

Outcome Agreement 2013-2016 Vale of Glamorgan Council

Strategic theme: Growth and sustainable jobs	Vale of Glamorgan Council				
Broad Outcome: Supporting the Economy and Business	Outcome 1 Supporting the local economy				
Why are we focussing on this outcome? The Vale of Glamorgan exhibits considerable socio-economic and	What will success look like? Increased private sector investment.				
environmental diversity. The natural environment is of outstanding quality but the area displays characteristics similar to a major urban area by harbouring some of the most affluent and the most deprived locations within Wales, often located in close proximity. The range of assets, both physical and human is considerable. One focus of regeneration, therefore, should be securing the greatest return on this richness of diversity. This includes exploiting the Vale's coast and countryside with particular emphasis on tourism and visitor facilities as well as increasing footfall as a result of events. The diversity of the area provides challenges in providing a Vale of Glamorgan-wide synopsis of the socio-economic and environmental characteristics for the area. The area's disparity in affluence is reflected by the fact that whilst 10 of the 78 Lower Super Output Areas in the Vale of Glamorgan are in the 25% most deprived in Wales (predominantly in Barry), 41 of the 78 Lower Super Output Areas (over 50% of the Vale's population) are in the least 20%	f Increased confidence in those needing support in Increased visitor numbers . Increased footfall at organised events.			ne rural Vale.	
deprived areas in Wales.	Reporting2013-142014-15201year out-TargetsTargetsTarturnturnturnturnturn				
How much did we do?

Number of local individuals gaining training and employment through targeted recruitment and training in council construction projects		20 fte	24 fte	24 fte
Number of visitors to Council led or supported events		90,000	100 000	110 000
Is anyone better off?				
Community Strategy Priority Outcome 7 - The underlying causes				
of deprivation are tackled and the regeneration of the Vale				
continues, opportunities for individuals and businesses are				
developed and the quality of the built and natural environment is				
protected and enhanced. Quantitative evidence of the outcome				
achieved using tracking indicators from the Programme for				
Government and your single integrated plans				
Percentage of 16-18 year olds who are not in education employment or training (NEET)		4.3%	4.2%	4.1%
Number of visitors to the Vale of Glamorgan for tourism purposes ( as		3.2 Million	3.21 M	3.22M
measured by the STEAM survey)				
Story behind the data?	<ul> <li>The Council is a direct provider of a number of national programmes. It is a subcontractor delivering the Work</li> <li>Programme locally and is also the lead body for the delivery of Communities First in the new Barry Cluster, covering a third of the town. These programmes work side by side to provide considerable support to primarily long term unemployed individuals in the Barry and the across the Vale.</li> <li>Within the Vale, Barry suffers considerably more deprivation than the rest of the county. However, there are pockets of deprivation and issues of access to services in the rural Vale</li> </ul>			

which also need addressing, and a need to modernise the rural economy. The Council is the lead body for the delivery of the Wales Rural Development Plan locally in this respect.
Tourism is one of the most important contributors to employment and economic growth in the Vale, across the urban and rural areas. As such, much of our regeneration effort directly or indirectly contributes to tourism. The Council is committed to ensuring local people benefit from training and employment opportunities arising from local investment. This includes the Council contractually requiring construction companies delivering Council-funded capital projects to recruit and train unemployed local people on appropriate schemes.
However, measuring local impact on economic improvements can be very difficult. The national and indeed international economic direction of travel can dominate outcomes locally. Hence, this data is focussing on local contributions to improvement, and consequent direct benefits to local people.

Strategic theme: Education	Vale of Glamorgan Council

Percentage of pupil attendance in secondary schools		92.63%	93%	94%	
The percentage of young people formerly looked after with whom the authority is in contact, who are known to be engaged in education, training or employment at the age of 19		50%	52%	54%	
Story behind the data?	The council is developing the Engagement and Progression Framework which will encapsulate the NEET Strategy and the Youth Support Strategy to support the prevention of NEET. Youth support services will be directed to support schools with broader flexible curriculum of provision which will be used to engage young people in learning. Education services, training providers and youth support service will collaborate under the framework via a key worker network to broker for young people and to keep in touch with young people identified as at risk of becoming NEET. Data information sharing protocols will be developed to ensure services can track individual students and the council will work with Careers Wales to provide appropriate services for young people who drop out of EET. The council wil establish a responsible senior person to monitor and co-ordinat the E&PF.				
	Improving performance in Key Stage 3 is a priority. Improving the number of pupils who achieve the expected level in be English and Maths separately, and in combination, is a prerequisite to good achievement in the Level 2+ in Key S (L2+ equates to 5 GCSEs which must include English and Mathematics in combination). Implementation of the Key 3 Improvement Strategy, coupled with targeted support for identified schools is anticipated to help further improve standards ahead.

