	Something with the potential to harm: hazards listed should be all those present before controls are in place.	Where a group of people may be affected differently, for example young people or expectant mothers, identify the separate effects/harm and risk rating.	Indicate the rating prior to controls being in place. (See page 7 for guidance on rating the risk.)	Provide details of control measures already in place. If measures are detailed in other documents, state where.	Note the action required, responsible person and target date.	Indicate the rating following implementation of controls.
