

Belle Vue Play Area

Proposed Play Area Improvements

Large timber climbing frame to be replaced with new play equipment

Huck Rota Net to be upgraded or potentially replaced.

Climbing wall removed and replaced with new.

Existing Picnic benches to be replaced with recycled plastic picnic benches

Small timber climbing frame to be replaced with new play equipment.

Retain existing dragon sculpture.

Retain and repaint existing swings.

Existing benches and recycle bin to be retained. Other open top bin to be replaced with new

What features would you like to see in the new play area ?

Notes

The Vale of Glamorgan Council has secured funding through Section 106 monies received by nearby new developments to improve public open space and recreational facilities in the area. Most of the existing play equipment at Belle Vue Park is deteriorating and will need replacing over the next few years. The Council therefore propose to upgrade the play area to ensure that it is a high quality facility for the community.

The Council invites local residents to provide their views to help develop proposals for this area. Questions to consider include:

- What type of equipment would you like to see here?
- Would you like to see steel or timber equipment?
- What age group should the equipment be aimed at?
- Is there a specific theme or design you would like to have for the play area?
- We are intending to replace the existing surfacing with wetpour. What kind of graphics would you like to see?

Are there any other improvements that you would like to see implemented here?
