woodland, bio-diversity and the Ely Valley SSSI., The under-estimated road cost of up to £77million can be better spent on improving public transport or the NHS., The A48 junction at Sycamore Cross is already congested. Building a road that could add 1000 vehicles per hour to the junction will create greater congestion and CO2 emissions., Your new proposals intend to block off country lanes that will divide communities., The proposal blocks recreational routes used by walkers, cyclists and horse riders. This is contrary to Design Guidance stated in the Active Travel (Wales) Act 2013 .</p> <p>My further personal comments are: [Not asked]</p> <p>Please add my objections to your feedback process.</p> <p>Kind Regards</p>
1282	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between</p>

	<p>Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p>

	<p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1294	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. 1306	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations</p>

	<p>Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a</p>

	<p>20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1319	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1331	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p>

	<p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new</p>

	<p>development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1344	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1356	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales</p>

	<p>and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1369	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1381	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the</p>

	<p>biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1394	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1406	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and</p>

	<p>deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1419	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p>

The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1431	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options</p>

	<p>would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1444	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p>

This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

1456	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. 1468	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p>

	<p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1481	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1493	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations</p>

	<p>Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a</p>

	<p>20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1506	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1518	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p>

	<p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new</p>

	<p>development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1531	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1543	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales</p>

	<p>and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1556	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1568	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the</p>

	<p>biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1581	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1593	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and</p>

	<p>deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1606	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p>

The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1618	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options</p>

	<p>would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1631	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p>

This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

1643	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. 1655	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p>

	<p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1668	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1680	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations</p>

	<p>Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a</p>

	<p>20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1693	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1705	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p>

	<p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new</p>

	<p>development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1718	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1730	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales</p>

	<p>and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1743	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1755	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the</p>

	<p>biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1768	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1780	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and</p>

	<p>deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1793	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p>

The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1805	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options</p>

	<p>would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
1818	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p>

This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>

1830	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. 1842	<p>Dear Vale of Glamorgan Council,</p> <p>I am deeply concerned for the ancient woods set to be impacted by the proposed link road between Junction 34 of the M4 and the A48 at Sycamore Cross.</p> <p>It is unacceptable that ancient woodlands are still threatened with destruction by this scheme. The original damaging route options – now known as Option A and B – are still on the table. Both options would fragment the landscape, impacting the connectivity and overall ecological integrity of the surrounding environment and affect the wildlife that lives in the surrounding ancient woods. The new options (C1 and C2) will also likely lead to loss of the ancient woodlands within close proximity.</p> <p>Ancient woodland cannot be recreated. Any impact from these proposals will be devastating and permanent. The council must seek to redesign any route options to ensure the avoidance of loss and deterioration of ancient woodland. I consider that there are no suitable compensation measures that can make up for the loss of this precious irreplaceable habitat. The impact on local biodiversity and ancient woodland impacts must not be trivialised in assessment of the proposed route options.</p> <p>The Welsh Government has committed to the protection of ancient woodland through Planning Policy Wales 10. It has also written the principle of maintaining the natural environment into law through the Well-being of Future Generations Act. The council should be seeking to conserve and enhance the biodiversity of the Vale. It should not be proposing destructive schemes where local people are asked to choose which precious ancient woods should be destroyed. Public authorities have a duty to maintain and enhance biodiversity, and in doing so promote the resilience of ecosystems in line with any new development. This is entrenched within Section 6 of the Environment (Wales) Act 2016.</p> <p>The Welsh Government has increasingly been outlining its new ambitions to reshape transport in Wales and move towards green transport options in an effort to tackle carbon emissions. With the Government recognising that current patterns of less commuting and more home working are likely to continue, the council must question the need for a new road scheme. The Well-being of Future Generations Commissioner's aspiration for Wales is for people to have their everyday needs within a 20-minute walk of their home, while the Deputy Minister for Economy and Transport has also stated that efforts must be made to encourage alternatives to car travel.</p> <p>Saving irreplaceable habitats is vital for people and wildlife – but especially so if they could be harmed for a road that may not be needed.</p> <p>I urge you to find a more appropriate solution that does not result in the loss of irreplaceable ancient woodlands. I reject all four highway options that you have put forward.</p> <p>I love coming to Wales and seeing the local environment. Please work with the Future Generations Commissioner and see that this road is neither needed, not suitable when carrying out One Planet thinking.</p> <p>Yours sincerely,</p>
