

Aberthaw Tarmac Cement Works

We are keen to support local businesses and recently had the opportunity to visit Tarmac's Aberthaw Cement Works. It was a fascinating tour, providing a behind-the-scenes look at the cement production process. One of the highlights was being able to stand inside the furnace while it was undergoing maintenance.

We also learned about Tarmac's commitment to sustainability, including its use of waste-derived fuels such as end-of-life tyres and certain plastic waste materials.

Beyond its operations, Tarmac actively supports local organisations and community projects through donations and partnerships. Their funding focuses on initiatives that promote education and skills development, environmental improvement, sustainability, restoration, and biodiversity.

If your organisation or community initiative could benefit from support, please contact Tarmac for more information at aberthaw.feedback@tarmac.com
