Skills Offered	<p>Highly professional organisation offering people with a disability the opportunity to undertake vocational training with a view to employment.</p> <p>Vision 21 is a training organisation that provides nationally accredited vocational training, personal development and employment options for people with learning disabilities from the age of fourteen years. We have bases in Cardiff, Newport, Vale of Glamorgan, Caerphilly and Blaenau Gwent and have supported developments in Monmouth, Rhondda Cynon Taff, Ceredigion, Carmarthen, Port Talbot and Pembroke. Students can gain nationally accredited training in the vocational routes of their choice. The Vision 21 projects are all set up to provide realistic training for students in real work experience settings. Many of these projects are open to the general public and give the students the opportunity to practice all the skills needed to gain real paid employment. The projects are all run using the social enterprise model, and each project operates as a small business. The products made as part of the student training, be it food, wooden products, pottery, cards or plants, are all sold to generate income which in turn is fed back into the projects to make them as self-sustaining as possible.</p>
Age	14+
Cost	No
Tier	3
