Subject :- Application for disabled parking Ref. IF849.

Dear Sir, I wish to raise an objection to the proposed disabled parking plan mentioned above. Parking in this area is at a premium and many residences have blue badge parking permits, (myself included) but do not apply for special parking privileges, but are quite happy to live in harmony with one another where parking is concerned, which has been the case for many years. Yet this application for parking privileges outside of number 134 doesn't seam right when at the rear of this property there is road access to a hard stand and partially built garage (which has been in an unfinished state for at least 18 years, **but still useable**) which in all this time has never been used for the purpose of parking. Numerous times it has been suggested to the owners to complete the work on their garage by myself and several other neighbours but to no avail. The owners of this proper have raised many objections over the years to people parking outside their property, that they consider being part of their property and I see this application as a way of forcing their own will on this matter. They only have the one car, so why they don't use the rear parking area they have bemuses me !! In short why should they have special parking privlages when there is already private parking unused at the rear of the property.

Yours Sincerely

Ref No.IF849

Dear Sir

I wish to object to the planning application for a parking bay outside no. 134 as they already have planning for a garage/hard standing which is partly built at the rear of the property

Yours faithfully

To whom It may concern,

I am writing to you objecting to the application for disabled parking at 134 Tenner Rd, Barry. Ref IF 849.
The road is generally busy but as a family they are healthy disable. An Autistic Son who is very able bodied and walks plenty of places. The husband has suffered cancer but surely he isn't physically disabled? They also have a garage shell to the rear.
They seem not to park on opposite side of Tenner rd due to problems with people that side even though there are spaces over there.

Yours faith faithly

Smith, Wendy

Good Afternoon, FAO Miles Punter

I would like to log my objection to a disabled parking space due to be added to my neighbours property.

This property is 134 Jenner road

Ref IF849.

My address is   Jenner road.

My objection is that I really don't see the need for this space as we all park very considerately in this street I am yet to see an occasion when they couldn't park outside their house and actually I was so surprised I have monitored the parking since this notice went up. I have attached various photos of different times of the day and parking hasn't been a problem. I feel allowing a 6.6 m parking space will only exacerbate parking problems for us, most of us run small cars two of which can fit outside each house if parked properly so this will take a space away from the other neighbours.

We also have parking at the back of our houses that is usually available. The property in question also has a hard stand at the back (I have attached a photo) surely this is the obvious solution for the parking problem they feel they have.

I feel this space has been applied for purely because the owners seem to require a lot of space in front and behind their car and unfortunately leaving on a busy road you have to be able to park well and with consideration. Several neighbours have disabled badges but have never applied for a space as there is no need.

Best regards