Percentage of community supported clients receiving 20 or more hours		20	25	30
of care per week				
Story behind the data?	The number of older people living in the Vale of Glamorgan in predicted to continue to rise. By 2020 it is predicted that ther will be a 28% increase in the size of the population aged 65 years and over. In the same timescale the council will be expected to reduce its overall expenditure on services and social services is required to contribute to the overall reducti The council is already one of the lowest spenders per head of older peoples services of local authorities in Wales. The council has invested in reablement services to support people to remindependent in their own homes and their communities.			
	DFGs took 346 days to complete in 2012/13. The council is committed to reducing this further, as changes to a resident's home can ensure that less intensive care will be required, for longer periods.			

Strategic theme: Welsh homes/supporting people	Vale of Glamorgan Council			
Broad Outcome: Welsh Homes – Improving Quality	Outcome 4			
	Improving social housing			
Why are we focussing on this outcome? Work undertaken as part of the Welsh Housing Quality Standard (WHQS) will improve the quality of life of the tenants and the families living in Council owned homes, enhance the quality of the existing housing stock and enhance the appearance of the neighbourhood. In addition the investment will deliver wider community investment outcomes associated with training, employment and support local businesses.	undertaken and therefore the quality of their home Increased and more sustainable employment opportunities. Strategic theme: Environment and Sustainability/Rural Communities	Vale of Glamorgan Council
Broad Outcome: Living within environmental limits and acting on climate change	Outcome 5 Reducing landfill
<ul> <li>Why are we focussing on this outcome?</li> <li>Local authorities have historically relied on landfill to deal with municipal waste, but research shows that once recycling and composting targets are met, managing residual waste through landfill alone generates the highest carbon impact. Although this will meet Welsh Government and EU landfill diversion targets is unsustainable in terms of climate change and Welsh ecologic footprint reduction.</li> <li>The Vale of Glamorgan Council has therefore formed a partnership with Cardiff, Caerphilly, Monmouthshire and Newport Councils to procure a residual waste treatment facility to treat the residual waste higher up the waste hierarchy and avoid its landfill.</li> <li>The Vale of Glamorgan Council have also entered into a Partnership with Cardiff Council to procure anaerobic digestion (AD) of municipal food waste to meet Welsh Government policy on the most sustainable treatment method for organic food waste.</li> <li>The Welsh Government has set out the One Wales: One Planet: 'Towards Zero Waste Strategy' and supports regional waste</li> </ul>	Reducing landfillWhat will success look like?A major reduction in the proportion of waste sent to landfill; increasing waste recycling rates and reducing levels of residual waste with energy recovery (electricity and 
partnerships in Wales. By working together the project will achieve better value for the tax-payer by combining the remaining waste of five local authorities. The priority is to recycle and compost as much waste as possible to achieve the progressive Welsh Government recycling targets to 2025 and beyond.	Funds (£50K per year) will be set up to support local projects in the area; Net export of electricity and heat from renewable sources reducing the non renewal requirement of power generators;

By working in partnership with other local authorities, we will achieve economies of scale in procurement on contract agreement result in cost efficiencies and ensure that we comply with a sustainable and ecological advantageous solution.	220 workers on site during the construction stages, v 50% from the local area.			n stages, with

composted or treated biologically another way.					
Story behind the data?	<ul> <li>Prosiect Gwyrdd (Green Project) is a partnership between the Vale of Glamorgan, Caerphilly, Cardiff, Monmouthshire and Newport Councils. The project will deliver a regional solution to residual waste - the waste left over after practical recycling and composting has taken place.</li> <li>Local authorities have relied on landfill to deal with waste but research shows that once recycling and composting targets are met, managing residual waste through landfill alone generates the highest carbon impact.</li> </ul>				
		·			
	The Welsh Government has set out the <i>Towards Zero Waste</i> <i>Strategy</i> and supports regional waste partnerships in Wales. By working together the project will achieve better value for the tax-				
		payer by combining the remaining waste of the five local			
authorities. Each of the partners' priority is to r			priority is to recy	rcie and	

compost as much waste as possible to achieve the progressive Welsh Government recycling targets up until 2025 and beyond.
What we throw away costs us about £100 per tonne currently and costs of doing so are rising. We are encouraged to minimise the waste we produce and to recycle, but inevitably we will always have some waste left behind.
In Wales we have an estimated seven years of landfill space left, so we must look to embrace new technologies which in this case will create power and heat to supply to local homes and businesses.
The Vale of Glamorgan Council is also working in partnership with Cardiff Council to procure an anaerobic digestion facility. We currently use an in-vessel composting system. Anaerobic digestion is a natural process in which micro-organisms break down organic matter, in the absence of oxygen, into biogas. This gas is then captured and used to make electricity, heat/power and/or a soil improver.
