

Employing Disabled People in Wales:

A Networking and Discussion Event

Disabled and chronically ill people in Wales are *disproportionately* more likely to be unemployed. **We think Wales' businesses could change this for the better.**

Small and medium-sized businesses play a vital role in the Welsh economy, but many face challenges when it comes to recruiting, supporting and retaining disabled and chronically ill staff. **Rather than telling businesses what they 'should' do, we want to learn from employers about the barriers they face and the changes that would make inclusive hiring and staff retention more realistic.**

This event brings together Welsh business leaders and employers to talk about the challenges and opportunities involved in employing disabled and chronically ill people.
